PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.—By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet*, *British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser*.

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—PUNCTUAL ATTENDANCE EVERY THURSDAY AT 4 HIGH STREET, ALDERSHOT, FROM 11 TILL 5.

ZOEDONE. — OHNE PHOSPHOR,

KEIN GEDANKE.—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases.

A small extra charge in smaller cases. See Pamphlet.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 10s. 4d. per annum; viâ *Brindisi, £1 14s. 8d.*

THE more that is known about the Patriotic Fund, and the greater the consideration given to this important subject, the clearer becomes the conviction that a thorough investigation, and, as we believe, a complete reform, are indispensable. Originally, the Royal Patriotic Fund was directly managed by a Royal Commission, and as long as the Prince Consort was president, the management was efficient. At present, the Royal Commission consists of 27 members, among whom are the Duke of Cambridge, Mr. Gladstone, Lord Beaconsfield, and the Lord Mayor. In 1867 the Patriotic Fund Act was passed, and one of its provisions was that, while retaining the general responsibility of the Royal Commission, an executive committee should be appointed from among its members to look after the carrying-out of details. Of these members of the committee two form a quorum, and can, practically, exercise all the powers of the full committee and the Commission. That few of the executive committee should devote much time to the Fund is not surprising, when we consider its composition and the amount of other work that most of the members have on their hands. They are fourteen in number, are distinguished officers of the Army and Navy, a former tutor of the Prince of Wales, and two eminent civil servants. The average age of the fourteen members is 70½ years, the youngest being 59, and the eldest 83. It is absurd to suppose that such a committee can be very "executive," and as a matter of fact, some of the most important functions are discharged by the secretary. For example, it is he who selects the recipients of the Fund's bounty. This power seems to have been so exercised, that in several instances, three, four, and even five children of one family have been admitted into the schools. The original capital of £140,860 has dwindled down to £60,200, and an income of £50,000 to one of a little over £20,000. In fairness, however, there must be added to the capital the value of the Royal Patriotic Schools, which originally cost nearly £280,000, though what their selling value now would be we cannot tell. It appears, from the evidence of witnesses examined by a sub-committee in 1879, that the number of pupils is 250 less than the accommodation, and that there was extravagance in the management. The cost of management of the Fund proper during 1877 and 1878 averaged £3,637. Office salaries were £2,082; stationery, postage, travelling expenses, and inspectors' salaries, £336; miscellaneous, £581 in 1877, and £239 in 1878; and per-centages and postage for Staff Officers of Pensioners, about £800. The £2,082 for office expenses are thus accounted for:—Honorary secretary, £600; assistant-secretary and accountant, £400; clerks, office-keepers, and other subordinates, £1,082. The work of this numerous and highly-paid staff is simply the keeping of accounts and the disbursing the pensions of some 2,700 widows. Under the latter head must also be charged about £800 a year additional, given in per-centages to the Staff Officers of Pensioners and their serjeants, who actually pay over the cash of the recipients. With regard to this, we may observe that, for paying Government pensions, the Staff Officers of Pensioners are allowed 1s. 4d. per head per annum. If he pays 60 pensioners in the course of the year, he gets £4 for his trouble. From the Patriotic Fund he receives 2½ per cent. and his serjeant ½ per cent. on all money distributed. For example, if £670 were distributed among 60 pensioners, he and his serjeant would receive £21 16s. for the same amount of labour for which the Government only pays £4. To pay an *honorary* secretary £600 a year, though he is assisted by an assistant-secretary at £400 a year, and an ample number of clerks, strikes one as anything but economical, especially as the honorary secretary has been for the last twelve years in the receipt of a pension of £300 a year as a reward for 13½ years' service at £600 a year. Had he been in the Civil Service, he would have received a pension of only £130 a year. The administration of the Royal Patriotic Fund, with a capital of £602,000, costs £3,627 per annum; while Lloyd's Patriotic Fund expends less than £600 a year for the management of £200,000. We think that the above facts will convince those least given to find fault with existing arrangements that a searching investigation into the affairs and management of the Royal Patriotic Fund is imperatively needed. We regret to find that although the Government have admitted that reform is necessary, they have merely proposed that two Government officials should be added to the Executive Committee. This is much to be regretted, for an independent and searching investigation is the only thing which will give confidence to the public. We should like to see a Committee selected to administer all money subscribed for the benefit of the Army and Navy. The Committee would then become a central Military and Naval organisation, for the relief of all temporary or permanent distress among soldiers, sailors, and their families. It might be arranged that they should exercise a general supervision over every charity of the sort, and the consolidation of management would secure a substantial economy. Means ought also to be taken to secure a regular influx of subscriptions, instead of relying solely on some sensational event, such as the loss of the *Atalanta*, or the disaster of Isandlwana, for a spasmodic burst of generosity. Till the public feel assured that they are handing over their money to intelligent and economical trustees, they will prefer forming their own occasional committees, and substituting an occasional rush for a steady flow of generosity.

Long have the Lieutenants of the Royal Navy waited for that "something" to be done for them which the late First Lord of the Admiralty promised, or said he hoped to do. Again and again has the question been brought forward, with no result but its being "considered." And now, at the close of the present Session, Vice-Admiral Sir John Hay has once more called attention to the matter, and has been told that the case of the Lieutenants will be considered during the Recess. The idea of giving these officers some outlet, by increasing the Commanders' List, or, still better, by adding generally to the senior Lists, does not meet with favour; and Mr. Smith, who, doubtless, did look into the subject, but dropped it, as being a difficult one to deal with, adds his voice to that of Mr. Lefevre in damping the hopes of Lieutenants as regards more rapid promotion, and advocates the greatest caution in considering any increase of the senior Lists. It is alleged that the block in promotion has been caused by the number of naval cadets entered in past years; and how vast that block would have been had not the retirement scheme for Lieutenants become law may be imagined, seeing that the possibilities of outlet, namely, the complements of the whole of the senior lists, have been also reduced. To get over the difficulty with the Sub-Lieutenants, who were positively threatening to become grey in the junior rank, like the Assistant-Paymasters, the Lieutenants' List was increased, but there seems to be no intention of carrying that remedy for a block into higher grades. In the case of the junior officers it began to look very serious indeed, and as though some might reach the age for compulsory retirement, without having attained the rank of Lieutenant, had the rules then existent been adhered to. So after much persuasion the Treasury consented to approve of the proposal of the late Admiralty Board that the list of Lieutenants should be increased to 1,000. Mr. Childers, when First Lord of the Admiralty, fondly believed that 600 Lieutenants would be sufficient to relieve the Sub-Lieutenants' List in proper course, but as he cut down the numbers of all the senior Lists, the Lieutenants could not get promotion themselves, and therefore could not make room for their juniors. Thus it happened that an addition of 400 Lieutenants was made to that List, and now Mr. Smith states that, in his opinion, that number is not one too many for the requirements of the Fleet. A glance at the List will show that nearly the whole of them, except the most junior, are now in employment; and if that be so with a Fleet on a peace footing, it is plain that we have no great margin for expansion in time of war. But it is quite a question whether this same want of expansion would not be felt in the senior grades, in which case, we presume, there would be a general promotion among the officers on the Active List, and Retired Lieutenants and Commanders would be called in to resume their old places on their lists; and so long as a fair proportion of young officers go to the Retired Lists, the Admiralty will be able to comfort themselves with the knowledge that there is at hand a reserve upon which they can call in an emergency. There is one thing which Lieutenants must look boldly in the face, namely, that it is an utter impossibility that they can all be promoted. The fact that for the past few years Lieutenants have been coming on that List just four times as quickly as they have gone off by promotion speaks for itself, and neither death nor voluntary retirement is equal to remove the surplus. There must, therefore, be a large number of Lieutenants of each year who must make up their minds that their hopes of advancement to the higher grades of the Service will never be realised, and if they remain on the List hoping and hoping, then there is nothing before them but retirement at the compulsory age, after having wound up a not too successful career in command of some Coastguard Division. If they were more rapidly advanced, the block would only be transferred to the Commanders' List, and instead of getting employment, they would then remain for years on a miserable rate of half-pay, and would not add much to their retirement; while on the other hand, they would probably quit the Service at a more advanced age, and with less prospect of being able to get any employment on shore. The Navy, as a profession, is, we fear, under the existing order of things, to be classed rather as a failure for the majority who have entered with the idea of devoting their lives to it and reaching the highest grades. Successive Boards have endeavoured to grapple with the difficulty of blocks. Mr. Childers took the question in hand in the boldest manner; but the best thing he could offer was a good retirement, so as to get the block temporarily cleared. Others have followed in his steps, and special inducements to leave the Service have been held out from time to time to officers, so that a temporary flow of promotion might be obtained; but that "steady flow," which the Navy was promised, has never come, and is to-day as far distant as ever. That being so, we can see but one way of smoothing the difficulty, and that is, try increasing the pay of Lieutenants after they shall have obtained a certain seniority, instead of making their pay so entirely dependent upon that promotion which, however deserving they may be, they cannot obtain.

The Tower, and the Park Guns, and Waterloo Banquets, ought to remind us that we are as fond as our neighbours of keeping great Naval and Military anniversaries, and to teach us to govern ourselves in our criticisms on foreign nations accordingly. A sensitive Frenchman can scarcely walk through any English town without being reminded of the misfortunes of his country in the days of the Republic and First Empire, by endless repetitions of Waterloo Places, Nelson and Wellington Streets, and Trafalgar Squares; and the Waterloo Banquet was an annual event as long as there were hosts and guests to keep it up. It is not astonishing that the Germans should make much of September 1—the day of Sedan—the day which saw the realisation of the dreams of poet and patriot from the Rhine to the Elbe, in a united, victorious Fatherland. When journalists and others assure us that Candahar bars the route to India from Herat, or that Herat itself, in British hands, would secure either Candahar or India, they may be asked to consider what happened at Metz and Strasbourg, and the reduction of all the strong places, from the Rhine to Paris, in 1870-71. With delicate consideration for the feelings of our gallant neighbours, there was not any active participation of British officers in the anniversary of Sedan rejoicings, and the intelligent observations of such excellent critics as the Duke of Cambridge, the Duke of Connaught, Sir Garnet Wolseley, and the representatives of the various arms of our Service attached to their suites, will be concentrated on the actual manœuvres of the troops collected in the vicinity of Berlin. It will be of great service to an officer like Sir Garnet Wolseley, who may be called upon to take command of a British contingent some fine day, to see what a European Army is like, and to compare it with the composite forces he has had experience of since he attained field rank in India, China, West and South Africa; and the Duke of Connaught will have additional instruction in the profession which he studies theoretically with such diligence and success, in the hope, no doubt, that he would, some time or other, be enabled to turn it to account in actual service. The Duke of Cambridge is thoroughly acquainted with the German system, but, if we are not misinformed, his Royal Highness will have occasion to observe that there has been great progress made in the tactical instruction of the troops, and that the Military cabinet has been indefatigable in preparing the German Army for any test to which it can be subjected. A little inquiry will convince any of these officers who need it that the attempt to apply the German territorial short-service system to the British Army, one-half at least of which must serve abroad, can only lead to failure. British officers could teach German officers a great deal in the manner of fitting out an expedition, and of providing transport in foreign countries; and the latter would be very much at sea in more senses than one if they were called upon to send 30,000 men to India or China, and keep them there. It seems that a good deal of discussion, which means difference of opinion, goes on respecting the way in which the autumn manœuvres of these great foreign armies should be conducted. Some ardent reformers, contending that the utility of the manœuvres is minimised by adherence to a programme which predestines every day's result, and others insisting on the many inconveniences of allowing full scope to the opposing Generals and the impossibility of imitating in peace all the accidents of war, and of providing adequately for the transport of rations, stores, &c., without fixed rendezvous for train and commissariat. We think that an intelligent umpire staff would do a great deal in the way of promoting more elastic movements, and in giving corps commanders greater power of initiative, but it is certain that no system can be devised which shall lead to the results which follow a battle in earnest, and that the task of umpires will always be thankless and difficult. It should be remembered that these peace manœuvres are tests of tactical dispositions, not of strategical ability. In reference to the Isandhlwana controversy, which has been so unprofitably renewed, a foreign military critic remarks that any German general, who acted at a peace manœuvre as the English commander did in the presence of an enemy, would find that he was passed over in the selection of officers for a command in war, as no excuse he could make would be accepted as a justification for his neglect of the precautions which must have ensured his discovering the presence of the enemy within a short march of his camp, and have prevented the division of his force which led to such a terrible disaster. Durnford's Native Cavalry should have been in the front, instead of being left in the rear. To a German general, a surprise is the greatest disgrace, short of defeat, which can happen; and we observe that a critic in the *Wochenblatt* lays great stress on the unaccountable behaviour of the Staff officer who ordered back Harness and his guns when he had turned. There will be many opportunities afforded to our officers of marking defects and lapses in the German manœuvres. They will probably find the Artillery far less smart, and the Cavalry infinitely less bright in buckle and steel and leather than our own; they may see here and there unsized companies, and detect irregularity of various kinds in the line of march or operation; but they should remember that during the great war in France, no German detachment was ever surprised but one, and that was attacked under very peculiar circumstances, which did not, however, save the survivors from severe censure and actual punishment.

The *Bacchante* is to be reported ready for sea at the end of next week, and it is intended that she shall then proceed on a short cruise, with Princes Albert Victor and George of Wales, calling in at Vigo, where she will await the arrival of the new detached squadron.

The Royal yacht *Victoria and Albert* is to proceed to Flushing on September 13, to embark the Grand Duke of Hesse-Darmstadt and family for passage to England.

Directions have been received at Portsmouth for the Royal yacht *Osborne* to be held in readiness for sea, she being required, it is said, to embark the Princess of Wales for passage to the Continent.

Vice-Admiral Sir L. M'Clintock left Halifax last week on a cruise to Quebec, where he was to arrive on Wednesday last, leaving again on September 9, arriving at St. John's, N.B., on the 16th, leaving on the 20th, and returning to Halifax on September 26.

Captain John D'Arcy, of the *Shannon*, and Captain Medlycott, of the *Turquoise*, have been called upon to report whether it is true, as alleged, that the British flag was used by them to afford protection to foreigners rather than for the benefit of British subjects, during the recent scare at Callao. It is stated that even English women were refused a refuge on board these English ships-of-war when their lives were in some danger, and while room was provided for foreign residents who desired to quit the place. We feel confident that the officers named will have a good answer to make to this allegation, and will be able to show that their courtesy to foreigners in distress has not been exercised at the expense of their fellow-subjects.

The unfortunate *Shannon* is still detained on the Pacific station, although it was believed some time ago that she would be ordered to return to England to pay off. What good she is doing may well be asked, for as we stated some weeks ago, her engines are in a bad condition, her zinc sheathing is peeling, and she is unfit for real active service. The health of both officers and men is anything but satisfactory, and the sooner the ship is ordered home the better. She has been commissioned over three years, and has served in all parts of the world.

It having come to the notice of the Admiralty that some instances have occurred of smoking in officers' mess places, without any special authority for so doing, their Lordships have directed this custom to be discontinued. Arrangements are to be made in each ship that a suitable position shall be appropriated for the officers to smoke in during the recognised hours for "that indulgence," but such smoking accommodation is not to be either in the officers' mess places or cabins.

Another revised Circular on the navigation and pilotage duties of the Fleet is about to be issued. This will be the third or fourth revision which has been found necessary since the original idea was promulgated.

The following officers' deaths have been reported to the Admiralty since July 20:—Vice-Admiral Rowley Lambert, C.B.; Lieutenants A. K. Woodrow and John B. Bennett; Assistant-Paymaster Edgar Radford. The following removals from the Active List have also taken place since the same date:—Midshipman F. Crookshank (withdrawn); R. M. J. Rowley, Percy Smith, O. W. Carey, and H. K. Warrand, Naval cadets (failed to pass out of the *Britannia*); Boatswain D. Driscoll (deprived of acting warrant); Chief Gunners Josiah Hunt, W. Simmonds, Robert Coates, James Furze; Boatswain J. M'Leod; Chief Carpenter W. Armstrong, and Carpenter David Tiddy, all pensioned.

By the last mail from the West Coast of Africa, it would appear that we are likely to be involved in another little difficulty with the natives. Nothing has yet been done in the way of obtaining satisfaction for the plundering of the British trader *Cypriote*, and orders are said to have been given for the *Dido* to blockade the Brass River. This is very unsatisfactory work for the Navy, and having in remembrance the failure which attended our efforts to bring the King of Dahomey to terms by the blockade of his coast, we may well wonder whether the game is worth the candle.

We called attention some time since to the retention of the officers and crew of the *London* at Zanzibar beyond the time for which they were appointed, and alluded to the trying nature of their duties and the extreme monotony of the station as a reason for their speedy relief. That relief has now been carried out, and we are glad to hear that their Lordships have given orders for the men to be granted an additional fourteen days on arrival in England. That the *London* has done good service the present slackness of the slave trade will testify, and even with the reduced chances of effecting capture a reference to the name of the ship under another column will prove that her boats have not been idle. A distribution of bounty for the capture of dhows and liberation of slaves was begun at the Admiralty yesterday.

Rear-Admiral Leveson Somerset has struck his flag on board the *Agincourt*, and has proceeded on a fortnight's leave of absence. We trust that the complaints which have reached us as to the want of consideration shown for the convenience and comfort of the officers of this flag-ship with respect to their leave may cease, now that the Admiral has himself proceeded on leave.

The late Dr. Murdoch, R.N., having practised for many years in the village of Ratcliffe, Nottinghamshire, before being appointed to the ill-fated *Eurydice*, in which ship he lost his life, a few friends have erected a handsome mural tablet in the parish church, as a mark of the esteem in which the deceased was held throughout the neighbourhood.

It is with regret that we hear of the death of Mr. Alexander Scott, late of the Accountant-General's Department at the Admiralty, whose great kindness to naval officers in his capacity as head of the Full and Half-pay Department must be known to many.

It is stated that the authorities at the Admiralty attach but little importance to the report from Flores of the washing ashore of a large piece of wreckage having gun-ports. We hope, however, that Lloyd's agent may be asked for a detailed report of the nature of the wreckage, for should it be traced to the *Atalanta*, it would show that the vessel had broken up, and would throw doubt on the more generally accepted idea that she had simply foundered or had been capsized.

The *Atalanta* Fête at Kensington House resulted, we are glad to learn, in a profit of over £300, which will be handed over to the Mansion-House Fund.

The Lords of the Admiralty will not make their official inspection of the dockyards at Pembroke, Devonport, or Queenstown until the rising of Parliament, and will thus be later than usual in their visits to the ports. Chatham and Sheerness were sufficiently near London to admit of the Board making the annual visit in August, and Portsmouth will be visited by the Board on Monday.

Paymaster John Bremner, R.N., has been granted twelve weeks' leave on full pay, in consideration of his eight years' service at Hong Kong, where he was employed as naval and victualling storekeeper.

Rear-Admiral the Hon. William Ward is on passage home from Port Royal, having left, on promotion, by the mail of the 25th ult.

Mr. Walmsley Dangerfield, retired assistant-paymaster, R.N., has been selected by the Indian Government for the appointment of Agent for Government Consignments at Calcutta.

The decision to recommission the *Achilles* after orders had been given for her to be dismantled and paid off, was arrived at under the idea that such a course would be more truly economical than ordering her to be laid up in reserve. Had she been allowed to lie idle for some time, deterioration, however slight, would have made her less available for a fresh commission than she is at this moment fit for a recommission. Her boilers have been reported as being in very fair condition, having been new a little more than three years ago. Her refit at that time for hull and machinery cost just £60,000, and as she did not go to sea until July, 1877, it has been thought advisable to try and run her for a second commission from September 1. The only approach to folly about this proceeding is, that the Board should not have arrived at this decision earlier, but should have caused a very considerable waste of money both in labour and material, in permitting the original orders for her paying-off to be issued without a word as to her recommission. As a result, the ship was nearly dismantled, quite unnecessarily.

The pleasure of the *Vulture's* crew at coming home will be augmented by the intelligence that preparations are now being made for the distribution of the amount awarded to the officers and crew of this ship, for services against pirates on October 11, 1878.

For years the Editors of the *Navy List* have been under the impression that there is an order of which the distinctive letters are "C.O.I.," *vide* page viii. of the authorised publication, under the heading, "Honorary Distinctions!" It is intended that these letters after the name of an officer shall denote that he is a Companion of the Order of the Indian Empire, but as "C.I.E." is the recognised form everywhere else, it is rather confusing to set up the form "C.O.I." for the Navy alone. On the same principle, we might expect Naval Companions of the Order of the Bath to be distinguished by the letters "C.O.B."

The receipts of Naval prize bounty, salvage, and other moneys during the year ended March 31 last amounted to £58,780, but of this sum only £6,594 has been paid, leaving a balance of £52,186. A little more despatch in placing that balance in the hands of the rightful claimants would be appreciated.

The Civil Service Commissioners give notice that, with the consent of the Treasury, they have prescribed a fee of £1 to be paid by all candidates before they will be qualified to attend a preliminary examination for the rank of naval instructor in the Royal Navy.

That the gun question is an all-important one to the Navy is an undoubted fact, and if that Service has been inclined to feel dissatisfied at the guns with which her Majesty's Fleet has been supplied, it certainly has some cause. The late First Lord of the Admiralty would not have spoken as he did in Parliament on this question, had he not felt that the gravity of the case called for such a statement; and his words will, we trust, be borne in remembrance by those responsible for the armament of the Fleet. Mr. Smith has stated in the House that our ships are armed with guns "inferior both in range and penetration to the new guns adopted in the navies of other countries. It is, therefore, of vital importance that no time should be lost in furnishing our ships with such guns as would place them on an equality with the navies of other nations." For this utterance, Mr. Smith will receive the thanks of the Service, and such a statement, from one who has but recently vacated the office of First Lord of the Admiralty, needs no comment.

In recently forwarding a cheque for £10 towards the *Orpheus* Memorial Fund, now being raised by public subscription, Lord Northbrook informed Mr. Charles Brooke-Hunt, the originator of the scheme, that he had "much pleasure in contributing to the memorial, which you are so properly desirous to erect to the memory of Commodore Burnett and the officers and men whose conduct on the melancholy occasion reflected so much credit on H.M.'s Navy." Such an expression of sympathy, accompanied as it was by assistance to the fund, will, we feel sure, be appreciated by the Service.

Lieutenant Temple, R.N., read a paper before the Geographical Section of the British Association on Tuesday, on Nordenskjold's recent voyage in the *Vega*.

The services of Captain Dowding, R.M.L.I., in the late Zulu war, which gained for him special promotion to the rank of captain, have, we are glad to find, been further recognised by the award of a brevet majority, "in recognition of his services in the field in South Africa in the years 1877-8-9."

The slow progress being made in the trial of Serjeant Marshman, R.M.L.I., has, we are glad to find, drawn the attention of the public to the tediousness of trial by court-martial. A member has asked Mr. Childers if there is any probability of reform; but the only hope held out is that the matter is "under consideration." Should improvements be introduced into the form of trial by military courts-martial, we hope that the procedure of Naval courts will be modified, for, if possible, the courts afloat are even more leisurely in their proceedings than those of the sister-service.

At the request of the Admiralty, the Astronomer-Royal will dispense with the services of Major Tupman R.M.A. as early as possible, to allow him to return to his regimental duties. Major Tupman has been absent from his corps ever since he was selected to take part in the observation of the transit of Venus, for since the date of the transit, he has been engaged in assisting in working out the observations.

Captain John Robilliard, R.M.A., has been directed to be examined for appointment as adjutant in the Auxiliary Forces, for which post he is a candidate.

A telegram from Constantinople, dated Tuesday, states that Major-General Hamley, who has returned there, after having finished his labours in connection with the delimitation of the Russo-Turkish frontier in Asia, has forwarded maps of the territory in question to Earl Granville, together with a report upon the settlement of the Khotour question. We learn further that Baker Pasha has had an audience of the Sultan, at which his Majesty promised to examine his proposals for the projected reforms in Turkey in Asia. Major Trotter, R.E., has been summoned to Constantinople by Mr. Goschen, and has made a report to him upon the present state of affairs in Armenia. Captain Swaine, Military Attaché, has returned there, and has made a report to Mr. Goschen concerning the condition of Thessaly.

In the August number of the *Antiquary* there is an interesting paper on "Early Army Accounts," by Mr. Hubert Hall, founded on the records of the old Pipe Office and of the Audit Office, from the time of Henry VIII. to the reign of Victoria. It would appear that the Government in those days could raise a body of foreign arquebusiers, and lancers, and of English men-at-arms, and archers for foreign or home service; and Mr. Hall observes that the entries for the pay and victualling of garrisons on the Border, the Channel Islands, Ireland, and abroad, as well as in such places as Havre, Boulogne, and Calais, but it is noteworthy that in those days recourse was largely had to the aid of foreign mercenaries, and in 1550 or thereabouts 3,000 "Spaniards, Italians, and Albanians" were serving under foreign leaders in the garrisons and camps on the Scotch Border, at such places as Berwick, Newcastle, Warwick, and Holy Island, and that there were also a company of "almaynes," or Germans and "Iryshmen," on the same service. Contracts were made with foreign leaders or great nobles at home for raising troops for special occasions, and Ireland plays an important part in the history of these levyings to put down rebellion or maintain English supremacy. If the British private of to-day will compare his dietary with that of his predecessor serving in Ireland between 1598 and 1604, he will have reason to be thankful. The following was the ration of the Army in those days:—1 lb. of biscuit per diem, 1 lb. of cheese once a week, 1 lb. of butter once a week, 2 lbs. of pease or oatmeal or 1 lb. of rice a week, six to eight herrings or one ling or one and a half John Dory among five once a week, salt or fresh beef or pork, 1 lb. to 2 lbs. once a week. From 1688 to 1698, there were large bodies of foreign mercenaries in Ireland, including the brigades of Prince Frederick, Prince Christian, Prince George, the Finnish, Laland, Oldenburg, &c., regiments, and the Dutch Artillery train; and the old game of peculation and fraud seemed to have been played vigorously, and often successfully, in the victualling of the troops. Altogether, the paper, which is a mere abstract of facts, is of great interest, as we have said, to the military antiquarian.

The appointment of Assistant-Inspector of Warlike Stores at Mauritius is in the gift of the Horse Guards, Lieutenant J. V. V. Baker, R.A., having vacated the post, which he has held since March, 1877.

It is not quite evident how it is the Warrant of the Army Pay Department should hang fire in the matter of retirement of senior paymasters over sixty years of age. The Warrant (only $2\frac{1}{2}$ years old), it is true, gives the Secretary of State for War power to suspend the sixty-year limit in "special cases." All cases, however, can scarcely be considered "special," or the word has quite a new meaning to War-Office minds. To any ordinary person not educated up to this degree of refinement, the present state of affairs looks rather like breaking faith with the Department, and seems to point to a want of due and sympathetic representation of the rights of the officers at the War Office. There are, altogether, thirteen retirements overdue; any way, there are thirteen officers of the Department who have completed their sixtieth year. These are Majors J. P. Hall, H. J. Wahab, H. C. Watson, W. R. Wastell, R. Anderson, A. W. M'Kenzie, A. B. de Lasalle, H. Morgan, H. Manning, J. J. Bailey, T. R. Griffiths, W. Banbury, and A. F. Braham.

The "Powers that be" have at last recognised the fact that in a soldier's kit it is impossible always to combine the two desiderata, use and appearance,—*e.g.*, the new forage-cap and glengarry for officers. Why not, therefore, go a step farther to improve the uniform of the English Infantry, and restore the wings and epaulettes, not to be worn every day, but at balls, levées, and State parades? All other armies except ours wear that most handsome ornament, the epaulette, and its introduction into our Service would be hailed with immense satisfaction by all classes of officers.

The shield which Lady Frere, at the request of the ladies of the Cape Colony, presented to General Sir Evelyn Wood at Capetown, is a magnificent work of art, being a cast of the famous Milton Shield, the mould of which cost £10,000. The shield is executed in repoussé iron and silver, and the design illustrates the leading incidents of *Paradise Lost*. In the centre medallion, the angel Raphael recites the details of the "War in Heaven" to Adam and Eve in the Garden of Eden. In the panels to the left and right are depicted the rebellion and its consequences; in the former the Satanic hosts are advancing to the assault, and in the latter, hurled from Heaven by the victorious angels. Above each of these appear the Heavenly Hosts, either in array of battle or in attitudes of adoration and praise. The border is composed of symbolical figures, &c., typifying the elements in chaos—Time and Eternity. The Archangel Michael triumphing over the prostrate form of Satan, and figures symbolising Sin and Death, complete the lower portion of the shield. The Milton Shield is one of the grandest works of its class produced in any age or country. In conception it is admirable, and in execution perfect. The shield has a perfect ground of black ebony, and on it, in addition to the shield, are six medallions which record the most important engagements in which General Sir Evelyn Wood has taken part. They are "Ashantee, 1873-4," "Essaman Prah," "Ordashu, 1873-4," "Coomassie," "Sevonge Jungle, 1859-60," "Rajghur Scindwaho, 1852," "Naval Brigade, 1854-5." Below the shield on a silver plate is the following inscription:—"Presented to Brigadier-General Sir Evelyn Wood, V.C., C.B., by the ladies of the Cape Colony, in recognition of his gallant services during the Kaffir and Zulu wars of 1878 and 1879."

Mr. Parnell, with cynical audacity, asked Mr. Childers if his attention had been called to a speech made by General Pakenham to the Marines when the latter embarked for Ireland. Mr. Childers showed a nervous anxiety to conciliate the loyal Mr. Parnell, and said that the Duke of Cambridge had written to General Pakenham, disapproving of the language used, and that he himself approved of the course taken by the Commander-in-Chief. We strongly suspect that Mr. Childers's kind approval of his Royal Highness's action in a matter of quasi-military discipline is to be accounted for by the fact that he induced the Duke to write the letter above mentioned. But let us see what was General Pakenham's offence. He said, it appears, that the disturbances in Ireland were chiefly owing to the conduct of certain unprincipled agitators. Well, is not every word true? Did not, in fact, General Pakenham express himself rather too mildly? Was he not quite right to stimulate the loyalty of the Marines, by holding up to well-merited contempt the cowardly and unprincipled conduct of a set of knaves who have succeeded in rendering life and property insecure in Ireland, and are doing their best to rob one class—a respectable one—for the benefit of another which is utterly disreputable?

We are glad to learn that the Secretary of State for War, on the recommendation of H.R.H. the Commander-in-Chief, has made the appointment of Major Savory as adjutant of the Royal London Militia permanent. This is a very graceful and proper recognition of the services of a most excellent officer. Major Savory served in the 90th Light Infantry during the Indian Mutiny, including the several actions which resulted in the relief of the garrison of the Residency of Lucknow. He was also present at the siege and capture of the city by Lord Clyde. In the Oude campaign of 1858, served as Staff officer to Colonel Smith's column. From 1861 to 1863 he was aide-de-camp to Major-General Brown, and afterwards acted as military secretary to that officer when appointed commander of the forces in China and Japan. He is in possession of the Indian war medal (with two clasps), has an extra year's service for the defence of the Residency, and is in receipt of a life pension for wounds received at the defence of Lucknow. In 1871, having retired from the Service, he was appointed adjutant to the Royal London Militia, which regiment has, mainly owing to his unremitting exertions, attained to a very high degree of efficiency.

How is it that two out of the four Horse Artillery commands in India have remained vacant so long? The regimental monthly list shows Colonel Saunders and Colonel Greene as on the Indian Establishment, and has done so for a long time. If they, like a certain minstrel troupe, "never perform out of England," surely many of the junior regimental colonels now without employment would be only too happy to assume these generally much coveted and highly remunerative commands?

It will be seen from our advertisement columns that the dinner in commemoration of the entry into Lucknow of the force under Generals Havelock and Outram, will take place on Saturday, the 25th inst., at the Albion Hotel, Aldersgate Street, E.C., at eight o'clock.

"Purchase Subaltern," in our issue of the 21st ult., drew attention to a grievance, which would seem to call for the consideration of the Secretary of State for War. As our correspondent pointed out, each combatant officer had a "vested interest" at the date of the abolition of Purchase in the Army, but this vested interest has only been recognised in the case of Purchase captains who retire. Common justice would seem to demand that in a proportionate degree it should be taken into account in settling the claims of Purchase subalterns. An ensign appointed prior to November, 1871, had £450 locked up, a lieutenant (say) £800. To the Purchase captain on retirement a pension of £259 is granted, or £59 more than his non-Purchase brother can demand. But what is this extra sum given for? Clearly it is interest on (say) £1,800, at about $3\frac{1}{4}$ per cent. But is not the man who had £450 or £800 invested also entitled to $3\frac{1}{4}$ per cent. interest? It is hopeless to expect any equalisation of pay, while serving, between Purchase and non-Purchase officers, but the principle having been recognised that on retirement a Purchase captain is entitled to a higher rate of pension, we may surely hope that the claims of subalterns, in this respect, will not be altogether ignored. "Purchase Subaltern" has done well to call attention to the matter, for the wrong which the Purchase officer suffers must be clear to all.

With the exception of the police, most of the classes formed under the auspices of that excellent society, the St. John's Ambulance Association, are now closed for the summer recess, but already active preparations are being made at many places for the ensuing autumn and winter session, and the formation of numerous new centres is being arranged. During the past year, 4,068 certificates for first aid to the injured have been awarded to the pupils at the centres; 1,314 certificates to detached male and female classes (held pending the formation of centres), in addition to the bestowal of 327 vellum certificates for the second or higher course. These numbers represent only the successful candidates, and therefore only a small number of those actually receiving instruction—about a third—the remainder either failing to pass the required test, or being prevented from attending the examination. The handbook written for the pupils by the late lamented Surgeon-Major Shepherd (killed at Isandhlwana), 20,000 copies of which have been sold without a single advertisement, is being revised, prior to the issue of a second edition. As an instance of the wonderful popularity of this movement, it may be mentioned that though only established by the Order of St. John in 1877, its area of operation has been more than quadrupled every successive year, and that continued applications for its extension are received from not only all parts of the United Kingdom, but even from the Colonies and America. In England the interest taken in this work of practical philanthropy by all classes, from Royalty downwards, is as intense as it is gratifying, and the society owes a debt of gratitude to the Army Medical Department for the thoroughness with which its members have thrown themselves into the work, and identified themselves with its mission.

It may be a convenience to those officers who are about on the occasion of the German manœuvres, to visit Berlin, to know where they can be well and economically lodged in that expensive city. We, therefore, commend to their notice the pension of Frau von Schach, 21 Hallesche Strasse, which is near the tramways, ten minutes from "Unter den Linden," is near Belle Alliance Platz, and leads out of the Königgrätzer Strasse. The rooms are large and airy, and the charge for board and lodging is from 5s. to 7s. a day. The cooking is good, the fare is plentiful, and the table and other linen faultless. Both Frau von Schach and her daughter speak English. She was formerly Maid of Honour to the Princess Friedrich Carl, and her husband had a post at Court. When, for some political reason he lost this, his wife resolved to bring up her children without asking help from any one. There is, therefore, quite a little romance attached to this lady.

There is no doubt that the announcement that a committee is being assembled at the War Office to look into and report upon the working of the regulations affecting the Veterinary Department of the Army, and to make suggestions as to the steps necessary to be taken to improve the position of the veterinary officer, has conveyed to those interested a feeling of satisfaction hitherto unknown. There is no denying the fact that the feeling among the members of the Department has been for some time past one of grievous injury, injustice, and, we may almost add, insult; and the discontent, although not loud, is none the less deep. It is to be hoped, therefore, that the results arrived at by the Committee may be such as will lead to a satisfactory removal of all causes of discontent. Among the many points in dispute, one of the chief ones upon which nearly all Army veterinary surgeons are agreed, is that of relative rank. The officers of the Department are now, for some reason as yet unexplained, years behind other departments in this respect; and since the publication of the last Medical Warrant, giving surgeons the relative rank of captain on appointment, the position of veterinary-surgeons has been rendered even worse than before. To compel them to wait 12 years to obtain what the surgeon is given after six months, and 20 years for what he is granted after 12, is scarcely fair treatment. A more equitable rearrangement of relative rank would go far towards soothing the discontent; and should the relative rank of captain be conferred after, say, six or eight years, and that of major after 15 years, giving inspecting veterinary-surgeons the relative rank of lieutenant-colonel after 20, the officers of the Veterinary Department would be tolerably contented. It is not so much a case of too little pay as one of too little justice and fair-play. A great many veterinary-surgeons would like to see the rank of 1st-class abolished; for, as they argue, and truly enough, the duties of both 1st and 2nd-classes are almost identical. It is also argued, and with some truth, that if surgeons are not examined for promotion, it is unfair, or, at least, hard, upon veterinary-surgeons that they should have to undergo such an ordeal. Of course, no good officer who has his profession at heart can object to being examined; but it is none the less a hardship that an examination should be considered necessary in one profession, when it has been found unnecessary in another. The chief subjects, however, which ought to be considered are these, viz.:—Honours, social status (including the question of presentation at Court), relative rank, equalisation of foreign service, promotion, and the ten years' scheme, which has failed, to the surprise of no one who has watched its operation in the Medical Department.

What has come of the Report of the Committee on Military Equipment which sat lately at Aldershot? Considering how highly the "magazine system," the invention of Surgeon-Major Oliver, has been reported upon by the 52nd and 1st Battalion Rifle Brigade, both of which regiments have had it on trial for over a year, we cannot think that it is to be condemned, or that the Report of the Committee in question is to be shelved, on account of the expense that would be involved in carrying out a change of system. Neither the 52nd nor Rifle Brigade have been able to find a single fault with the Oliver accoutrements. Surely, no better guarantee could be forthcoming than this that they are adapted to the wants of the soldier, and are an improvement upon the much-abused valise, which has always been unpopular, and is, perhaps, as unfitted as any equipment could be to the requirements of active service. It is no economy to retain an equipment which—as has been shown in the case of the valise—proves inefficient directly the soldier takes the field, and prevents a General from performing any movement which cuts him off for a time from his base of supplies. Dr. Oliver, in the opinion of all competent critics, has mastered all the difficulties which have surrounded for so many years the question of the equipment and supply of an army in the field. Then, by all means, give him the credit which is his due, if only as an encouragement to other inventors.

MEN, WOMEN, AND INVENTORS.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

SIR,—I am glad to find by your recent articles on the claims of Inventors, that you are of opinion that the War Office should have accepted, in some shape or form, the offer of Gen. Ripley and myself to construct breech-loading guns showing savings of 80 per cent. in weight and 60 per cent. in money on the muzzle-loading, condemned, Campbell-Fraser-Woolwich-Armstrong-gun, not to be paid for unless certified by Gen. Campbell himself. I think, Sir, that every suffering taxpayer who has contributed his mite towards the 10, or 12, or perhaps 15 millions sterling wasted, in spite of the loudest remonstrances, upon the Armstrong and Woolwich guns, will very cordially agree with you. We offered, at our own risk and expense, to achieve the above results, *plus* any further conditions of trial (as to endurance, and so forth) that could be devised, Gen. Campbell himself to be the judge. Where, then, was the danger to the War Office or the country? Where? But, sir, satisfactory and gratifying to myself as are the general tone and conclusions of the article, there are one or two traces peeping out here and there of the old-fashioned and official, but essentially Philistine, view of "inventors," which I desire to protest against, and which I undertake to show you are erroneous—at least, in this case. The writer of the article has adhered to the time-honoured division of the human race into men, women, and inventors, and has not yet thrown off the belief that the latter are the natural enemies of the two former,—must be regarded with a wakeful suspicion, warily approached and craftily dealt with. To illustrate the relations of inventors to the rest of mankind, he instances the case of "Mr. Smith" and his bullet-proof dress. But, Sir, "Mr. Smith" was emphatically *not* an inventor. Mr. Smith was simply a charlatan like "Dr." Slade, of table renown, or any other "vagabond." Similarly, the enthusiastic ignoramus who firmly believes he has invented something is not an inventor,—he is only a fool. Of inventors there are three kinds,—firstly, the philosophical working-man or foreman, who feels in his daily work that there is a want to be supplied, and after many failures, sometimes ludicrous enough, laboriously perfects his invention; secondly, the man of science, who is consulted by a manufacturer in a difficulty, and who, on the whole process and difficulty being explained to him, sits down and patiently solves the problem; and thirdly, the man of science, who is also an expert in some particular branch of applied science, and who combines in his own person the knowledge and the work of the two first. Now, Sir, I maintain—and without fear of contradiction—that the most useful of all mankind are those who come under one of these three categories, and of these the most useful are those who come under the last category, and that is what Gen. Ripley and I both claim to do. Gen. Ripley, after passing through the United States' Military Academy at West Point, was made Assistant-Professor of Mathematics at that place; he is, therefore, a man of science. He disabled a whole ironclad fleet, chiefly with guns of his own manufacture; he is, therefore, an expert. As to myself, I was at Cambridge before I went into the Army. I have carried out many and large works as a civil engineer, and I served for no less than seven years on one very important committee of the British Association. I am, therefore a man of science. I went through a large part of the siege of Sevastopol, and invented the shrapnell shell for rifled guns in consequence of what I saw there. I received on those several occasions, while attached to her Majesty's Legations abroad, the thanks in writing of the Secretary of State for War for the time being, for reports sent home on breechloading small arms, Dutch bronze and rifled cannon, and foreign fortifications. I am therefore an expert. An offer made by two men of this stamp—no cure, no pay—has simple nothing in common with the offer of "Mr. Smith," the charlatan,—no pay, no cure. But, sir, I have *not* said, in reference to the Hope Gun, "I only ask of you to try it." I will not allow the War Office to try it, or to see it, or to know anything whatever about it, unless they are prepared to go a step farther, and—if it does all that I guarantee and they stipulate—adopt it. So long as the War Office maintain their monstrous pretension of a right to any man's invention without paying him for it, so long must they be treated as one would treat any one else that one suspected of dishonesty. But, Sir, I want no "fostering hand" from the War Office. I only want a fair and moderate price for a good article, after they have tried it and certified it to be good. And the writer of the article is quite mistaken in supposing that there are any "rules" at the War Office which prevent such an offer being accepted. Of course there are not. The rules which Gen. Campbell sent to me, and pleaded as preventing the acceptance of such an offer, apply solely and exclusively to the case of a man applying to the Office—though if Bedlam and Hanwell are properly guarded, I cannot imagine where the man is to come from—for a "fostering hand" and a grant of money with which to make experiments and complete an invention. No, Sir, there is no excuse for Gen. Campbell's refusal of our offer. The writer of your article is also mistaken in supposing that I am "posing as a martyr." I have no intention of doing so, and I don't like the breed. Nor am I a "baffled artillery genius." Whether I am an artillery, or any other kind of genius, I don't know, but at all events I do not intend to be "baffled." Of course I cannot force Gen. Campbell to try my guns if he chooses not to do it; but having made every possible exertion to supply them to my own Government, I have now taken my pigs to another market. I did *not* say that "General Campbell was the responsible and autocratic head of the Ordnance Department," for that would have been nonsense. What I wrote was "the irresponsible and autocratic," and your compositor printed "their responsible," dissociating the "ir" from the word to which it belonged and joining it to the "the." This also made non sense, but such transparent nonsense that every one to whom I showed it saw at a glance and without any explanation what was intended, so I did not think it worth while to ask you to correct the error. But the writer of your article of to-day misquotes the compositor's misprint, and gives me a wholly unnecessary lecture upon the English language. I said that Gen. Campbell was "the irresponsible and autocratic head of the Ordnance Department," because, under a Surveyor-General who was to all intents and purposes a layman, he was necessarily "autocratic," while it was Col. Stanley and Lord Eustace Cecil who were responsible; and I say that during the five years that he held that very peculiar position," he forced on "the reluctant Navy" the Campbell-Fraser gun. I neither said nor hinted that in doing this, in spite of the strongest remonstrances from the "Director of Naval Ordnance," he gained "a single advantage to the extent of a penny," but I do say—and it is a hard fact—that in his capacity of "irresponsible autocrat," he "rejected off-hand" the offer of Gen. Ripley and myself. I learn with great satisfaction that you "are sorry that it was refused," and it may interest your readers to know that had it been accepted, the first batch of guns would have been delivered and proved some little time ago. The writer of your article is also very greatly in error in quoting, as if from some letter of mine, a sentence in praise of "the Vavasseur steel guns." I never wrote one word about them, and I am, I regret to say, wholly ignorant of the details of their construction and of their power. Nor have I "manufactured" any "competent foreign critics," and I do not even understand to what the allusion "to the appearance of the article of June 26" refers. The writer has evidently made a confusion between my letter and something else. I am prepared to justify, whenever called upon, whatever I have myself written, but I must disclaim responsibility for other men's words.—I am, &c.,

Army and Navy Club, Aug. 28. W. HOPE.

P.S.—I must also protest against the allegation that I have made "any insinuation" that the *Army and Navy Gazette* has "any interested motives, public or private." I have made no such suggestion. Indeed, I never make insinuations. When I attack a man, I do so openly, and in the plainest possible language, as in the case of Gen. Campbell; but even in his case, I have made no attack on his motives, which I have no doubt are the best possible. However, as a man of science, I have a horror of all such subjects, and I keep as closely as possible within the region of physical facts.

Another relic of the Spanish Armada has been secured at Slains during the course of this week by the efforts of Mr. David Ritchie and the salmon fishermen. It is a large gun raised up out of the place where one of the ships belonging to the Armada was wrecked, and strange to say, though it has been in that place for upwards of 290 years, yet it seems as good as ever. The length of the gun is 8 ft., the diameter at the touch-hole 13 in., and the diameter of the bore at muzzle 4 in. It appears to be loaded, partly with nails. One of these is in a complete state, well-made, and arrow-shaped. A slight rubbing with a piece of cloth makes it shine, which leads to the supposition that it is made of hammered iron. Several guns from the same place have been raised and presented to the Queen, and another is in the possession of Lord Abercorn.—*Edinburgh Daily Review.*

According to the latest intelligence from Chili, a treaty of peace has been projected, by which the entire territory of Bolivia on the Pacific would be annexed by Chili. Bolivia itself would cease to be an independent republic, and would be annexed to Peru, under the name of "Alta Peru." The proposed treaty further stipulates that the cost of the war, namely, 40,000,000 dollars, should be paid by Peru to Chili, which Power would retain the city of Tarapaca until payment be made.

Sunday was the 98th anniversary of the loss of the Royal George, which ship capsized and sank at Spithead on August 29, 1782, with her crew of 600 officers and men and 300 civilians.

THE WIMBLEDON SCANDAL COURT-MARTIAL.

The court-martial on Serjt. Marshman, Royal Marines, on charges of fraudulent marking at Wimbledon, was resumed for the fourteenth time at Forton Barracks, on Saturday.

Serjt. Sage, of the Tower Hamlets Rifles, recalled and cross-examined by Lieut. Edye, the prisoner's friend, said that at rifle competitions he had not always fired with Corpl. Adams, but they had fired together at other than Wimbledon meetings. He knew a Mr. Thomas Jennings, who, when alive, was superintendent of the Wenlock Baths, City Road. He was a personal friend of his, and was bugle-major of his corps. He did not supply him with funds, but as a friend he paid some of his entrance-fees. Could not give the dates, but on several occasions Capt. Smith had bought tickets for competition at Wimbledon and transferred them to him. Could not give the occasions, but he had done so several times during the last three or four years, but he did not think he had ever won a prize when Capt. Smith had paid his fees. Had not paid nor promised to repay Capt. Smith out of his prizes, but he had promised, should he be successful, to pay to him a portion of his prizes, say half, to their prize fund. Prisoner: Have you not been in the habit of going about the country competing in rifle-matches for the last three or four years?—Witness: In the habit? I have been about, but not to make a profession of it. Who paid the expenses of your going about the country for such a purpose?—I have not been in the habit of going about the country. I have been to Liverpool and Wimbledon; once to Liverpool. In 1878, a Mr. Jennings arranged to pay my entrance-fees and expenses, and to take my winnings, if any, on the occasion of going to Liverpool only. I was not friendly with Mr. Jennings till his death. We had a fall-out because I would not present him with a tea-service that I had won. He did not claim it on the ground that he had paid half my expenses. The entrance-fee was only a shilling, and it was on my own ground. There were no expenses attached to it at all. I paid Jennings all moneys he had paid out for me for entrance-fees, expenses, &c. I was sued in the county-court by Jennings for something that he had paid in connection with the expenses. He admitted having received £22 from me, and his expenses were £11. He was non-suited. I paid him £22 because I was very successful that year. I had an arrangement with Jennings which entitled him to the £22. It was to give him half of what I won, and I did so. Did you not tell the Court the arrangement with Jennings referred only to Liverpool?—From the way these questions are put to me I scarcely know what I am saying. I consider it a cowardly attack on my character. The question was repeated.—Witness: I might have done so; in fact, the arrangement lasted only about three months, when we had the fall-out about the tea-service. I know I gave him more than I ought to have done, which the county court judge admitted. I have expressed no hope that I shall receive a reward for giving evidence against the prisoner. Have you ever made any remark at all about any reward for evidence or information in this case?—Not that I am aware of. Have you not said you expected a testimonial worth about £50?—No. Have you ever taken ammunition from the head-quarters of the Tower Hamlets Rifles, or have you had the same without having paid for it?—Certainly not. At one time, in years past, we had what we required without paying, but of late it has been paid for. Is there not an impression among the Tower Hamlets Rifles, or some of the members thereof, that you bribed or arranged with the markers?—Very possibly there is; but if you want my character connected with the whole of the questions, all the officers of my regiment are quite willing to guarantee as to my bonâ fides for 15 years past. They will give you the history of all these things. There are a few of my regiment, no doubt, who would be glad to get me into a bother, but they are much disliked in the regiment. By the Court: It was not unusual for a volunteer to make an arrangement such as I made with Jennings. Hundreds of volunteers go to Wimbledon who are not in a position to pay their expenses. I don't consider it a disgraceful thing to do. I should think I was justified in doing it again if I had a personal friend.

At the conclusion of the cross-examination of Serjeant Sage, the President said the Court would assemble on Wednesday for deliberation, and prisoner could then state whether he was ready, and if not he would be allowed until Thursday. At the reassembling of the Court on Wednesday, Lieut. Edye stated that he was not not ready with the defence, and the Court adjourned until Thursday.

The court-martial was resumed on Thursday afternoon, when Lieut. Edye, read the prisoner's defence. As to the first charge, of having made a proposal to Serjt. Sage that he should meet him early next year to make arrangements for Sage to win prizes, the prisoner denied that he ever said or intended anything fraudulent, and argued against the improbability of his having done so. Dealing next with the conversation alleged to have taken place in the public-house at Putney, the prisoner argued that the accusation was not supported by evidence worthy of the slightest acceptance. As to the alleged conversation in a railway carriage, he submitted that Adam's evidence afforded a positive contradiction to Sage's statement. He asked the Court to consider the history of the book which Sage alleged was his. What grounds had they for believing that the book produced by Sage was his own? He told them so, and asked them to believe it, but was his veracity to be depended on? The prisoner emphatically denied having written his name in Sage's book, and submitted that Sage had not identified the book as his own, and could not be regarded as a man of honour, nor was there any corroboration of Sage's evidence as to what was said to have taken place at the York Hotel. Having gone minutely over the points of the evidence, the prisoner argued that as to every one of the periods to which he had called attention, the witness Adams had given Sage the direct lie. Either Sage was telling the truth and Adams was lying, or Sage was lying and Adams telling the truth. Dwelling on the improbability of the charges brought against him, the prisoner admitted that if the non-commissioned officer was desirous of being dishonest, bribery might be possible, but in what might be described as a leading competition, he ventured to assert that it had never yet been carried out, and that no non-commissioned officer would dare to enter into such an undertaking. It was a representative match, and was a competition in which fraud at the firing-points was an absolute impossibility. If the Court found him guilty of this charge, they must necessarily convict the Cheshire team of having won the China Cup by fraud in 1879. If the Court convicted him they must bring in the whole of the Tower Hamlets' team as being parties to the fraud, inasmuch as they, or some of them, knowing the said China Cup to have been won as aforesaid, did not report the same. They would prove Capt. Smith unworthy the position he held, and each and every member of the team would be liable to the penalties attached to such conduct by the National Rifle Association, and to dismissal from their regiment, in that they did not report his (prisoner's) alleged fraudulent statement concerning the Silver Medal and St. George's Vase. Secondly, in that they did not report this alleged fraudulent statement, and that it was through his instrumentality that the China Cup was fraudulently obtained by the Cheshire team. With reference to the charge that he had proposed to Serjt. Sage that he should enter for the Olympic, and that he had arranged with some serjeant by giving him a sovereign that he should put him into the butt instead of at the firing-point, Prisoner said, as a fact, he never was detailed for duty at the firing-point; therefore there was primarily no need for him to bribe; and secondly, there was no need for him to have made the alleged statement. As to the charge that the prisoner was guilty of an offence of a fraudulent nature, "in having arranged and agreed with Serjeant Sage that he (the prisoner) would give to a friend of Sage when shooting for the Olympic Prize as many points as would be necessary to win it," and that, in consideration thereof, he (the prisoner) was to have £20—the said friend of the said Serjeant John Sage, being one Private Runtz, of the London Rifle Brigade, was to have £20, the said Serjeant John Sage the remainder of the prize for himself; and that he, the said Serjeant Sage, was to tell his friend to be sure and fire first and go through;" the prisoner said this was really the most serious charge of all, and he analysed the evidence in order to support his contention that the whole of the alleged transactions were false, and that Private Runtz, as well as the Executive Committee, had in their turn been the victims of the witness Sage. Coming to the alleged pecuniary arrangements, the prisoner urged that of all extraordinary accusations that had ever been made, none could be more wilfully false than this, and he emphatically denied its truth. He was sure there was no one in the Court who, after having heard all that had been brought forward concerning the witness Sage, could think his evidence worthy of credit. As to the charge that he (prisoner) signalled or caused to be signalled a false report of the hits on the target with intent to defraud, he maintained that if the danger signal was shown whilst Runtz's bullet was travelling up the range, the range being only 600 yards, and taking into consideration that the targets were raised and lowered on the winch principle, it would take a very much longer time for the target to be moved from the line of fire than it would take for the bullet to reach it. On the other hand, he was prepared to admit that Mr. Runtz's shot might have gone over the target; indeed, he saw no reason why it should not have done so, and even if it did, and he was accredited with a score, it was because his target had been previously hit by another competitor, and this would account for the target which he was firing at being lowered so rapidly. Although this fact did not come before the notice of the range office on the day in question, he had had access to the tickets of the competitors who fired at the two targets on the right and left of No. 14 target—viz., Nos. 12, 13, 15, and 16. On the ticket of a competitor who fired at No. 16 target the Court would find recorded indirectly the name of the man who fired in error at the target about which there was much controversy. He referred to Mr. Mackenzie, of the Honourable Artillery Company. On his ticket now before the Court, they would find recorded the following score:—3 2 3 5 5 0 5 5 5 3. This was the man who hit No. 14 target. They would note there were two bull's-eyes before and three after. Mr. Runtz was a first-class shot. He had told them what were his shooting qualities, and he only last year beat over 1,300 competitors in one single competition with a Snider rifle. Under these circumstances, he thought they might fairly assume that during the period which he (the prisoner) would call the fifth shot period nothing occurred that could be construed as fraudulent marking, except by the over-heated imagination of a person suffering from some unhappy hallucination. It could not but be apparent to the members of the Court that on the day when the Olympic Prize was being shot for, the National Rifle Association had secured in the butts the services of an officer who had fully carried out their instructions. On entering the butt, his first duty was to ascertain from the non-commissioned officer of that butt (who happened to be the prisoner) what detail of the men under his charge had been made. Having ascertained this, he proceeded to tell them off to other targets, and personally took every precaution to obviate fraud. Mr. Houghton said, "I watched the men change their places, and then afterwards asked them personally if they had done so." In fact, no stone was left unturned by this officer that the competitors should have a fair and honest competition. Mr. Houghton also went into the adjoining butt, under the charge of Serjt. M'Carthy, of the Royal Marines. He returned to the butt which was the subject of so much controversy, and, curiously enough, before the firing commenced, and meeting prisoner, a conversation ensued on the topic which was at present engaging their minds as to a person having attempted to bribe a serjeant of the Royal Marine Artillery. This serjeant the prisoner proposed to call, who would explain how he (prisoner) became acquainted with the information which he communicated to Lieut. Houghton. During this conversation, and whilst they were standing close to No. 12 target, the firing commenced. Lieut. Houghton then proceeded to watch each target in its turn, and as he inspected every one he must have inspected No. 14, and since he saw two or three shots recorded on each target, he (prisoner) submitted the lieutenant must have seen some of the disputed shots actually signalled at No. 14 target. It would appear from the evidence that at no period of the forenoon did he relax his energies in any manner in the due performance of his duties. He told the Court the various periods at which they were in company with one another. He left the Court to judge how little time he must have had to watch or see that the alleged fraudulent signalling was being carried out to his satisfaction, and for the purpose of ensuring the score of 46, which, it was alleged, he had previously promised. At no period of the day did it appear that anything took place to arouse the suspicion of Mr. Houghton. They would find that throughout the whole competition every shot was correctly signalled, and that therefore he was innocent of the charge that he either signalled, or caused to be signalled, a false report of the hits on target 14, with intent to defraud. With reference to the charge that the prisoner, with intent to defraud, said to Francis Wuddy, a private of the 3rd Hants Rifle Volunteers, "What target do you fire at, and at what time do you fire?" and when informed, replied, "I shall be at that target, and if you make 90 or so I shall see you again," the prisoner also elaborately entered into his defence; but Major Ozzard, the prosecutor, intimated that this charge would be withdrawn.

The Court then adjourned until yesterday, when the examination of the witnesses for the defence was proceeded with.

INDIA.

Some of our contemporaries are again speculating as to the resignation of Sir F. P. Haines, and who his successor will be. The *Englishman* says the question will soon come up for settlement, and is "not aware whether Sir F. Haines would remain, should the Government wish to retain his Excellency in the appointment; but, apart from that, the most likely candidates at present in the field seem to be Sir Frederick Neville Chamberlain, Sir Donald Stewart, and Sir Roberts, of the three Sir Donald Stewart would probably have the best chance; though we are not sure that, if the Army Commission's recommendations are carried out, he would accept the appointment, shorn, as it would be, of the seat in the Executive Council."

Col. M. R. Bruce, Bombay S.C., has been granted an ordinary pension of £365, and capitalized value of special annuity, £3,874.

Writing to a Bombay paper, a correspondent gives the following statement of how matters stand in regard to the officers of the three Presidental Staff Corps:—Field Officers—Bengal, 464; Madras, 358; Bombay, 228,—total, 1,050. Captains—Bengal, 201; Madras, 41; Bombay, 72,—total, 314. Subalterns—Bengal, 205; Madras, 62; Bombay, 98,—total, 365. A glance at this statement will show how inadequate the present retirement scheme is to meet the peculiarities of the case. This statement does not include local list field officers, which may be added. In June last eleven officers were promoted to the rank of lieut.-col. in the Madras Staff Corps, whilst in the same month there were three retirements—two cols. on allowances, and one on a bonus, he having served within a very short time of his thirty-eight years.

It seems that the late Brigdr.-Gen Brooke, who was killed in the recent sortie from Candahar, had previously a very narrow escape. The *Candahar News* of July 22 says:—"Yesterday morning, as Gen. Brooke and Major Adam, Assist.-Qrmr.-Gen., with eight troopers of the Poona Horse, were returning from the Argandab up the Moorcha Kotul, they were fired upon by some men from behind the rocks above. The General, Major Adam, and half the men dismounted, and, taking each a carbine, slowly ascended the pass, returning the fire of their assailants, and thus forced their way through the Kotul, driving the enemy up the hillside. A trooper was now sent off to camp to fetch some infantry, and ere long a company of the 4th Rifles arrived, and climbing up the sides of the hill, searched everywhere for the ruffians, but without success, owing to the numerous caves about, and the precipitous nature of the mountain at its summit, which is quite inaccessible to any one but mountaineers. Only four men were seen at any one time, but judging from the rapidity of their fire there must have been many more, probably the band who stole into camp on Sunday night last and fired into the cavalry patrol. One horse belonging to the escort of the Poona Horse was killed, the men of which worked admirably, two of them accompanying Major Adam as near the summit of the mountain as the precipices would allow."

MILITIA ALLOWANCES.

"West Essex" writes:—"Referring to a paragraph in your last issue (page 601), will you allow me to mention that in the 'Regulations for the Militia, 1880,' par. 516, it is clearly stated that one-half of the usual rate of lodging-money (towards provision of furniture) 'will also be granted to officers whilst encamped during training, in addition to the field allowance?'"

Yellow fever has broken out in Havana, and as yet shows no signs of abating. During last month no fewer than 282 persons died of yellow fever, of whom 54 succumbed during the last week in the month. It appears also that other diseases were causing much havoc among the population, small-pox and typhoid fever being mentioned.

Messrs. Samuda have succeeded in getting the contract for three new gunboats of the Mallard class, and the new paddle-vessel to relieve the Pioneer. The Mallards will cost rather more than £30,000 each, and the new Pioneer some £12,000, so that Messrs. Samuda have booked an order for fully £100,000.—*Hampshire Telegraph.*

The Army.

ROYAL HORSE GUARDS (BLUE). Col. Owen Williams completes his five years in command of the regiment on Saturday next, when he will be placed on half-pay, Brevet Lieut.-Col. Cecil Ives succeeding to the command.

4TH DRAGOON GUARDS. The regiment has marched into Aldershot from York in splendid condition, and promises to earn for itself as high a reputation for smartness and efficiency as it won when last at the station, which is saying a great deal, considering the character it carried away with it from the camp. The head-quarters and one squadron marched into the North Camp on the 25th ult., under command of Col. Gunter, after a seventeen days' march. The following officers arrived with the head-quarters, viz.: —Capt. Chadwick, Lieuts. Penton, Wilson, and Willoughby (adjt.), and 2nd Lieut. Orr-Ewing.

5TH DRAGOON GUARDS. Capt. Johnstone, lately promoted from the 7th Hussars, is about to retire from the Service by the sale of his commission.

3RD HUSSARS. Capt. J. Unett, late of the regiment, died at Worcester on the 29th ult., aged 41 years. He entered the Army July 31, 1857; became lieut., May 28, 1858; capt., June 12, 1860; and retired shortly afterwards by the sale of his commission.

4TH HUSSARS. Capt. Pennefather met with a serious accident whilst driving the regimental team near Bagshot on Saturday last. The leaders shied off the road, causing the break to leave it also, and on regaining the road, the break gave a sudden lurch, Capt. Pennefather being thrown to the ground, the reins falling on the backs of the wheelers. Lieut. Peters, who was occupying the seat next the driver, succeeded in securing the reins as the team started off, acting with commendable coolness, and preventing further damage being done. It was found, however, that Capt. Pennefather had broken his thigh-bone, and he will be incapacitated for some time to come.

7TH HUSSARS. Brevet Lieut.-Col. M'Calmont and Lieut. Viscount St. Vincent have been granted four months' leave of absence, with permission to travel in India and the present seat of war in Afghanistan.

10TH HUSSARS. 2nd Lieut. Hon. G. L. Bellew has been granted leave from India to England for four months, on urgent private affairs.

19TH HUSSARS. Capt. Williams has been granted leave of absence to the 27th inst., pending his retirement on pension. Lieuts. Taylor and French are both expected to be gazetted to their troops next month.

20TH HUSSARS. Lieut. Sir J. C. Burke, Bart., who died recently at Newbridge Barracks, was interred last week at Ballinakill, county Galway.

ROYAL ARTILLERY.

No. 5 Baty 8th Brig., which before its conversion some months ago into a mountain battery was stationed at Colaba, left Kirkee on the 2nd ult. by rail, *en route* to Candahar. The officers doing duty with the battery were Capt. C. E. Brown, Lieuts. M. O. Hopkins, A. C. Daniell, H. H. Champion, and W. Elliott, and Surg.-Major T. O'Farrell. The battery proceeded out to India soon after the war began, to go on service, and is now proceeding to the front for the first time. It is supplied with mules specially procured from Cyprus, and it will be interesting to notice whether the misgivings felt by some military men as to the fitness of these animals for the work of a mountain battery are justified or not. At any rate, it may be assumed that the Authorities are satisfied with the mules, or they would not now be on the way to the front. Major Lluellyn was prevented from proceeding with the battery to the front, because the mail which arrived the day of its departure brought the news of his promotion as lieut.-col. The task of preparing the battery for service wholly devolved upon Lieut.-Col. Lluellyn, and it is a little hard that he should be removed from it just as it is going on service. Capt. Arbuthnott, another officer who, like Lieut.-Col. Lluellyn, volunteered to go out to India with the same battery, has received promotion since he arrived in India, and has never yet been across the border. Some people are very unlucky.

Major-Gen. Sir Michael Biddulph, K.C.B., took leave of the Queen on board her Majesty's yacht Alberta on the 26th ult., previous to his departure for India.

The annual athletic sports of No. 5 Bat. 7th Brig. came off at Sandown on the 26th ult. Major Newall superintended the arrangements, and the success of the day was in a large measure due to his indefatigable labours.

The gold medal of the Royal Artillery Institution has been awarded to Major W. Kemmis, 5th Brig., for his essay on the "Attack of Entrenchments by Field Artillery." This is the second occasion on which Major Kemmis has been successful in this annual competition.

The first battery of breechloading guns designed for the use of the Royal Horse Artillery and Field Brigades was issued for service from the Royal Gun Factories, Woolwich, yesterday, having first been inspected and passed by Col. Maitland, the superintendent of the department. They will, in the first place, be sent to Exeter, and placed in charge of F Baty., B Brig., R.H.A., for the purpose of testing their efficiency by a series of rough work at Okehampton in competition with muzzle-loaders, the tests being irrespective of power and accuracy, which have been already established at Shoeburyness, but designed to ascertain the suitability of the new weapons for the knocking about amidst dust and mud and bad weather which they must expect on active service. Should they pass through the trial with satisfaction, they will probably be transferred, for extended duty and under other conditions to G Baty. of the same brigade. The guns have been constructed as far as practicable, seeing that they are breech-loaders, on the model of the muzzle-loading 13-pounder, which is the most highly regarded specimen of British ordnance, but are somewhat longer, by reason of the breech arrangement. Both are of 3-inch calibre in the bore, which is in each 84 inches long, and enlarged to 6½ inches in the powder-chamber.

ROYAL ENGINEERS.

Lieuts. E. C. Spilsbury and W. A. E. St. Clair have left India for service in Afghanistan.

Serjt.-Major T. B. Johnson, R.E., instructor to the 1st London Engineer Volunteers, who, it will be remembered, won the first prize in the "Army and Navy" at the late Wimbledon meeting, and made a fine score in the "General Eyre," on Saturday last made a score with the short Snider which, it is believed, has never been equalled. Firing with other competitors at the usual Queen's distances, he made four bull's-eyes and three inners at 200 yards; the same score at 500 yards; and five bulls, one inner, and one outer at 600 yards; total, 95. He won the Association Challenge Cup, the first prize, and the Andrew Cup, the latter presented by himself.

GRENADIER GUARDS. The 3rd Batn. moved on Wednesday from Windsor to the Tower.

COLDSTREAM GUARDS. Ten serjeants of the 2nd Batn. fired a match on Saturday last at the Purley ranges, Croydon, with a similar number of serjeants of the 2nd Surrey (Croydon) Rifles. Conditions, seven shots at 200, 500, and 600 yards, the Regulars firing with the Martini-Henry and four of the Volunteers with the same weapon, the other six using the Snider. At 200 yards, the Volunteers led by four points, added one more at 500, and ultimately won with 48 points,—713 against 665. Serjt. Hitchcock, for the Guards, made the fine aggregate of 92.

SCOTS GUARDS. The 1st Batn. returned to town on Wednesday from Shorncliffe, and took over quarters at Wellington Barracks. The 2nd Batn. proceeded on the same day to Windsor, to be stationed for the winter.

2ND QUEEN'S. Capt. Lawson, 2nd Batn., has been selected for the adjutancy of the 4th Surrey Rifle Volunteers.

5TH FUSILIERS. Brevet Lieut.-Col. Pocklington and 2nd Lieuts. Stewart, Etheridge, Colvin, Braithwaite, Cowley, and Southey, have passed the lower-standard examination in Hindostanee.

7TH FUSILIERS. Great regret is felt throughout the regiment at the intelligence which has reached England of the death of Major Vandeleur, which has occurred at Candahar, of wounds received in action in the late sortie from that city. The deceased, who was 55 years of age, joined the regiment as ensign, Sept. 21, 1855; became lieut., Oct. 23, 1857; capt., June 24, 1864; brevet major, Oct. 1, 1877; and major, Jan. 1, 1880. No officer in the regiment was more deservedly esteemed. Capt. Keyser will doubtless obtain the majority thus rendered vacant, Lieut. Mostyn proceeding out from the depôt to take the company.

10TH REGIMENT. The death is announced of 2nd Lieut. H. R. C. Graham, 2nd Batn., as having occurred at Malta, on the 27th ult., of diphtheria. The deceased, who was second son of Mr. R. J. Graham, the Elms, Eastbourne, was 23 years of age, and entered the Army Dec. 4, 1878.

12TH REGIMENT. Major Pearson, 1st Batn., has been ordered to join the 32nd Brigade Depôt at Bury St. Edmunds for two years. Captain Brooke, 1st Batn., a candidate for the Army Pay Department, has taken up duty in the pay office of the 66th Brigade Depôt at Naas, on probation.

18TH ROYAL IRISH. Lieut. Parkyn, 1st Batn., has been granted leave from India to England for six months.

20TH REGIMENT. Capt. Hussey, whose appointment as adjutant of the 7th Royal Lancashire Militia would, under ordinary circumstances, expire on Nov. 30, has been appointed aide-de-camp to Lieut.-Gen. Sir J. H. Lefroy, K.C.M.G., Governor of Tasmania.

21ST FUSILIERS. The *Transvaal Argus* of the 17th ult. has the following:—"We have, with feelings of intense regret, to record the death, at the Camp here, yesterday morning, of Brevet Lieut.-Col. Hazlerigg, 21st Fusiliers. The sad event has taken everyone in town by surprise, for although it was known that Col. Hazlerigg was ill, there were few who knew him who would have imagined that his illness—enteric fever—would have a fatal termination. Of splendid build, magnificent presence, and in physical strength and endurance standing head and shoulders above his fellows, he was the last man whom one would imagine destined to die in the prime of his days and vigour. A son of Sir Arthur Gray Hazlerigg, of Noseley Hall, Leicestershire, he entered the Army in 1854, and served through the Crimean war. When the 2-21st arrived in South Africa, along with the reinforcements sent out after Isandhlwana, they were sent to the front in Zululand, and then Major Hazlerigg received his brevet of lieut.-col. for gallantry at the final struggle at Ulundi. In the Secacoeni campaign he was present with his regiment at the taking of the stronghold, and was favourably mentioned in the despatches relating to this affair, as well as in those of the action of Ulundi. Throughout these two campaigns he was most unremitting in his attention to the comfort and health of his men, in whom he inspired the highest respect and esteem. Deceased married, some few years ago, Miss Orr Ewing, daughter of Mr. W. Orr Ewing, of Glasgow. We are certain that the widow, who is in England, and the relatives of the deceased, have the sympathy of all here in their great affliction."

22ND REGIMENT. Surg. Noad, attached to the 2nd Batn., died at Allahabad on July 31, of cholera. From a local paper we are glad to learn there is a decided improvement in the health of the battalion. Up to the beginning of last month there had been 32 cases of cholera, 18 of which occurred on July 31. The patients were progressing very favourably. A decided improvement was also reported in the city.

24TH REGIMENT. Capt. E. J. Tarte, late of the regiment, residing at Bellair, Natal, writes:—"Learning that a popular and generous feeling exists in favour of erecting some token of regard in memory of my brother officers, non-commissioned officers, and privates that fell at Isandhlwana in defence of this beautiful colony and the others belonging to the Crown, allow me to say that I shall feel most happy, indeed honoured, to take any useful part in so noble an intention, either in acting as secretary for the occasion, receiving subscriptions, or placing my services at the disposal, or in any direction that may be considered necessary in carrying out a resolution, the object of which will remain a graceful tribute of gratitude and respect from the inhabitants of Durban and the other cities and towns of South Africa, to the memory of the dead."

28TH REGIMENT. Lieut.-Col. C. F. Hutton, major on the Retired Full-pay List, died at 26 Albany Street, Edinburgh, on the 31st ult. The deceased obtained his commission March 2, 1855; became capt., Jan. 25, 1856; major, Oct. 22, 1870; and retired upon full pay, with the honorary rank of lieut.-col., Dec. 7, 1870.

30TH REGIMENT. Brevet Lieut.-Col. Chapman, Brevet Major Williamson, Capts. Goodwyn, Clowes, and Evans, Lieut. Carey, and 2nd Lieut. Finch have passed the lower-standard examination in Hindostanee.

40TH REGIMENT. Lieut. O'Brien, attached to the 1st Punjab Cavalry, has been mentioned in despatches for gallantry in the charge of Palliser's Brigade on July 1 in the Logar Valley.

42ND HIGHLANDERS. Capt. Wauchope, C.M.G., has reverted to regimental duty from civil employ. Capt. Monro rejoins head-quarters at Aldershot from depôt duty, on promotion. Lieut. Kennedy has been appointed to the depôt at Perth, in place of Capt. Monro, promoted.

43RD LIGHT INFANTRY. An old officer and survivor of the Peninsula, Capt. J. Dobbs, died the other day at Upper Clonlee, Larne. His father, Mr. F. Dobbs, M.P., was descended from an officer of rank in Queen Elizabeth's Army, and married a granddaughter of O'Neill, Earl of Tyrone. He took an active part in the politics of his day, as a writer and as a speaker in the House of Commons; also in the Irish Volunteers, being reviewing major to Lord Charlemont. Capt. Dobbs was only ten years old when his father died, and in 1806, at the age of fifteen, he received from Lord Gosford a lieutenancy in the Armagh Militia, from which he was afterwards transferred to the 43rd, in which he served with distinction through the Peninsular campaign. He passed through the thickest of the fight in the battle of Corunna, and received the Peninsular medal, with clasps for Corunna, Fuentes d'Onoro, Cuidad Rodrigo, Badajoz, Salamanca, Vittoria, Pyrenees, St. Sebastian, Nivelle, and Nive. After spending 57 years in the public service, he retired into private life.

47TH REGIMENT. Lieut.-Col. FitzRoy completed his five years in command of the regiment on the 1st inst., and is about to be placed upon half-pay.

ROYAL MARINES.

The athletic sports in connection with the Royal Marines at the depôt, Walmer, took place last week. The committee was composed of Major Way, Lieut. and Adjt. Burrowes, Lieut. Wright, and Serjt.-Major Rendell. The flat race for officers was won by Lieut. Quill.

Lieut. R. M. Ussher, 2 corporals, and 63 privates, R.M.L.I., and 2 serjeants, 2 corporals, 1 bugler, and 23 gunners, R.M.A., embarked in the Achilles on the 1st inst., Lieut. J. B. Darling, R.M.L.I., and a corresponding number of non-commissioned officers and men having completed two years' service in that ship.

57TH REGIMENT. Major Bicknell is about to retire. Major Picot has joined the depôt at Hounslow for two years, in place of Major Bicknell.

62ND REGIMENT. Lieut. Walton has been granted leave from India to England for six months.

68TH LIGHT INFANTRY. Lieut. FitzGerald is a candidate for the Indian S.C., and has been appointed to the 15th Bengal N.I., on probation.

72ND HIGHLANDERS. The following regimental order was issued at Cabul on July 4:—"Capt. R. H. Murray having returned to regimental duty in due course, on promotion, Lieut.-Col. Brownlow desires to place on record his sense of the extremely satisfactory manner in which Capt. Murray has at all times carried the many and difficult duties of a most responsible appointment, which he has now held, both in cantonments and on active service in the field, for more than three years. For this and for his cordial support at all times, Lieut.-Col. Brownlow feels that he is personally deeply indebted to him."

75TH REGIMENT. Brevet Major Essex will shortly join the Staff of the Army.

80TH REGIMENT. Lieut. Lindop has applied for permission to exchange into the 102nd Fusiliers with Lieut. Way.

83RD REGIMENT. Lieut. Enriquez is a candidate for the Indian S.C., and has been appointed to the 16th Bengal N.I.

85TH LIGHT INFANTRY. Lieut. Revett-Carnac is a candidate for the Indian S.C., and has been appointed to the 18th Bengal N.I., on probation.

88TH REGIMENT. Qrmr. Morrison, temporarily attached to the depot at Galway, has been ordered to hold himself in readiness to proceed to India, and join head-quarters, on promotion.

89TH REGIMENT. Lieut. Meade, a probationer, officiating squadron officer, 10th Bengal Cavalry, is about to be admitted to the Bengal S.C., with effect from July 19, 1878.

94TH REGIMENT. A Transvaal paper gives the following particulars of the death of Capt. Bowlby, which was lately announced by telegraph:—"We much regret to learn of the death of Capt. Bowlby, of the 94th Regt., whilst hunting in the wilds of the Transvaal, a week or two since. Some few weeks ago Mr. Henry Glynn, of Kruger's Post, made up a party for the purpose of proceeding to the flats towards Delagoa Bay, hunting and shooting large game, and Capt. Bowlby obtained leave of absence to proceed with them. On joining the party, the whole of them went into the fly country for nine days. They returned in due course, meeting with little success. Capt. Bowlby's leave being near expiration, he decided to return, remaining a day or two, however, with some of the others at the camping-ground. During this stay, and while out hunting, Capt. Bowlby, with two or three others, came upon a leopard, which they followed into a bush. Surrounding this bush, they intended to drive out the leopard; but the animal appears to have got behind Capt. Bowlby, and sprang upon him, and Capt. Bowlby received several dangerous wounds, especially one in the scalp. Shortly after the accident, a messenger was despatched to Mr. Corrie, of Spitzkop, who, without delay, saddled up and rode into town. He arrived late on Thursday evening. Dr. Falvay and the regimental adjt., Lieut. Harrison, started for the scene of the accident immediately after Mr. Corrie's arrival. Arriving at the spot, Dr. Falvay did all he could for Capt. Bowlby, but it was useless. He expired on his way in, being carried on a stretcher."

100TH REGIMENT. Lieut. Clery has been ordered home from India, for duty with the depôt at Birr, in place of Lieut. Denison, who embarks to join head-quarters.

102ND FUSILIERS. Lieut. Way has arranged an exchange to the 80th Regiment.

104TH FUSILIERS. Major Taylor is about to retire on his pension.

MEDICAL DEPARTMENT. Surg.-Major W. L. Gubbins, M.B., has been granted leave from India to England for six months. Surg. H. I. Noad died at Allahabad on July 31, of cholera. The deceased entered the Service, Aug. 4, 1878.

The Auxiliary Forces.

MILITIA.

2ND ROYAL LANARK. The regiment has sent a donation of £8 15s. to the Marquis of Lorne towards the fund being raised for the purpose of presenting to Canada a challenge cup, to be shot for at the meeting of the Dominion Rifle Association.

The annual trainings in Great Britain were brought to a close on Saturday last by the dismissal of the Northumberland Artillery at Berwick-on-Tweed. The regiment was under canvas at Dunbar Camp. Since Feb. 9, when the trainings commenced, 98 regiments have been called out in England and Wales, and 16 in Scotland. Of the 45 regiments in Ireland, 43 have completed; one (the Dublin City Artillery), which is training at Wicklow Camp, will be dismissed on the 11th inst., and the other (the Mid-Ulster Artillery), which assembled last Monday, will be dismissed on the 25th inst.

The following letter has been addressed to the commanding officers of the several Militia regiments in the United Kingdom:—Sir,—I ask your kind consideration of the project to raise a small sum, the interest of which shall be given yearly by the Governor-General, on the part of the Auxiliary Forces of Great Britain, as a prize, at the Dominion Rifle Association Meeting to the forces of Canada. The Dominion Rifle Associations takes the place in Canada of the National Rifle Association in Great Britain. An annual meeting is held at Ottawa, where marksmen from every province of the Dominion—from British Columbia on the Pacific Ocean in the West, to the Atlantic provinces in the East—take part in the competitions. As at present holding the office of Governor-General, and as the bearer of a commission in the British Auxiliary Forces, I venture to appeal to the officers, non-commissioned officers, and men of your regiment to contribute in aid of the founding of a prize which, if instituted, would, I know, be regarded as one of the most valued upon our list, and would well express the unity in patriotism of all the forces throughout the Empire of her Majesty the Queen. The secretary of the N.R.A. in London, or the Governor-General's secretary at Ottawa, Canada, will receive any subscriptions you may be enabled to send.—I am, &c., LORNE."

YEOMANRY CAVALRY.

Since Aug. 3, when the 2nd West York were dismissed at Harrogate, there have been no trainings of Yeomanry Cavalry in Great Britain. Three regiments have, however, yet to assemble—the Queen's Own Worcestershire, at Worcester, Sept. 9 (dismiss Sept. 16); the North Somerset, at Bath, Sept. 18 (dismiss Sept. 25); and the Montgomeryshire, at Welshpool, Sept. 23 (dismiss Sept. 29).

THE VOLUNTEERS.

1ST KENT ARTILLERY. The annual inspection of the 1st and 2nd Batys. of this regiment was held on the 30th ult. by Col. Trevor, R.A., Inspector of Auxiliary Artillery, South-Eastern District, who was evidently well pleased with the turn-out and drill of all ranks.

HON. ARTILLERY COMPANY. The "Captain-General and Colonel's" (H.R.H. the Prince of Wales) prize to this regiment was competed for on Tuesday at the Park ranges, Tottenham, at Queen's, 1st stage, distances, and won by Serjt. Williams, with the fine score of 92. We are glad to observe that the old "class" positions—standing at 200 yards and kneeling at 300—were reverted to.

2ND (SOUTH) MIDDLESEX RIFLES. Capt. Hill James, adjt., has announced the results of the recent field-firing of the regiment at the Caterham ranges. The prizes were won by Qrmr.-Serjt. Bacchus's company, with a per-centage of 6·47. The total per-centage of hits to rounds fired (including hits on support and main body) was 7·63. The field and staff prize for volley-firing at long ranges and unknown distances was won by Private P. H. Jones's company, with a per-centage of 16·6. It would be to the advantage of the Service if other Rifle regiments would follow the excellent example of the South Middlesex, many members of which, we have reason to know, travelled from Aldershot, where they had been drilling with the Regulars, to participate in the contest. Gen. Cameron, who took the greatest interest in the Volunteers under his command at Aldershot, invited any of those who were in the 7th Provisional Battalion in the last week to fire with the Regular troops. Capt. Hill James well expresses the value of this sort of practice in the statement that individual practice is but the means to an end, and that he who can shoot in the ranks or in any position in which he may be placed as a soldier, is a more valuable Volunteer than the best shot who can only make good practice singly.

ARMY GAZETTE.

WAR OFFICE, PALL MALL, August 31, 1880.

Ordnance Store Department—Comys. W. G. Boyes and C. W. Elphinstone-Holloway are placed on retired pay, under Article 59 of the Royal Warrant of Jan. 31, 1880 (the former dated Sept. 11, and the latter Aug. 29).

BREVET.

Capt. T. W. Dowding, R.M.L.I., to be Major, in recognition of his services in the field in South Africa in the years 1877-8-9 (Sept. 1).

[Where not otherwise specified, the following commissions and announcements bear date Sept. 4, and the current year must be understood.]

WAR OFFICE, PALL MALL, Sept. 3, 1880.

1st Life Guards—Vet.-Surg, 1st class, M. Mence retires on half-pay.

Royal Horse Guards—Lieut. A. W. Merry retires from the Service, receiving the value of his commission; Surg.-Major J. M. Taylor is granted retired pay.

7th Dragoon Guards—Lieut. J. H. Banks, from the 12th Lancers, to be Capt., vice Weston, retired.

4th Hussars—Lieut. D. L. De la Cherois retires on temporary half-pay.

Royal Artillery—Majors J. T. Leishman (late Bombay), to be Lieut.-Col., vice Brevet Col. Stone (late Bombay), who retires upon a pension and extra annuity, with the hon. rank of Major-Gen.; F. C. H. Clarke, C.M.G. (late Bombay), from the Seconded List, to be Major, vice Leishman (late Bombay), promoted (both dated Aug. 17); Lieuts. E. B. Coke to be Capt., vice Mainguy, deceased (Aug. 21); F. H. J. Birch to be Lieut. upon the Seconded List (Sept. 3); Gent. Cadet Charles Oliver Fairbank, from the Royal Military College, Kingston, Canada, to be Lieut., vice Lett, deceased (Aug. 25).

Royal Engineers—Gent. Cadet Aylesworth Bowen Perry, from the Royal Military College, Kingston, Canada, to be Lieut., vice Settle, promoted (Aug. 25).

Grenadier Guards—For "Capt. and Lieut.-Col. L. G. Phillips to be Major," &c., as stated in the *Gazette* of Aug. 24, read "Capt. and Lieut.-Col. L. G. Phillips to be Major (with the rank of Col.)," &c.

8th Foot—Lieut. H. W. de Montmorency resigns his commission.

9th Foot—Capt. and Brevet Major E. Kerrich retires on a pension, with the hon. rank of Lieut.-Col.

19th Foot—Lieut. A. W. Turner, from the 99th Foot, to be Capt., vice Trotter, retired. The promotion to the rank of Lieut., dated Nov. 24, 1877, of 2nd Lieut. E. J. B. Buckle is post-dated to Dec. 8, 1877.

23rd Foot—Lieut. R. B. Mainwaring to be Capt., vice Griffith, seconded for service on the Staff (June 13).

24th Foot—Lieut.-Col. W. M. Dunbar retires on half-pay; 2nd Lieut. R. Campbell to be Lieut., vice Lloyd, appointed a probationer for the Indian S.C. (Aug. 16).

27th Foot—Major W. Herring retires on a pension, with the hon. rank of Lieut.-Col.

41st Foot—The promotion to the rank of Lieut. of 2nd Lieut. C. H. D. Cass, from the 69th Foot, dated May 19, is cancelled.

44th Foot—Capt. W. D. Saunders retires on half-pay.

47th Foot—Lieut.-Col. and Brevet Col. W. FitzRoy, having completed five years' service as a Regimental Lieut.-Col., has been placed on half-pay.

50th Foot—Lieut.-Col. and Brevet Col. J. Thompson retires on a pension, with the hon. rank of Major-Gen. (Aug. 31).

53rd Foot—Capt. F. B. Bowyer-Lane retires on half-pay.

68th Foot—Lieut. H. S. FitzGerald has been appointed a probationer for the Indian S.C. (July 16).

83rd Foot—Lieut. A. D. Enriquez has been appointed a probationer for the Indian S.C. (July 10).

85th Foot—Lieut. E. H. Rivett-Carnac has been appointed a probationer for the Indian S.C. (July 19).

86th Foot—Lieut. R. B. Finnie, from the 1st Royal Lanark Militia, to be 2nd Lieut., vice Allen, promoted.

98th Foot—Lieut. J. Reeves to be Instructor of Musketry, vice Lieut. Williams, promoted (Aug. 6).

100th Foot—2nd Lieut. H. B. Vaughan, from the 97th Foot, to be 2nd Lieut., vice Broome, promoted.

102nd Foot—Lieut. J. C. S. Irving, from the 39th Foot, to be Capt., vice Mills, seconded for service on the Staff.

108th Foot—Capt. I. M. Urquhart retires on half-pay; Lieut. C. F. H. Spencer, from the 48th Foot, to be Capt., vice Brevet Major Nicholson, promoted.

Staff—Major-Gen. H.R.H. A. W. P. Albert, Duke of Connaught and Strathearn, K.G., K.T., K.P., G.C.S.I., G.C.M.G., Colonel-in-Chief of the Rifle Brigade, to be placed on the Staff of the Army in Great Britain as a Brigdr.-Gen., with a view to his commanding a Brigade at Aldershot, vice Major-Gen. Peyton, whose period of service on the Staff is about to expire (Sept. 30); Major and Brevet Lieut.-Col. W. C. Justice, half-pay, late Depôt Battalion, to be Assistant-Adjt. and Qrmr.-Gen. in the West Indies, vice Major and Brevet Lieut.-Col. C. Steel, half-pay, unattached, who resigns that appointment on account of ill-health (Oct. 1); Lieut. J. D. Barry, R.A., to be Extra Aide-de-Camp to the Lieut.-Gen. and General Governor of Ireland.

Commissariat and Transport Staff—Deputy-Assist.-Comy.-Gen. J. K. Johnson to be Assist.-Comy.-Gen., vice Lewis, deceased (Aug. 15); Deputy-Assist.-Comy.-Gen. J. A. Scott to be Assist.-Comy.-Gen., to complete establishment (Aug. 19).

Commissariat and Transport Department—Assist.-Comy.-Gen. C. R. Shervinton has been retired under the Royal Warrant of Jan. 31, 1880, upon the reorganisation of the Department, being over the limit of age, with the hon. rank of Deputy-Comy.-Gen. (Aug. 19).

Army Pay Department—Capt. J. Stuart, from the 47th Foot, having resigned his combatant commission, to be Pymr., with the hon. rank of Capt. in the Army (Dec. 31, 1879, such antedate not to carry pay prior to Aug. 2).

Medical Department—Surg.-Major G. B. Poppelwell has been granted retired pay, with the hon. rank of Brig.-Surg. (Aug. 14). To be Brig.-Surgs.:—Surg.-Majors F. M. Skues, vice Steuart, deceased (July 28); H. J. Rose, vice Teevan, granted retired pay (July 30). To be Surgs. (July 31):—George Holden Sylvester, gent.; W. J. Macnamara, M.D.; Daniel O'Sullivan, gent.; Edwin Milward, gent.; Paul Bennett Conolly, gent.; C. R. Woods, M.D.; H. F. Babington, M.B.; W. C. Milward, M.B.; W. H. Bracken, M.D.; Michael F. Macnamara, gent.; J. O. G. Sandiford, M.D.; R. L. Love, M.D.; H. W. Murray, M.B.; Michael William Kerin, gent.; A. Peterkin, M.B.; James Harran, gent.; W. S. Lecky, M.B.; Edward Lewis Maunsell, gent.; John Sydney Langdon, gent.; William Heffernan, gent.; Ronald William Edward Huntly Nicholson, gent.; James Grove White Crofts, gent.; William Dugdale, gent.; Delaware Lewis Irvine, gent.; James Ronayne, gent.; C. H. Clabburn, M.B.; Edward Russell Cree, gent.; Maurice O'Connor Drury, gent.; W. Deane Freeman, M.B.; James Hamilton Nicholas, gent.; Denham Franklin, gent.; Jeremiah O'Brien Curtin, gent.; Herbert Saunders, gent.

Army Hospital Corps—Staff Serjt. T. Phillips to be Lieut. of Orderlies, vice Mellors, dismissed from her Majesty's Service.

Veterinary Department—Vet.-Surg. B. L. Glover, R.A., to be Vet.-Surg., First Class, in recognition of his distinguished service during the recent operations in South Africa.

BREVET.

Lieut.-Col. J. W. Collington, R.A., to be Col. (Aug. 21); Major and Brevet Lieut.-Col. E. D. Smith, half-pay, late 95th Foot, Assist.-Adjt. and Qrmr.-Gen., Dublin District, to be Col. (Aug. 23); Lieut.-Col. W. FitzRoy, 47th Foot, to be Col. (Sept. 1).

Qrmr. C. Lenton, Northampton and Rutland Militia, to have the temporary rank of Qrmr. in the Army whilst serving in the Militia (Aug. 9).

Deputy-Assist.-Comy. E. J. Fleming, Hyderabad Contingent, to have the hon. rank of Lieut. (Feb. 28, 1879).

MEMORANDA.

Major and Brevet Lieut.-Col. W. Mosse, half-pay, late 26th Foot, retires from the Service, receiving the value of his commission.

Hon. Major H. M. Parkerson, late Capt., 63rd Foot, has been permitted to commute his pension (Aug. 12); Hon. Major J. Irwin, late Capt., 88th Foot, has been permitted to commute his pension (Aug. 20).

Capt. I. M. Urquhart, half-pay, late 108th Foot, retires on a pension, with the hon. rank of Major.

Hon. Deputy Inspector-Gen. A. Maclean, M.D., late Surg.-Major, Depôt Battalion, has been permitted to commute his retired pay (July 31).

RESERVE OF OFFICERS.

Major A. M. Fawcett, late 2nd Dragoon Guards, to be Major; Capt. J. Hoole, 5th West York Militia, to be Capt.

The under-mentioned officers to be Lieutenants:—Lieut. C. McK. Campbell-Haslip, 1st Durham Militia; 2nd Lieut. A. W. Jarvis, Lieut. 3rd Norfolk R.V.C.; Lieut. T. H. K. Payne, Londonderry Militia.

INDIA OFFICE, September 2, 1880.

The Queen has approved of the under-mentioned admissions to her Majesty's Indian Medical Service:—To be Surgs. (March 31):—Bengal—J. Simpson, M.D., C. P. Lukis, R. R. H. Whitwell, L. A. Waddell, G. Shewan, D. B. Spencer, J. Clarke, M.D., C. C. Vaid, P. D. Pank, Thomas Richard Mulroney, Thomas Rankin Macdonald. Madras: D. F. Dymott, R. H. Cama, W. B. Browning, C. Henderson, F. R. Divecha, A. P. Adams, C. M. Thompson, C. T. Rundle, J. W. Evans, and J. Leonard. Bombay: Oct. 31, 1879—C. F. Willis; March 31, 1880—H. P. Dimmock and C. B. Maitland.

ERRATUM.

The name of Surg. Thompson, whose admission to the Indian Medical Service was notified in the *London Gazette* of April 23, page 2,658, should have been given as "Andrew" Colquhoun Thompson, and not "Arthur."

THE IRISH RELIEF SQUADRON.

The report of Capt. G. Digby Morant, R.N., senior officer, on the above subject, has been presented to Parliament. The report is dated, "H.M.S. Valorous, Galway, Aug. 4, 1880." Capt. Morant states that the first ship detailed for relief service was H.M.'s gunboat Goshawk, and she commenced her relief service on Feb. 3 last, followed by the Orwell, Bruiser, Hawk, Imogene, and the Valorous. These vessels were detailed by the senior naval officer at Queenstown to carry out the directions of the committee. This arrangement continued until the arrival of the Duke of Edinburgh in H.M.S. Lively, when he took command of the whole of the squadron, which was worked as the several committees required, on application to him for a ship or ships, and has been continued on the same system since the departure of his Royal Highness under Capt. Morant. Since the first commencement of this service by H.M.'s ships 856½ tons of meal, 453 tons of seed potatoes, 30 tons of oats and barley, and 110 bales of clothing, and a considerable quantity of loose clothing issued by H.M.'s ships Lively and Valorous have been conveyed to the several islands and those portions of the coast difficult of access. The population of the places so relieved amounts to the number, approximately, of 36,841. Capt. Morant has endeavoured on his recent visits to several parts of the coast to ascertain if there was any actual distress yet existing, but happily the reply has been in the negative, the relief committee having been enabled to give food or money up to this time; and now the new potatoes are generally matured and fit for food. Various statistics having reference to the subject accompany the report.

GREENWICH HOSPITAL PENSIONS.

In the House of Commons on Monday night, on the vote to complete the sum necessary for Greenwich Hospital and Schools, Capt. Price said he had given notice to reduce this vote by £1,500. The reason why he did so was because it had been found necessary to limit the amount of pensions given to our seamen. The reason of that was that a great strain had been put upon the funds of the hospital some time ago. The men said if there was not enough for all, why not take away something from the pensions of the officers—why take it only from the men? There were ten flag officers who received from this fund £150 a year, which made £1,500, the amount by which he proposed to reduce the vote. Every one of those officers had served his country well, and no doubt was entitled to the pension awarded to him by the Admiralty. Nor did he wish to deprive those officers of their pensions, but he knew that if he was successful in carrying the reduction of the vote, the first thing her Majesty's Government would do to-morrow was to ask for a grant out of the Consolidated Fund to compensate those officers, and he would be the first to support them. But if it was fair that those officers should be compensated for the loss of their pensions, was it not right that the men should receive the pensions to which they were entitled? There were many seamen who were expecting those pensions who had, perhaps, for thirty-five or forty years been looking forward to them. It was not too much to ask the House of Commons to make a temporary grant to meet the present difficulty. They were not altogether without precedent in this matter. So long ago as 1834, Government obtained a grant of £22,000 for a similar object. The spirit which guided the Government of that day was shown in the preamble of the Act, the 4th of William IV. That Act repealed the law as to merchant seamen's contributions—then amounting to £22,000—and the preamble recited that whereas the revenues of the said hospital would by such repeal be so greatly diminished as to render them wholly inadequate for the maintenance of that establishment, and it was highly becoming the character and the honour of the nation that the seamen and Marines should be supported according to the original intention of the hospital, and that other funds should be provided for their maintenance, the Act went on to provide a sum of £22,000. He moved to reduce the vote by the sum of £1,500. Mr. Brassey said that the funds of the hospital were insufficient to meet all the claims on them; but, after all, it was more a question of principle than of funds. It was undesirable that when a Government went out of office the seamen should expect a largess from their successors. Under the arrangements of the late Government, the men had derived great benefits from the way in which those funds had been administered. Mr. W. H. Smith said that when the late Government came into office they found that the funds were capable of pensioning 5,000 men, and the careful administration of his hon. friend the Member for South Devon had raised that number to 7,500. It was quite a mistake to suppose that every man who was qualified by age and service to receive a pension was necessarily entitled to one. The late Government had considered the case of all the men, and had preferred to extend the number of the pensioners rather than to increase the amount of the existing pensions. Sir J. Hay, as one of the officers on the Greenwich Hospital Commission, had watched the changes that had been made, and held that every good-conduct man who had reached the age of 55 ought, if possible, to have a pension, whether or not he was strictly entitled to it. The number of the men who were qualified for pensions but did not receive them was rapidly increasing, and a fresh scheme was desirable while the list was still small. Mr. Childers said the prospects which he held out when last in office as to the amount of pensions likely to be paid to Greenwich Hospital pensioners had been more than realised. Capt. Price withdrew his motion. Mr. W. H. Smith suggested that it would be satisfactory if some more detailed statement than had yet been given could be circulated as to the cost of this particular item.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army, of not less than 50 years of age.

There are 57 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £617, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £2,300 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

"ATALANTA" RELIEF FUND.

The sum required for the relief of the numerous dependent relatives is £20,000.

Subscriptions are earnestly requested to be paid to "ATALANTA" RELIEF FUND, at Bank of England; Messrs. DRUMMOND and Co., London; at any local bank at Portsmouth; or by

Commander JOHN W. F. HARVEY, R.N., Hon. Secretary.

Portsmouth Branch, H.M.'s Dockyard, Portsmouth.

THE AMERICAN WALTHAM WATCHES are the best timekeepers in the world.—HENRY W. BEDFORD, No. 67 Regent Street (next to St. James's Hall). has the largest retail stock in England to select from. Silver cases from £2 10s; gold cases from £8 8s. Sent securely packed by mail to all parts of the world.

AMERICAN WALTHAM WATCHES. — The wonderful and unprecedented success of these Watches over all others submitted for competition at the Philadelphia, Paris, and Sydney Exhibitions, together with the official recognition of their merits received from Governments and important Corporations, and numerous testimonials from all classes, stamp them as unequalled.—HENRY W. BEDFORD, Agent for the Company, 67 Regent Street, next to St. James's Hall. Price lists sent post free with all particulars.

BEDFORD'S CATALOGUE of WALTHAM WATCHES, describing all the varieties manufactured by the Company, including the finest movements, in gold and silver cases, made expressly for his house, sent free by HENRY W. BEDFORD, Agent for the Company, 67 Regent Street (next to St. James's Hall).

Army and Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 4, 1880.

THE intelligence that General Roberts has attacked Ayoub Khan's army, and inflicted a crushing defeat, capturing 27 out of 38 guns, will relieve the public from a suspense which had become almost painful. We are utterly without details as t the day on which the battle was fought, but the fact that 27 guns had been captured shows that the victory must have been decisive. We learn that the Cabulees are retreating up the Argandab. Probably, therefore, the Afghan army is broken up, a part trying to reach Ghuznee, and the remainder Herat. Of the latter, our cavalry will, no doubt, be able to give a good account. The battle has taken place sooner than we anticipated, for General Phayre was not expected at Candahar till the 5th, and we imagined that General Roberts was to have deferred the attack till after his arrival. No doubt, however, he had good reasons for the course adopted. Either Ayoub was about to retire, or the fortifications which he was constructing were becoming dangerously strong. Ayoub Khan had, when last heard of, taken up a position on the banks of the Argandab, at a place called Mazra, some four miles north-west of Candahar. The village of Mazra itself is in the valley of the Argandab, on the left bank of that river, and separated from Candahar by a range of hills. The road to Mazra runs through a pass called Kotal-i-Baba Wali, and that pass, with the heights further to the north-east, are strongly held by the enemy, who were busily engaged fortifying their position. It was said that Ayoub opened negotiations with General Roberts, who refused to treat save on the base of an unconditional submission and surrender of prisoners. That this base would be accepted by Ayoub Khan, we never for a moment believed. He, nevertheless, was no doubt anxious, if possible, to avoid a battle, and would probably, if he could, have tried to slip past Roberts to Ghuznee. The Ghazees and the rebellious Sirdars who had joined him, however, insisted on a battle. Ten days ago, Ayoub's army consisted of 10,000 men, including 4,000 regular infantry, with 38 guns; and since then he had, no doubt, been joined by many thousands of tribesmen. Our artillery could not have been superior to his, while, as to numbers, Roberts was probably able to bring some 12,000 men into action. The enemy, however, occupied a strong position, which, if directly assailed, must have proved a tough nut to crack. We presume, however, that Roberts repeated his tactics at the Peiwar Kotal, and attempted a turning movement. As to General Roberts's march, it is impossible not to speak of it in the highest terms of admiration. It is simply one of the most brilliant, well-managed, and successful exploits of the sort ever achieved by an army. General Phayre, with his head-quarters, reached a point 26 miles distant from Chaman on the 1st, whilst his cavalry brigade arrived on the same day at Takht-i-Pul, which is 27 miles distant from Candahar. It was rumoured that a large tribal gathering had assembled at Tukht-i-Pul, with a view of disputing General Phayre's advance. No confirmation of the report has, however, yet been received, and it is not known whether General Phayre's cavalry has met with any opposition. As to Phayre's delay in advancing to the succour of the Candahar garrison till nearly five weeks after his aid was urgently asked for, the fact reflects the greatest discredit not on the General, but on the Government of India. As early as June 27 the latter knew that Ayoub was approaching the Helmund, and contemplated the necessity of at once moving up Phayre's Division. So utterly destitute of transport, however, had the latter been left that, notwithstanding all his exertions and the cordial co-operation of the Khan of Khelat, Phayre was not able to march till some weeks later. Ere closing this article, we would call attention to the sortie of August 16. It was claimed at the time as a success, but it was evidently a failure, and a very costly failure. That the means adopted to dislodge the enemy from the village was very clumsy, and calculated to cause great loss of life, we think must be apparent to all who have studied the subject, and possess any knowledge of the art of war.

We understand that on the news reaching England of the late disastrous sortie from Candahar, her Majesty graciously expressed, through Lieutenant-General Sir Henry Ponsonby, her sympathy with Mrs. Brooke on the death of her husband, the late Brigadier-General Brooke, who fell in the sortie when endeavouring to carry off Captain Cruickshank, R.E., when wounded, out of action; and her Majesty, at the same time, made known her deep regret that she should have been deprived of the services of so gallant and worthy a soldier.

The Berlin newspapers express great gratification at hearing that H.R.H. the Duke of Cambridge will be present at the forthcoming manœuvres of the German Army.

As we announced some weeks ago was probable, Major-General H.R.H. the Duke of Connaught has been selected to succeed Major-General Peyton in command of the 3rd Infantry Brigade at Aldershot, and will take up his duties on the 1st prox. General Peyton's retirement will be the subject of general regret throughout the Aldershot Division, and no brigadier has left the station of late years with a higher reputation for professional ability.

The Duke and Duchess of Connaught arrived at Berlin on Sunday, and immediately proceeded to Potsdam.

After an unusually hard season of work, the Horse Guards' Staff are taking a little holiday—some of them, at least. The Duke of Cambridge, attended by Colonel Stephens, is at Kissingen, General Macdonald is in Scotland, General Whitmore is in Villegiatura, Sir F. Campbell is on the Moors. Sir Garnet Wolseley is busy with the German Armies.

The officer who is named as the probable successor to Major-General Conolly at Paris is Colonel A. Elliot, C.B., lately at the Horse Guards.

By placing General Sir T. Steele on the footing of Lieutenant-General on the Staff whilst in command in Ireland, the country effects the remarkable saving of the difference between the allowances of a full and of a lieutenant-general in command; and in the same way the pay and allowances of a Field-Marshal as Commander-in-Chief are saved in the case of the Duke of Cambridge, who is only "Field-Marshal-Commanding-in-Chief."

The vacancy among the colonels-commandant of the Royal Horse Artillery, caused by the death of General Sir John Bloomfield, has been given to General Sir Edward Warde, K.C.B. Sir Edward Warde served in the Crimean campaign of 1855, in command of the siege train before Sebastopol, and was present at the bombardments of April 9 and June 6 and 17 (medal with clasp, C.B., Officer of the Legion of Honor, 4th Class of the Medjidie, and Turkish medal). He joined the Army, May 19, 1828, and was appointed a colonel commandant, March 29, 1873.

The following officers have been selected to fill vacancies in the Royal Horse Artillery, and have been posted, viz.:—Major J. A. Tillard to E Battery B Brigade, in Afghanistan, vice G. F. Blackwood; Captain T. E. Disney to G Battery A Brigade, at Lucknow, vice H. S. Higginson; Captain W. F. de H. Curtis to Depôt Brigade, at Woolwich, vice G. R. Gambier, transferred to D Battery B Brigade, at Kurrachee, vice C. E. Beadnell; Lieutenants D. C. Dean-Pitt and W. A. Plant to E Battery B Brigade, in Afghanistan, vice H. Maclaine and E. G. Osborne; Lieutenant S. K. Mackenzie to E Battery A Brigade, at Peshawur, vice D. E. Dewar; and Lieutenant St. J. St. G. Ord to K Battery A Brigade, at Aldershot, vice A. W. Hanson.

Deputy-Surgeon-General S. H. Fasson, M.D., from principal medical officer in the West Indies, has been appointed principal medical officer at Aldershot, vice Surgeon-General G. A. F. Shelton, M.B., transferred to the staff in Whitehall Yard as chief of the Medical Branch, in succession to Surgeon-General W. Munro, M.D., C.B., appointed principal medical officer at Gibraltar; and Brigade-Surgeon J. Ogilvie, M.D., from acting principal medical officer at Portsmouth, has been appointed sanitary officer to the division at Aldershot, in place of Deputy-Surgeon-General H. T. Reade, V.C., who has been selected to succeed Dr. Fasson as principal medical officer in the West India command.

Colonel C. G. Arbuthnot, having returned to England from service in Afghanistan, entered upon his duties as deputy-adjutant-general of Royal Artillery at head-quarters from the 1st inst., in succession to Major-General R. P. Radcliffe, who took over the office of Inspector-General of Artillery from the same date.

The 24th Company Royal Engineers has been told off for duty in connection with the military ballooning experiments now being carried out at Aldershot. The company has been placed under command of Captain H. Elsdale, with Lieutenants J. Hare, W. F. N. Noel, and R. W. Anstruther, Captain J. H. Templer, Royal Edmonton Rifles Militia, being attached to the company for duty, to assist in the carrying out of the experiments.

There is no truth in the report as to the probable early retirement of Lord Gifford from the Army, consequent upon his appointment to the Colonial Service. His lordship is far too much attached to his profession to desire to leave it altogether, and it is scarcely likely that the War Office would put pressure on him to induce him to retire. It is certain that Lord Gifford has taken no steps yet to justify the rumours which are being circulated, and, so far as we can learn, there will be no objection raised at Head-quarters to his being seconded in his regiment, the 57th.

The revision of numbers of the Middlesex Rifle Volunteer regiments has now been approved by the Secretary of State for War, and will take effect from the 27th ult. Only two corps—the 11th (St. George's) and 49th (Post Office)—raised, it seems, any objection to the carrying-out of the War-Office scheme, and it has been intimated to these two corps that the Commander-in-Chief regrets that he has been unable to meet their wishes as to the position to be held by them in the Volunteer force of the county.

We learn from Maritzburg that Colonel Bellairs, C.B., is to be allowed to retain his appointment as colonel on the Staff commanding the troops in Natal and the Transvaal, for the usual period of five years, and has no intention of returning to England, as it was lately stated he was about to do.

Major G. A. Agnew, half-pay, late 30th Regiment, is to retain his appointment as deputy-assistant-adjutant and quartermaster-general for musketry at Dublin, to complete five years' service, notwithstanding his recent promotion to an unattached majority.

Major Sir G. Strahan, K.C.M.G., left England on Thursday for Cape Town, to relieve Sir Bartle Frere in the government of the Cape Colony. Captain Carlisle Greer, Royal Artillery, accompanied his Excellency as aide-de-camp. On being relieved at Cape Town by Sir Hercules Robinson, Sir George Strahan will proceed to Hobart Town to take up his appointment as the Governor of Tasmania.

We understand that the subscriptions towards the purchase of the "United Service Challenge Cup," principally from regiments of the Regular and Auxiliary Forces, have, up to the present, barely reached £150.

Major Wilkinson Shaw is, we learn, about to resign his post as Garrison Instructor at Aldershot, with a view to devoting himself to the private education of candidates for the Army. Introduced experimentally not many years ago, for the purpose of affording the means of technical training to regimental officers, the Garrison Instructors' Department has proved in all respects successful, and among other benefits which it has conferred upon the Army is that it has raised the tone of military instruction and, by contrast, illustrated the evils of the old "cramming" system. The garrison educational staff is composed exclusively of officers of the Staff College, and this suffices to ensure the possession on their part of the requisite knowledge; but the faculty of simply, attractively, and effectually imparting knowledge is a gift less easy to acquire than the knowledge itself, and this faculty Major Shaw possesses in an exceptional degree. His classes at Aldershot are always eagerly attended by officers of all ranks, and his admirable method of teaching the minor tactics by means of a war-game on modelled ground has been introduced in all our principal camps and garrisons. His retirement will be a loss to the Service, but a decided gain to those who, having sons to prepare for the Army, consider social and professional status an additional guarantee for successful education.

Lieutenant-Colonel F. J. Hutchinson, half-pay, late 64th Regiment, who has been for over seven years on the Garrison Instruction Staff, and has lately vacated his appointment is, like Major Wilkinson Shaw, about to lay by the sword in order to give the benefit of experience to those who may hereafter come forward as candidates for commissions in the Army. It certainly must be viewed as an encouraging sign for the British Army of the future, when officers of the standing and experience of Colonel Hutchinson and Major Shaw set aside their prospects, and add themselves to the already long list of Army tutors, and young military aspirants will have no cause to complain of a want of good instructors whilst such men are at hand to help them to pass the educational tests, which are now the sole qualification called for from those who are candidates for appointment to commissions.

Captain F. B. Knox, R.A., who has held since January 1, 1879, the appointment of aide-de-camp to Lieutenant-General Phillpotts, R.A., the inspector-general of artillery at head-quarters, has been appointed to the staff of Major-General Radcliffe, the new inspector-general, to complete five years' service on the Staff of the Army.

Lieutenant R, H. Elwes, Grenadier Guards, will shortly proceed to Maritzburg, to take up the appointment of aide-de-camp to Major-General Sir George P. Colley, K.C.S.I., Governor and Commander-in-Chief of Natal, for which he was selected before Sir George Colley left England.

Deputy-Surgeon-General W. A. Thomson, M.B., from the York District, has been appointed Principal Medical Officer in China, and left England on Thursday, *en route* to take up his duties.

The selection of Major-General Sir Michael Biddulph, K.C.B., for the divisional command in India, about to become vacant by the return of Lieutenant-General Sir F. F. Maude, V.C., K.C.B., cannot fail to meet with the approval of all who know the officer. General Biddulph commanded a brigade of the Bengal Army for five years, performing during the latter portion of his time most valuable service in command of a column of the Afghan expedition, and it is principally in recognition of the ability he displayed whilst employed in the field that he has been chosen to return to India in the higher capacity. There are other grounds, too, on which we cannot but approve of the choice which has been made. The Artillery have felt for some time past that they have been unfairly treated in the matter of General's commands. With Sir Francis Roberts occupying a foremost position in Afghanistan and Major-Generals Biddulph and Macintyre filling divisional commands, the "gunners" will become convinced, no doubt, that so far as India goes, there is no disposition shown to deny them their fair share of the rewards open to those officers who prove their fitness for them.

The Navy.

ADMIRALTY, August 28, 1880.

Staff Surgeon Charles Strickland has been promoted to the rank of Fleet Surgeon in her Majesty's Fleet, with seniority of the 22nd inst.

ADMIRALTY, August 31, 1880.

ROYAL NAVAL ARTILLERY VOLUNTEERS.—London Brigade: The Rev. Charles Richard Dawes, B.A., to be hon. Chaplain (Aug. 31).

APPOINTMENTS.

Staff Captain—Joseph G. Dathan, to Sheerness Yard, as Master-Attendant, vice G. L. Carr, retired.

Commander—Hon. A. C. Littleton, to the Rambler, when commissioned.

Staff Commanders—Charles G. Johnston, to Portsmouth Yard as Assistant-Attendant Master, vice Dathan; John Phillips, to the Minotaur; William W. Vine, to the Nankin.

Lieutenants—Charles G. Pritchard, to the Excellent (additional, for gunnery practice); Arthur W. Carter, to the Valorous; Alfred L. Winsloe, to the Inconstant, as flag-lieutenant to Rear-Admiral the Earl of Clanwilliam.

Navigating Lieutenant—C. R. H. Robinson, to the Duke of Wellington (additional, for temporary service).

Midshipmen—Edmund H. Thruston, to the Triumph; Charles de la B. Granville, to the Achilles; Hugh H. D. Tothill, to the Invincible.

Naval Cadets—Herbert J. D. Millar, to the Triumph; Harold C. Scroggs and Henry F. Oliver, to the Agincourt; John Nicholas, to the Minotaur; Price V. Lewes, Cecil S. Hickley, John S. Luard, and Frederick C. Montresor, to the Achilles; Algernon B. E. Greville and John E. P. Grenfell, to the Alexandra; Walter Lumsden, Edward A. Salwey, Albert E. Poland, and Robert A. Dillon, to the Invincible.

Chaplain—Rev. A. W. Mayow, to the Achilles.

Naval Instructor—H. C. Binmore, to the Achilles.

Fleet Surgeon—Gerald Molloy, to the Achilles, when recommissioned on Sept. 1.

Staff Surgeons—John Lamber, to the Tamar; E. W. Doyle, to the Coquette; James Dunlop, to the Orwell (in lieu of a surgeon).

Paymaster—F. Lima, to the Achilles.

Chief Engineer—J. M'Gough, to the Achilles.

Assistant-Paymasters—W. G. E. Penfold, to be secretary to the Commodore at Jamaica; John K. Moss, to the Inconstant (as Secretary's Clerk); R. P. Hawkshaw, to the Penelope.

Surgeons—J. T. Henwood and Arthur W. May, to the Achilles; Francis A. Jeans, to the Minotaur.

Engineers—R. Pattison, W. S. Stibling, G. F. Paterson, J. T. Robinson, to the Achilles.

Assistant-Engineer—Walter J. Featherstone, to the Achilles.

Clerks—Edwin C. Petch, G. Whitcroft (additional, in lieu of an assistant-clerk), and W. L. Davy, to the Achilles; W. J. Willoughby, to the Tamar.

Gunners—James Watson, to the Northampton; Francis R. Boland, to the Indus, for Mutine; Benjamin J. Blower, to the Indus, for Espiegle.

ACHILLES, Capt. A. C. F. Heneage, was paid off in Keyham Basin on Tuesday, and the crew granted leave of absence. The ship was recommissioned on Wednesday for further service, under the command of Capt. Kelly, of the Newcastle. About 60 Royal Marines of the Chatham division joined the Achilles on Wednesday, the strength of the Plymouth division having been so weakened by recent drafts, not allowing of such a contingent being spared for the Achilles. A sufficient number would not be left for harbour service. The Chatham men were only warned the previous night that they would be required.

AGINCOURT, Capt. Murray. Rear-Admiral L. E. H. Somerset, second-in-command of the Channel Squadron, having proceeded on leave of absence for fourteen days, his flag was struck on board the Agincourt in Devonport Yard on Tuesday.

ALEXANDRA, Capt. Lord Walter T. Kerr, bearing the flag of Vice-Admiral Sir F. Beauchamp Seymour, K.C.B., left Palermo on Sept. 1 for Ragusa, having in company the Téméraire, Condor, and Coquette.

ASIA, Capt. W. Codrington, C.B., who has been appointed to the command of the Steam Reserve at Portsmouth, entered the Navy in 1847, and served as mate in the Excellent from Nov. 14, 1853, to April 18, 1854, when he was appointed to the Eurydice, fitting at Portsmouth for the North America and West Indies stations; and on Oct. 31, 1855, was promoted to lieut. As lieut. he served in the Cambridge from March 20, 1857, to Feb. 15, 1858, when he joined the Euryalus, Capt. J. W. Tarleton, C.B., and served in the Mediterranean, on particular service, and with the Channel Squadron, until the close of 1860. On Dec. 20 of the year last named, he was appointed to the Narcissus, fitting for the flag of Sir Baldwin W. Walker, Bart., K.C.B., on the Cape of Good Hope and Africa station, and was paid off Aug. 16, 1864, his promotion to the rank of com. being dated from the 29th of the previous month. On Sept. 10 of the same year he was appointed to the Warrior, attached to the Channel Squadron, and on Nov. 1 was transferred to the Victoria, fitting at Portsmouth as the flagship on the Mediterranean station, where he remained until paid off in July, 1867. On the 13th of the following November he was appointed to the Caledonia, and again served in the Mediterranean, until posted, June 1, 1869. From Dec. 1, 1870, until paid off, Oct. 8, 1872, he commanded the Narcissus, flagship of the Detached Squadron.

BACCHANTE, Capt. Lord Charles Scott, is ordered to be out of the dockyard hands at Portsmouth by Sept. 8, when she will leave for Vigo, and await the arrival of the Flying Squadron.

BRITANNIA. Capt. Richard Wells, who has succeeded Capt. Henry Fairfax, C.B., in the command of this ship, entered the Navy in 1846, and served as mate in the Arrogant, Capt. Hastings R. Yelverton in the Baltic, from Feb. 7, 1854, until Dec. 16 following, when he was transferred to the Exmouth, Capt. the Hon. Fred. Pelham, at Devonport, and was promoted to lieut., Feb. 3, 1855, into the Pembroke, Capt. George H. Seymour, fitting for the Baltic. On May 15, 1856, he was transferred to the Duke of Wellington, Capt. Henry Caldwell, C.B., flagship in the Baltic of the Hon. Sir Richard S. Dundas, and on May 1, 1857, removed into the Boscawen, Capt. Richard A. Powell, C.B., fitting for the Cape of Good Hope, as flagship of the Hon. Sir Frederick W. Grey, and returned to England, and was paid off in September, 1860. On Nov. 16 following, he was appointed to the Immortalité, Capt. G. Hancock, fitting for the West Indies and North America, and was promoted from her to the rank of com., Dec. 12, 1863. On April 13, 1865, he was appointed 2nd capt. in the Narcissus, Capt. Colin A. Campbell, fitting for the flag on the south-east coast of America, of Rear-Admiral the Hon. C. G. J. B. Elliot, C.B., and was posted July 6, 1866. On Sept. 1, 1869, he recommissioned the Royal Alfred, flagship of Vice-Admiral G. Wellesley, C.B., on the North America and West Indies station, and subsequently visited Barbadoes, Trinidad, Grenada, St. Vincent, Porto Rico, Port-au-Prince, Port Royal, Havannah, Tobago, Martinique, Antigua, St. Thomas's, St. Domingo, Nassau, Bermuda, &c. During the cruise, a series of readings were given, high and low, from the admiral (who originated the idea) downwards, contributing their aid. In May, 1870, the Royal Alfred was at Bermuda, and afterwards again visited Halifax, where, on Nov. 4, 1870, Vice-Admiral E. G. Fanshawe, C.B., hoisted his flag on board, he having been appointed commander-in-chief on Sept. 15; and Capt. H. F. Nicholson also succeeded Capt. Wells. He was afterwards, from Oct. 25, 1870, to Sept. 1871, flag-capt. to Vice-Admiral G. G. Wellesley, C.B., Commander-in-Chief of the Channel Squadron, in the Minotaur; and on Oct. 14, 1873, was again appointed flag-capt. to Admiral G. G. Wellesley, C.B., in the Bellerophon, fitting for the West Indies, where he remained until Feb. 1, 1876. He was subsequently employed in the Mediterranean, under the flag of Rear-Admiral Sir J. E. Commerell, V.C., from July 10, 1877, until Dec. 1878.

BRUISER, Lieut.-Com. T. E. Maxwell, recently returned from Ireland, has been moved to Keyham for repairs.

CLEOPATRA, Capt. F. Durrant. "This ship does not bid fair to become a 'comfortable' ship, as far as the chief petty officers are concerned, on account of the system of messing adopted. The admission of the ship's steward and his assistant into the master-at-arms' mess, to the exclusion of its rightful occupiers—the naval schoolmaster and writer—is in direct opposition to article 665 of the Queen's Regulations and Admiralty Instructions. The schoolmaster and writer have to take refuge in an open broadside mess, with their inferiors in rank."—*Western Morning News.*

CONDOR, Com. E. F. Day, left Palermo on Sept. 1, in company with the flag.

CONSTANCE, the last of the vessels launched at Chatham Dockyard, is now being prepared for sea with all despatch. Additional hands have been set to work to get her ready. It was at first thought she would be fitted as a flagship, but it is now understood that she will only be fitted as an ordinary vessel of her class.

COQUETTE, Lieut.-Com. E. G. Festing, left Palermo on Sept. 1, in company with the flag.

CROCODILE, Capt. F. Proby Doughty, will not, it is thought, make any voyages to the East this season, but the Euphrates will probably be ready for a second trip in the middle of October.

DIDO, Capt. Compton E. Domville, intends blockading the port of Brasson on Sept. 1, unless the natives restored the oil belonging to the British vessel Cypriote, which went ashore in Brass River some time ago, and whose cargo was plundered by the natives.

FALCON, Com. Bouverie F. Clark, arrived at Malta last week from Syracuse.

HECLA, Capt. Morgan Singer, has left Malta for Cyprus.

HIMALAYA, Capt. Harry W. Brent, left Suez on Sunday for India.

INCONSTANT, Capt. Chas. C. P. Fitz-Gerald, commissioned to carry the flag of Rear-Admiral the Right Hon. the Earl of Clanwilliam, C.B., is being fitted out with all despatch. Nearly 150 Bluejackets left the Royal Naval Barracks, Sheerness, on Monday, in charge of Lieut. Scott, and proceeded by train to Portsmouth. They are to form part of this ship's complement.

INFLEXIBLE. On Saturday the second of the 80-ton guns was lifted on board, and placed in position in the after-turret. The work was performed in about twenty minutes, and without a hitch of any kind. The *Hampshire Telegraph* says:—"The turret was rotated to bring the slides nearer the side of the ship, and the whole operation was completed in 22½ minutes, or 12½ minutes less time than on the previous day. The draught of the ship on being undocked was 21 ft. 10 in. aft, and 18 ft. 11 in. forward. After the first gun was placed on board the draught was increased to 22 ft. 2 in. aft, and 19 ft. 1½ in. forward, while the second gun brought it down to 22 ft. 5 in. and 19 ft. 2½ in. The two guns brought the ship down 7 in. by the stern, which was just about what was expected, as it had been calculated that 47 tons would sink the ship an inch. The heel of the ship was 3 in. in 7 ft., her total cant being about 1½ degrees. Though the guns are mounted side by side, the arrangement differs in other respects from that of the Thunderer, and may be said to be a development of the system which was introduced by Sir William Armstrong's firm in the arming of the Alpha type of gunboats for the Chinese Government. Hitherto it has been the practice to place all heavy guns upon an iron structure, called the carriage, on which they are supported by the trunnions. This carriage bears, besides the gun, the mechanism for elevating and depressing the gun and for tripping, and also in part the mechanism for checking recoil. In the system adopted in the Inflexible, however, the bold step has been taken of dispensing with a carriage, each gun being supported on three points. The trunnions rest on brass blocks, which slide on fixed beams bolted down to the floor of the turret, while the breech rests on a third block, sliding like the others between guides upon a beam or table. Behind each of the trunnion-blocks are two hydraulic presses for checking recoil and running the gun out, and a third press is fixed vertically beneath the beam on which the breech rests, and by means of this the muzzle of the gun, which pivots on its trunnions with a large preponderance towards the breech, can be easily raised or lowered. It is believed that two months will elapse before the ship will be ready for the trial of her guns."

INVINCIBLE, Capt. the Hon. Edmund R. Freemantle, C.B., is refitting at Malta. She is ordered to rejoin the flag of the Commander-in-Chief without delay.

IRIS, Capt. E. H. Seymour, remained at Palermo on Sept. 1.

JACKAL, Lieut.-Com. the Hon. R. Bingham. We called attention last week to the efforts of a Wick paper to reprimand the Jackal for not performing her duties. This week we notice that the editor is in a calmer frame of mind, and reports that the Jackal rendered some assistance to the becalmed herring fleet, but calls attention to the great desirableness of the instructions to commanders of Government vessels detailed for fishery service being more accurately defined than they appear to be. The editor evidently ought to be given a seat at the Admiralty.

JUMNA, Capt. George Parsons, arrived at Malta on Tuesday with 80 officers and 923 men of the Rifles, &c. After embarking two officers and 185 men of the 61st Regt., she proceeded for Bombay.

LONDON, Capt. Brownrigg. Notice is given of the distribution of the slave bounty awarded for 12 slaves, captured on March 7, 1879, by the London. The following are the shares due:—Flag, £1 15s. 2d.; captain, £5 2s. 2d.; 2nd class, 16s. 5d.; 3rd class, 14s. 2d.; 4th class, 9s. 4d.; 5th class, 5s. 7d.; 6th class, 4s. 8d.; 7th class, 3s. 3d.; 8th class, 1s. 11d.; 9th class, 11d.; 10th class, 5d. Also of the distribution of the tonnage bounty awarded for the slave-dhow Chuni Kunga, captured on April 4, 1879. The following are the shares due:—Flag, £12 16s. 9d.; captain, £37 4s. 7d.; 2nd class, £6 0s. 2d.; 3rd class, £5 3s.; 4th class, £3 8s. 9d.; 5th class, £2 1s. 2d.; 6th class, £1 14s. 3d.; 7th class, £1 4s.; 8th class, 13s. 9d.; 9th class, 6s. 10d.; 10th class, 3s. 5d. Also of the distribution of the tonnage bounty awarded for the slave-dhow, name unknown, captured on April 6, 1879. The following are the shares due to an individual in the several classes:—Flag, £19 6s. 10d.; captain, £56 1s. 10d.; 2nd class, £9 0s. 8d.; 3rd class, £7 14s. 11d.; 4th class, £5 3s. 3d.; 5th class, £3 2s.; 6th class, £2 11s. 7d.; 7th class, £1 16s. 2d.; 8th class, £1 0s. 8d.; 9th class. 10s. 3d.; 10th class, 5s. 1d. And of the distribution of the tonnage bounty awarded for the slave-dhow, name unknown, captured on April 9, 1879. The following are the shares due:—Flag, £18 6s. 8d.; captain, £53 3s. 7d.; 2nd class, £8 11s. 4d.; 3rd class, £7 6s. 11d.; 4th class, £4 17s. 11d.; 5th class, £2 18s. 10d.; 6th class, £2 8s. 11d.; 7th class, £1 14s. 3d.; 8th class, 19s. 7d.; 9th class, 9s. 9d.; 10th class, 4s. 10d. The distribution on all the above commenced yesterday in the prize branch of the Department of the Accountant-General of the Navy, New Street, Spring Gardens, S.W.

MALABAR, Capt. John F. G. Grant, arrived at Port Said on Monday.

MARTIN, Lieut.-Com. Bromley, arrived in Portsmouth harbour on Monday from the westward.

MINOTAUR, Capt. H. Rawson, flagship of Vice-Admiral Arthur Hood, C.B. The *Hampshire Telegraph* correspondent is "surprised to hear that a slight attempt at starving a man into submission has been perpetrated on board the flagship of the Channel Squadron. A man who was confined in the cells of that ship for his unruly conduct proved, like Rob Roy, to be "not yet subdued," for he positively refused to perform the oakum-picking task imposed upon him. His insubordidate conduct was reported, and the commanding officer directed that he should be subjected to forty-eight hours of Dr. Tanner's experiences, on the ground that if he would not do any work he should not have any food. There is no doubt that this order was an improper one, and entirely unprovided for in the code of naval punishments approved by the Admiralty, and as there has been a little stir about the matter, it is not at all likely that the officer of an inventive turn of mind as regards punishments will try any more experiments, but will comply with the table of summary punishments compiled for the use of the Fleet."

NORTHAMPTON, Capt. John A. Fisher, bearing the flag of Vice-Admiral Sir L. M'Clintock, left Halifax on Friday last on a cruise to Quebec, where he is timed to arrive on Sept. 1, leaving again on Sept. 9, arriving at St. John's, N.B., on the 16th, leaving on the 20th, and returning to Halifax on Sept. 26.

NORTHUMBERLAND, Capt. H. R. Wratislaw, was docked in Keyham Yard on Tuesday, to make good defects.

OSBORNE, Com. Lord Charles Beresford, is to be prepared at Portsmouth to convey the Princess of Wales to Copenhagen.

RALEIGH, Capt. Charles T. Jago, visited Amsterdam Island on her passage to Australia. Lieuts. C. E. Gissing and J. B. Hay landed at a point where it was found practicable to climb the cliffs, when, leaving the boats in charge of Sub-Lieut. E. B. T. Hall, they proceeded to explore the island, keeping at a distance of about 700 yards from the cliffs. The following extract from Lieut. Gissing's report will be of interest to our readers:—"The land rises gradually from the cliffs to the highest central peak, which is 2,760 ft. high. On the side of the hill were several small extinct craters, and higher up larger ones, which we had not time to visit. After about a mile of this walking we climbed up one of these small extinct craters, and found on the top of it a cairn of loose scoriæ stones, which we examined to see if any records were enclosed in or buried beneath it, but, finding nothing, we rebuilt it. During our walk we frequently came across footprints of cattle, but we did not see any. After leaving this cairn, we directed our steps towards Hosken Point. From here we saw the flagstaff which had been seen before landing from the ship, to which we walked, and found, about 50 yards to the north of it, a small hut, about 7 ft. high, 8 ft. long, and 6 ft. wide, built of stout poles driven into the ground, thatched on the roof and sides with dry grass having no door, but a piece of matting substituted for it. Outside were a miscellaneous collection of empty casks, a wooden tub, bucket, iron hoops, a large glass jar covered with wicker-work, containing water, some iron staples, ringbolts, feathers of seabirds, empty eggshells, also of seabirds, empty bottles, &c. On examining the inside of the hut, we found three bunks, with a narrow space in the centre. Below the hut, on the rocks, was an old rotten whaleboat. North of this hut, and about 20 yards from it, was a larger one, about 30 ft. long by 14 ft. across. On crawling inside to examine the interior, we found it contained a boat, bottom up, in very good repair, covered with pitch, evidently to preserve it against the return of its owners; also the oars belonging to it, a quantity of dried fish, some wooden cases partially filled with dried fish, some casks, iron hoops, and a miscellaneous collection of small gear belonging to a fishing boat. On coming outside the boathouse, we found carved on the rock in Roman capital letters, '1880. Enault. Etienne. A L'Age, 22.' On some rocks between the boat and the old whaler were the following, also in Roman capitals, 'Louis Dugaw, L. Edward, 1880. Ducain Julien. A. N. 1880. Mulot.' The position of the hut is about 50 yards from the shore, which here slopes down conveniently to the water, the rocks forming a natural pier, over which the surf was breaking heavily. On this natural pier, which extended out about thirty yards, were two iron davits let into the rock, and evidently used in fine weather for hoisting up a boat, also some iron crutches, evidently for supporting a planked gangway. About fifty yards above the hut was a wooden cross, near which was a small cave, or natural well of dripping water. About fifty yards inland of the flagstaff was the following inscription, cut on a slab of rock, 'Daniel Low departed this life June 13, A.E., A.D. 1803.' The inscription was also in Roman capitals. From all appearances, we came to the conclusion that there were no signs of any shipwrecked people having been there; but on the other hand, there was every indication of recent habitation by fishermen who, it would appear, both from the inscriptions on the rocks and the fact of so good a boat being left behind, and so much useful gear belonging to their trade, make periodical visits during the fishing season. During our search, we could find nothing of the bottle recording the visit of the late Comdre. James Goodenough, R.N., C.B., C.M.G., on Aug. 30, 1873, in H.M.S. Pearl. The hut mentioned by him we believe to be the one we term 'the boathouse.' It contains no furniture now, neither boxes nor partitions, as mentioned by him. The cabbage-garden we found about twenty yards inland of the hut, but quite overgrown with thick grass. A few cabbages still remain, having grown into small bushes, with stems several inches thick. Before leaving, we deposited in a conspicuous place a bottle containing a statement of our visit to the island, by order of the Admiralty, adding thereto in pencil that the hut and boathouse had been visited by Lieuts. Gissing and Hay, of her Majesty's ship Raleigh; and we had not found the statement of the visit of her Majesty's ship Pearl in 1873, nor the box containing seeds or books. Owing to the shortness of time at our disposal, we were unable to obtain many specimens of plants; but we found that the island was covered largely with sedge and coarse grass, and the soil was peaty in its nature, with abundance of water. Some few ferns were collected of the genus Polypodium; the shrubs were of the order Myrtaceæ, but few in number, growing only here and there in the hollows. The cones of the craters are extremely well marked and perfect, but all of small size, continuing in some places in ridges running from the central peak down towards the sea. Our walk back (owing to our finding a small path along the edge of the cliffs, which enabled us to avoid the roughest of the ground) was not nearly so laborious an undertaking as going there. The getting over the cliff and into the boat were done just in time to enable us to reach the ship before dark."

SERAPIS, Capt. Guy O. Twiss, went out of Portsmouth Harbour on Wednesday for trial of machinery. It is expected that the Serapis will be ready for sea about Oct. 3, when she will leave for India with drafts.

SUPERB. Capt. Thomas Le Hunte Ward, who has been appointed to the command of this ship, is superintending the completion of her fittings at Chatham. A large number of men are employed upon the vessel, many of them working overtime, in order to get her out of hand.

TAMAR, Capt. T. Royse, left Gibraltar on Sunday afternoon for Plymouth and Portsmouth, having on board the late crew of the Condor.

TÉMÉRAIRE, Capt. the Hon. Walter C. Carpenter, left Palermo on Sept. 1, in company with the flag.

THUNDERER, Capt. Philip Colomb, remained at Palermo on Sept. 1.

VALOROUS, Capt. Morant, arrived in Plymouth Sound early last Sunday morning, from Queenstown, with the Shamrock, water tank, in tow. She was taken into harbour in the forenoon.

VICTORIA AND ALBERT, Capt. Frank Thompson, is to be held in readiness to proceed to Flushing on Sept. 13 or 14.

VULTURE, Com. J. Eliot Pringle. It is officially announced that preparations are now being made for the intended distribution of the amount awarded to the officers and crew of this ship for services against pirates on Oct. 11, 1878, and that all persons having any just and legal claim are requested to transmit such particulars to the Registrar of the Admiralty Division of her Majesty's High Court of Justice.

The Ranger, of the U.S. Navy, which has been under repair at the Mare Island Navy Yard since July 1, will be placed in commission in October. The vessel will be ordered to surveying duty, to complete the work on which the Tuscarora was engaged for over two years, in surveying along the Pacific coast of Mexico and Central America. It is the intention of the Navy Department to order all of the officers (who are available) who were on duty on board the Tuscarora on her last cruise to do duty on board the Ranger on account of their familiarity with the work and with the coast.—*Army and Navy Register*, Washington.

THE STATE OF THE NAVY.

On Tuesday Admiral Sir J. Hay, Bart., called attention in Parliament to the state of the ironclad ships of the Navy, stating that we were not, in regard to this, in that position which we ought to occupy if we were to be considered the first Naval Power in the world. He had in the last Parliament endeavoured to persuade the House and his right hon. friend (Mr. W. H. Smith) that the present condition of the Navy was not in accordance with our position, and had his right hon. friend remained in power he had hoped to have been able to convince him of the fact. There were five great lines of communication for our commerce which had to be protected, and which must be protected, not only against ironclads, but against privateers and smaller cruisers. If it was to be said that we were not going to war, he should reply that there was no use in maintaining the Navy at all. The line to the East through the Mediterranean carried annually £150,000,000 of commerce; that across the Atlantic, round the Cape, and round Cape Horn to the Pacific, carried £62,000,000; that to the West Indies and Panama, £20,000,000: that to North America and Canada, £110,000,000; and to the Baltic, £80,000.000. Thus there was a total of some £422,000,000 a year of our commerce which had to be protected on these various lines of communication. For this they expended an insurance of £10,000,000 in the maintenance of the Navy. He only asked for a slight increase on this sum. Competent authorities had computed that we required 62 efficient ironclads to properly protect all these lines, but while the *Navy List* contained the names of 71 ironclads, he should show that only 31 of them were at this moment fit for sea-going purposes. We had six home harbour-defence ships, seven efficient ships repairing, and eight building. From the 71 ships 41 had thus to be deducted, leaving 30 sea-going ships of all kinds. Of these we had in the Channel, on the China, Pacific, and North-American stations 15 now in commission; and these, with 15 first-class reserve ships in the Coastguard, made 30 ships ready for going to sea. There were seven ironclads repairing and eight building. Admitting that the seven ships repairing were available, that we were never to have ships under repair, and that the smallest number of ships necessary was 62, there were 17 of that number not yet begun. After all, what was the cost of 17 ships to a great country like this? If there was the necessity for our ironclads at all, we ought to have a sufficient number to protect the £422,000,000 worth of commerce which would be exposed to risk in the event of war. He entreated the House and the country to remember that although we had a strong Navy and well-disciplined men, we had not enough of ironclads to perform the duties they were expected to perform in the event of European war. The 17 additional ships which he contended were necessary for the purpose could be built in two years at a cost of some £5,000,000 added to the Estimates for the two years, which would not raise the Navy Estimates to the amount at which the Army Estimates stood in their normal position. Whether the ships cost five millions or six, it would matter very little to this country, so long as our Fleet was duly completed, and ready and efficient for the service required of it, which he hoped it would be our endeavour to make it. Mr. S. Lefevre presumed if we waited till next Session, the demands of the right hon. and gallant gentleman would probably be found to have become modified. It had already been pointed out, oftener than once, on the part of the Admiralty, that the hasty building of an enormous quantity of ironclads would not be a wise course to adopt. Some ten years ago the Warrior and the Black Prince were regarded as the final type of the vessels we ought to have, and it was recommended that 40 should be built of the same kind. If that had been done what would have been the result? Those ships were practically obsolete as vessels of the first type, being unfit to take their place in the first rank of the fighting navy. The consequence would have been that we should ere now have had equally strong arguments advanced in favour of reconstructing our fleet to the same degree. The experience we had had in that respect rendered it necessary that we should be extremely cautious in the future. He did not think we had yet reached the best type of ironclad. There never had been greater difficulty than there was at the present moment in deciding what the type of ironclad should be. The race of guns and armour had been going on at a greater rate than before, and there were greater difficulties introduced as to the value of the torpedo, the question of speed, and other matters, so that it was a question whether it might not be necessary to discard a great deal of the armour in favour of speed and torpedoes. These were not arguments against the building of any ironclads at all; but they were arguments against the hasty building of any great number of ships as was recommended by the right honourable and gallant gentleman. We had 26 ironclads at this moment in commission. We had in the first reserve larger vessels than he ever remembered. We had at this moment in the first reserve seven vessels of the best class actually ready. We had four other vessels which were repairing, three of which—the Repulse, the Sultan, and the Swiftsure—would be complete next month; whilst the fourth—the Invincible—was expected to be finished by the end of the year. We had altogether 12 such ships to be added to the 26 in commission, making a total of 38. We had three vessels of another type for coast defence in India and the Colonies. We had six ironclads at Bermuda. Then we had at this moment six vessels building in the dockyards; two of which would be completed next year—the Ajax and the Agamemnon. So that he entirely disputed the figures of the right hon. and gallant member, and it was not the fact that of 70 vessels we had only 30 which were efficient. A much larger number were efficient as ironclads and available for use in the Navy. Our Navy was capable of meeting any hostile combination of the fleets of other countries that could possibly be brought against us. The policy of the Government would be to hasten on as much as possible building of the vessels which were actually in course of construction. Mr. W. H. Smith said the statement of the Secretary to the Admiralty that the present reserve of ironclads was superior to any which had existed within his knowledge for many years ought to be satisfactory to the House and the country, as well as reassuring, to some extent, to his right hon. and gallant friend (Sir J. Hay). The hon. gentleman (Mr. Shaw-Lefevre) had not exaggerated the difficulty that any Board of Admiralty felt in determining the type of ship which, on the whole, would be the most powerful and most useful for the service. That was a difficulty experienced during the last three or four years by the late Government, who came to a decision as to the best ship for the Navy, according to their knowledge of the circumstances, instead of rushing into a programme for building a large number of vessels of a particular type. The difficulty was evidenced by the fact that, in the present day, they had to deal with theoretic rather practical knowledge, gained by experiment on shore, and as the result of the best judgment of sailors and artificers. He concurred entirely as to the expediency of finishing a ship as quickly as possible after the design had once been settled, for nothing was so injurious as to keep a ship on the stocks for a very long time, and to change its armament, possibly its armour, in the course of the three or four years during which it might be building. Another important consideration was to have a Navy which, for the time being, was capable of discharging the duties which devolved upon this country, of protecting its trade and commerce in different parts of the world. His right hon. friend had spoken of the necessity of having 62 ironclads, but for the purposes just mentioned as many as 300 or 400 vessels were necessary, including fast cruisers and small vessels. For his part, he attached great importance to the provision of a sufficient supply of fast cruisers, because, in case of war, there would be greater danger from the cruisers than from the ironclad battle-ships of foreign countries. The unarmoured fleet ought to be maintained to the fullest extent, and he should like to see it increased in strength and power. No doubt we were falling a little behind, as compared with other countries. At the same time, he strongly deprecated comparisons between the navies of France, Russia, and Germany with our own country, and on that point, therefore, he cordially concurred with the views of the Secretary to the Admiralty. Capt. Price said the proposal of his right hon. friend (Sir J. Hay), that the Navy should be reinforced by several ironclads, had been met by the objection, from the Secretary to the Admiralty, and the late First Lord, that the Board had not decided upon the proper type of ironclad. That was a most dangerous argument, for its logical conclusion was that, as they had not yet arrived at the type of line-of-battle ship, they ought to build none at all. They could never arrive at finality in a matter of this kind. Comparison between this and foreign countries had been deprecated, but as a matter of fact, such a comparison would be made outside the House. With regard to ordnance, he some time ago called attention to that subject, and it was clear that the ordnance put into our ships from the Woolwich Arsenal was not altogether satisfactory. There had, no doubt, been a change of opinion as well on the part of the present and the late Government, but there was also a change in the Arsenal itself. He was most anxious an independent inquiry should be instituted into this question by an impartial Committee, and he hoped such a Committee would be appointed. Mr. Brassey said it was the intention of the Government to order a certain number of 6-in. guns for the Navy without delay.

SUPPOSED RELICS OF THE ATALANTA.

The barque Queen of the Fleet, from Ichaboe, bound to Leith, called off Falmouth on Tuesday. The master reported that on Aug. 4, in lat. 37° 11′ N., long. 38° 11′ W., he picked up a yellow-metal canister, apparently air-tight, about four feet long and ten inches in diameter, and heavily bruised. One side was painted white. He examined it, but found no marks. On opening it he saw nothing but a little sea-water. He was of opinion it belonged to a life-boat, and had not been long in the water. As it was picked up near Flores, at which island a large piece of wreck had been washed on shore on the day previously to this canister being picked up, it is thought that it might be a relic of the Atalanta. The authorities at the Admiralty, it is stated, attach little importance to the statement of Lloyd's agent at Flores, that a large piece of a wreck, with gunports shut up inside, which was washed ashore on the southern side of the island, belonged to the missing training-ship Atalanta. It is regarded as improbable that the Atalanta would go to pieces in the way indicated, or that the wreckage would be washed up in the locality mentioned in the condition described.

The under-named men have been awarded the medal for long service and good conduct:—H. Allen, bandsman, and J. Davey, quartermaster, of the Duke of Wellington; E. Chalmers, carpenter's mate, of the Excellent; H. Mildren, leading stoker, of the Royal yacht Osborne; R. Richards, ship's steward, of the Crocodile; P. Willington, acting coxswain, and J. Giddy, stoker, of the Indus; R. Hill, armourer, and C. H. Price, gunner's mate, of the Cambridge; the following belonging to the Coastguard—B. Burr, J. Ahearn, J. Randall, W. J. Neel, and J. Hare, boatmen; R. Cutler, W. Shephard, E. T. Broad, G. Lewis, E. Fox, and H. Curnow, commissioned boatmen; J. Lynch, carpenter, of the Revenge; J. Beattie, leading stoker, and S. L. Manning, armourer, of the Victor Emmanuel; J. Crow, head krooman, of the Pioneer; W. Powell, private, of 38th Company R.M.L.I., and H. Bohling, chief boatswain's mate, of the Frolic.

ROWLAND'S ODONTO is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that ROWLAND'S ODONTO will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

THE NAVAL DEMONSTRATION.

Earl Granville, in reply to a question asked by Lord Stanley of Alderley, on Monday last, in the House of Lords, made the following important statement. Earl Granville said:—"Three weeks ago I stated to your Lordships' House the steps which the Powers of Europe had taken in order to accelerate the settlement of the frontier international questions, and also of the reforms both in Europe and Asia, to prevent a catastrophe which might be very dangerous not only to Turkey, but to Europe. In answer to the question of the noble lord, I will state very briefly what has occurred since that time. With regard to the Montenegrin frontier, in answer to the Collective Note in which the Powers stated to the Porte that they insisted upon either the carrying-out of the Corti arrangement (which had failed two months ago, in consequence of the neglect of the Turkish Government to carry out the conditions of transfer), or on the cession of the Dulcigno district, the Porte gave two answers, one verbal and the other in writing. These answers were not in the same words, and it is not yet clear that they are to the same effect. The Powers have under consideration the rejoinder which they will make, and have in the meantime ordered a certain number of their vessels to go to Ragusa, which port has been thrown open to them by the Austrian Government, as being within an easy distance of the coast which is to be ceded to Montenegro. Instructions have been prepared for the Admiral in command of our contingent and communicated to the Powers. The correspondence upon the Montenegrin question will be presented before the close of the Session, but the instructions to the Admiral cannot, for obvious reasons, be published at present." In reference to the instructions sent to Admiral Sir B. Seymour, it is said that some of the Powers have proposed modifications, of a nature which shows their repugnance to any extreme measures in the way of coercion. The combined squadron will, according to latest accounts, be represented by her Majesty's ships Alexandra and Téméraire; the Italian Palestro and Venezia; the Austrian Prinz Eugen and Custozza; the French Friedland and Suffren; and the Russian Askold, Svetlana, and Elborus. Of the above vessels the Alexandra is the most powerful broadside ironclad, being of 9,492 tons' displacement. The Téméraire, of 1,000 tons' less displacement, is armed with four 25-ton and four 18-ton guns. After the English ships, the French vessels will be the most powerful, the Friedland being an ironclad of 8,823 tons' displacement, armed with eight 27-centimetre (23-ton) and eight 24-centimetre (15-ton) guns; while the Suffren, of 7,600 tons' displacement, carries four 27-centimetre and four 24-centimetre pieces, both vessels being of the broadside type. Next comes the Austrian ironclad Custozza, a broadside ship of 7,060 tons' displacement, armed with six 28-centimetre (22-ton) Krupp guns; but her consort, the Prinz Eugen, is a small vessel of 3,550 tons only, armed with eight 21-centimetre (8-ton) Krupp pieces. The two Italian ironclads are ships of 5,700 tons' displacement, the Palestro armed with one 25-ton gun and four 18-ton guns, and the Roma. The Russian contingent of the squadron will consist of unarmoured vessels; while the Victoria, the ship which will represent the German navy, is an unarmoured corvette.

NAVAL AND MARINE RIFLE COMPETITION.

The third rifle competition this year between the Royal Marine Artillery and H.M.S. Excellent took place last Wednesday afternoon at Whale Island, the range of the Excellent, and ended in a most complete victory to the Navy. The weather was fine, with a light breeze blowing across the range from the left, and there can be no doubt that the Marines were at a great disadvantage from not knowing the range, which is an extremely difficult one. This victory leaves the Excellent winners of two matches out of the three this year. The scores were as follows:—

Excellent.	Total.	R.M.A.	Total.
Lieut. Lloyd	85	Serjt. Collins	82
Lieut. Nicolls	84	Lieut. Eastman	80
A.B. J. Laycock	84	Gunner Frazer	77
Chief Petty Officer R. Young	82	Serjt. Fletcher	76
Mr. Swinney	79	Serjt. Deacup	75
Petty Officer J. Leadbeter	77	Serjt. Wright	72
A.B. H. Brison	74	Gunner Crutchley	70
Chief Petty Officer F. Gosling	73	Serjt. White	68
Petty Officer W. Morgan	73	Serjt. Howard	65
A.B. J. Larty	73	Serjt. Hammond	65
A.B. J. Brind	72	Serjt. Julin	63
A.B. E. Budgen	62	Serjt. Mann	61
	918		854

Excellent wins by 64.

USE MARGERISON'S REGISTERED WHITE WINDSOR SOAP, PRESTON.—The best and cheapest Soap in England for washing clothes, or any household purpose. Ask for MARGERISON'S Soap, and see that the word MARGERISON is on every bar, as there are so many worthless imitations. Sold at Stores.

EPPS'S CHOCOLATE ESSENCE.—Product of a special refining process. It is chocolate devoided of its over-richness and substantiality. Sugarless and, when made, of the consistency of coffee. An afternoon chocolate. Sold only in packets, 6d and 1s, labelled, "James Epps and Co., Homœopathic Chemists, 48 Threadneedle Street, and 170 Piccadilly, London."

Reviews.

SOME MAGAZINES FOR SEPTEMBER.

The *Nineteenth Century* opens with an exhaustive article on Ireland, by Mr. J. A. Froude. It is written in strong, forcible language, and the writer does not appear to have omitted any matter of importance. In offering some explanation of the political aspect of Mr. Forster's action as it affects Ireland, Mr. Froude considers that the Irish Secretary supposed himself to be dealing with an accidental state of things which, in a couple of years, would have passed away; whereas he was telling the people that, in the opinion of the Cabinet, the Irish landlords had not the same right of property in their estates which they had in England or elsewhere. As to the future of the country, Mr. Froude points out that agrarian outrage at all hazard and by any means must be brought to an end, and that the future state of Ireland depends entirely on the courage of a Ministry to propose and the willingness of Parliament to allow such measures as may be necessary for the purpose.

There is no particular feature in *Cornhill* for this month. The post of honour is still maintained by the yachting romance, which may "go on for ever." "White Wings" has certain merits, but it is not one of the author's best efforts; and many of its readers, when the end does come, will feel relieved by having no longer to endure the platitudes of "the Laird," and watch the billing and cooing of the doctor and the *ingénue*. A short story, in two parts, is introduced in this number, with a strange title, "The Pavilion on the Links," rather a mysterious narrative, to all appearances. There is also a long article on "Game," a very interesting topic just now; "A Gossip about Madeira;" and a sketch from life, entitled "Two Beggars," by John Dangerfield. The really interesting article, however, is "The Growth of Sculpture," by Grant Allen.

The mainstay of the September number of *Blackwood* is a critical review of General Goldsmid's biography of James Outram. The reviewer regards the career of "the Bayard of the East" as one of the most notable instances in our own day of an independent judgment, exerted in the teeth of authority, forcing its way to recognition and high reward. The title of "Bayard," bestowed on him by his contemporaries, was given more to his chivalrous defiance of the authority of Government when he conceived its policy to be wrong or unsuitable, than to the dauntless courage which never failed him on the battle-field or hunting-ground. The reviewer in *Blackwood* at the same time points out how little the career of Outram could be recommended for general imitation. Again and again he flung "instructions" to the winds, and with success, but still the meed of approbation accorded to him was often qualified by reflections upon his mode of action. "A Week in Athens" is remarkably well spent.

"The Knight of Kerry" contributes to *Macmillan* a most interesting episode of the Waterloo campaign. It was by a mere accident, the particulars of which are fully explained, that he became enabled to make public his father's narrative of an event which, coming, as it does, direct from the field of action, cannot fail to interest the British public, even though it relates back to Wellington and Waterloo. The "episode" is full of interest, no portion of it, perhaps, more so than when it speaks of the Duchess of Richmond's ball:—"This ball was a scene of great interest. We could not without emotion see so many fine fellows, our intimate friends, who were to pass from that scene of gaiety, probably within a few hours, into action. As it approached ten, the General officers separated, and quietly withdrew. I remember being particularly struck with the interesting manner of William Ponsonby and the Prince of Orange, both of whom were killed, covered with glory. The women were greatly affected, especially Lady Sarah Lennox." M. Eugène Schuyler, Consul-General of the United States in Roumania, contributes to *Macmillan* the first part of a history, written by Resmi Ahmed Effendi, of the war between Turkey and Russia which began in 1769, and ended in 1774 with the famous peace of Rustchuk Kainardji.

Cabul, Candahar, and India are considered by Sir G. Cox in the present number of *Fraser*. There is nothing of interest in the article contributed, as everything it tells has already become well known through the agency of the Press. It, however, affords to the writer an opportunity of supporting the present Government, or, rather, of trying to do so, in its Indian policy, and condemning "the iniquitous schemes of Lord Beaconsfield and his Viceroy." There must be few readers of *Fraser* who will not close with regret the last pages of Mr. Blackmore's charming story, "Mary Anerley." For many months this work has been before the public, whose verdict, no doubt, will be that it holds high rank in the first flight of English novels.

The Theatre. (Charles Dickens and Evans.)—There is a great deal of attractive reading in the current number of this monthly review of the drama, music, and the fine arts. Some names known to literary fame have sent contributions, and helped in forming an excellent number. Readers of poetry will find some touching lines to the memory of the lamented Adelaide Neilson.

A WORD FOR THE FATHERLESS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Will you allow me to appeal to your readers in behalf of the following fund? Of the origin or management of the Afghan and Zulu wars, I say nothing. But officers and men of the British Army march promptly and fight gallantly at the bidding of whatever Government may be in power, and numbers of them have been killed in action, or have perished of disease and exposure, during the arduous campaigns waged by us in South Africa and Central Asia, leaving behind them widows, boys, and girls, practically destitute. The gross receipts of a bazaar held last week in Godinton Park, on behalf of the fund for which I plead, has been lodged in the bank of Messrs. Pomfret, Burra, and Co., at Ashford, Kent, in the joint names of Major Toke, of Godinton Park, and myself. They amount to the sum of £130. Any donation, however small, will be added to the fund, and gratefully acknowledged. We propose to give one-half of the proceeds to the School for Officers' Daughters at Bath, and the other moiety to the Soldiers' Daughters' Home at Hampstead.—I am, &c.,

FRANCIS REID, late Capt. Carabineers.

Baxford House, Ashford, Kent, Sept. 1.

Obituary.

Com. Walter Francis Robinson, on the Retired List, died at 12 South Parade, Bath, on the 29th ult., aged 71. He entered the Navy in April, 1825, and became lieut. in 1841. He served in the Malabar, Capt. Sir George Rose Sartorius, in the Mediterranean, from Aug. 1841 until paid off in 1844, and was employed in the Vindictive, flag-ship of Sir F. W. Austen, in the West Indies and North America, from Dec. 1844 until 1847. He became retired commander Oct. 1, 1860.

Lieut. Charles G. Michaelson, R.N., late of the Dido, Capt. C. E. Domville, on the West Coast of Africa, and second son of the late Mr. T. Y. P. Michaelson, of the Isle of Barrow, Lancashire, died at High Street House, Lancaster, on Aug. 27, aged 33. He served as sub-lieutenant in the Lord Clyde, Capt. Roderick Dew, C.B., in the Mediterranean, from June 18, 1867, until Aug. 12, 1868, when he was transferred to the Northumberland, under his former captain, and was subsequently employed with the Channel Squadron, under Capt. Charles H. May, in the same ship; and on May 25, 1869, removed into the Endymion, Capt. Edward Lacy, employed on particular service, and remained until paid off in November, 1870. He afterwards, from March 18, 1871, until promoted to lieutenant May 24, 1871, served in the Monarch, Capt. C. M. Aynsley, with the Channel Squadron. On Sept. 4, 1872, he was appointed to the Northumberland, Capt. John H. J. Alexander, C.B., and subsequently served under Capt. T. B. Lethbridge, in the same ships, under the flags of Rear-Admiral George Hancock and Lord John Hay, C.B., with the Channel Squadron until August, 1875. He was afterwards employed on the North America and West Indies station in the Argus, Coms. Edward J. Jermain and Robert H. Harris, from Sept. 29, 1875, until July, 1878; and on May 27, 1879, was appointed to the Dido, Capt. Arthur B. Wright, fitting for the Cape of Good Hope and the West Coast of Africa, from which he was compelled to invalide early in the present year.

Lieut. St. John Radcliffe Hall Parlby, R.N., died at Manadon, Devon, on the 27th ult., aged 25. He served in 1871 in the Trafalgar, Capt. T. B. Lethbridge, and on Dec. 10 of that year was appointed midshipman of the Narcissus, with the Detached Squadron, and continued in the Narcissus until July 21, 1874, when he was transferred to the Agincourt, with the Channel Squadron, and remained until Aug. 1875. He subsequently studied at the Royal Naval College, and was sub-lieut. in the Bellerophon, flag-ship of Vice-Admiral Sir A. Cooper Key, K.C.B., on the North American and West Indies station, from June 24, 1876, until appointed to the Royal yacht Victoria and Albert, from which vessel he was promoted to lieut., Sept. 13, 1878.

I MUST NOT MISS THIS OPPORTUNITY OF COMMENDING THE "PERFECTED" COD LIVER OIL, lately introduced by Messrs. Allen and Hanburys. It is so pure and tasteless that, when oil will agree at all, this is sure to do so.—"On Loss of Weight, Blood-Spitting, and Lung Disease" (New Edition),—by Horace Dobell, M.D., Consulting (late Senior) Physician to the Royal Hospital for Diseases of the Chest, &c. See also the opinions of the *Lancet*, *British Medical Journal*, *Medical Times*, *Practitioner*, &c. All who have difficulty in taking Cod Liver Oil should insist on having Allen and Hanburys' Perfected Oil. Sold only in imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade-mark, a Plough. Of all Chemists.

HOT WEATHER.—How to Invigorate the Nervous System by Natural Means. Mental Prostration.—"Having suffered much from headache and mental prostration, I was induced to try ENO'S FRUIT SALT, the effects of which have been most satisfactory, resulting in invigorating my entire nervous system, and removing the frequent headache to which I was subject. You are at liberty to make any use you think proper of this testimonial, as I consider Eno's Fruit Salt an indispensable adjunct to the Household."—TRUTH, Sigdon Road, Dalston, E. Caution.—Examine each bottle, and see the Capsule is marked, "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d

NOTICE.

INFORMATION WANTED of T. P. STAFFORD, who left Sydney, on November 17, 1869, as Engine-driver, in the Western Empire (42,750), and was discharged in London on March 22, 1870. If he is still alive, and sends his proper address to H. and G. STAFFORD, 9 and 10 Bridge Street, Cavan, Ireland, he will receive most valuable information relative to his father's property.

(English and Irish papers please copy.)

THE DINNER IN COMMEMORATION OF

THE ENTRY INTO LUCKNOW, of the Force under Generals Havelock and Outram, will take place on SATURDAY, the 25th September, 1880, at

THE ALBION HOTEL, Aldersgate Street, E.C., at 8 o'clock.

N.B.—Officers who wish to dine are requested to notify their intention to Mr. B. STREET, Messrs. Cox and Co., Craig's Court, on or before the 18th September.

WANTED, by a thoroughly respectable married man, who has been a Mess Waiter and Non-commissioned Officer in a Regiment of Dragoons, the MANAGEMENT of a RESTAURANT or CLUB, &c. Can furnish good testimonials, both as to business capabilities and character, and has permission from Major Haviland, of "The Villa," Saltford, near Bristol (late Queen's Bays), to give his name as a reference.—Apply, G. F. COX, "Old Bell" Inn, Cheese Lane, Bristol.

OFFICERS' MESSES.—A respectable and competent Man is desirous of a Re-engagement as MESSMAN. Good testimonials as to experience and ability.—Address "A. O.," 35 Inworth Street, Battersea Park Road.

MAN COOK, in CATERING MESS.—Single, trustworthy; experience five years present regiment.—Address, ALFRED KER, 14 Stoney Street, Borough, S.E.

TO OFFICERS RETIRING, seeking a suitable place to settle down. Healthy neighbourhood, in the midst of beautiful scenery by the seaside, resorted to greatly by retired officers. Capital yachting, boating, bathing. Also, an opportunity to a man of energy to work up a yacht club remuneratively.—Any information of D. CAWS, Seaview, I. of W.

SIDMOUTH.—To LET, by the Year, or term of Years, a FURNISHED HOUSE, standing in its own garden, five minutes from the sea, and near church and town. Large drawing-rooms, and dining-room, and a schoolroom. Seven bedrooms, offices good and large, servants' bedrooms, stabling for two horses, and coachhouse. Water supply plentiful and good, drainage excellent.—Apply to W. TRUMP, Sidmouth.

JUNIOR ARMY and NAVY CLUB,
Grafton Street, W.
Established in 1870.

Enrolled Members, 1,200. For the next 300 members, the Entrance Fee will be £10 10s; Annual Home Subscription, £7 7s; Annual Foreign Subscription, £1 1s. Open to all officers of her Majesty's Regular Forces, and those who have retired from the same.

RICHARD TRIMEN, Secretary.

HALL LINE. — LIVERPOOL to BOMBAY, *viâ* SUEZ CANAL, calling at MALTA.

Sail punctually as advertised.

The magnificent fast steamship SPEKE HALL, 2,700 tons, will sail on September 11.

This steamer has been specially adapted for the EAST INDIA TRADE. Her saloon and state-rooms are spacious and well ventilated.

The accommodation is unsurpassed. Only first-class passengers taken. Fare from Liverpool to Bombay, 50 guineas. Surgeon and stewardess carried.

Succeeding Steamers:—

Branksome Hall	October 2.
City of Baltimore	October 23.
Trentham Hall	November 6.
Rydal Hall	November 20.
Wistow Hall	December 4.

And fortnightly thereafter.

For passage, apply in London to Henry S. King and Co., 65 Cornhill, and 45A Pall Mall; or for freight or passage, to

ALEXANDER and RADCLIFFE,
8B Liverpool and London Chambers, Liverpool.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

HOLLOWAY'S PILLS. — Weary of Life.—Derangement of the liver is one of the most efficient causes of dangerous diseases, and the most prolific source of those melancholy forebodings which are worse than death itself. A few doses of these noted Pills act magically in dispelling low spirits, and repelling the covert attacks made on the nerves by excessive heat, impure atmospheres, over-indulgence, or exhausting excitement. The most shattered constitution may derive benefit from Holloway's Pills, which will regulate disordered action, brace the nerves, increase the energy of the intellectual faculties, and revive the failing memory. By attentively studying the instructions for taking these Pills and explicitly putting them in practice, the most desponding will soon feel confident of a perfect recovery.

WATCHES.—JEWELLERY.—WATCHES.

The Rev. Robt. Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Ladies' Gold Lever Watch received from you for 70s in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

The Rev. James Arthur Kemp, Lew Down, North Devon, also writes, March 8, 1880:—"The watch I ordered of you at 25s, for my servant arrived quite safely, and I am exceedingly well pleased with it in every way. It is an excellent timekeeper, very neat and handsome in appearance, and in my opinion worth far more than those that cost treble the money. I do not think anybody should be without a watch, when they can obtain from you such an excellent article at so reasonable a price."

THE MIDLAND COUNTIES WATCH COMPANY supply their celebrated Watches direct to wearers, at very lowest wholesale cash prices. They guarantee watches supplied by them to be most perfect timekeepers, and honestly assert their price to be under one-half those charged by watchmakers; and as a guarantee of good-faith they undertake to return the full amount paid for any Watch if not to the satisfaction of the purchaser.

The Company's chief manufacture are their celebrated Crystal Glasses, which dispense with all risk of breakage. Their LADIES' and GENTLEMEN'S SILVER WATCHES, at 25s, and their LADIES' GOLD LEVERS, at 70s, are acknowledged to be the cheapest Watches in the world.

Catalogues, containing list of testimonials, and beautifully illustrated descriptions of more expensive watches, gold and silver jewellery, electro-plate, &c., are sent gratis on application. We may safely assert that the prices in same will be a surprise to all who see them.

GENTLEMEN'S FINE SILVER, flat crystal glass, heavy cased, superior movement, 25s.

LADIES' FINE SILVER, handsomely engraved, flat crystal glass, highly-finished movements, 25s.

YOUTHS' FINE SILVER, flat crystal glass, highly-finished movements, 25s.

LADIES' very heavy cased GOLD LEVERS, in exquisitely chased cases, with highly-finished extra-jewelled movements, 70s.

These watches are frequently sold for treble the money.

Cheques or Post-Office Orders must be made payable to the Company's Manager,

Mr. S. HISSEY, Vyse Street, Birmingham.

On receipt of which any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

THE UNITED SERVICE ESTABLISHMENT for the purchase of Wedding Presents in Antique Silver, China, Jewelry, Diamonds, &c is at MAURICE MOSES', 201 Oxford Street, W.

MAJOR WILKINSON SHAW, 102nd Fusiliers, Garrison-Instructor at Aldershot Camp. begs to inform his friends that he is about to join Colonel B. A. WILKINSON, late R.E., at DARMSTADT, in preparing Army Candidates for their Examinations.

MILITARY EDUCATION in GERMANY.—Colonel BERDOE A. WILKINSON (retired full pay Royal Engineers) RECEIVES PUPILS, to prepare for Sandhurst and Woolwich, at his residence in Darmstadt. A Class of Militia Candidates for direct commissions is also being formed to read for the Examinations of 1881.

Colonel Wilkinson is aided in the preparation of his pupils by an efficient Staff of English, French, and German Masters; he has now the pleasure to announce that he is about to be joined by the well-known military instructor and lecturer, Major WILKINSON SHAW, M.A., Garrison-Instructor at Aldershot—a Staff-College officer—who is retiring from the Service, for the purpose of assisting to develope the business which Colonel Wilkinson has so far conducted by himself. The record of Major Shaw's work as a Garrison-Instructor for seven years past, shows that 88 out of 90 officers prepared by him personally for examination in the Sandhurst or four months courses have passed successfully, a large proportion with first-class certificates or honourable mention. During the same period, upwards of 200 other officers, as voluntary students, have read or studied military science with Major Shaw, who has thus obtained an extensive and varied experience in tuition. Major Shaw is the author of the popular text-book, "The Elements of Modern Tactics." — Address, Colonel BERDOE WILKINSON, Heinrichstrasse, Darmstadt; or (till September 20), Major WILKINSON SHAW, Aldershot.

BEDFORD GRAMMAR SCHOOL.—Head Master, J. S. PHILLPOTS, M.A., B.C.L., formerly Fellow of New College, Oxford, and Assistant-Master at Rugby School.

Special Classes for Woolwich, Sandhurst, E.I.C.S., &c. Three Pupils passed direct into Woolwich at the last competition.

Fees per annum—Day boys under 13, £9; above 13, £12; Terms for Boarders on application to HEAD MASTER, Grammar School, Bedford.

NEXT TERM BEGINS SEPTEMBER 17.

PUBLIC SCHOOL EDUCATION.—TRINITY COLLEGE SCHOOL, Stratford-on-Avon.—The Warden, Richard F. Curry, M.A., is assisted by Seven Resident Masters, Two being specially for Modern Languages. Classical and Modern Sides. Special preparation for the Universities, Army, Navy, and all competitive examinations. Large playgrounds, gymnasium, &c. Terms, 50 and 60 Guineas.—Apply to the WARDEN.

SPA, BELGIUM.—A limited number of PUPILS have every facility for acquiring a thorough knowledge of modern languages and of preparing for Public Examinations. High-class references. Terms, 70 to 80 Guineas, according to age. The English Principal will be in London in September to take back pupils.—Address, "W. and L.," care of Messrs. Orellana, Collis, and Cuffe, 32A George Street, Hanover Square, London, W.

EDUCATION.—GERMANY, HEIDELBERG.—Dr. KLOSE'S School guarantees thorough knowledge of German and French, for Army Examinations, Public Schools. Experienced English University Tutors for Mathematics, Classics, English, Geometrical Drawing. Highest Army references. Terms, from £15, quarterly. Cricket, swimming baths, English diet.

ARMY AGENCY.—WOOLWICH, SANDHURST, STAFF COLLEGE, MILITIA.—Prospectuses of the most successful Tutors on application to the SECRETARY 32A George Street, Hanover Square; also Prospectuses of Civil Service and other Tutors.

UNITED SERVICES PROPRIETARY COLLEGE,
WESTWARD HO, NORTH DEVON (on the coast).
(With the approval of H.R.H. the Duke of Cambridge, K.G.)

The primary object of this School is to enable officers—especially those on foreign service—to obtain for their sons a public education of the highest class adapted to their peculiar needs at the lowest cost compatible with efficiency. There is a Junior School for Boys under twelve, and a Dame's School for Boys under ten within half-a-mile of the College.

Pupils can board all the year round.

Two boys direct from the School were successful for Woolwich in the July examination. The senior cadet of Sandhurst in the July list passed direct from the School last year.

There are fourteen Tutors, of whom nine are Graduates of Oxford and Cambridge.

Chairman of Council—General Sir H. C. B. DAUBENEY, K.C.B.

Head Master—CORMELL PRICE, M.A., B.C.L., (eleven years Head Master of the Modern Side, Haileybury College).

Secretary—Lieutenant-Colonel BURTON (late 91st Highlanders).

For Prospectus, list of pupils, &c., apply to the HEAD MASTER or SECRETARY.

N.B.—NEXT TERM commences September 17.

SALISBURY SCHOOL.

Head Master—Rev. W. H. EMRA, M.A., late Open Scholar of Exeter College, Oxford, Classical Honourman in Moderations and Final Schools; Assistant Classical Master of the King's School, Bruton, 1867; Rector of Gt. Blakenham, 1871.

Second Master—CHAS. MORGAN, Esq., B.A., Senior Optime, late Scholar and Mathematical Prizeman of Jesus College, Cambridge.

With an efficient staff of Assistants.

This Proprietary School was founded in 1876 expressly to enable gentlemen of moderate means to obtain for their sons—

A high-class education in accordance with modern requirements.

A liberal and well-appointed dietary and domestic ménage.

The best associations of a Public School and companions exclusively of their own class.

The work is tested yearly by Public Examiners, whose reports are published, and one of the first pupils at the School has already passed with credit into Cooper's Hill College.

The sanitary and domestic arrangements will also be inspected and reported on periodically.

The New Buildings, on a fine site of ten acres, and fitted with every modern appliance. were opened in September last.

Terms, £51 a year.

A full prospectus will be sent on application to the Head Master, Salisbury School, Salisbury; or to the Warden, Batcombe Rectory, Evercreech.

DERBY SCHOOL.

FOUNDED, 1160, A.D. RESTORED BY ROYAL CHARTER, 1554.

In the Modern School, Boys are Prepared for Woolwich, the Indian Civil Service, Sandhurst, and Cooper's Hill. Sons of Officers in the Army and Navy have certain advantages at Derby. TWENTY House, Rowland, or School Scholarships, tenable for two or three years, are awarded by Half-yearly Examinations. — Address, the Rev. WALTER CLARK, B.D., Head Master; or the SECRETARY, the School, Derby.

TRENT COLLEGE.

Patrons.—The Duke of DEVONSHIRE, K.G.,
Colonel Sir HENRY WILMOT, V.C., M.P., &c.
Head Master.—Rev. T. F. FENN, M.A.

Fees, £51 a year.

A Church of England Public School of 200 Boys.

There are many Sons of Officers in the Army in the School.

Next Term begins on September 16.

Full particulars on application to the HEAD MASTER, Trent College, near Nottingham.

MR. G. M. HICKS, M.A., has a FEW VACANCIES for PUPILS reading for Sandhurst or Woolwich. In the recent Examination for Woolwich, Two Pupils out of Three passed, and another obtained twenty-fifth place for Sandhurst.—Apply, 5 South Row, Blackheath.

EDUCATION.—Mr. THOMAS JONES, F.G.S., F.R.A.S., formerly a Master in the Woolwich Common and Oxford Military Schools, RECEIVES a FEW BOARDERS. Thorough grounding, careful training, and home comforts. Terms moderate.—Address, Broomhill, Shooters' Hill, Kent.

MILITARY COLLEGE, CLAPHAM, SURREY.—Principal, Rev. Dr. WRIGLEY, M.A., Wrangler, formerly Professor of Mathematics R.I.M.C., Addiscombe, PREPARES PUPILS, who generally obtain success, and frequently the highest places. — For Prospectus, apply to Dr. WRIGLEY, 67 High Street; or, Mr. E. STANFORD, 55 Charing Cross.

COLLEGE EDUCATION.—High-Class Boarding House, exclusively for Young Ladies, Students of Queen's College, London, under sanction of the Council and Committee of Education, who will speak for the care, attention, and unusual comforts which the young ladies will receive. A large and cheerful house close to Park and College. Term commences September 29.—For particulars and private references, apply, Miss KNOTT, Devonshire Lodge, York Gate, Regent's Park, W.

TO OFFICERS GOING ABROAD, &c. —A Lady wishes to RECEIVE a GIRL of about seven years of age, to educate with her own family. Good social position. Resident governess. Healthy neighbourhood, in N. Wales. Country house. References given and required. £80 per annum. No extras.—Address "O. 12," at C. H. MAY and CO.'s General Advertising Offices, 78 Gracechurch Street, London.

THE WIFE of a CLERGYMAN of the Church of England, who with her Daughters devotes her time to the Care and Education of a FEW LITTLE BOYS, of good family, has Vacancies for three more. A thorough grounding in English, Classics, and Mathematics, preparatory for any of the Public Schools, is ensured, with the refinements and comforts of a Christian home. Terms liberal; near London; high references. — Address, "MATER," care of Mr. Beecroft, Reading.

ARMY, NAVY, AND CIVIL SERVICE EXAMINATIONS.
SYSTEMATIC AND SUCCESSFUL PREPARATION FOR THE ABOVE AT
ST. JAMES'S COLLEGIATE SCHOOL,
HIGHLANDS, JERSEY.

Upwards of 300 successful Candidates in these Examinations have gone up direct from the School, many of them taking very high places, especially in the Examinations for entrance into Woolwich and Sandhurst. Among recent ones are a third place in French out of 162 Candidates at the Militia Examination in April, 1880, and twelfth place with 5,104 Marks at the last examination in July, 1880, for entrance into the Royal Military College, Sandhurst.

Inclusive terms for Boarders from Fifty Guineas.

NEXT TERM COMMENCES ON TUESDAY, SEPTEMBER 7.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

THE ARMY, viâ Sandhurst, Woolwich, or the Militia.—The Rev. WALTER BAKER, M.A., late Scholar of his College, &c., assisted by able tutors of special experience, offers careful PREPARATION for the QUALIFYING and COMPETITIVE EXAMINATIONS. Few pupils taken, and great individual attention given to each. References to parents of former pupils who have taken high places, as well as to successful Militia and University Candidates.—Batcombe Rectory, Evercreech, Bath.

ARMY and COOPER'S HILL. — D. C. FEENY, B.A., 37 Cambridge Gardens, Notting Hill, prepares resident and non-resident Candidates for the above. At the Examinations held in July, Pupils passed 11th, 14th, &c.

ARMY.—21 Berners Street, London, W. —Mr. LAWRENCE has passed all his Candidates for Sandhurst or Examination for Militia Lieutenants, since 1877. Preparation for the Military Competitive.—For particulars, address as above.

THE ARMY.—Rev. W. FULFORD, M.A. (Oxon.), and Mr. J. ENRIGHT, B.Sc. Honours (Lond.), PREPARE CANDIDATES. References to Pupils who have taken 2nd, 3rd, 9th, &c., places for Sandhurst. Ninety per cent. successful. Class for competitive Militia Military Examinations.—32 Hogarth Road, South Kensington.

ARMY EXAMINATIONS.— Woolwich, Line, Staff College, Militia.—Captain DE CARTERET BISSON, Author of "Our Schools and Colleges" (officially recognised by the Queen and H.R.H. the Commander-in-Chief), sends (gratis) PROSPECTUSES of the most successful TUTORS for all these Examinations.—Reference permitted to late Secretary of State for War.—3 Berners Street, London, W.

STAFF COLLEGE.—OFFICERS of the Army PREPARED by a former STAFF OFFICER, of great experience in Tuition.

MILITIA COMPETITIVE EXAMINATIONS.—Classes and Private Tuition in Fortification, Tactics, Military Surveying, Law, and Administration, &c. —For Terms and References, apply to Captain DEMANGEL, 19 Aldridge Road Villas, W.

LIEUTENANTS of MILITIA. — A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY. — Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

SANDHURST.—Successful preparation for Admission Examination. Nominal fees. Payment based upon results. Highest references. —THOS. LYLE, B.A., F.R.Hist.S., Fern House, 48 Navarino Road, Hackney, N.E.

LIEUTENANTS of MILITIA desirous of competing, this year or next, for Line Commissions can be RECEIVED by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major R. V. DICKENS (late 11th Foot), who, besides having passed the Staff College, and held several Staff appointments, has for some time past been successfully engaged in coaching Lieutenants of Militia, and also Sandhurst Cadets for their final examination in the same subjects. Other competent Tutors assist in preparing for the qualifying Examinations.

Which are calculated to deceive the Public, LEA and PERRINS have adopted a NEW LABEL, bearing their signature, "LEA and PERRINS," which signature is placed on every bottle of

WORCESTERSHIRE SAUCE,

And without which none is genuine.

Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.— By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet*, *British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser.*

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—PUNCTUAL ATTENDANCE EVERY THURSDAY AT 4 HIGH STREET, ALDERSHOT, FROM 11 TILL 5.

SAMPSON LOW, MARSTON, & CO.'S

THOMAS WHITE AND CO.

throughout the whole of the various departments, as heretofore.

ZOEDONE. — OHNE PHOSPHOR,

KEIN GEDANKE.—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases.
A small extra charge in smaller cases. See Pamphlet.

ZOEDONE & GROUSE SHOOTING.

THE BEST DRINK FOR THE MOORS.
STEADIES THE NERVES.
QUENCHES THE THIRST.
SUPPORTS THE STRENGTH.
NO LASSITUDE.
NO LIVER.
NO MISSING.

London Agents:—Messrs. Allen and Hanburys; Barclay and Son; W. Best and Sons; Corbyn, Stacey, and Co.; Edwards and Son; Hearon, Squire, and Francis; Ingram and Royle; Lynch and Co.; F. Newbery and Son; Probyn and Co.; Savory and Moore.
Agents in the principal towns of the United Kingdom.

Patentee—DAVID JOHNSON, F.C.S. Manufacturers: The **ZOEDONE CO.,** Limited, Wrexham.
London Office—25 Abchurch Lane, E.C.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179, of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactory."

Sole Address—**3 THE HARD, PORTSEA.**

THE Report of the Wellington College Commission is of so much interest to the Army, that it demands a more exhaustive notice than the limited space at our disposal will allow us to give. We shall endeavour, however, within the limits of an article, to present our readers with the substance of the Royal Commissioners' conclusions and recommendations. Up to December 31, 1858 (the date of the opening of the College), there had been received in subscriptions from the public £120,785 15s. 7d., and from the Patriotic Fund £25,000—making a total of £145,000. The interest on the above amounted to £20,642 17s. 1d., bringing up the Fund on that date to £166,427 17s. 1d. Since then there has been received up to the end of 1878, from further subscriptions, legacies, and donations for special purposes, £169,443 3s. 1d. Adding to this, rent of houses and grounds, and miscellaneous receipts, and interest since December 31, 1858, we arrive at a grand total of £260,367 1s. 3d. This sum of over a quarter of a million is what the Commissioners of the College have to account for. Of the £260,000 odd received, speaking in round numbers, £90,000 has been invested at 4 per cent. as an endowment fund. On preliminary expenses, purchase and laying-out of land, building (£120,000), interest on loans, &c., £150,000 has been expended. The balance between receipts and expenditure is £22,000, has been laid out on the current expenses of the school. These figures seem to us thoroughly unsatisfactory, and it is to be regretted that by the annual publication of a balance-sheet, some check was not applied to the extravagance of the authorities. To think that out of a sum of over £260,000 only £90,000 has been invested as an endowment fund, and that over £140,000 has been spent in buying a site and erecting a building, is simply monstrous. Yet, after all this vast outlay, we are calmly told, by the late and present Head Master, that the accommodation is still very imperfect, and that a considerable further outlay is required for it. Again, let us examine the result of this extravagance and bad management. The recognised number of foundationers, being the sons of deceased officers, educated free, is 80. On December 31, 1878, there were of these boys only 56 in college, and 16 younger boys educated at the cost of the College at a private preparatory school in the neighbourhood, making a total of 72. This, we are told, in the Report, is about the average number for the last ten years. The original scheme, as announced in 1854, was that 100 boys should be educated gratuitously. In 1858, the Governors announced that 81 boys should be foundationers, 19 non-foundationers paying £30 a year, and 100 other boys, the preference being given to officers' sons, but civilians not to be excluded. Of these, 100 officers' sons were to pay £70, and civilians £100 a year. We have seen how the matter stands with regard to foundationers. As to the remaining pupils, there are three classes, viz., 77 officers' sons in College, paying £80 a year; 149 sons of officers and civilians, paying £110 a year; 88 boys boarding in masters' houses, paying £130 a year; and five day boys, paying £25 a year. The Commissioners say that the explanation of these results is to be found in the financial management of the College. "While the larger part of the capital has been laid out in buildings and grounds, the current working of the school has been conducted at a loss, amounting to about £22,000 up to the end of 1878." The cost of the boys, after deducting what they pay, is as follows:—Foundationers pay nothing, and cost about £88 a year; the non-foundationers cost the College about £81, each. The boys in boarding-houses give a profit to the College nominally of £8, but really less, for they have not been debited with their share of the expense of the general working of the school. The day boys are educated at a loss of £10. In this calculation, no money value is assigned to the benefits derived from the buildings. The Commissioners proceed to consider how matters may be mended. Considering how any increase of income may be obtained, they dismiss the idea of increasing the amount demanded by non-foundationers. The Head Master thinks that the charges are already sufficiently high, and that no increase would be practicable. The Commissioners adopt the same view, remarking that the charges for boys in boarding-houses are next, after Eton, the highest in the kingdom; "while those for boys living in the College are higher than the charges made at Charterhouse, Winchester, Rugby, and Marlborough, for boys in houses, who may be supposed to get a larger return in the way of comfort. Compared with the charges at other schools conducted on the same plan, of boys occupying one building, and taking their meals in common, those at Wellington College are exceptionally high." As to increasing the number of boys, it would involve almost a reconstruction of the building. The Commissioners, therefore, do not recommend this step. They suggest, however, that the number of foundationers might be increased by discontinuing the purely gratuitous character of the system, and making even foundationers pay a small sum, which in most cases they can well afford. The Commissioners also suggest that there should be a change in the distribution of the £130 a year paid by boarders. At present, £40 goes to the school and £90 to the house-master. The latter sum is £20 in excess of that paid at Charterhouse, and £11 10s. beyond that paid at Winchester. It is therefore recommended that at the Wellington College the house-master should, in future, only receive £75, £55 being paid to the school. The most efficacious means, however, of carrying out the intentions of the original subscribers to the school would be by reducing the expenditure. This rose, from 1870 to 1878, from £30,000 to £38,000 a year, the number of boys remaining the same. Each boy now costs £80 a year, yet there are no special advantages, either in the shape of comfort or efficiency, over other schools of a similar nature which are much more economical; at Haileybury College, for instance, the number of boys is almost the same. It is an admirable school in every respect, yet the cost of boarding and educating a boy is only £67 9s. 11d. a year. An indication of the general extravagance of the system pursued at Wellington College is afforded by the fact that the emoluments of the Head Master amount to £2,400 a year, and a detached house, free of rates and taxes. Yet he does not keep a boarding-house. Some of the Under-masters are also rather highly paid. A crying evil is the amount paid for "Extras." Some of these are, to a certain extent, others wholly, optional; but none bring in any return to the school, and only tend to inculcate habits of extravagance. Evidence proves that there is no distinction between foundationers and others, and that in most cases neither the Head Master nor the boys themselves know to which class a pupil belongs. This is as it should be, but as the Commissioners justly observe, "The equality between them should be maintained not by allowing poor boys to run into expense, but by compelling all boys to be moderate." Some of the foundationers' bills, we learn, are as high as £40 a year, while in several instances those of the non-foundationers are even higher. One source of these "extras" is the furnishing of the cubicles, which costs the foundationers at starting on an average £2 2s., the highest amount being £4 12s. The average of the non-foundationers is a higher figure than even this last sum. The College only supplies a bed and washstand. Then there are charges for science, in the lower school; for drill, for bathing; the gymnasium, which is optional; the library, &c., books and drawing materials, and private tuition. The slightest consideration will show that these charges are utterly inadmissible as regards foundationers. The Commissioners, on the other hand, admit that, both educationally and socially, the College has attained a very high position; but they wind up with the following pregnant passage:—"Although this result has, up to the present time, been obtained only by keeping down the number of Foundationers to their original limit, we feel assured that with due economy, which, in our opinion, has not hitherto been sufficiently regarded, the number of Foundationers may be considerably increased, without in any degree endangering the high position of the School." We cordially concur in the sentiments above expressed, and are ourselves most decidedly of opinion that, in spite of the specious arguments employed by the late and present Head Master and others, the object of the subscribers to Wellington College has not been carried out, and that the Army and the public have good right to complain. We trust that a new system will now be introduced, and are convinced that the best means of securing in future a proper administration of the fund is that the accounts should be annually published and duly audited by independent persons. The object of Dr. Wickham and his predecessor seems to have been to make Wellington College a second Eton, but that is neither what was intended, and is very far from what is desirable.

"W. Hope, Army and Navy Club," "a man of science," who "keeps as closely as possible within the region of physical facts," an "expert" and an "inventor," has at all events an amount of confidence in himself and his opinions which would, if justified by physical facts, make him an admirable "irresponsible and autocratic head of the Ordnance," or of any other Department which had to deal with "men, women, and inventors." As he has offered his astounding ordnance to some other Power—which is, we are glad to learn, not Russia—and, as he has, to use his own words, "carried his pigs to another market," it is to be hoped that there is no chance of collision with that happy country which is henceforth to be blessed by the possession of the "Ripley-cum-Hope," or "Hope-cum-Ripley," Artillery. "The enthusiastic ignoramus who believes he has invented something is not an inventor, he is simply a fool," writes Colonel Hope. Very true, indeed. But the belief of the enthusiastic inventor in himself is not the less strong because he is a fool, and he is not the less apt to consider those who do not believe in his words to be either fools or knaves. How many men are there now who have the firmest faith in themselves, and in their ability to construct ships, armour, guns, balloons, flying-machines, and the like, whose dream of a perfect Government Department would be realised the moment they had at their disposal all the officials and all the resources, pecuniary and otherwise, of the State, to work out their "fads"? Colonel Hope, indeed, is not one of these men. He and

General Ripley apparently have, somewhere or other, a gun factory, where stores of breech-loading guns, "showing savings of 80 per cent. in weight and 60 per cent. in money on the muzzle-loading, condemned, Campbell-Fraser-Woolwich-Armstrong gun," may be turned out, as soon as their offers are accepted. We have already expressed our opinion, and repeat it, that the War Office should have accepted the offer made to it by these inventive gentlemen, who must not be offended if they are called "artillery geniuses," to try those guns; but we cannot admit the truth of the assertion that General Campbell was the autocratic and irresponsible personage who stood between the country and their offer, and rejected it on his own authority. We may be termed "Philistine" because we say so, but those who know the physical facts of the case are aware that the conditions on which the War Office, warned by disastrous experience, accepts the offers of inventors, were not laid down or dictated by General Campbell. We are well aware of the nature of the combination, and of the motives of the authors of the venomous attacks which are directed against those who wish to protect the taxpayers of the country from "men, women, and inventors." We can lay our hand on one of the foremost of these as a "rejected contributor" of our own, who has found an organ for the discharge of his spite against the Authorities, engendered by the action of the War Office, on, as we think erroneously, dispensing with his services; and we know thoroughly the authors of the movement to place the national purse at the mercy of the metallurgists. The movement will fail, the serpents bite a file, and break their teeth. Colonel Hope and General Ripley are men of a different stamp; but as Colonel Hope, having had his say in our columns, applied himself to the publication of an offensive letter where he knew it would be welcome, he may henceforth air his grievances in other quarters, just as he has sent his artillery "pigs to another market." Apparently, the latter have not even been farrowed yet, so the foreign Power has "bought a pig in a poke." It seems from Colonel Hope's letter—the last that shall appear in our columns from his pen, though we shall be very happy to record the physical fact of the first squeak of his pigs, when they are no longer *in nubibus*—that, at the time the offer was made by him to the War Office, there were no guns of the Ripley-cum-Hope sort in existence, and that their construction entirely depended on the acceptance of that offer. Our voluminous correspondent—the "inventor of the shrapnell shell for rifled guns," who "was at Cambridge before" he "went into the Army," who has "carried out many and large works as a civil engineer," and who "served for no less than seven years on one very important Committee of the British Association"—had only eliminated his artillery out of the depths of his inner consciousness at the moment he called on General Campbell to try it, as he writes that, "had the offer been accepted, the first batch of guns would have been proved and delivered some little time ago." Just imagine the howl that would have been raised, had it been announced one fine day that certain guns constructed by an American ex-officer, C.S.A., and an English officer (not R.A.), having been found 80 per cent. lighter and 60 per cent. cheaper than the existing artillery, would henceforth be adopted in our Service; and that all guns, stores, ammunition, &c., would be henceforth valueless for the purposes to which the Ripley-cum-Hope guns could be applied! What journals would contain the protests of the fancy gun-makers, the disc-throwers, cycloidal-cannon constructors, the workers in metal and in theories, against such a monstrous injustice! Would they not demand the trials of ordnance 80 per cent. lighter and 60 per cent. cheaper than the Hope-Ripley, on the same conditions that Hope-cum-Ripley obtained? Who has equalled the wonders in range and accuracy obtained by Whitworth? Who has eclipsed the feats of endurance exhibited by Palliser? The War Minister of the day, whoever he may be, will in all probability be a civilian, or at best so much of a soldier as Colonel Stanley, for whose professional experience the Army generally had not very great, though it had some reason to be thankful. He must depend upon his subordinates who have special knowledge for advice on special subjects, and he, and he alone, is responsible for the course he may take on every question submitted to his Department; but strong men will know how to shape the course of weak Ministers, and it would, we think, be well if the system of departmental councils and committees in such matters as the ordnance system, military and naval, were resorted to, for the purpose of strengthening the hands of the Government Authorities, and protecting them against attack or bias. As to attacks on ourselves, we may say, having regard to the quarter whence they come, whether the projectile be fired by an anonymous "gunner" or an editorial "we,"—"Contempsi Catilinae gladios, non pertimescam tuos!" Any profit or advantage that may be gained by those who indulge in them they are welcome to, in addition to their other sources of income; but we do not think it will redound to the credit of Service journals to resort to the practices of what has been well termed "the personal Press," in the treatment of public questions.

Their Royal Highnesses Prince Albert Victor and Prince George of Wales are expected to rejoin the *Bacchante*, from leave of absence, on Monday.

A return is to be rendered by each Division of Royal Marines, showing respectively the terms of service afloat and on shore served by each man at head-quarters. Some curiosity is felt as to the reason why this exceptional return has been called for, and it is believed to have some connection with the recommendations of the recent Marine Committee. Their Lordships declined to accept the recommendations of that Committee as a whole, but it is known that questions then raised are now being quietly looked into.

Directions have been given that the *Decoy*, on arrival at Gibraltar from the West Coast of Africa, shall be attached to the Mediterranean Squadron.

It is reported that Commodore Wilson has returned to Sydney in the *Wolverene* from Fiji. From this it is to be anticipated that he has deemed it advisable to return for the purpose of repairing the damage done to the *Wolverene* by her recent grounding, as the Commodore had intended to visit New Ireland and New Britain, and would not then have been at Sydney until nearly the end of the present month.

Captain Bedford Pim, as an old Arctic officer, has expressed to the Admiralty his willingness to proceed to the United States of America, on behalf of the department, to make the presentation to the President of the furniture which has been made out of some of the timbers of the old *Resolute*. From what we hear, we do not think that the offer of Captain Pim is likely to be accepted by the Admiralty.

It has been decided by the Admiralty that midshipmen and naval cadets who have recently passed out of the *Britannia* may be permitted to remain on leave of absence until the captains of the ships to which they may be appointed direct them to join their ships. This is a far better arrangement than compelling young officers to join the harbour receiving-ships as soon as their leave has expired, there to await appointment to a sea-going ship, and often getting into mischief in the meanwhile.

Captain Robert Dennistoun will be given the offer of re-appointment to the command of the *Tourmaline*, on her being recommissioned for service with the Detached Squadron, under the command of Rear-Admiral the Earl of Clanwilliam. Although the *Tourmaline* has been in commission since October, 1876, it is thought that she will be quite fit for service with this squadron, which will, as far as practicable, cruise under sail. As Captain Dennistoun did not join the *Tourmaline* until August, 1878, this cruise with the flag of Lord Clanwilliam will just complete the term of an ordinary commission.

Five candidates at the late examination for entry into the Royal Military Academy, have been approved of by the Admiralty for appointment as Lieutenants of the Royal Marine Artillery, on probation.

A vacancy for appointment as Lieutenant-Colonel second Commandant of the Chatham Division of Marines is, we hear, about to be made by the retirement of Lieutenant-Colonel Herrick. That officer in taking this step quickly follows that taken by Colonel Gregory, who, having seen all the present Colonels-Commandant promoted over him, naturally thought retirement more satisfactory than active service under such circumstances.

Directions have been received at Portsmouth for the staff of the *Vernon* and the yard officials to endeavour to design a handy and compact carriage from which Whitehead torpedoes can be discharged, as it is desired to effect an improvement on the present fittings and mode of discharge.

His Imperial Highness the Grand Duke Constantine, High Admiral of the Russian Navy, left London on Thursday for Glasgow, to inspect the Czar's yacht *Livadia*, now being completed. The vessel will, it is expected, be ready for sea in about a fortnight, and it is the intention of the Grand Duke to join her at Plymouth and take her to the Crimea. Sir Houston Stewart, Controller of the Navy, Sir Edward Reed, M.P., late Constructor of the Navy, and Mr. Pearce, the builder of the vessel, are, it is said, to accompany the yacht on a portion of her cruise, to judge of the sea-going qualitities of the vessel. One hundred and eighty-seven Russian officers and men, forming the crew of the yacht, arrived in Glasgow on Tuesday morning, and proceeded to Govan to await her completion.

The Navy Estimates have only just been finally disposed of by Parliament, when we hear from the ports that either a number of discharges must be made from the yards, or a supplementary estimate asked for. We do not think the yards must look forward to any more money being asked for by the present Board.

Captain Alexander Buller, C.B., of the *Cambridge* has been instructed to report upon the best means of training an increased number of seamen in the use of the semaphore and of night-flashing signals.

By order of the Admiralty, the officer commanding the London recruiting district, Royal Marines, is to hold the appointment for a term of five years, at the end of which time he shall stand first on the foreign-service roster.

Rear-Admiral Gore Jones, C.B., arrived at Trincomalee in the *Euryalus* on the 3rd inst.

Commodore Richards, C.B., remained at Simon's Bay in the *Boadicea* up to August 18.

Sub-Lieutenant Colmore, of the *Valorous*, has, we regret to hear, been compelled to be discharged from duty on account of ill-health. Their Lordships have directed him to be placed upon the half-pay of his rank for three months, to enable him to recruit his health.

We recently noticed the duties performed by Major Crease in connection with the public works at the Royal Marine Artillery Barracks at Eastney; and we venture to express our opinion that if the same system was adopted at the head-quarters of the Light Infantry Division, it would be an advantage to the Service. There must surely be some Light Infantry officers whose capabilities would warrant their being selected for the performance of duties which would relieve the present clerks of works, and enable them to give more undivided attention to the other local Admiralty establishments which are under their care.

Captain George Tryon, C.B., is reported to have arrived at Constantinople on Wednesday from Naples, on a diplomatic mission to Mr. Goschen.

The Earl of Clanwilliam, C.B., hoisted his flag at Portsmouth on Monday as Rear-Admiral commanding the Detached Squadron, which is about to be formed.

Admiral Ryder has issued a fresh appeal on behalf of the *Atalanta* fund, which he says, including that of the Lord Mayor, amounts to £5,000, or £12,000 short of that raised at the time of the kindred disaster on board the *Eurydice*.

The latest news from the West Coast of Africa, brought by the mail steamer *Cameroon*, which arrived yesterday, is that on leaving Bonny she met the *Dido*, returning from Brass, with Consul Hewitt on board, but the result of his visit was not known. The *Cameroon* met several of her Majesty's ships making for Bonny to take part in the blockade of Brass, if found necessary.

Commander the Earl of Dalhousie has been appointed a Lord-in-Waiting.

Lieutenants Pullen, Hadley, Grove, and Glennie have joined the *Vernon* for a torpedo course, having just completed the short gunnery course on board the *Cambridge*.

The comfortable arrangement by which the medical officers of Portsmouth Yard have only been compelled to spend a day in the yard twice a week, has now been altered, owing to a slight hitch in medical attendance which recently occurred. Aid was not forthcoming as soon as was desired, and it is now ordered that two medical officers shall remain on duty daily.

The Naval hospital and dockyard at Port Royal are reported to have suffered considerably from the recent hurricane which passed over Jamaica.

Lieutenant Gott, of the Royal Marines, serving in the *Minotaur*, and Lieutenant Stevens, of the Chatham Division, have asked to be allowed to avail themselves of the further opportunity of volunteering for the Indian Staff Corps thrown open to Marine officers. Their requests will probably be granted, in which case they will be required to leave for India in the course of next month.

Mr. Peter Taylor is ever ready to believe that any atrocity may be committed on board her Majesty's ships. He has treated the House of Commons to harrowing tales of the birching of boys and the flogging of men, and now that corporal punishment is very nearly abolished altogether, he hears that the Navy has found a substitute. He even imagines that keel-hauling has been introduced, and that a marine of the flagship in the Mediterranean has been the victim. For this piece of information Mr. Peter Taylor is indebted to an Italian newspaper, and the Admiralty has very rightly declined to insult Sir Beauchamp Seymour by calling upon him to report whether such an act of inhumanity has been perpetrated in the ship flying his flag. It is really too ridiculous, and Mr. Peter Taylor might have spared the time of an exhausted Parliament by asking such questions.

We understand that the application of the surgeon of the *Foxhound*, Mr. Thomas Mugliston, to be permitted to resign his commission in her Majesty's Fleet, has been approved of by their Lordships. Mr. Mugliston entered the Service in 1876, and the *Foxhound* was his first experience of foreign service.

Lieutenant Arthur Mansell, R.N., inspecting officer of the Swanage Division of Coastguard, has been distinguishing himself by saving life at Bournemouth, having jumped overboard from a steamer and rescued two persons whose boat had been run down. Four of the occupants of the boat are reported to have been drowned.

Fourteen ships of war are reported to have arrived at Ragusa on Sunday, and so soon as the French contribution to this extraordinary fleet arrives, it has been arranged to hold a council of war, under the presidency of Vice-Admiral Sir Beauchamp Seymour.

In some recent articles on dockyard expenditure, we drew attention to the fact that during the past few years there had been an alarming increase in the "incidental charges" at the different dockyards. In the last six years these charges have risen 67 per cent. at Devonport, 63 per cent. at Portsmouth, 41 per cent. at Pembroke, and 32 per cent. at Sheerness. We are glad to find that this rapid growth of "incidentals" has not been allowed to escape the notice of the Admiralty, and that a departmental committee is to inquire into and report upon the causes of the additional expenditure under this head. There is a suspicion that the manner in which estimates for repairs are often cut down has necessitated finding funds for completing the work by creating a fictitious demand under another head, and thus some £400,000 increase has arisen under this item.

Considerable interest is now being centered in the results of the Army Inter-Regimental Rifle Match, the shooting in which closes on the 19th inst. It is understood that some splendid practice has been made; but, of course, no figures will be given until all the returns have been received by the hon. secretary, Captain F. M. Salmond, D.A.A.G. for Musketry at Edinburgh. Last year 232 men fired, as against 216 in 1878; the highest total being made by Colour-Serjeant Hoey, 1st Battalion Rifle Brigade,—97 points, at 200, 500, and 600 yards.

A new rifle, the invention of Professor Hebler, has been tried in Zürich. The arm resembles the Mauser rifle in its construction, and has a calibre of seven millim. The projectile is a long pointed ball of hard lead, weighting twelve grammes; the charge is five grammes. The inventor expects, in consequence of the heavy charge, to obtain an initial velocity of 600 metres. With a range of 1,700 metres, the results obtained were very satisfactory. The new rifle has aroused considerable interest in German military circles.

It is not unlikely that the War Office will consent to the establishment of a permanent school or college for the instruction and training of officers of the Militia and Volunteers, at some station near London. The idea meets with the approval of all those who have the interests of the Auxiliary Forces at heart. The want of such an institution has long been felt, and the money which would be expended in maintaining it would be well spent. As yet the proposal has taken no practical form, and it would be scarcely advisable for the officers interested to look for any immediate realisation of their wishes in the matter. It is, however, satisfactory to know that the establishment of some such school was included amongst the proposals submitted for the consideration of the Committee on Army organisation, of which Lord Airey was president.

We congratulate the members of the Army Veterinary Department on the announcement which appeared in the *Gazette* of the 3rd inst., of the promotion of Veterinary-Surgeon B. L. Glover, R.A., to the rank of first-class, in recognition of the distinguished services rendered by him in the Zulu campaign. Mr. Glover displayed great zeal and devotion whilst employed on active service at the Cape, and it would have been nothing short of an injustice to the whole body of Veterinary officers had he been allowed to pass unrecognised. The promotion of this officer may be viewed as an evidence on the part of those in authority to reward merit among the members of the Veterinary profession, and will act as an inducement to others to do their work well, and go beyond the ordinary routine of duty in future campaigns in which British troops may be engaged. We have all along contended that the Army Veterinary Surgeon is placed at a serious disadvantage with regard to the other departments of the Army when employed with an Army in the field, and it is a healthy sign to find that measures are being taken to remove one at least of the anomalies which have too long existed, and have entirely prevented anything like a proper spirit of emulation among the members of the Veterinary Department.

An Indian good-service pension of £100 per annum has been conferred upon Colonel H. F. M. Boisragon, Bengal Staff Corps. Colonel Boisragon entered the Army June 14, 1845, and became colonel April 2, 1872. He served in the Burmese war in 1852-53, and was present at the relief of the garrison of Pegu, and commanded a field force against the rebel chief Mong Gouneggie (medal with clasp for Pegu). Served also in the Indian Mutiny campaign in 1857-58; commanded a wing of the Kumaon Goorkha Battalion at the siege, storm, and capture of Delhi (dangerously wounded); commanded a force in the Saharunpore district, and on January 10, 1858, encountered and beat back across the Ganges at Hurdwar upwards of 1,000 of the enemy with four guns, destroying many of the enemy and capturing arms and munitions of war (thanked by Government, medal with clasp, and brevet of major).

Major-General Sir Henry Havelock-Allan gave notice on Tuesday that early next session he will move, "That, as a consequence of the abolition of Purchase, it is equitable that officers, the regulation price of whose commission is still retained by the State, should be permitted to bequeath that price by will to their widows or other legal representatives, such bequest to take effect only in the case of officers killed in action, or dying from disease contracted by exposure on service in the field." Sir Henry Havelock-Allan's motion is a modification of that which has twice come before Parliament—last year at the instance of General Shute, and this year on that of Lord Percy—and is not unlikely, we hear, to meet with some amount of support from the Secretary of State for War.

The principal items of intelligence brought from the Cape are as follows.—"Sir George Colley intends visiting Bloemhof on business connected with the Keate award, the white residents in which district have presented a petition against the country being handed back to the Korannas. Colonel Lanyon has returned to Pretoria from his trip to the northern border, where he found everything quiet. General Bissett's scheme for colonisation on the Lower Umzinkubu is regarded with great interest. The district selected is one of the most fertile in South Africa, but from various reasons is practically unoccupied."

The subjects of examination in military history and geography at the examination for admission to the Staff College in June, 1881, will be (1), the campaigns in France in 1814, with battles of La Rothière and Laon. Candidates will be expected to have a general knowledge of the country. (2). The General Principles of War. Text-books: Jomini, *L'Art de la Guerre*; Hamley, *Operations of War*. Revised regulations for admission to the Royal Military College, and for first appointments therefrom to the Army have been approved, and will be issued to all concerned. General Order 88 of 1876 and the regulations issued therewith, and 69 of 1877 are cancelled.

Colonel Keith Fraser has done good service to the Army by his manly and most soldierlike letter, protesting against the treatment to which a non-commissioned officer of the 1st Life Guards was subjected lately by the proprietor of a Windsor hotel. The difficulties of obtaining recruits is great enough, without their being increased by the action of civilians in heaping indignity after indignity on her Majesty's uniform. The letter of Colonel Keith Fraser ought to have its effect in opening the eyes of the public to the fact that those who know the soldier best are not disposed to join in the condemnation of him. Colonel Keith Fraser has simply expressed the views of every British officer on the subject, and the rank and file of the Army owe him a debt of gratitude for having come forward as their champion, and endeavoured to remove the impression, which evidently exists to a large extent, that the presence of a non-commissioned officer or private soldier in uniform in a place of public resort would prove unacceptable to his military superiors. If the officers of the Army do not object to meet their men off duty, and no officer would do so, it is not for the public to establish rules for the observance of military etiquette.

Considerable disappointment, not to say dissatisfaction, exists among the officers lately appointed to commissions in the Reserve at finding that they are to be denied the privilege of seeing their names inserted in the monthly *Army List*. It is difficult to understand on what grounds the War Office refuses to insert a list of those upon whom commissions have been conferred. True, a list is given in the new *Quarterly Army List*, but considering the trouble and expense to which the officers have in most cases been put in qualifying for their commissions, and the patriotic feelings which have influenced them in coming forward as candidates, they ought, we think, to be given a place in the *Army List*. The names, if inserted, would occupy little more than two pages, and the publication of the list would be an inducement to others to give the country the benefit of their services, whereas the omission of all mention of the newly-constituted body has not unnaturally created an impression that the Reserve is, after all, a farce, and that the War Office regards it with disfavour,—a feeling that it is not well to engender. We trust that the mistake—for it is a mistake, no doubt—will be corrected before the October *Army List* is published, and that in future a full list may be inserted in its proper place in the work.

How is it that in a war which has lasted two years in Afghanistan we have heard so little of the work done by the officers of the Veterinary Department? Is this due to the practice in vogue in India of officially ignoring veterinary officers, or to those officers themselves? Surely some one or more of them have done something sufficient to gain them a small place in despatches among the host of other names submitted for reward. We heard something long since of the exertions of the principal veterinary-surgeon in India, and those under him, in keeping the transport animals effective; but officially he might apparently have remained at Simla, for any good he has done himself or his Department by his labours. And yet it is wondered at that veterinary-surgeons are discontented and disinclined to serve in India!

The question of "prone *versus* back" in rifle shooting will not be much served by the matches which have recently been held among the Volunteers and others that are announced to come off. If it is really intended to test which is the best for fighting purposes, skirmishing drill in full marching order, before a target at unknown distances, might serve some practical end. There is much to be said in favour of both positions. Under cover the man who can shoot best on the back, and pot his enemy at, say, 1,000 yards, would be valuable; but in the open, and in face of a foe, it is very questionable whether the best-trained soldier would be sufficiently cool to adopt the rear position, with the incumbrance of great-coat, valise, &c., make allowance for wind and light, calculate the distance, and take the long and careful aim necessary to hit. We should like to see more attention given to the conditions under which men fight, not as they win prizes at stated distances at the target.

The India Office has approved the appointment of Brigadier-General F. G. Kempster, Madras Staff Corps, to command the forces in British Burmah, vice Major-General A. Knox Gore, Madras Staff Corps, whose period of staff service has expired. General Kempster has been in command of a brigade of the Madras Army since June, 1876.

General the Right Hon. Sir William Knollys, K.C.B., Usher of the Black Rod, is staying at Folkestone to recruit his health, and, although much better, was unable to attend to his official duties on Tuesday, on the prorogation of Parliament.

There are some disagreeable reports in circulation among members of the Ordnance Store Department, with regard to the treatment which one senior officer has received, who was among the number of those selected to be specially retired on the recent reorganisation. If these rumours are true, an able and most deserving officer has been subjected to treatment which can be looked upon as nothing short of departmental tyranny in its worst form. We cannot, however, bring ourselves to believe that the War Office would intentionally be guilty of such a gross act of dishonesty as to deny promotion to an officer of admitted ability on the grounds of a pending reorganisation, and then to retire him on the pension of the junior rank, whilst his immediate juniors, though retired in the lower rank also, are given the pension of the senior grade. There has evidently been a mistake committed, and it only requires to be pointed out to be rectified.

The march of 1,000 miles in sixty days, which has been accomplished by the Russian column from Tashkend to Kuldja, will, no doubt, be in due course of time made available for study by military critics, and meantime we venture to commend to Sir A. Alison and his staff at the Intelligence Department the investigation by every means at their disposal of the details of such a feat. Kuldja is not quite 1,000 miles from Tashkend, but it is within a day's march of that distance, and inclusive of halts, it may be assumed that the Russians covered the ground at the rate of eighteen miles a day, as they generally give a day's rest out of every seven. General Roberts halted one day at Khelat-i-Ghilzai in his march to Candahar, and it seems fair to assume that the Russians followed their usual custom. But such averages are very unsafe guides to conclusions respecting the capacity of marching, for to attain given ends some armies may execute feats of which other armies quite their equals in average may be incapable, and we are told that the Russians executed in one day, without any immediate pressure, a march of 36 miles, which is nearly double the distance which General Roberts, under the urgency of relieving the garrison of Candahar, could get over in his eight days' work. For a composite force formed on the Indian system, the performance of General Roberts is, as we have said before, worthy of great commendation. It would not be possible for such a force, however, to emulate the march of the Russians from Tashkend to Kuldja, if we are to accept the statements respecting the latter as perfectly true; but it is a mistake to suppose that the vast herd of camp followers on which an Indian army depends is under ordinary circumstances any drawback to its marching powers. The camp followers are in the rear of their respective attachments, unless in the case of attacks in the rear, when they are quickly in the front, and in the case of retreats, when they are sure to lead the van. The fact is that the climate is so trying, and the state of our localised Native armies so essentially one of repose, that long marching at high pressure is unknown to them, and it is all the more creditable to General Roberts and his officers that he should have got out of his column a rate of speed which is equal to the average of the marches of the Kuldja force for nearly seven times as long a period. A short march is, as all soldiers know, very different indeed in its effects on the marchers from a long one, and sick and foot-sore men accumulate as the days multiply. Under any circumstances, the Kuldja march is an achievement of unusual excellence and magnitude, but we must know more about it before we can take it as a specimen of what the Russian army in Asia can accomplish.

The Austrian military manœuvres in Galicia commenced on Sunday last, when the Eastern corps in full force filled and surrounded Lemberg. The Western corps was eighty-five miles distant, at Przemisl, Eradimnow, and Medica. The operations were commenced by the cavalry, both sides advancing with such rapidity that the advanced guards of each army corps came in sight of one another before 12 o'clock. They had, therefore, traversed forty-two miles each in seven hours. Towards evening the Chasseurs arrived and commenced operations. The fighting ceased at sunset. The marches were first-rate feats. The Emperor met the Minister for War, the general staff, and the foreign officers at noon in Sadowa Wisznia, and witnessed the operations. His Majesty returned to head-quarters in the evening. On Monday morning the infantry columns marched upon each other, when the commanders for the first time were allowed liberty of action, and in fact were told that they must act as in real warfare. The foreign officers greatly approved this plan. The Emperor arrived at 8 o'clock on the field of operations near Sadowa Wisznia. Operations have continued throughout the week.

THE RIDINGMASTERS' CASE.

"Cavalry" writes :—"It appears to be forgotten by the authorities that the duties of the Cavalry ridingmaster, since the short-service system has been introduced, have increased something like 200 to 300 per cent. Yet no corresponding increase of pay or promotion has been granted, but actually a serious decrease has taken place. Would it be presumptuous to ask if such treatment would be tolerated, or even offered to other officers, or is it only these twenty-eight unfortunate officers from the ranks, who have no influential friends to advocate their cause, who are treated with such utter indifference? Surely a system which gives promotion to one class of officers and not another must be a very unsound principle, and one likely to create class prejudice, and deter all respectable young fellows from joining the Service, at the same time tending to lower the Army in the eyes of the people from whose ranks it is recruited, and create dissatisfaction in the ranks of the non-commissioned officers, upon whom the discipline of the Army in a great measure depends, and for whom some outlet must be made to stimulate and create a limited amount of ambition, without which a non-commissioned officer is useless. Therefore, to view one of the few appointments open to him in the light that the supply is greater than the demand, is as erroneous as anything can possibly be. For there is no position in the Army but what the supply is greater than the demand. But what about the quality; is that of no consequence? Is it of no importance to get the right man in the right place? The duties of the cavalry ridingmaster are so peculiar, that the greatest of care should be taken in selecting a non-commissioned officer to be qualified for the appointment. For by his example the character of the young soldiers in a manner is formed, during the six to twelve months they are under his tuition. The position is, therefore, one of the utmost importance in a cavalry regiment; his services being required more now than ever, for many and various reasons, which are well known to thoughtful observers of the times, and should, therefore, be treated accordingly with a fair amount of promotion, the same as other officers. This could be done by allowing them to revert to their former position as combatant officers, taking their proper turn of promotion in the regiment, or by giving them honorary rank, as distinguished from the relative rank held by quartermasters, whose duties are essentially non-combatant. I would suggest that the ridingmaster be appointed with the honorary rank of 2nd lieutenant; after five years, lieutenant; after ten years, captain, providing he has twenty years' service,—the average would be twenty-two years; after five years captain to be allowed to retire on the present pension of £180, providing he has twenty-five years' service,—average would be twenty-seven years; after ten years captain to retire on £200, providing he has thirty years' service,—average would be thirty-two years,—with the rank of major. Such an arrangement would give general satisfaction, with the addition of suitable quarters, consisting of two rooms and a kitchen, which are absolutely necessary for a married officer."

The Army.

◆

1st Life Guards. Col. Keith Fraser, writing to a local contemporary with reference to the exclusion of a non-commissioned officer of his regiment from the public room of the White Hart Hotel, Windsor, observes that "under no circumstances would a non-commissioned officer or soldier in uniform, conducting himself properly, have to leave a public room because an officer entered it. The fact of the soldier being, as in this instance, a man who had taken his degree at college, and who had held commissions as an officer, would not affect the case one way or the other. The suggestion that a private room (granted, as I am informed, not with the best grace, and duly charged for in the bill) was provided in order that the non-commissioned officer should be saved from 'indignity' at the hands of officers of the garrison, can hardly be intended as a serious excuse for the public insult which 'in accordance,' it would appear, 'with the custom of the house,' was offered on this occasion to her Majesty's uniform; and for which insult the present landlord of the White Hart has, by refusing an apology, accepted the whole responsibility. In every other country in Europe the uniform of the soldier obtains respect. It is incredible that it should be otherwise in England, and doubly incredible that in the royal borough of Windsor a rule should exist which subjects non-commissioned officers to great indignity."

1st (King's) Dragoon Guards. We learn by telegram from Cape Town, dated Aug. 17, that "Sir G. Colley has left Natal for the Transvaal, Col. Alexander, King's Dragoon Guards, acting as Provisional Administrator."

5th Dragoon Guards. Capts. Jee and Bowers and Lieuts. Mackeson and the Hon. K. D. St. Lawrence have taken up duty with the squadron at Hilsea.

4th Hussars. 2nd Lieut. Critchley becomes Lieut., vice Lieut. De la Cherois, retired upon half-pay.

6th Dragoons. Mr. M. L. Dames, J.P., formerly of the regiment, died at 15 Lansdowne Crescent, Cheltenham, on the 5th inst., aged 88 years.

13th Hussars. An Indian contemporary asks :—"Why do not the military authorities send the 13th Hussars to the front? That is what two correspondents, 'Dragoon' and 'An Inquirer,' who write to a contemporary, wish to know. The former is at loss to understand why they 'should not have been ordered up to Kandahar in place of the 15th Hussars, who have already had their share of this miserable campaign, and to whom another move up must entail great expense, as they fully expected to be on the move to England about the time they will reach Kandahar; while the 13th are sitting at their ease, as they have done since their arrival in India, and are likely to do till they leave it?'"

ROYAL ARTILLERY.

The Lahore paper says :—"We regret to state that a report which reached us some days ago of the murder of Capt. A. T. Wintle, R.A., on transport duty at Peshawur, has been confirmed; and a commissariat gomashta named Saligram was, on Wednesday last, arrested on his arrival at Lahore railway station, for abetting the murder. Capt. Wintle was riding home, when he was shot from behind by a Pathan coolie, the bullet penetrating one of his lungs. Capt. Wintle was removed to his house, but died shortly after reaching it. Capt. St. Paul, Rifle Brigade, on duty at Jhelum, has been telegraphed to take up Capt. Wintle's work." Our contemporary, in a subsequent, issue says:—"We regret extremely that we should have published a statement to the effect that Capt. Wintle, R.A., had died at Peshawur from the effects of a shot fired at him by a Pathan coolie. We were correct, however, in stating that he had been shot through one lung, and are rejoiced to hear that Capt. Wintle is 'doing very well,' and we trust may speedily become convalescent."

Intelligence has reached England from Candahar that the body of Lieut. Maclaine, for whose pathetic fate no words can suffice, was found outside his tent on the arrival of Gen. Roberts's force in Ayoub's camp after the action last week, and the prisoners who escaped from the massacre that took place as soon as the Afghans found that all hope was gone, say that when the British troops were heard advancing, the guards, according to the orders left behind him by Ayoub Khan, who had already fled, called out the captives and deliberately murdered them. Several ran for their lives and escaped, but Maclaine met his death with complete dignity and without any attempt at flight. We have received the following extract from Battery Orders by Major W. Ward, commanding I Baty. 2nd Brig. R.A. :—"Athlone, Sept. 6.—It is with deep regret that Major Ward has read the announcement in the telegrams from India of the murder of Lieut. Maclaine, E Baty. B Brig. R.H.A., near Candahar, while a prisoner of war in the hands of the Afghans. The deceased officer joined the late B Baty. 18th Brig., now I Baty. 2nd Brig. R.A., in India, soon after entering the service in 1872, and remained with the battery until 1878, when he was appointed to the Royal Horse Artillery. By those who knew him he will be remembered as an officer of singularly soldierlike qualities, winning the regard and esteem of all with whom he was associated. All ranks of his old battery have now to deplore his untimely end, and in paying their tribute of respect to his memory the battery would also express their sympathy and condolence with his bereaved relatives. Of the late Lieut. Maclaine, it may be truly said, 'He died at the post of duty.'"

Lieut.-Col. J. Hanwell, 9th Brig., lately commanding the Royal Artillery of the Northern Division of the Bombay Army, and formerly in subordinate command at Colaba, has received orders when the mail left India to return at once to England and report himself at the Horse Guards.

Lieut. E. W. Fleming, 3rd Brig., has passed the higher-standard examination in Hindostanee.

Capt. H. B. Hellard, 8th Brig., died at the residence of his father, Mr. C. B. Hellard, J.P., in High Street, Portsmouth, on the 1st inst., aged 33 years. He joined the Service July 10, 1867, and became Capt. Jan. 1, 1879.

Major C. Collingwood, 11th Brig., has been granted an extension of leave from India to remain in England from June 29 to Dec. 29, on medical certificate.

Capt. E. Blaksley, 2nd Brig., has been appointed adjt. to R.A. 2nd (Reserve) Division, Candahar Field Force, vice Robson, deceased.

Lieut. E. H. Elliot, 6th Brig., has been appointed extra A.D.C. to Sir James Fergusson, Governor of Bombay.

The following appointments are made in the Punjab Frontier Force :—No. 1 (Kohat) Mountain Baty.—Lieut. J. C. Shirres, R.A., 2nd subaltern and officiating 1st subaltern, to be 1st subaltern, vice Capt. H. N. Jervois, R.A., promoted; Lieut. F. R. Thackeray, R.A., 3rd subaltern, and officiating 2nd subaltern, to be 2nd subaltern, vice Lieut. Shirres; Lieut. W. J. Honner, R.A., officiating 3rd subaltern, to be 3rd subaltern, vice Lieut. Thackeray.

Capt. N. Powlett, 3rd Brig., has proceeded from Safed Sung to Simla, for duty at Indian Army head-quarters.

Major J. A. Tillard (late Bengal) accompanied Gen. Robert's force from Cabul to Candahar to join E Baty. B Brig. R.H.A., vice Major Blackwood, killed in the engagement at Kushk-i-Nakhud.

The new 13-pounder breech-loading field.guns have been handed over to the Royal Horse Artillery at Exeter for a series of practical trials, and a skilled artificer from the royal Gun Factories has been selected to proceed to Okehampton to remedy any trifling defect which may arise during the progress of the experiments.

Col. W. T. Bolton, C.M.G., commanding the Auxiliary Artillery in the Aberdeen Sub-District, died at Aberdeen on Thursday night, after a short illness. Col. Bolton served in the Eastern campaign of 1854-55, in the trenches with the siege train throughout the siege of Sebastopol, including the bombardments of Oct. 17, April 9, June 6 and 17, Aug. 17, and Sept. 8; was also present at the battle of Inkerman (mentioned in despatches, brevet of major, medal with two clasps, Knight of the Legion of Honour, 5th Class of the Medjidie, and Turkish medal). In 1870, while serving as brigade-major of Royal Artillery in Canada, he volunteered for the Red River expedition, to which he was appointed chief staff officer, and on the return of the force was honourably mentioned in despatches and made a C.M.G. for his services therewith. He entered the Army, Dec. 18, 1847; became lieut.-col., Dec. 23, 1871; and brevet col., Dec. 23, 1876.

Capt. E. O. Hay, from the District Staff at Woolwich, has been appointed adjutant of the 1st Brig., in succession to Capt. Carlisle Greer, who has been selected for the office of aide-de-camp to Sir George Strahan, K.C.M.G., and will accompany that officer to South Africa, subsequently proceeding with his chief to Tasmania.

ROYAL ENGINEERS.

Capt. W. H. Pierson, executive engineer, 1st grade, Public Works Department, has been appointed officiating Military Secretary to the Marquis of Ripon.

Grenadier Guards. Lieut. the Hon. G. F. H. Somerset, A.D.C. to Sir J. Fergusson, Bart., Governor of Bombay, is employed as A.D.C. to Major-Gen. Phayre, C.B., commanding the Reserve Division of the Cabul Field Force.

Scots Guards. Lieut. E. W. W. Wynn, 2nd Batn., was drowned on Wednesday evening in the Thames at Windsor. Accompanied by the Hon. A. Keppel and Mr. Dawson-Damer, he had been shooting Tumbling Bay, off the weir between Romney Island and Eton. The cascade is about three feet deep, and the current over it is very strong. Deceased, who was a good swimmer, had performed the feat successfully once previously, and was attempting to shoot the weir again when he fell out of the canoe and was washed into Tumbling Bay, which is some dozen feet deep, and kept by the torrent from rising. The deceased entered the Army Sept. 11, 1877. At an inquest held on Thursday, the coroner, in summing up, observed that the deceased and his brother officers, being perfectly used to the river, would probably pay but little attention to the opinion of the waterman. It was, however, at the same time rather extraordinary that persons knowing the danger should risk their lives as in the case under inquiry. The jury returned a verdict that the deceased was "Accidentally drowned," and recommended that chains should be placed across the river to prevent any boat going over, and that a rope should be kept ready for use at the spot. The deceased officer was a nephew of Sir Watkin Williams Wynn, and heir to his estate.

2nd Queen's. Capt. Lawson and 2nd Lieut. Bunbury, 2nd Batn., have passed the higher-standard examination in Hindostanee.

5th Fusiliers. Capt. Cherry, 2nd Batn., has passed the higher-standard examination in Hindostanee.

6th Regiment. Lieut. Scott, 2nd Batn., has passed the higher-standard examination in Hindostanee.

7th Fusiliers. Major R. Inglis, late of the regiment, died at his residence, Druimuan, near Pitlochry, N.B., on the 2nd inst. He served with the 18th Royal Irish in the Crimea from Dec. 30, 1854, including the siege and fall of Sebastopol, and assault and capture of the cemetery on June 18 (medal with clasp, brevet of major, and Turkish medal).

8th King's. Lieut. Dundas, 2nd Batn., has passed the higher-standard examination in Hindostanee.

9th Regiment. This announcement appears in Indian General Orders :—"Lieut.-Col. W. Daunt, 2nd Batn., 9th Foot, is appointed to command a brigade in the field, from July 12, 1880, vice Major-Gen. W. Roberts, who vacates on promotion. While so employed, Lieut.-Col. Daunt will have the temporary rank of brigdr.-gen. of the 2nd Class." Lieut. Shepherd obtains his company by the retirement of Brevet Major Kerrich.

11th Regiment. The athletic sports of the 1st Batn. were held at Fulwood Barracks, Preston, on the 6th and 7th inst. The band, conducted by Mr. Stubbings, played during the intervals. The prizes were distributed on the ground by Lieut.-Col. Birch, commanding. Col. Bancroft, the officers of the garrison, and numerous civilians were present. The boxing was remarkably good, and would have induced one of the pugilists of a few years ago to take some of the performers under training. The tug-of-war was carried by the men of the 11th Regt. against the garrison. Pte. Stephenson and McLoughlin, of the band, and Pte. Bush took all the leading prizes. On the whole, the two days' holiday were spent to advantage by the officers, non-commissioned officers, and men.

12th Regiment. "We" (Lahore paper) "are glad to hear that Col. Walker, 12th Regt., is to have the command of the brigade from Bengal proceeding to Candahar, composed of H.M.'s 63rd Regt., the 2nd Queen's, and the 3rd and 4th Regts. of Bengal N.I. Col. Walker has seen much service in Afghanistan since the outbreak of the war, and has gained the confidence of the Generals under whom he has served. Col. Walker commanded the infantry in the expedition from Jellalabad into the Lughman valley at the beginning of the present year." Lieut. Adams, 1st Batn., a probationer, officiating wing-officer, Corps of Guides, is about to be admitted to the Bengal S.C., from May 16, 1879. The 1st Batn., when last heard of, was not in Afghanistan, but at Cherat, near Peshawur, having been sent back to India by a medical board, the thirteen months' hard work, on the worst of food, having unfitted them for further active service. The battalion, which has throughout behaved with soldiery devotion, was lucky enough to come in for a nice little fight on the way down at Jellalabad. The right-half-battalion, under Col. Sillery, with some of the 5th Fusiliers, and a mountain battery R.A., with some Native troops, were ordered to cross the Cabul river, and disperse a gathering of about 2,000 Afghans at a place called Bésood. They did so, and a sharp fight was the consequence, the Afghans being driven out of the place, leaving 82 dead on the ground, and carrying off many more dead and wounded. Pte. Longworthy is to be recommended for the V.C. for saving the life of Lieut. Kilgour, of the 5th Regt. He and Lieut. Kilgour were the first into the fortification, and found themselves among 17 Ghazis or Fanatics who had sworn on the Koran that they would not forsake the place. Longworthy got badly wounded, and the men of the regiment, streaming in after them, killed every Ghazi with the bayonet. It may be remembered that the 12th were kept a considerable time at Lundi Kotal, where fever crept into their ranks and laid the regiment so low as to ultimately render them unfit for a time for service in the field, although they were pushed up afterwards as far as Jellalabad."

15th Regiment. Lieut. Wood, 1st Batn., is acting as orderly officer to Brigdr.-Gen. Wood in Afghanistan.

18th Royal Fusiliers. Major Toppin, 2nd Batn., has vacated his appointment as Commandant of the School for Officers of the Auxiliary Forces at Aldershot, and has proceeded to join the depôt at Clonmel. Lieut. Fox, a probationer for the Indian S.C., reverts to duty with his regiment, and will be brought again on to the establishment to fill the next vacancy.

19th Regiment. Capt. Turner is posted to the 2nd Batn., on promotion from the 99th Foot.

20th Regiment. On Monday, the 2nd inst. (the 1st falling on a Sunday), the 1st Batn. at Cyprus celebrated the anniversary of the battle of Minden with the usual honours. The regiment paraded at half-past ten, and after the presentation of a medal for long service and good conduct by Major Webster to Drum-Major Kaill, the ceremony of trooping the colours was performed before his Excellency and the officer commanding the troops, who minutely inspected the regiment. Every officer and man wore a rose in his helmet, and the regimental colour was decorated with a handsome wreath. The dinners were visited by the officers, whose healths were drunk with great enthusiasm, and after dinner the regimental sports took place. These lasted till after seven, the shades of evening, in fact, putting the last two or three events out of the programme. In the evening the officers entertained Sir R. Biddulph and a large party of guests at dinner.

21st Fusiliers. The remains of Brevet Lieut.-Col. Hazlerigg, 2nd Batn., were interred at Pretoria, with military honours, on the 19th ult. The mournful procession which accompanied the remains of the deceased was heralded to the townspeople by the strains of the "Dead March in *Saul*" and the beat of the muffled drums. With arms reversed, and marching slowly, the long procession filed down Market Street, and along Schoeman Street, to the Pro-Cathedral of St. Alban's, into which the dead was brought, borne by officers of the regiment. The Right Reverend the Bishop, with his clergy, officiated, and the solemn words of the opening sentence of the burial service were recited as the coffin was brought up the aisle, and placed in the chancel. As the funeral *cortége* proceeded on its way, the marks of respect for the dead were everywhere apparent. Flags were flown half-mast high, stores were closed, hats doffed, and the order of the procession was unbroken by the crowd. Arrived at the graveyard, the body was placed in consecrated ground, in a vault prepared at the south end of the walled enclosure in which not a few of the soldiers who have died at this station repose. The funeral salute then followed the recital of the remainder of the funeral service, and ashes were committed to ashes, dust to dust. Mr. W. E. Money-Kyrle, late of the regiment, died at Littlehampton on the 4th inst., aged 35 years.

22nd Regiment. Capt. E. Straton, 2nd Batn., who was recently killed in Sir F. Roberts's brilliant action on Sept. 1, near Candahar, entered the Service on June 25, 1861, obtained his lieutenancy by purchase June 23, 1863, and after holding the adjutancy of his battalion for more than four years, obtained his company on April 24, 1872. He accompanied Sir Frederick Roberts in his advance on Cabul from the Peiwar Kotal last year as superintendent of signalling, and was specially mentioned in despatches for the very great assistance he rendered at the battle of Char-Asaib. He retained this position in Gen. Roberts's column during its recent march on Candahar, and fell in the performance of his duties almost in the moment of victory. His loss will be deeply deplored, not only by the officers and men of his regiment, but by a very large number of friends throughout the Service. A man of indomitable courage and untiring energy, he was passionately fond of his profession, and singularly zealous in the performance of his duties. First in every manly exercise, kind-hearted and courteous, he was a noble specimen of "an officer and a gentleman."

23rd Fusiliers. Capt. Mainwaring remains with the 1st Batn. on promotion. The friends, military and civilian, of Qrmr. Knightley entertained him at a dinner in the Masonic club-room, Thomas Street, Woolwich, last week, prior to his departure to join the 2nd Batn. at Plymouth, and hearty good-wishes were expressed for his welfare, and for his return at some future day to the many who have learnt to know and esteem him in the town and garrison of Woolwich.

24th Regiment. Brevet Lieut.-Col. Black, C.B., obtains the lieutenant-colonelcy, by the retirement of Lieut.-Col. Dunbar.

26th Cameronians. A correspondent writes to the *Times*:—"In the scheme as published to-day (Sept. 8) for the renaming of regiments it is proposed to join the 26th and 74th into a regiment, to be called the 'Cameronian Highlanders.' Now, the 26th Foot, or Cameronians, was raised in 1689 from among the fanatical disciples of Richard Cameron, the Covenanters of the south-west of Scotland. Not only were they in no sense Highlanders, but they were actually raised to fight the Jacobites, whose strength chiefly lay among the clans of the North, and their earliest service was the desperate, but successful defence of Dunkeld against a vastly superior body of the Northern mountaineers, in which action fell their lieutenant-colonel (the gallant Cleland, who not only fought the Highlanders with material weapons, but also assailed them in doggrel verse), several other officers, and many men. Whatever it may be decided to do with this regiment, I trust it may never be called 'Highland.'"

28th Regiment. Capt. Collingwood has joined the depot at Bristol for two years, in place of Capt. Marshman, appointed to a Militia adjutancy.

29th Regiment. Lieut. Chapman has been appointed station staff officer of the Purunahar Sanatarium, vice Lieut. Inglefield, 15th Foot, proceeded on service.

34th Regiment. Capt. Hinde has been appointed adjt. of the Carlisle Brigade Depôt.

36th Regiment. Capt. Riddell has been appointed pymr. on joining the Pay Department, from the 70th Foot.

39th Regiment. Capt. Luby has passed the higher-standard examination in Hindostanee.

42nd Highlanders. There is no truth in the report which has been circulated that the regiment is about to proceed to Woolwich from Aldershot.

43rd Light Infantry. The death has been officially announced of Lieut.-Col. T. Horan, on the Retired Full-pay List. Col. Horan served with the 41st Regiment during the whole of the campaign of 1842 in Afghanistan (medal), and was present in the engagements in the Pisheen Valley, near Candahar, before Ghuznee, and occupation and destruction of Cabul, expedition into Kohistan, storm, capture, and destruction of Istaliff, and in the various minor affairs. Served with the 43rd during the Indian Mutiny campaign from Dec. 1857 to 1859, and was present at the surrender of Kirwee, and subsequent operations (medal). Also served in New Zealand war of 1864-65, including expedition into the province of Taranaki, and in command of outposts, destroying many pahs and fortified villages (medal). He joined the Army May 27, 1842; became major July 20, 1866; and retired with the hon. rank of lieut.-col. Oct. 28, 1868.

47th Regiment. Brevet Lieut.-Col. Straton succeeds to the command of the regiment, vice Col. FitzRoy, placed upon half-pay, on completing five years in the appointment, Brevet Major North obtaining the majority.

ROYAL MARINES.

Lieut. C. V. W. Williamson, late R.M.L.I., a candidate for the Indian S.C., has been appointed to the 35th Bengal N.I., and Lieut. W. W. Taylor to the 38th Bengal N.I., on probation.

The voluntary retirements of the following officers who belong to the corps of the Royal Marine Light Infantry will, in all probability, be effected shortly, under provisions of Order in Council dated Jan. 15, 1878:—Lieut.-Col. and Brevet Col. B. B. Herrick, second-commandant of Chatham Division; Major L. G. Rodney, of Portsmouth Division; Majors W. H. Wroot and C. E. Macdonald, both of Chatham Division; and Major A. Macintosh, of Plymouth Division. In consequence of these retirements, the following officers will be promoted:—To be second-commandant, Lieut.-Col. J. M. Maskery, of Chatham; to be lieut.-col., Major J. W. V. Arbuckle; to be majors, M. H. Farquharson (instructor of musketry at Chatham), Brevet Major Joseph Phillips (instructor of musketry at the recruit depôt at Deal), Capts. J. M. W. Silver (of Plymouth), H. H. Strong (instructor of gunnery at Portsmouth), and T. P. Norton (of Portsmouth); to be capts., Lieuts. A. E. Chapman (adjt. at Chatham), G. Hobart (adjt. at Portsmouth), W. P. Rumley (assist.-instructor of musketry at Plymouth), H. H. Morgan (of Plymouth), and A. D. Corbet (of Portsmouth). These promotions will leave the following Staff appointments at the disposal nominally of the Admiralty, but in reality at that of the Deputy-Adjutant-General, Major-Gen. Adair:—Instructors of musketry at Chatham and Deal, assist.-instructor of musketry at Plymouth, instructor of gunnery at Portsmouth, and adjutancies at Chatham and Portsmouth. When the foregoing promotions are gazetted, Lieut. J. F. Luxmoore, adjt. of the Plymouth Division, whose commission as a 2nd lieut. is dated Dec. 13, 1865, will be the senior officer on the lieutenants' list.—*Western Morning News.*

A request has been made to the War Office for arrangements to be made for the reception of Capt. O'Connor, R.M.A., both at Woolwich and Shoeburyness, to become acquainted with the latest alterations in the science of gunnery.

Capt. Frank Roberts, R.M.A., has been selected to fill the post now held by Major Crease as Superintendent of Artificers at Eastney. At present, Capt. Roberts will be appointed as assistant to Major Crease, but on the promotion of the major, Capt. Roberts will assume the duties of superintendent.

Major W. H. Farquharson will relieve Major Hore of the command of the Hull recruiting party on the 16th inst.

Major Boase, in command of Exeter recruiting party, will be relieved by Capt. Rose on the 1st prox.

Major G. H. Munro is under orders for embarkation in H.M.S. Inconstant.

50th Queen's Own. Major Fyler obtains the lieutenant-colonelcy, vice Col. Thompson, retired on pension, Capt. and Brevet Lieut.-Col. Leach succeeding to the majority.

61st Regiment. Capt. Corbett has succeeded Capt. Fowler at the depot at Bristol.

63rd Regiment. Lieut. D. M'L. H. Farrington died a Kurrachee on the 31st ult., aged 22 years. The deceased, who was son of Major-Gen. Farrington, Retired List, Bengal Army, entered the Service, May 11, 1878, and became lieut. May 5, 1880. A telegram to the *Standard*, dated Killa Abdulla, Tuesday, says:—"In accordance with orders received from Gen. Roberts, our division has halted, and a portion of it has already begun to retrace its steps. The 63rd Regiment left to-day. It will march to Quetta, and halt there for the present in readiness to act, if necessary, against the Khelat mutineers and the Sharawak tribes."

65th Regiment. Brevet Lieut.-Col. Wolseley, officiating D.A.A.G. Rohilcund District, Bengal, has been appointed A.A. and Q.M.G. Peshawur District, from July 11.

69th Regiment. Capt. Glendonwyn has succeeded Brevet Major Montgomery, 41st Regt., as adjt. of the Brigade Depôt at Cardiff.

70th Regiment. Capt. Riddell has been appointed to the 36th Regt. as pymr., on joining the Pay Department.

71st Highland Light Infantry. Capt. Spencer has joined the depôt for two years.

72nd Highlanders. Lieut.-Col. F. Brownlow, C.B., whose death is announced from Candahar, had commanded the regiment from the commencement of the Afghan war in November, 1878, when he was ordered from Kohat to go in Gen. Roberts's column, then assembling at Thull for an advance through the Kurum. His whole service had been passed in the 72nd, to which he was first gazetted as an ensign by purchase in September, 1854. In the following May he went out to the Crimea with a draft from the depot, and, joining his regiment in the field, took part in the expedition to Kertch, the siege and fall of Sebastopol, and attack on the Redan on June 8, 1855. As a subaltern, he accompanied his regiment to India in August, 1857, when large reinforcements were sent out, to aid in quelling the Sepoy mutiny. The 72nd was, on its arrival in Bombay, sent to Central India, and included in what was then known as the Rajpootana Field Force. He did good service at the siege and capture of Kotah, and furnished the leading column of assault on March 30, 1858, when Col. Parke led his men to the storming of the fortress. Lieut. Brownlow was among the young officers who accompanied the assault column on that occasion, and took his share in the hand-to-hand fighting which ensued after our entry into the city. He served subsequently throughout the operations in Central India, and took part in the pursuit of the rebel forces under Tantia Topee and Rao Sahib, who were finally attacked and routed at Podeypore in December, 1858. After the Mutiny he was sent with his regiment into cantonments at Mhow. He purchased his company in August, 1862, and came home from India with his regiment in February, 1866, subsequently serving with head-quarters at Edinburgh, Manchester, Limerick, and Cork, until again called upon to go out to India. His regiment embarked at Queenstown in February, 1871, and has served in India ever since. Col. Brownlow went out with it as junior major, did duty with head-quarters at Umballa, Peshawur, Nowshera, and Sealkote, and succeeded to the command in Aug. 1877, on the retirement of Col. Beresford. In command of the 72nd Highlanders, he advanced with Gen. Roberts from Thull in Nov. 1878, and took a leading part in the successful storming of the Peiwar Kotal, a position of very great strength, and held by an enemy superior in numbers both in men and guns. At the storming of the Peiwar, the sturdy little Goorkhas and stalwart Highlanders of the 72nd went side by side up the hill, and shared equally in the hand-to-hand fighting which ensued. Col. Brownlow, on that occasion, went up with the leading company of his regiment, and was in the thickest of the fighting, full justice being done to him in the despatches of Gen. Roberts, who states:—"I brought up the 72nd Highlanders as soon as the firing commenced, and I cannot praise too highly the gallant conduct of this splendid regiment and the brilliant style in which the men were led by Lieut.-Col. Brownlow and the other officers of the corps." Col. Brownlow served next with his regiment in our occupation of the Shuturgardan, and then returned to India on sick-leave. He rejoined his regiment in time to take part in our occupation of Cabul, and shared in the hard fighting of December last, when the 72nd formed part of Baker's brigade. In his despatches Gen. Roberts states:—"The retirement of Brgdr.-Gen. Baker's troops down the eastern face of Asmai, under a heavy fire, was most ably conducted by that distinguished officer Col. Jenkins, C.B., who speaks with great admiration of the example set to their men by Lieut.-Col. Brownlow, C.B., and Major C. M. Stockwell, 72nd Highlanders." During our subsequent occupation of the Sherpur cantonments, Col. Brownlow was placed in charge of the fifth section of the defences. While at Cabul his Afghan services were to a certain extent recognised by his appointment to the Order of the Bath. Capt. St. J. T. Frome, who is also returned in the list of officers killed, had served with his regiment throughout the Afghan war, and commanded a company at the capture of the Peiwar Kotal, occupation of the Kurum Valley, subsequent advance into Afghanistan, battle of Charasiab, capture of Cabul, and occupation of the Sherpur cantonments. He had over 19 years' service in the 72nd, joining the regiment as an ensign by purchase Feb. 22, 1861; purchasing his lieutenancy April 19, 1864; and obtaining his company June 8, 1872. Capt. Murray and Lieut. and Adjt. Monro were wounded in the action before Candahar, and the following non-commissioned officers and men were either killed or have died of wounds, viz.:—Lance-Serjt. William Cameron; Lance-Corpls. Josiah McHoenna, William Gannon; Ptes. Mill Erskine, Alexander Hodge, James McQueen, James McGowan, James Baggin, George Haseltine. Lieut.-Col. F. Pitts, late of this regt., died at the Hermitage, Bridlington, on the 1st inst., aged 78 years.

75th Regiment. Quarters are ordered to be provided at Chatham Garrison for the 75th Regt., at present stationed at Aldershot. It will replace the 26th Regt., which has gone to Malta, relieving one of the regiments which were ordered to India.

78th Highlanders. The regiment embarked at Kurrachee on the 10th ult., *en route* for Afghanistan. The numbers that embarked, were, in the Huzara: 17 officers, 1 warrant officer, 579 rank and file, and 66 followers. In the Dalhousie: 8 officers, 242 rank and file, 5 hospital apprentices, and 43 followers. The following officers accompanied head-quarters, viz.:—Lieut.-Col. Warren, Major Mackenzie, Brevet Major Smith; Capts. Graham, Waugh, Stewart, and Sandeman; Lieuts. M'Dougall, Harvey, Hatton, Halkett, Barlow, Davidson, Graham-Campbell (adjt.), and Hume; 2nd Lieuts Mackintosh, Fraser, Lund, and Macintyre; Capt. and Pymr. Hewson, Qrmr. Campbell, and Surg. Hatch. Surg.-Major Land, lately in medical charge of the regiment, has been transferred to Kirkee for duty, and did not, therefore, embark for service. Surg. G. Rogers takes his place. 2nd Lieut. Brown was told off for departure to the depôt at Poona.

82nd Regiment. Major Briggs has been appointed commandant of the School of Instruction at Aldershot for officers of the Auxiliary Forces, from the 1st inst. inclusive, vice Major Toppin, 18th Foot.

83rd Regiment. Sub-Lieut. Baker, officiating squadron-officer, 3rd Punjab Cavalry, was slightly wounded during the cavalry pursuit after the defeat of Ayoub Khan's army by Gen. Roberts before Candahar last week.

85th Light Infantry. Lieut. Rivett-Carnac has passed the higher-standard examination in Hindostanee.

87th Fusiliers. Mr. C. H. Bagot, formerly of the regiment, died at his residence, North Adelaide, South Australia, on July 29, aged 93 years.

92nd Highlanders. Lieut. Menzies and 2nd Lieut. Stewart are reported as having been wounded in the action before Cabul last week, when Ayoub's army was defeated by Gen. Roberts's force. The following non-commissioned officers and men were either killed or have died of their wounds, viz.:—Colour-Serjt. Richard Fraser; Corporal Lewin Friendship; Privates Alexander Eastron, Thomas Kerr, John McKenzie, William Reid, Neil Ross, James Scott, John Strachan, William Wilson, William Henderson, Peter Hoey, James Wilson.

100th Regiment. We learn by special telegram from India that the regiment has received orders to remove at once to Kurram. Capt. Downes and Lieut. Willcocks, Transport Staff; Lieut. Kempster, attached 1st Goorkhas; Lieut. Thomson, attached 3rd Goorkhas; and Surg.-Major Atkins, attached 72nd Highlanders, met in Cabul on Aug. 1. Besides these officers now serving with the Northern Afghanistan Field Force, Capt. and Brevet Lieut.-Col. Prior and Lieut. Short served in the first campaign. The Royal Canadians have, it will be seen, been well represented in Afghanistan.

104th Fusiliers. Capt. Alcock, a candidate for the Pay Department, who has been attached to the pay office of the Royal Artillery at Dublin, has been ordered to the War Office to complete the period of his term of probation. Capt. Gordon-Short has been ordered to proceed to Sunderland without delay, to assume duty as adjt. of the 3rd Durham Rifle Volunteers.

105th Light Infantry. Capt. Davy has joined the depôt at Pontefract for two years, vice Way, promoted.

107th Regiment. Capt. A. Batson died at Ebberly, North Devon, on the 31st ult. of remittent fever, aged 32 years. The deceased entered the Army Jan. 23, 1869; became lieut., June 30, 1871; and capt., Aug. 31, 1879.

Rifle Brigade. Capt. Lascelles, 1st Batn., has replaced Brevet Major Fryer at the depôt at Winchester.

2nd West India Regiment. Lieut. Kerans, a probationer for the Indian S.C., has passed the higher-standard examination in Hindostanee. Lieut. Bond, a candidate for the Indian S.C., has been appointed officiating wing-officer, on probation, 26th Bengal N.I.

Commissariat and Transport Department. Deputy-Comy.-Gen. R. Major has retired from the Service with the rank of Comy.-Gen. The following changes have taken place:—Assist.-Comy.-Gen. W. H. Christie, to Straits Settlements, vice Saunder, to unattached; Assist.-Comy.-Gen. Meyer, Portsmouth, to Hong Kong, vice Macfarlane, retired; Assist.-Comy.-Gen. T. B. Prissick, Cyprus, to York; Deputy-Assist.-Comys.-Gen. Johnson, Honduras, to unattached; D. S. Skirving, Ceylon, to unattached; W. F. Moore, Cork, to Bermuda; J. W. B. Parkin, unattached, to Army Service Corps; H. A. L. Harvest, Chatham, to Army Service Corps; R. V. Day, unattached, to Aldershot; Qrmr. W. J. Barrell, Natal, to Woolwich; Deputy-Assist.-Comy.-Gen. L. A. Hope, Natal, to Singapore.

Ordnance Store Department. The following changes have taken place:—Assist.-Comy.-Gen. of Ordnance A Beswick has been promoted to the rank of deputy-comy.-gen., vice G. G. Munro, retired; Assist.-Comy.-Gen. of Ordnance C. Ralph, to Bermuda, vice J. Lilley, retired; Assist.-Comy.-Gen. of Ordnance G. C. Murray, to York, vice Ralph; Deputy-Assist.-Comy.-Gen. of Ordnance G. A. Jolly, to Upnor Castle, vice Murray; Deputy-Assist.-Comys.-Gen. of Ordnance R. T. Stainforth, Athlone, to Chester; W. B. Cooke, Natal, to Army Service Corps; G. H. Everard, Army Service Corps, to Aldershot; E. E. Markwick, King William's Town, to Natal; W. Horan, Hong Kong, to unattached; W. F. Wright, unattached, to Bermuda; C. W. H. Tate, unattached, to Purfleet; Assist.-Comys. E. Heath, Ceylon, to unattached; E. C. Wainwright, Natal, to Stirling Castle; A. Sadler, Natal, to Devonport; T. Heron, Natal, to Aldershot; Qrmr. W. Johnson, from unattached, to Army Service Corps. A correspondent writes:—"In the Ordnance Branch, Army Service Corps, no definite rule seems to be in existence relative to non-commissioned officers and men taking their turn for foreign service. A great number of non-commissioned officers manage to remain, some at head-quarters, others at home stations, during the whole period of their service. It is hardly justice allowing them to remain, even though some of them hold responsible places in office, and I think that if every non-commissioned officer and man in this corps were made to take his turn for service abroad, the 'responsible duties' at head-quarters and home stations would, in a very short time,' be performed to the entire satisfaction of the authorities, besides imparting a knowledge of these duties to others which would be intrinsically valuable in case of necessity."

Medical Department. The Commander-in-Chief in India has been pleased to sanction the following arrangements in the Administrative Medical Staff:—Deputy-Surg.-Gen. W. H. Adley, Indian Medical Department, to proceed to Jubbulpore, and assume administrative medical charge of the Saugor and Gwalior Circle. Deputy-Surg.-Gen. R. H. Perkins, I.M.S., on being relieved by Dr. Adley, to proceed to Cabul, and take up the appointment of principal medical officer, 1st Division, Northern Afghanistan Field Force. Deputy-Surg.-Gen. H. B. Hassard, Army Medical Department, on being relieved by Dr. Perkins, to proceed to Umballa, and assume administrative medical charge of the Sirhind Circle.

The Auxiliary Forces.

MILITIA.

Capts. Leeming, 5th Royal Lancashire, and Broadley, East York, and Lieut. Anderson, Worcester, and 2nd Lieut. Hill, 1st Somerset, joined the School of Instruction at Aldershot on the 1st inst.

THE VOLUNTEERS.

1st Pembrokeshire R.V. The annual inspection of the battalion took place at Haverfordwest on the 30th ult. The different detachments assembled on St. Thomas's Green at 1.30 p.m., and were then marched to Portfield. The inspecting officer was Col. Carden, 24th Brigade Depôt. At the close of the inspection, Col. Carden said they were the finest body of men he had yet inspected, and they had turned out clean and soldierlike, one man only in the whole battalion having a dirty belt. The movements on the whole were done very satisfactorily, the marching-past in column and quarter-column being especially good. The battalion now marched to the Castle Square, where they were thanked for their attendance by Col. Stokes, who said he hoped their services would never be required, but if they were, he should feel proud to lead such a battalion into the field. The strength of the battalion was 759 of all ranks.

Lieuts. Ruck, 1st Hants, Smyth, 1st Lincoln, Spottiswoode, 2nd Middlesex, and 2nd Lieuts. Johnson, 1st Kent, Leach, 23rd Middlesex, Standford and Howard M'Lean, 1st Shropshire, Greatrex, 3rd Stafford, and Barnes, 2nd Tower Hamlets, joined the School of Instruction at Aldershot on the 1st inst.

The Indian Army.

[The Editor will be glad to receive Contributions from time to time from Officers of Native Regiments who may desire to render this column interesting to friends in England.]

1st Bengal Cavalry. Lieut. R. F. Gartside-Tipping has been granted leave to England for one year, on medical certificate.

7th Bengal Cavalry. Lieut. A. McW. Renny, supernumerary 1st Bengal Cavalry, has been appointed squadron-officer, vice Hay, promoted.

8th Bengal Cavalry. Lieut. J. de C. D. Meade, from the 10th Bengal Cavalry, has been appointed officiating squadron-officer.

13th Bengal Cavalry. Surg. G. Watson, M.D., died at Peiwar Kotal on July 25, from typhoid fever, aged 34.

16th Bengal Cavalry. Lieut.-Col. J. Upperton, commandant, has been granted leave to England, on medical certificate.

1st Bengal N.I. Lieut. C. H. More-Molyneux has been appointed to officiate as commandant of the Corps of Jezailchis in the Khyber Pass.

7th Bengal N.I. Lieut. E. G. Barrow is the winner of the gold medal given by the United Service Institution of India for the best essay on "A Transport Service for Asiatic Warfare." The essay should be widely circulated among all whom the subject concerns; for whatever the exact degree of its merits, the paper must be valuable. Transport service is one of the two great military questions of the day in India—the other being, as our readers very well know, Army reorganisation. Opinions on the transport service should be collected without delay, and a committee appointed to arrange an effective system.

11th Bengal N.I. The Lahore paper of July 27 says:—"The exodus of troops from the front would appear to have commenced, as the 11th N.I., under Col. Harris, marched into Rawul Pindee a few days ago. The 11th have been on service during both campaigns, and have had a large share of that most harassing of duties—maintaining communications; at one season contending with frost, at another summering—*simmering* would be nearer the mark—in the rice swamps of the Lower Kurum Valley. A correspondent has favoured us with a copy of a farewell order issued to the regiment on leaving the Kurum force, in which the Major-General gracefully acknowledges the services of the regiment, and, whilst regretting the severe losses they had incurred during the campaigns—20 per cent. by death and 28 per cent. by invaliding—expresses a hope that a short residence in India will render them again as fit as they were when they first joined the force. That these losses are very severe there can be no doubt, but the question whether a great portion of the casualties sustained by native troops generally on the present campaign could not have been avoided by such simple expedients as a timely issue of warm clothing, more liberal scale of rationing, and a judicious selection of localities suited to the nationalities of various regiments, is one on which we may have something to say on another occasion."

14th Bengal N.I. The *Times of India* says:—"The retirement of Lieut. A. W. T. Radcliffe from the Governor's Staff occurs at an opportune time for him, as he rejoins his regiment in the Bengal Army just as it has received instructions to hold itself in immediate readiness to proceed on active service in Southern Afghanistan. His services are replaced at the disposal of the Government of India from July 1, and he is permitted to travel at the public expense from Poona to Umballa to join his regiment."

16th Bengal N.I. Lieut.-Col. W. G. Cubitt, V.C., second-in-command, has been granted leave to England for one year, on medical certificate.

17th Bengal N.I. Surg.-Major R. T. Lyons has been transferred to the regiment from the 35th Bengal N.I., vice Eades, transferred to the 35th.

18th Bengal N.I. Lieut. F. G. Vivian, wing-officer and qrmr., has been appointed adjt., vice Sage, promoted; Lieut. E. E. Taylor, wing-officer, has been appointed qrmr.

21st Bengal N.I. Col. J. B. Thelwall, C.B., whose resignation of his appointment as commandant has been accepted from April 27, has been posted to Dalhousie for general duty, pending retirement.

27th Bengal N.I. Lieut.-Col. C. J. Hughes, second-in-command, has been appointed commandant, vice Doran, vacated on succeeding to colonel's allowances; Capt. R. A. Swetenham, wing-commander, is appointed second-in-command, and Major C. W. Babington, wing-officer, wing-commander.

35th Bengal N.I. Surg.-Major L. E. Eades, from the 17th Bengal N.I., has been transferred to the regiment, vice Lyons, transferred to the 17th.

38th Bengal N.I. Lieut. C. W. Harris, from the 39th Bengal N.I., has been appointed officiating wing-officer.

2nd Central India Horse. Lieut. N. F. F. Chamberlain, squadron-officer, was slightly wounded during the cavalry pursuit after the defeat of Ayoub Khan's army at Candahar last week.

Corps of Guides. The Governor-General of India in Council has been pleased to admit 2nd-Class Hospital Assist. Gulam Haidar Khan to the 3rd Class of the Order of Merit, for conspicuous gallantry in action at Charasiah, April 25, 1880, on which occasion he continued, under a heavy fire, passing across the open from group to group of the skirmishers, so as to ensure no wounded man remaining long without assistance. In the performance of this duty he himself fell severely wounded.

2nd Goorkhas. Lieut. H. S. Wheatley, wing-officer and qrmr., has been appointed adjt., vice Newall, vacated on promotion. Brevet Lieut.-Col. A. Battye, acting commandant, brother of the late Major Wigram Battye, is returned as having been wounded in the action fought last week before Candahar.

Punjab Frontier Forces. We have good reason to suppose that, towards the end of the year, when the troops shall have returned from Afghanistan, the following movements of troops will take place:—1st P.I. and 5th P.I. will proceed to Dera Ismail Khan in course of relief; the 4th S.I. and 2nd P.I. to Bunnu; the 1st S.I. to Abbottabad; the 3rd S.I. and the 4th P.I. to Dera Ghazi Khan; the 2nd S.I., 3rd P.I., and 6th P.I. to Kohat, if that station be still garrisoned by the Punjab Frontier Force, which seems somewhat doubtful. To the force left in the Kurum Valley, the P.F.F. will contribute detachments of regiments only. The cavalry of the P.F.F. may be disposed as follows:—1st P.C., Dera Ismail Khan; 2nd P.C., Kohat; 3rd P.C., Rajanpore; 4th P.C., Bunnu; 5th P.C., Dera Ghazi Khan. This arrangement may be changed, of course, should an expedition against the Waziris take place. It is possible that a whole regiment of native infantry may be stationed at Rajanpore.

2nd Sikh Infantry. Major J. B. Slater was wounded in the action before Candahar last week, under Gen. Roberts.

3rd Sikh Infantry. The Right Hon. the Governor-General of India in Council has been pleased to make the following promotions in, and admissions to, the Order of Merit:—From the 3rd to the 2nd Class: Jemadar Ganesha Sing and Naick Sham Sing, for conspicuous gallantry in action at Mir Karez on Dec. 10, 1879, on which occasion they were most forward in the attack on the enemy's position, and set a brilliant example to the men of the regiment. To the 3rd Class: Havildar Gurdit Sing, for conspicuous gallantry in action near Cabul on Dec. 14, 1879, on which occasion, when a detachment of the regiment was retiring from the Conical Hill, near the Aliabad Kotal, he ran back under a heavy fire and rescued a wounded man, who would otherwise have been killed by the enemy; Havildar Saiad Gul, for conspicuous gallantry in action at Mir Karez on Dec. 10, 1879, when, with Jemadar Ganesha Sing and Naick Sham Sing, he was very forward in the attack on the enemy's position, setting the men a brilliant example, and receiving a severe wound in hand-to-hand conflict with the Afghans; Sepoy Panjab Sing, for conspicuous gallantry in action at the Takht-i-Shah Hill, near Cabul, on Dec. 12, 1879, in proceeding, under a heavy fire, to the assistance of Lieut. J. N. Fasken, who was severely wounded, remaining with him, and eventually carrying him out of fire; Second-Class Hospital Assist. Nehal Chand, for conspicuous gallantry in action at the Takht-i-Shah Hill, near Cabul, on Dec. 12, 1879, in twice proceeding, under a heavy fire, to the assistance of Lieut. J. N. Fasken, who was severely wounded. Lieut. C. H. M. Smith, has, with the concurrence of the Punjab Government, been appointed a paid attaché in the Intelligence Branch of the Quartermaster-General's Department in India.

2nd Madras Light Cavalry. Hon. Capt. and Subadar Major Mahomed Abdullah has been appointed aide-de-camp to Sir Neville Chamberlain, vice Hon. Capt. Mahomed

Hussain, who was recently killed. The new A.D.C. is a member of the Order of British India. He entered the Army forty-seven years ago, and is now sixty-two years of age. He served under Major-Gen. Whitlock with the Bundlecund Field Division in 1858-9, was present at the capture of Urighang, the affair at Koboie, and battle of Banda, has received medal and clasp for Central India, and prize money for Kurvi and Banda. He was only this year gazetted honorary captain.

4TH MADRAS LIGHT CAVALRY. The *Madras Times* says:—"On July 21, as Capt. Mahomed Hussain Sirdar Bahadur, subadar-major of the 4th Light Cavalry, and A.D.C. to H.E. the Commander-in-Chief, was proceeding to meet the Governor at the railway station, he met with a fatal accident in crossing the S.I.R. line near the General Hospital. His phaeton was struck by the engine of a train proceeding to the harbour works, and capsized into the Cooum. The deceased officer was severely injured, and died soon after his removal to the hospital. He was 80 years of age, and had seen much service."

1ST BOMBAY LANCERS. Col. J. J. Elder, commandant, has returned to India from leave in England, and resumed command. Lieut.-Col. Anderson, second-in-command, has returned to India from leave in England, and rejoined his regiment.

2ND SIND HORSE. Capt. F. Abbott has been appointed 3rd squadron-commander.

3RD BOMBAY N.I. The following appointments have been made, vice Col. Houghton, who has succeeded to colonels' allowances, viz.:—Lieut.-Col. J. R. Strutt, wing-commander, to be second-in-command, and Major C. W. Yonge to be wing-commander.

8TH BOMBAY N.I. Lieut.-Col. L. G. Brown, Bombay S.C., died of sunstroke at Sibi, *en route* to Candahar, in his 43rd year. Col. Brown was the eldest son of the late Major Lewis Brown, the gallant defender of Kahun. He served with the 5th Bombay N.I. against the Taepings, near Shanghai, and was present at the attack and capture of the entrenched camp at Wang Kaza, and of the town of Tseerpoo, at Nazeau, at the storming of the town Tsingpoo, and at the repulse of the rebel army near Nazeau (1862). He joined the Service, June 9, 1854; and became lieut.-col., June 9, 1880. A correspondent writes:—"Col. Brown, second-in-command of the 8th N.I., met with his death from sunstroke. The regiment was lately sent to Sind, and soon after the news of the Kushk-i-Nakhud disaster arrived received orders to proceed to join the Reserve Division in the place of the 3rd N.I. There were few officers better known in the Presidency, and none more generally liked than the late Col. Brown. Much sympathy will be felt for his relatives in their bereavement. One of his brothers is Capt. C. E. Brown, commanding 5-8 Mountain Battery, now on its way to the front, and another brother is Major W. T. Brown, Superintendent of Police in the Tanna district."

18TH BOMBAY N.I. Major J. G. E. Griffith, wing-commander, has been appointed officiating assist.-adjt.-gen. of a division of the Bombay Army, vice Major Grant, proceeded on service with the 13th Bombay N.I.

29TH BOMBAY N.I. The Right Hon. the Governor-General of India in Council has been pleased to admit Pte. Lall Mir Khan to the 3rd Class of the Order of Merit, for conspicuous gallantry in action at Kaj-Boz, near Khelat-i-Ghilzai, on May 2, 1880, on which occasion he was very forward in the storming of the position taken up by the enemy, several of whom he killed.

30TH BOMBAY N.I. Lieut.-Col. F. T. Humfrey, wing-commander, has returned to India from leave in England, and resumes command.

BOMBAY MEDICAL DEPARTMENT. The following officers were with Gen. Primrose's Force, according to latest accounts:—At Candahar: Surg.-Major J. Arnott, with 19th N.I.; Surgs. A. K. Stewart, Poona Horse; R. Manser and G. H. Earle, Base Hospital; E. Tully, Civil Dispensary. With the Girishk Brigade: Surgs. H. H. C. Dane, 1st N.I.; G. E. E. Burroughs, 3rd Sind Horse; A. W. F. Strut, 3rd Light Cavalry; and W. R. Kirtakar, 30th N.I. At Khelat-i-Ghilzai: Surg.-Major E. Morton.

ARMY GAZETTE.

WAR OFFICE, PALL MALL, Sept. 7, 1880.

Commissariat and Transport Staff—Assist.-Comy.-Gen. J. Milne has been retired, under Art. 46 of the Royal Warrant of Jan. 31, 1880, with the hon. rank of Deputy-Comy.-Gen.; Deputy-Assist.-Comy.-Gen. G. Ramsey to be Assist.-Comy.-Gen., vice J. Milne (both dated Sept. 2, 1880).

BREVET.

Lieut.-Col. and Brevet Col. F. G. Kempster, Madras S.C., to have the local rank of Major-Gen. in the East Indies, in consequence of his appointment to the Divisional Staff of the Army in the Madras Presidency (Sept. 1, 1880).

[Where not otherwise specified, the following commissions and announcements bear date Sept. 11, and the current year must be understood.]

WAR OFFICE, PALL MALL, Sept. 10, 1880.

Royal Horse Guards—Lieut.-Col. and Brevet Col. O. L. C. Williams, having completed five years' service as a Regimental Lieut.-Col., is placed on half-pay; 2nd Lieut. the Hon. L. F. Byng to be Lieut., vice Merry, retired (Sept. 4); Gent. Cadet George, Lord Binning, from the Royal Military College, to be 2nd Lieut., vice Byng; Surg. H. F. L. Melladew, M.D., to be Surg.-Major, vice Taylor, granted retired pay (Sept. 4).

5th Dragoon Guards—Capt. W. W. H. Johnstone retires from the Service, receiving the value of his commission.

16th Lancers—Gent. Cadet James Alexander Orr-Ewing, from the Royal Military College, to be 2nd Lieut., vice Browne, promoted.

Grenadier Guards—Lieut. the Hon. G. Fitz-R. H. Somerset has been seconded for service on the Staff (Aug. 31); Lieut. A. P. Crawley, from the 60th Foot, to be Lieut., vice Inman, who exchanges.

Scots Guards—2nd Lieut. Henry F., Earl of Mount Charles, from the Rifle Brigade, to be 2nd Lieut., in succession to Lieut. and Capt. Gordon-Cumming, promoted; Lieut. C. Crutchley to be Instructor of Musketry, vice Lieut. Knollys, appointed Adjt. (June 9).

2nd Foot—2nd Lieut. J. W. G. Tulloch, from the 41st Foot, to be 2nd Lieut., vice Pickard-Cambridge, promoted.

7th Foot—2nd Lieut. P. Malcolm, from the 35th Foot, to be 2nd Lieut., vice Wood, killed in action.

13th Foot—Queen's (India) Cadet George Arthur Cookson, from the Royal Military College, to be 2nd Lieut., vice Templer, promoted.

17th Foot—2nd Lieut. L. C. Sherer, from the 1st Foot, to be 2nd Lieut., vice Carpendale, appointed a probationer for the Indian S.C.

21st Foot—Major R. Cook retires on a pension, with the hon. rank of Lieut.-Col.

23rd Foot—Lieut. E. Gambier-Parry to be Instructor of Musketry to the 2nd Batn., vice Lieut. Carey, transferred to the 1st Batn. (Aug. 6).

25th Foot—2nd Lieut. R. W. Johnston, from the 80th Foot, to be 2nd Lieut., vice Fleming, promoted.

30th Foot—2nd Lieut. C. S. de B. Martindale, from the 6th Foot, to be 2nd Lieut., vice Hamilton, promoted.

33rd Foot—2nd Lieut. F. B. Buist, from the 48th Foot, to be 2nd Lieut., vice Rich, appointed a probationer for the Indian S.C.

48th Foot—Lieut. G. M. D. Lys, from the 58th Foot, to be Lieut., vice Spencer, promoted into the 108th Foot (Sept. 4); Lieut. E. G. Bennet to be Instructor of Musketry, vice Lieut. Dodd, promoted (July 5).

60th Foot—Lieut. E. M. L. Inman, from the Grenadier Guards, to be Lieut., vice Crawley, who exchanges.

61st Foot—2nd Lieut. C. F. Beville, from the 6th Foot, to be 2nd Lieut., vice Vines, promoted.

62nd Foot—Lieut. E. C. Hill to be Instructor of Musketry, vice Lieut. Inglis, promoted (May 19).

63rd Foot—2nd Lieut. T. Quin, from the 41st Foot, to be 2nd Lieut., vice Farrington, promoted; 2nd Lieut. A. Wilson, from the 20th Foot, to be 2nd Lieut., vice Ranken, promoted.

64th Foot—Capt. E. Stanley, from the 2nd West India Regiment, to be Capt., vice Bingham, who exchanges.

70th Foot—2nd Lieut. A. G. Peyton, from the 6th Foot, to be 2nd Lieut., vice Smith, promoted; 2nd Lieut. L. R. H. Roberts, from the 1st Foot, to be 2nd Lieut., vice Davies, promoted.

77th Foot—Lieut. W. S. Wood resigns his commission.

81st Foot—2nd Lieut. J. A. Vanrenen, from the 8th Foot, to be 2nd Lieut., vice Churchward, promoted.

88th Foot—Lieut. C. E. Wyncoll has been appointed a probationer for the Indian S.C. (June 25).

98th Foot—2nd Lieut. K. B. Mackenzie, from the 20th Foot, to be 2nd Lieut., vice Randolph, promoted; 2nd Lieut. E. J. Collins, from the 1st Foot, to be 2nd Lieut., vice Mackenzie, promoted.

105th Foot—Major E. D. Way retires on half-pay.

107th Foot—Major F. Henderson retires on half-pay; Lieut. J. C. Farrell to be Instructor of Musketry, vice Lieut. Thorndike, promoted (Aug. 14).

2nd West India Regiment—Capt. R. J. Bingham, from the 64th Foot, to be Capt., vice Stanley, who exchanges.

Staff—The following officers to be placed on the personal Staff of Gen. Sir T. M. Steele, K.C.B., Col. of the 61st Foot, appointed to command the Forces in Ireland (Oct. 1):—Capt. and Lieut.-Col. P. D. Boyle, Grenadier Guards, to be Assist. Military Secretary; Capt. and Brevet Major H. R. Y. Browne, R.H.A., to be Aide-de-Camp; Capt. H. R. L. Howard, 16th Lancers, to be Aide-de-Camp.

Medical Department—Surg.-Gen. H. G. Gordon, M.D., has been granted retired pay (Aug. 2); Surg.-Major W. H. Harris is granted retired pay with the honorary rank of Brig.-Surg.

Veterinary Department—John Cooper, gent., to be Vet.-Surg., on probation.

BREVET.

Major and Brevet Lieut.-Col. C. R. St. J. Ives, Royal Horse Guards, to be Col.

MEMORANDA.

Major F. Henderson, half-pay, late 107th Foot, retires on a pension, with the hon. rank of Lieut.-Col.; Major E. D. Way, half-pay, late 105th Foot, retires on a pension, with the hon. rank of Lieut.-Col.

RESERVE OF OFFICERS.

Capt. W. H. H. Wilson, Royal Glamorgan Militia, to be Capt.; Lieut. A. C. Bennett, 4th West York Militia, to be Lieut.

INDIA OFFICE, Sept. 6, 1880.

The Queen has approved of the following promotions among the officers of the Staff Corps and Indian Military Services made by the Governments in India:—

BENGAL STAFF CORPS.

To be Lieutenant-Colonels:—Majors H. M. Repton, F. Wheeler (both dated June 9); J. Upperton and H. C. T. Jarrett, V.C. (both dated June 10, 1880).

To be Majors:—Capts. C. E. Salkeld, J. R. Campbell, E. H. Steel, F. A. Wilson, V. Rivaz, and A. Conolly (all dated June 8, 1880).

To be Captains:—Lieuts. W. P. Newall and W. F. H. Grey (both dated June 3, 1880).

BENGAL ARMY.—INFANTRY.

To be Colonels:—Lieut.-Cols. and Brevet Cols. W. N. Lees (June 8) and J. M. Earle (June 24, 1880).

To be Majors:—Capts. J. G. T. Carruthers, A. Landon, and B. G. Vyvyan (all dated June 8, 1880).

MADRAS STAFF CORPS.

To be Lieutenant-Colonels:—Majors C. Mackenzie (June 20) and Brevet Lieut.-Col. F. H. Thompson (July 12, 1880).

To be Major:—Capt. H. B. Nangle (July 4, 1880).

To be Captains:—Lieuts. B. A. N. Parrott and D. D. Pryce (both dated July 8, 1880).

MADRAS ARMY.—CAVALRY.

To be Major:—Capt. H. Cracroft (July 12, 1880).

INFANTRY.

To be Major:—Capt. H. T. H. Baber (June 9, 1880).

BREVET.

To be Colonel:—Lieut.-Col. G. A. Arbuthnot, Madras Cavalry (July 10, 1879).

To be Lieutenant-Colonel:—Major R. G. T. Stevenson, Bombay Cavalry (since deceased), in succession to Lieut.-Gen. J. Barrett, Bengal Infantry, retired (April 14, 1880).

To be Major:—Capt. (now Major) H. P. Kirke, Bengal Infantry, in succession to Lieut.-Gen. J. Barrett (April 14, 1880).

ERRATA.—In the *London Gazette* of Nov. 18, 1879, the date of promotion of Major R. J. Le P. Trench should have been given as Sept. "3," instead of Sept. "11," 1879. The names of the under-mentioned officers should be as follows, and not as stated in the *Gazettes* named:—*London Gazettes*, May 16, 1879, Major "Steuart" C. MacTier, Bengal S.C.; Nov. 18, 1879, Major A. "Fraser" Stewart, Bombay S.C.; Aug. 13, 1880, Major C. W. "Babington," Bengal Infantry, and Lieut.-Col. H. C. B. "Tanner," Bombay S.C.

MILITIA GAZETTE.

[Where not otherwise specified, the following commissions and announcements bear date Sept. 8, and the current year must be understood.]

WAR OFFICE, PALL MALL, Sept. 7, 1880.

ARTILLERY.

Royal Glamorgan—Richard Crawshay Heyworth, gent., to be 2nd Lieut.

Mid-Ulster—The under-mentioned gentlemen to be 2nd Lieuts.:—Charles Edward Scott (Aug. 21); Hardress Gilbert Holmes (Aug. 25).

INFANTRY.

Royal Denbigh and Merioneth—The under-mentioned Lieuts. to be Capts.:—S. Sandbach and C. R. Mostyn-Owen.

Dorset—Eustace Scott Williams, gent., to be 2nd Lieut.

Royal South Gloucester—Lieut.-Col. J. P. Bontein is granted the hon. rank of Col.; Capt. W. A. Hill to be Major, vice Bontein, promoted; Lieut. F. H. Lyell to be Capt., vice Hill, promoted.

Royal North Gloucester—Augustus Yorke, gent., to be 2nd Lieut.

Huntingdon—2nd Lieut. J. G. Green to be Lieut.

East Kent—George Wyndham Chichester Knatchbull, gent., to be 2nd Lieut.

3rd Royal Lancashire—Randle Francis Joseph Feilden, gent., to be 2nd Lieut.

Royal London—The under-mentioned 2nd Lieuts. to be Lieuts.:—K. T. Burr, C. R. Rivers, and E. Woolmer.

Northumberland—2nd Lieut. J. E. B. Baillie to be Lieut.

1st Royal Surrey—2nd Lieut. W. G. Gifford to be Lieut.

2nd Royal Surrey—The under-mentioned 2nd Lieuts. to be Lieuts.:—L. St. George, H. A. Phillips, H. C. B. Payne, and H. D. Wilbraham.

1st Warwick—Capt. C. Wyndham, whose resignation of his commission appeared in the *London Gazette* of Jan. 18, 1878, is granted the hon. rank of Major, and is permitted to continue to wear the uniform of the regiment on his retirement (Jan. 19, 1878).

Worcester—Capt. S. B. R. Hawkins resigns his commission.

6th West York—Capt. J. C. K. Warneford resigns his commission.

Donegal—Hamilton Mathew Murray Thompson, gent., to be 2nd Lieut.

Royal South Down—2nd Lieut. W. A. Stoughton to be Lieut.

Kildare—Desmond FitzJohn Lloyd FitzGerald, gent., to be 2nd Lieut.

South Mayo—Lieut. W. J. Campbell resigns his commission.

North Tipperary—The under-mentioned 2nd Lieuts. to be Lieuts.:—A. L. Carnegie and C. A. Fry.

Wexford—Lieut. W. H. Nunn resigns his commission.

YEOMANRY CAVALRY GAZETTE.

WAR OFFICE, PALL MALL, Sept. 7, 1880.

Lanarkshire (Queen's Own Royal Glasgow and Lower Ward of Lanarkshire)—Robert Elmsall Findlay, gent., to be 2nd Lieut. (supernumerary) (Sept. 8).

Duke of Lancaster's Own—The Hon. R. G. Molyneux, late Lieut., 1st Dragoons, to be 2nd Lieut. (Sept. 8).

Nottinghamshire (Sherwood Rangers)—The name of the Adjt. whose appointment was notified in the *London Gazette* of July 23, 1880, is "Frederic Horace Davis Bellwood Bellwood," and not as therein stated.

QUARTERMASTER'S RANK.

"W. A. L." writes:—"The new official *Army List* is stated by itself to contain a 'Gradation List of Officers of the British Army;' then come, as that list, General officers, colonels, lieutenant-colonels, majors, captains, lieutenants, sub-lieutenants, 2nd lieutenants, ridingmasters, and quartermasters in regular gradation. Now, Sir, as 'gradation' means 'regular advance,' 'order,' and 'grade' means 'degree in order or dignity,' and as this *Army List* is published as a legal document for the use of courts-martial, as directed by the Army Discipline Bill, &c., I argue that it is wrong to put the isolated rankers called ridingmasters and quartermasters after junior lieutenants or after any sub or 2nd lieutenants. Well might Mr. Childers say in the House that the question of an honourable Member about ridingmasters fairly puzzled the War Office. It is very clear that both these rankers have no rank, and to give them a proper legal standing on the gradation list, they should be included in the list of lieutenants according to the dates of their commissions. No wonder that young officers, aye, and some older officers and recruits, think the quartermaster is the lowest officer. Here I part company with the ridingmasters, because I am an infantry man. Where is the encouragement for a quartermaster to be more than as slack as possible when everything is against him? A commanding officer's recommendation is nothing worth, a General's expressed sense of his special abilities and merits is as little use. No wonder that the quartermaster's heart fails, especially when he reads the *Gazette*, and sees boys who received their very first quarters from him promoted over his head! And I may point to the wholesale supersession of quartermasters by the recent promotion to deputy-assistant-commissary-generals of men who, as very much junior, used to issue rations to the quartermaster. The day for the redress of these solid grievances must come, and I believe Mr. Childers is too just and efficient a War Minister to allow this injustice to go on. In fact, quartermasters expect emancipation at his hands. The matter asks for your powerful advocacy, so that these men may be defended from their enemies."

DOMESTIC STEWARDS, R.N.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I am glad to see that one of my class has opened the oft-mooted question of the pay, pension, and position of domestic stewards, R.N., although I almost despair of any improvement in either of the three things mentioned, unless the ruling powers that be take a more favourable view of our cause than any of their predecessors have done. I know that our grievances have been ably set forth before now to several Boards of Admiralty, and also privately by myself and others to several flag officers who have afterwards formed members of that Board, but all without any good result ensuing therefrom. Can it be that they have forgotten us, or what? I think not, but rather that a difficulty may stand in the way in the classification of our numbers. But why not take the same rule by us as is done by the ships' stewards, and divide us into three classes, and promote one class from the other according to length of service and ability, the latter of which could be marked on our service certificate, the same as is done on a seaman's in regard to his proficiency in seamanship, and commanding officers could be guided in the same (to a certain extent) from the private certificates which we obtain from the officers for whom we cater? In justice to all, I certainly do not think that the same position should be given to a steward with only a few years' service (unless that he has special abilities) as is given to a well and tried man with, say, 10 or 15 years' service. And at the same time, I cannot understand why that a gun-room steward (especially in a large mess) should only receive the pay and rating of a second-class domestic; whereas, an admiral, captain, and ward-room steward in first, second, and third-class rated ships are first-class domestics. Are their duties less onerous than the three former are? I contend not, for I have served in all four positions and have the highest references from all the officers with whom I have served, and I am positive that the duties of a gun-room steward are quite as onerous as either of the other class. In fact, I am sure that I shall be borne out in what I state by old stewards now in the Service, and by others who have left, that the best man should be selected to fill that position, in order to keep the mess accounts of junior officers within the prescribed limits, and to regulate the proper expenditure of mess moneys per month; and then we should not hear, as we often do, of gun-room officers having to live on ships' provisions for a certain time, in order to retrench a reckless expenditure in a former part of a ship's commission. Another grievance under which he suffers is that through being a second-class domestic, he is not qualified to obtain the good-conduct medal as such, although he may change his rating for one of the others, and he immediately becomes qualified. I fear that I have already trespassed too long on your valuable space, but I trust that either you or some other kind friend will take up our cause, and, even if without any good results ensuing, I am sure that you will receive the heartfelt thanks of all of our class.—I am, &c.,

J. W.

The French man-of-war Lynx made her appearance at the Corea on July 16. The captain and a few officers landed, and applied to the Governor of Toraifu for permission to travel to that city, which was refused. The Lynx left for Nagasaki on July 18, where the Ticonderoga, Comdre. Shufeldt, U.S.N., was doing all that was possible to curry favour with the Japanese. On July 4 this ship was dressed with flags, fired a salute at noon, and after dark her hull, masts, and yards were illuminated with 2,500 lanterns.

"ATALANTA" RELIEF FUND.

The sum required for the relief of the numerous dependent relatives is £20,000.

Subscriptions are earnestly requested to be paid to "ATALANTA" RELIEF FUND, at Bank of England; Messrs. Drummond and Co., London; at any local bank at Portsmouth; or by
Commander JOHN W. F. HARVEY, R.N., Hon. Secretary.
Portsmouth Branch, H.M.'s Dockyard, Portsmouth.

NOTICES TO CORRESPONDENTS.

"Captain Cuttle."—We are obliged by your offer, but cannot accept it. The paper in question was sold some time ago, and is not now the property of the gentleman you mention, though we believe he has unwillingly an interest in it. We cannot believe the statement, without further proofs.

South-American War.—Thank you very much for the interesting details, which are in type, but held over till next week.

M.—Very glad to receive your communication, which is in type.

P. M. C.—In such cases, it is advisable to obtain the opinion of a higher authority on the subject, for on that opinion action can be taken. We should prefer not to decide the case, though we have no doubt in our own minds as to the decision which would be come to, were the matter represented.

Superannuated.—Your letter is in type.

The Naval and Military Stations are published by the Army and Navy Gazette on the first Saturday in each month.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e del Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; "*Vedette*;" *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Army and Navy Journal of New York*; in addition to all the home and colonial professional periodicals and journals.

Army and Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 11, 1880.

IN the face of the report of Mr. William John, made, by request, for the information of the *Atalanta* Inquiry, it would appear that the less said regarding the stability of the *Atalanta* the better, and let us hope that such crank craft will never again be employed as training-ships, and certainly not to cruise in the stormy regions of the Gulf Stream in the North Atlantic Ocean, where, from December to April, storms of fearful violence prevail. According to the statement of Mr. John, if the *Atalanta* rolled and lurched as recorded in the official returns made by the officers of the ship, a wind of about 3 lbs. force, catching her suddenly on the broadside, with plain sail set, would be sufficient to capsize her with ports closed. On the other hand, he had found merchant sailing-ships require as much as 10lbs. and even 20lbs. per square foot to produce this effect. The prevalence of these storms is well-known, and as long ago as 1854, at a meeting of the American Association for the Advancement of Science, Mr. Redfield mentioned one which he had traced out, and in which no less than seventy odd vessels had been wrecked, dismasted, or damaged. Ten years later the *Phaeton* left Halifax, and on her passage to Bermuda was caught in one of these gales. She nearly became a total wreck, receiving so much damage to sails, spars, rigging, and hull, that she was detained at Bermuda for a period of over five months, refitting and making good defects. Her hull was so strained, and her seams so opened, that she had, after all, to be ordered home, and when paid off was broken up. As it was, nothing but her steam-power saved her. The *Atalanta* had no steam-power. Her hull, built about the same time as was that of the *Phaeton*, was consequently sixteen years older than that of the converted frigate, and, therefore, less able to withstand the storms of the Atlantic in 1880 than was the *Phaeton*, with her steam-power, in 1863-4. Let us now consider what the *Phaeton* went through, and then we can form some opinion as to what would have become of the *Atalanta* if placed under similar adverse circumstances, without any steam-power to aid her against the sudden shifts of wind and heavy cross-sea which prevail during the storms now under consideration. Leaving Halifax harbour with a south-west wind of average force, or from four to five Admiralty scale, and a thermometer registering 13° F., the mercury in the barometer standing at 29·93 inches, the *Phaeton*, then commanded by Captain Tatham, the present Commodore at Jamaica being her commander, proceeded, in December, 1863, on her passage to Bermuda, under a clear, frosty, blue sky. On the morning of December 6 the wind hauled to the north-west, increasing somewhat in strength. Both the barometer and the thermometer rose, the former to 30·33 inches, the latter to 48° F. The ship's position at noon was lat. 41° N, long. 63° 39′ W. By the morning of December 7 the wind had hauled round to N.N.E., and by noon was blowing a gale—force from 8 to 10, sky overcast and gloomy, with passing showers of rain, the barometer falling to 29·98, while the thermometer rose to 56° F. The position of the ship at noon was lat. 37° 24′ N., long. 63·27 W. At this time the ship was running under close-reefed topsails, her topgallant masts and yards having previously been sent down, the mainsail furled, and everything made snug alow and aloft, as is—or at least was—usual in the Navy, on signs of bad weather coming on. Suddenly a heavy sea struck the ship on her port beam, carrying away the spare spars out of the chains, and washing away the waist hammock nettings. Then the gale increased in force to from 11 to 12. The barometer fell as the thermometer rose, the ship nearing the Gulf Stream. The cross-jack yard went in the slings, the foot-ropes of the topsails parted, and the sails were blown to ribbons in an instant. At noon on December 8 the *Phaeton* was in lat. 34° N., long. 64° 8′ W.; the force of the gale 12. Steam was got up, and the storm trysails set to steady the ship, which had been brought to the wind on the port tack heading E. by S., while an attempt was made to clear the yards and bend new canvas. The mainstays, however, parted, and the chain-plates carried away. The boats, in imminent danger of being washed away, were got inboard. The mainmast was secured with the shroud-hawser, and the old stays were stoppered. The wedges of the mainmast now fell out, and the ship's carpenters were called into requisition. The lower rigging had to be swifted in. A main-deck gun now broke loose, and fears were beginning to be entertained that, before the apparently living mass of iron could be checked in its wild career of destruction, it would batter its way through the ship's side. The gale, however, abated. The wind veered to northwest and south-west as the ship steamed south, but the sea was something fearful to witness as it hurled the *Phaeton* about in its fury, just as if the waters had gone mad because the ship had successfully combated their power by means of her screw. The *Atalanta*, if overtaken by such a gale, having no steam-power to help her through it, and manned for the most part by young hands, must infallibly have fallen a victim to the fury of the wind and of the waves. No skill, no seamanship could have saved her. The gale of 1863 so strained the *Phaeton* that her waterway seams opened over four-and-a-half inches, and the frigate had to be condemned and broken up. In her strained condition, it was only the steam-power that brought her out of that turbulent mass of water, in midst of which a stay of another twelve hours' duration would most assuredly have proved sufficient to cause the *Phaeton* to founder. And if a comparatively new ship, just out of dry dock, after being converted from a sailing vessel into a steam frigate fared so badly, what must have been the fate of the old *Juno*, sixteen years later, when overtaken by such a gale and unable to extricate herself from the troubled waters and huge billows of the stormy region of the Atlantic? The most charitable thing we can suppose is that the department responsible for selecting and equipping the *Atalanta* was in perfect ignorance of her unfitness for such service. This, however, is no excuse.

We are requested to state that the business connected with the appointment of Military Knights of Windsor has been transferred from the Home Office to the office of the Secretary of State for War.

We are authorised to notify for information that as a special arrangement, candidates will be admitted to examinations in December next for admission to the Royal Military College or Royal Military Academy, who are within the required limits of age, on December 1, 1880, or January 1, 1881.

An examination for cadetships at the Royal Military College, Sandhurst, will take place at the University of London, Burlington Gardens, W., on Monday, November 29, 1880, and following days, the first day being devoted to the medical examination of the candidates. There will be 110 cadetships to be competed for, of which ten will be for candidates for West India regiments. Twelve cadetships will also be offered for competition by University candidates. The successful competitors will be required to join the Royal Military College, as gentlemen cadets, on February 10, 1881. Applications cannot be received unless made in strict accordance with the Regulations, October 15 next being the latest date on which applications can be received. Candidates who have been previously examined should forward with their applications a certificate of good conduct for the intervening period. If intending competitors wish for any further information relative to the examination, they should apply by letter to the "Military Secretary," Horse Guards, War Office, S.W.

H.R.H. the Duke of Cambridge, accompanied by Colonels Hale and Stephens, A.D.C.'s, arrived at Berlin shortly after seven on Thursday morning. The Duke was received at the railway station by Lord Odo Russell and several members of the British Embassy. He drove at once to the Royal castle, where he was visited by the Emperor William at half-past twelve, and returned the Imperial visit an hour later. At five o'clock a special dinner was given by the Emperor in honour of the English officers invited to the manœuvres. Amongst those present were the Crown Prince, the Duke of Cambridge, the Grand Duke of Hesse, Sir Garnet Wolseley, and several leading German officers.

We learn by special telegram from Sealkote that the 100th Regiment has been ordered to proceed forthwith to Kurram from that station.

The appointment of Inspector-General of Artillery in India, vacated by the transfer of Colonel C. G. Arbuthnot, C.B., R.A., to the Horse Guards, as deputy-adjutant-general, has been given to Colonel G. Leslie, R.A.

The promotion of Lieutenant and Adjutant Banks, 12th Lancers, to a troop in the 7th Dragoon Guards, gazetted on the 3rd inst., must be viewed as a well-deserved recognition of the services of a very meritorious officer. Captain Banks has been for some time past the senior subaltern of Cavalry on full pay. The son of an old officer, Lieutenant-Colonel Banks, retired full pay, late 97th Regiment, he elected to join the ranks of the 17th Lancers, in order to qualify for his commission. After a short term of service, he was promoted, on June 26, 1867, to an ensigncy in the 24th Foot, becoming lieutenant October 28, 1871. He was transferred some years ago to the 12th Lancers as lieutenant, and was appointed to the adjutancy. Standing as he did fifth on the list of subalterns of his regiment, there was no prospect of his obtaining his troop for a considerable time to come in the 12th Lancers, and the Horse Guards have therefore done an act of justice in selecting him for special promotion, which has been so well-earned.

Lieutenant P. K. Doyne, 13th Hussars, by the promotion of Lieutenant Banks, has become the senior subaltern on the list of the Cavalry of the Line, having entered the Service March 14, 1868; Lieutenant F. S. Leslie, King's Dragoon Guards (February 27, 1869), standing second; Lieutenant H. L. Aylmer, 16th Lancers (September 25, 1869), third; Lieutenant C. F. J. Douglas, 15th Lancers (November 10, 1869), fourth; Lieutenant N. Sadlier, King's Dragoon Guards (December 22, 1869), fifth; Lieutenant H. F. Lane, 13th Hussars (September 3, 1870), sixth; Lieutenant Lord St. Vincent, 7th Hussars (March 22, 1871), seventh; Lieutenant R. Roper, 7th Hussars (March 23, 1871), eighth; and Lieutenant R. A. Vansittart, 4th Dragoon Guards (September 23, 1871), ninth.

In addition to the promotion of Lieutenant Banks, 12th Lancers, three infantry subalterns received on Friday last their companies by selection out of the ordinary groove,—Lieutenant A. W. Turner, 99th Foot, being gazetted to the 19th Foot; Lieutenant J. C. S. Irving, 39th Foot, to the 102nd Foot; and Lieutenant C. F. H. Spencer, 48th Foot, to the 108th Foot. Lieutenant Turner entered the Service on February 27, 1867; Lieutenant Irving on April 7, 1863; and Lieutenant Spencer on June 12, 1867. We should be glad to find further steps taken to help our old and deserving officers who have been unfortunate in their regimental advancement; and any measures which might be adopted by the authorities to help on those who have been unlucky in the race for promotion, cannot fail to meet with the approval of the Army and the public, for officers who have entered the Service since the abolition of Purchase would have no cause to complain were a decision come to to provide for every Purchase subaltern. A fair proportion of steps are always given to the seniors in regiments, but it is too much to expect that officers of five years' service shall be promoted captains whilst there remain so many to be provided for with double, and more than double, their service, many of whom have purchased one—if not two—steps, and possess therefore vested rights which give them a priority of claim.

Captain H. H. Parr, 13th Light Infantry, who has been employed as Military Secretary to Sir Bartle Frere at the Cape, is expected to accompany his "chief" to England, upon his vacating his appointment.

Lieutenant C. H. Gordon, 3rd Buffs, has been appointed acting aide-de-camp to Sir F. A. Weld, K.C.M.G., the new Governor of the Straits Settlements.

Captain P. L. McG. Skinner, R.A., the able and most courteous second-assistant-superintendent of experiments at the School of Gunnery, has been selected for the appointment of instructor in artillery in the Department of Artillery Studies, vice Major W. G. Brancker, R.A. This appointment has given the utmost satisfaction throughout the Royal regiment.

Her Majesty has been pleased to approve, from Sept. 1, 1880, of an establishment of 10 lieutenants for the Royal Malta Fencible Artillery, in lieu of six lieutenants and four second lieutenants.

Sir William Muir has now in his gift two important pieces of patronage, in the shape of a couple of appointments of medical officers to the Household Cavalry, one in the 2nd Life Guards and another in the Blues.

A Distinguished Service Reward of £100 per annum has been granted by the Government of India to Major-General Sir F. R. Roberts, V.C., K.C.B., in recognition of his recent services in Afghanistan.

In addition to the distinguished-service rewards which we lately stated had been granted to Sir William Muir, K.C.B., M.D., Director-General of the Army Medical Department, and Surgeons-General T. Crawford, M.D., C. A. Gordon, M.D., C.B., H. G. Gordon, M.D., H. H. Massy, M.D., C.B., and W. Munro, M.D., C.B., pensions of £100 per annum have been conferred upon two retired officers of the Army Medical Department, Inspector-Generals A. Anderson, M.D., C.B., and R. Dane, M.D., C.B., on the Half-Pay List. Dr. Anderson entered the Service October 16, 1835, and retired September 4, 1867. He served in the Eastern campaign of 1854, and up to June 13, 1855, including the battles of Alma, Balaklava, and Inkerman, and siege of Sebastopol; was P.M.O. of the 4th Division at Balaklava and Inkerman (medal with four clasps, Knight of the Legion of Honour, and Turkish medal); was present at the capture of Canton in December, 1857 (medal with clasp). Dr. Dane joined the Service July 17, 1835, and retired July 24, 1872. He served in the Punjab campaign of 1848-49, including the battle of Goojerat (medal with clasp). Served as P.M.O. of the expeditionary force in China in 1858, and was present in the various operations (mentioned in despatches, medal).

We are pleased to notice that Mr. R. T. Goldsworthy, C.M.G., late Colonial Secretary of Western Australia, late of the 9th and 17th Lancers, well known for his services, under Sir John Glover, G.C.M.G., in the Volta expedition in 1873-74, has been offered and has accepted the post of Administrator and Colonial Secretary of the Island of St. Lucia. A better appointment than this it would have been impossible to have made, nor one more thoroughly deserved. Mr. Goldsworthy, who was formerly in the 9th and 17th Lancers, served in the Volunteers with Havelock's force on the first advance to Lucknow during the Mutiny campaign, was present at the first relief, served in the subsequent defence as assistant-field-engineer, and after the evacuation of Lucknow accompanied Lord Clyde's force to the relief of Major-General Wyndham.

The action of Major-General Donovan in regard to 2nd Lieutenant Cox, 27th Inniskillings, when that officer was lent to Sir J. Pope Hennessy, K.C.M.G., Governor of Hong Kong, as aide-de-camp, and afterwards recalled to regimental duty, has been fully approved by the Horse Guards authorities. The place for a young officer of less than a years' service is with his regiment.

Lieutenant F. C. Ricardo, Grenadier Guards, has vacated his appointment as aide-de-camp to Earl Cowper, Lord-Lieutenant of Ireland, in order to take up the adjutancy of the 1st Battalion Grenadier Guards, to which he was lately gazetted.

Deputy-Surgeon-General J. P. Cunningham, M.D., has been appointed principal medical officer of the Northern (York) District, vice Deputy-Surgeon-General W. A. Thomson, M.B., who has embarked for Hong Kong, as P.M.O. in the China command.

The appointment of Captain J. H. Spurgin, 21st Fusiliers, as aide-de-camp to Major-General J. B. Spurgin, C.B., C.S.I., commanding the 1st Infantry Brigade at Aldershot, has been confirmed, Captain Spurgin having qualified in accordance with the Regulations.

Lieutenant G. A. Webbe, 15th Hussars, who has been acting aide-de-camp to Major-General Sir F. FitzWygram, Bart., commanding the Cavalry Brigade at Aldershot, since May, 1879, has now been confirmed in the appointment.

We learn upon reliable authority that Colonel D. S. Greene, C.B., R.H.A., will shortly embark for India to take up the command of the Royal Horse Artillery at Umballa, and that Colonel W. B. Saunders, R.H.A., will proceed to Bangalore to fill the vacant appointment at that station, unless offered the post of purchaser of remounts for the Royal Artillery, about to be vacated by Colonel Pipon.

A paragraph has gone the rounds of the daily papers with reference to the Royal Military College of Toronto, Canada, which is calculated to mislead. It states that cadets at the Toronto Military College will in future qualify for commissions in the Army on the same terms as cadets at the Royal Military Academy and Royal Military College. This is not the case. As we lately announced, only a given number of commissions will be offered annually to the Canadian students, viz., one in the Royal Engineers, one in the Royal Artillery, and two in the Cavalry and Infantry of the Line; and there is no present intention of withdrawing the limit, though it is probable that ere long the War Office may be induced to offer a larger number of appointments, if it is found that the present high standard of educational ability is maintained by the cadets at the College, as it promises to be under the very careful direction of Lieutenant-Colonel Hewett, R.E., and the officers of his staff.

The Navy.

ADMIRALTY, Sept. 3, 1880.

Royal Naval Artillery Volunteers.—London Brigade.—The following promotion has been made:—Sub-Lieutenant Alfred Sebastian Boom be additional Lieutenant-Commanding (Sept. 3, 1880).

ADMIRALTY, Sept. 4, 1880.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineers William Chase and Edmund James Murphy have been placed on the Retired List of their rank from the 3rd inst.

ADMIRALTY, Sept. 6, 1880.

Lieutenant William Thornton Down has been promoted to the rank of Commander in her Majesty's Fleet, with seniority of 4th inst.

ADMIRALTY, Sept. 8, 1880.

Sub-Lieutenant George John Scott Warrender has been promoted to be a Lieutenant in her Majesty's Fleet, with seniority of 7th inst.

In accordance with the provisions of her Majesty's Orders in Council of Feb. 22, 1870, and Nov. 29, 1879:—Lieutenant Tristram Henry Barre Beresford has been placed on the Retired List of his rank from Aug. 30.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Navigating Lieutenant Thomas Henry James has been placed on the Retired List of his rank from August 31, 1880.

ADMIRALTY, Sept. 9, 1880.

Staff Commander Charles George Johnston has been promoted to the rank of Staff Captain in her Majesty's Fleet, with seniority of this date.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Staff Captain George Lyon Carr has this day been placed on the Retired List, with permission to assume the rank and title of Retired Capt.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, the under-mentioned Engineers have been placed on the Retired List of their rank from the 3rd inst.:—Edwin William Boulton and James Frederick Lewis.

APPOINTMENTS.

Captain — Edward Kelly, of the Newcastle, to the Achilles, recommissioned last week.

Staff Commander—Jesse Dixon, to the Valiant.

Lieutenants—Thomas Hadley, to the Royal Adelaide, for temporary service; John H. W. Theed, to the Assistance (additional); T. D. S. Scott, to the Duncan; James Gairdner, F. G. S. Laye, and M. S. Beatty, to the Rambler (to be commissioned Sept. 14, 1880); Henry Baker, to the Inconstant.

Sub-Lieutenants—Reginald G. O. Tupper, to the Alexandra; Ralph J. Ruck Keene, to the Kingfisher; Richard S. B. Luard, to the Coquette; Oswald D. Grimston, to the Minotaur; William G. Stewart and Godfrey H. B. Mundy, to the Cleopatra.

Midshipmen—Walter B. Williams and Henry B. T. Somerville, to the Bacchante.

Gunners—S. H. E. Dawe, to the Pembroke; H. Bays, to the Vernon; W. Leather, to the Rambler.

Naval Cadets—G. S. Hockin and C. H. Morgan, to the Tourmaline.

Chaplains—Rev. George L. Blake, to the Inctantons; Rev. William Gunter, to the Hector.

Staff Surgeon—Bernard Renshaw, to the Penelope.

Naval Instructor—James R. Clark, to the Inconstant.

Surgeons—William J. Volatti, to the Rambler, when commissioned; William Brown, to Plymouth Hospital.

Paymasters—George Love, to be Secretary to Rear-Admiral the Earl of Clanwilliam, in command of the Detached Squadron; William H. Martin, to be Secretary to the Admiral-Superintendent of Malta Yard; Henry De Ridder, to the Hibernia.

Assistant-Paymasters—Edwin R. Brown, to the Hector; Frederick C. Good, to the Rambler; and Bourchier B. Savile, to the Excellent.

Clerk—Harry Robinson, to the Minotaur, as secretary's clerk.

Boatswains (acting)—J. Roberts, to the Asia (supernumerary); G. Clayton, to the Indus (for disposal).

Carpenters—Michael M'Evoy, to the Indus, additional for the Hotspur; William Band, to Pembroke, additional for Doterel; Robert Higham, to Pembroke, additional for Conqueror; E. Barrett, to the Achilles.

Assistance, Capt. Claude E. Buckle, has been ordered to be held in readiness for immediate service.

Bacchante, Capt. Lord Charles Scott, with the royal midshipmen on board, is to leave on Tuesday next for Vigo, to await the arrival of the Flying Squadron under Rear-Admiral the Earl of Clanwilliam.

Britomart, tender to the Hector, which has been refitting on Messrs. Read and Son's camber slipway, Portsmouth, was relaunched on Friday, and taken alongside the dockyard, previous to rejoining the Hector.

Condor, Com. Frederick Egerton, was recommissioned at Malta on Aug. 20, the day after her being paid off by her late crew, and as her repairs and refit had been pushed forward, she was able to leave Malta for the flag at the end of the month, and arrived at Brindisi on Sept. 4.

Conflict, Lieut. and Com. George Izat, was still on duty in the neighbourhood of New Ireland when last heard from, but would probably be relieved by either the Beagle, Renard, or Sandfly, all of which schooners were recommissioned at Sydney on July 1, and were to be off to the Islands as soon as reported ready for sea.—*Hampshire Telegraph.*

Coquette, Lieut. and Com. John L. Burr, arrived at Malta on Sept. 3 from Palermo.

Cormorant, Com. James A. T. Bruce, was left at Sydney as senior officer's ship during the absence of the Commodore.

Crocodile, Capt. F. Proby Doughty, is to proceed to the West Indies on troop service.

Danae, Capt. Purvis, will have completed a four years' commission on the 20th of this month, and if she waits for the arrival of the Miranda on the Australian station before leaving on her homeward passage, she will have an exceptionally long commission. She will come home round the Horn.

Decoy, Sub-Lieut. Fred. St. L. Luscombe. "There may be some who are hoping that the fact of this vessel having been ordered from the West Coast of Africa to Gibraltar 'for further orders,' may possibly result in instructions for her return to England, as she is in want of a few repairs. This will not, however, be the case, as it is intended to attach the Decoy to the Mediterranean station, although she is shown in the *Navy List* as being appropriated to no station. As the ship is without a lieutenant in command, and will naturally have to go into the hands of a dockyard, it would not be amiss if their Lordships would consider whether it would not be a good idea to allow her to run home for a few weeks, instead of going straight to Malta for refit. It would add immensely to the popularity of the Service if such opportunities of conferring a great privilege on officers and men, without in any way inconveniencing the Service, were not allowed to pass by without notice. Coming so near home and then turning the corner and going up the Straits is almost worse than being ordered to a more distant station to finish the commission."—*Hampshire Telegraph.*

Dido, Capt. Compton E. Domvile, has been on a visit to Ascension, and was, by last advices, to return to the West Coast to resume her duties as senior officer on that part of the station. She was to be at the Brass River on the 1st inst. to inquire whether the natives were ready to pay the fine of oil imposed upon them for plundering the Cypriote, but it was doubtful whether the process of blockading the river would be resorted to, for the white traders are greatly opposed to such a move, as it spoils their market.

Dwarf, Com. John H. Bainbridge, if not required for the blockade of Brass River, was to proceed to the Cape after her long stay as senior officer on the West Coast.

Emerald, Capt. W. H. Maxwell, has been employed in taking Sir Arthur Gordon, the High Commissioner, from Fiji to Tonga, Samoa, and elsewhere, and is probably not yet back at Sydney.—*Hampshire Telegraph.*

Esk, Lieut. and Com. Henry S. Haszard, passed through Spithead on September 7, going eastward.

Euphrates, Capt. Henry Hand, arrived at Bombay on Sept. 8.

Falcon, Com. Bouverie F. Clark, left Malta on Thursday last for Palermo, to join the flag, and arrived at Brindisi on Sept. 4.

Firebrand, Lieut. and Com. James J. L. Sisson, was to return to Accra after her visit to St. Helena and Ascension.

Firefly, Lieut. and Com. Edward C. F. Law, has been told off for service on the south sub-division of the West Coast station.

Flirt, Com. John W. Brackenbury, C.M.G., has been told off for duty in the sub-division of the Bights.

Hecla, Capt. Morgan Singer, arrived at Malta from Suda Bay on Sept. 6.

Helicon, Lieut. and Com. W. L. Morrison, left Malta on Thursday last for Palermo, to join the flag, and arrived at Brindisi on Sept. 4, with Vice-Admiral Sir F. Beauchamp Seymour, K.C.B., on board.

Inconstant, Capt. F. Durrant, hoisted the flag of Rear-Admiral the Earl of Clanwilliam, C.B., on Monday. Lieut. Alfred Leigh Winsloe, who has been appointed to this ship as flag-lieut. to the Earl of Clanwilliam, C.B., became a midshipman in the Royal Navy, April 16, 1867; and served in the Liffey, Capt. J. O. Johnson and Robert Gibson, from July 26, 1867, until the close of 1870. On April 19, 1871, he was appointed to the Minotaur, Capt. R. Wells, flagship with the Channel Squadron of Vice-Admiral G. G. Wellesley, C.B., and was promoted in that ship to sub-lieut., Oct. 15, 1871, and remained in her until transferred to the Agincourt, Capt. R. O'B. FitzRoy, flagship of Rear-Admiral G. T. P. Hornby, also with the Channel Squadron, until promoted to lieut., Sept. 30, 1874. He afterwards studied for some time at the Royal Naval College at Greenwich, and on July 5, 1876, was appointed additional of the Encounter, Capt. Richard Bradshaw, on the West Indies and North America station, and on Nov. 14 following was transferred to the Duke of Wellington, Capt. the Hon. W. C. Carpenter, flagship at Portsmouth of Admiral George Elliot, and from Jan. 18, 1877, until March, 1880, was flag-lieut. to Admiral Sir Geoffrey T. P. Hornby, in the Alexandra in the Mediterranean.

Jumna, Capt. George Parsons, arrived at Port Said on Sunday.

Kingfisher, Com. Reginald H. Thornton, arrived at Spithead on Saturday from Sheerness, and sailed on Sunday for a cruise in the Channel.

Malabar, Capt. John F. G. Grant, with the 1st Batn. 23rd (Royal Welsh) Fusiliers, arrived at Malta on the 25th, and after embarking 9 officers and 245 non-commissioned officers and men of the 61st Regt., proceeded on her way to India on Thursday morning.

Minotaur, Capt. Harry H. Rawson, flagship to Rear-Admiral Hood, the repairs of which were originally intended to be completed by Christmas, has been ordered to be prepared with despatch, and additional hands have been placed upon her in Portsmouth Dockyard.

Miranda, Com. Hon. Edward S. Dawson, calls on her way out to Sydney at Madeira, Tristan d'Acunha, the Cape of Good Hope, and Fremantle.

Monarch, Capt. Tryon, remains at Naples.

Newcastle, Capt. E. Kelly, was paid off alongside the Devonport Yard on Wednesday, under the superintendence of Capt. W. B. Grant, and was placed in the fourth division of the Steam Reserve.

Orontes, Capt. Richard J. Kinahan, left Bombay on September 7 for Natal.

Salamis, Com. FitzGeorge, has been put into No. 3 dock at Sheerness, to undergo extensive repairs.

Sealark, Lieut. G. R. Bromley, sailed from Plymouth Sound on Wednesday.

St. Vincent, Com. R. F. Britten, hoisted on Monday last the flag of Rear-Admiral the Earl of Clanwilliam, C.B., under the customary salutes from the Duke of Wellington, after which it was transferred to the Inconstant.

Superb, Capt. Ward, will, it is expected, be ready to be commissioned by the 28th inst. She will proceed to the Mediterranean to relieve the Rupert, ordered to Chatham to be paid off.

Swinger, Lieut. and Com. O. P. Tudor, has had her boilers overhauled, and a few repairs executed, sufficient to enable her to run for six months. She would probably leave Hong Kong about the middle of August for the northern division of the station.

Tamar, Capt. Thomas H. Royse, arrived in Portsmouth Harbour on Sunday from Malta, with a portion of the Condor's crew, invalids, and time-expired men.

Toumaline, Capt. Robert P. Dennistown, from the North America and West Indies station, arrived at Plymouth on Wednesday last from Jamaica and Bermuda. She transferred supernumeraries brought home to the Royal Adelaide, flagship at Devonport, and a number of military officers who took passage in her were also landed. She left on Thursday for Sheerness to refit, preparatory to joining the Detached Squadron.

Vulture, Com Pringle, arrived at Aden, homeward bound from the Persian Gulf, on Aug. 15. The ship left Bombay on July 14, but as the monsoon was blowing at its height, it was found impossible to steam against it, so she had to run down to Seychelles to pick up the south-east trades. H.M.S. Vulture was to leave Aden on Aug. 16, for Suez, *viâ* Hodeida and Jeddah.

Wolverene, Com. Burgess Watson, bearing the broad pendant of Comdre. John C. Wilson, A.D.C., did not receive any material damage from her recent grounding. "A number of the men of the new crew sent out for the Wolverene did not care much about joining the ship, but thought the passage out a good opportunity for starting in life as 'colonials.' On the other hand, many of the Wolverene's men, who had seen enough of the colony to know where to go for their daily bread, and saw some chance of bettering their condition, thought they would defer their return to the old country, and were in no hurry to join the Raleigh for the passage home. From these two ships' companies there were at one time over sixty men missing, but a fair number of these were recovered, for the authorities at Sydney have been asked by the Home Government to lend every assistance in their power towards checking desertions from her Majesty's ships employed on the Australian station. It does not matter how comfortable a ship may be, there must be a number of men not contented with their lot; and if these are not bound by home ties, the inducement held out in the shape of high wages is a bait they readily take."—*Hampshire Telegraph.*

THE DETACHED SQUADRON.

In the House of Commons on Saturday, Sir E. J. Reed asked whether the Admiralty proposed to make any porvision for the training of young seamen in substitution for the Eurydice and the Atalanta.—Mr. Shaw-Lefevre:—There are no other sailing-vessels in the Reserves at our naval ports which could be made suitable for the training of seamen to replace the Eurydice and Atalanta, if it were thought desirable to do so. There are, however, large numbers of young seamen in our home ports whom it is most desirable to send to sea. The Admiralty, therefore, have considered that, without waiting further for the determination of the question whether it would be desirable to build sailing-vessels for the special purpose of training seamen, it is, at all events, most expedient to send to sea as many of these men as they can. They have, therefore, decided to form a detached squadron with this object. It will consist of the Inconstant, the Bacchante, and two corvettes, the Tourmaline and the Cleopatra. Of these vessels the Bacchante is already in commission. The Tourmaline is taken from the West Indian Squadron, and will have fresh drafts of seamen put on board on her return home in a few days. As many young seamen will be drafted into the squadron as possible. The squadron will be under the command of Lord Clanwilliam, and will be absent from England about 15 months. The instructions to Lord Clanwilliam will be that the purpose in view is the training of the officers and seamen, and that with this object steam will only be used in emergency or for steam tactics.

The Admiralty have ordered that all overtime is to cease at Chatham Dockyard. For some time past a large number of the hands have been working extra hours completing the work on board the Superb, 16 guns, armour-plated, 8,760 tons, 7,430 horse-power, and the Agamemnon, four guns, armour-plated turret ship, 8,492 tons, 6,000-horse power.

Staff Capt. Joseph Gilley Dathan, who we announced last week had been appointed master-attendant of Sheerness Dockyard, vice Staff Capt. G. L. Carr, retired, served as second-master in the Firefly, commanded successively by Lieut. T. C. Ponsonby and Com. John Tudor, on the coast of Africa, from Nov. 1847 until 1850, and in Aug. of that year was appointed to the Portland, Capt. Henry Chads, fitting for the Pacific, and remained until 1851. In July 1852 he was appointed to the Mæander, Com. Charles Talbot, at the Cape of Good Hope, and after next serving in the Cuckoo, Lieut.-Com. A. G. E. Murray, was promoted to master, Feb. 1855. He was master of the Dragon, Capt. W. H. Stewart, C.B., in the Baltic, from Feb. 1855 to the close of the Russian war; and from March 1857 until paid off in Aug. 1859 served in the Alarm, in the Pacific. In Sept. 1859 he joined the Encounter, fitting for China, and in Sept. 1861 was transferred to the Imperieuse, and returned to England, and was paid off in March 1863. In the following Nov. he was appointed to the Duncan, fitting for the West Indies and North America, and returned with her to England, and was paid off in June 1867. In the following month he became staff com. of the Cumberland, and in Jan. 1869 was transferred to the Agincourt, also at Sheerness, and in June removed into the Pembroke. In Sept. 1869 he was appointed to the Royal Alfred, flagship, on the North American and West Indies station, and was paid off in Jan. 1874. He commanded the Fox, store-ship, from Nov. 12, 1874, until promoted to the rank of staff capt., Sept. 5, 1877, and appointed at the same time assist.-master-attendant of Portsmouth Dockyard, from which port he now removes to Sheerness.

Epps's Chocolate Essence.—Product of a special refining process. It is chocolate devoided of its over-richness and substantiality. Sugarless and, when made, of the consistency of coffee. An afternoon chocolate. Sold only in packets, 6d and 1s, labelled, "James Epps and Co., Homœopathic Chemists, 48 Threadneedle Street, and 170 Piccadilly, London."

THE HYDROGRAPHIC DEPARTMENT.

The Norway Pilot, Part 2, containing directions for the west and north coasts of Norway, extending from the Naze to the North Cape, and thence to Jacob River, the boundary between Norwegian and Russian Lapland, compiled by Lieut. G. T. Temple, R.N., has at last been published by the Admiralty. We notice that in the official "advertisement," or preface, after mentioning the various authorities on which the work is based, the Hydrographer, Capt. F. J. Evans, remarks that this volume has been compiled from those sources by Lieut. G. T. Temple, "who translated the latest editions of the works mentioned, and furnished much additional information, derived from authentic sources, and verified in many places by personal observation and experience." This would have been a graceful, if somewhat tardy and forced, recognition of the services rendered by Lieut. Temple to the maritime world, had it not been immediately followed by a paragraph stating that "the whole work has now been compared with the most recent chart of this long line of coast, and been prepared for the press by Staff Com. W. R. Martin, R.N., of the Hydrographic Department,"—an officer, we may observe in parenthesis, who has never been to Norway, and has no knowledge of the language. It is, therefore, plain that Capt. Evans did dispense with the further services of Lieut. Temple for "departmental reasons," but whether for the good of the public or not remains to be seen, as the reasons could apparently only have been dictated by a desire to deprive Lieut. Temple of a part of the credit due to him for his work, in order to bestow it on a member of the regular Hydrographic staff.

In our issue for July 24, we made some remarks under the above heading, on a letter forwarded to us by Lieut. G. T. Temple, R.N., which a weekly journal of science had declined to publish. We now notice with pleasure that the said journal has inserted the following communication, which was addressed to Lieut. Temple by Col. Sejersted, Director of the Royal Norwegian Geographical Survey Office, and which fully bears out the opinion we expressed, that our contemporary had been lured into error, and had failed to grasp the true bearings of the case. We congratulate our contemporary on the course it has now adopted, and no one can fail to appreciate the frank and honourable manner in which Col. Sejersted has acknowledged his mistake, and the generosity and promptitude with which he has made reparation to Lieut. Temple :—

Christiania, August 7, 1880.

SIR,—You may possibly have noticed that I have replied in some English newspapers to remarks stated in those papers to have been made by you, at a meeting on May 19 last of the Society of Arts, with respect to our Norwegian coast charts, and that I have especially alleged that your remarks must have been caused by ignorance of the present stage of our coast charts. I now learn from a copy of the "Journal" of the Society of Arts, containing your paper complete, that the said newspaper statements were misguiding extracts, and that your censure was not pointed against our coast charts, but against an English belabouring of those charts in no way connected with the geographical survey of Norway. As a matter of course, my reply would not have been published if the said newspaper statements had been correct concerning the main point to us, and I hereby declare, with great pleasure, that the copy of the "Journal" of the Society of Arts, containing your paper, proves plainly that you are intimately acquainted with our coast charts and coast descriptions, which are mentioned by you in a very satisfactory manner to us. I express my wish that these lines may help to make good the injustice you have suffered from the misconceptions caused by the ambiguous newspaper statements, and I beg to leave it to you to use this letter at pleasure.—Your obedient servant, (Signed)

FR. SEJERSTED, Lieutenant-Colonel,
Director of the Royal Norwegian Geographical
Survey Office.

To George T. Temple, Lieutenant, R.N., F.R.G.S., The Nash, near Worcester, England.

Mr. William Hancock, late foreman of the yard at Portsmouth, who has had charge of the construction of the Inflexible from the laying of the keel plate on the blocks in February, 1874, until within the last fortnight, died somewhat suddenly last week, at the age of 51. The funeral took place at Kingston Cemetery last week, the remains being followed to the grave by Rear-Admiral Foley, Admiral Superintendent; Mr. Nathaniel Barnaby, C.B., Director of Naval Construction at the Admiralty; the Chief Constructor, and the two constructors at Portsmouth; nearly the whole of the foremen of the yard, and masters of trades, and about 400 leading men and dockyardmen who had served under the deceased. Vice-Admiral Stewart, Controller of the Navy, sent a telegram to express the high esteem in which he held Mr. Hancock, and the loss which the Service has sustained by the death of so able and zealous a public servant.

By Fleet Circular No. 23 V., the Admiralty direct that a new establishment of books for the use of schools on board her Majesty's ships and vessels shall be substituted for that referred to in Clause 4 of Article 1,735 of the Queen's Regulations and Admiralty Instructions.

HOT WEATHER.—How to Invigorate the Nervous System by Natural Means. Mental Prostration.—"Having suffered much from headache and mental prostration, I was induced to try ENO'S FRUIT SALT, the effects of which have been most satisfactory, resulting in invigorating my entire nervous system, and removing the frequent headache to which I was subject. You are at liberty to make any use you think proper of this testimonial, as I consider Eno's Fruit Salt an indispensable adjunct to the Household."—TRUTH, Sigdon Road, Dalston, E. Caution.—Examine each bottle, and see the Capsule is marked, "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d.

ADMIRALTY INSPECTION AT PORTSMOUTH.

The Admiralty have this week been engaged inspecting Portsmouth Yard, together with the establishments at Eastney, Gosport, Haslar, and Forton. Vice-Admiral Sir William Houston Stewart, K.C.B., Controller of the Navy, arrived on Saturday and made a preliminary inspection. On Monday night Admiral Sir Cooper Key, Rear-Admiral A. H. Hoskins, C.B., Mr. Shaw Lefevre, Mr. Birch, and Capt. Erskine, arrived, and proceeded on board the Enchantress. On Tuesday morning Lord Northbrook arrived from London, and went on board the Enchantress. Admiral Ryder, Rear-Admiral Foley, and the commanding officers of ships in port and heads of departments, the Commandants of the Royal Marine Artillery and the Royal Marine Light Infantry, and the Inspector-General at Haslar then proceeded on board. Shortly before 11 o'clock, the inspection commenced, and the gunnery arrangements of the Inflexible were examined into. Steam had been generated, and the necessary arrangements were made for experiments in loading, ramming, running in and out, depressing and elevating the ponderous weapons, Lord Northbrook and other members of the party viewing the operations from a platform erected on the top of the turret itself. The machinery worked admirably. Although no date has been fixed for the completion of the ship for the pennant, it is understood that she is to be ready by the end of the present financial year. Since the last steam trial the Inflexible has been fitted with four-bladed propellers, for the purpose of diminishing the vibration, which had a tendency to loosen some of her after-plating. Leaving the Inflexible, the party proceeded on board the Dreadnought, and inspected the engines and general arrangements on board. The Dreadnought is quite complete, and ready for sea at short notice. After remaining about half-an-hour on board, their Lordships proceeded to the electric shop, where they remained some considerable time inspecting the various systems of generating and utilising the electric light.

A visit was next paid to the Marlborough. About 100 engineer students were drawn up in single line on the wharf, immediately opposite the ship. Having passed up and down the line, the lads standing at attention, their Lordships passed into the ship, and on leaving expressed themselves highly satisfied. After luncheon the Admiral Superintendent's office was visited, and the usual proposals for improvements, extensions, &c., in the establishments were submitted, and the plans examined and explained. Later on, the Steam Reserve offices were visited, and an inspection of the men took place, after which their Lordships returned to the Enchantress, where in the evening they entertained Admirals Ryder and Foley and the heads of departments at dinner, the Dockyard being brilliantly illuminated with the electric light for the occasion. On Wednesday morning their Lordships went ashore at half-past 9 o'clock, and began work at the Superintendent's office. This occupied their attention until 11 o'clock, when they proceeded to the "New Ground" at the northern corner of the yard. Walking through the turnery their Lordships ascended the long flight of circular stairs to the fitting shop, where the bulk of the engineer students are employed at the vice, and up higher still to the torpedo room. They bestowed considerable attention on the corvette Canada, and instituted a careful inspection of the Colossus. Their Lordships next went to the Excellent. Lord Northbrook and his colleagues were afterwards conducted to Whale Island, where they witnessed some practice from machine-guns. After the gunnery experiments, the Admiralty attended a long and varied programme of torpedo trials on board the Vernon. After luncheon on board the Enchantress, their Lordships made an inspection of the Duke of Wellington, the yards being manned. They afterwards visited the Inconstant and the Bacchante. At night their Lordships dined with Admiral Ryder, and concluded the labours of a long day by attending the ball of the Seamen and Marines' Orphan School. On Thursday the Admiralty inspected the Royal Naval Hospital at Haslar, the slip at Haslar, on which are a number of gun and torpedo-boats under cover, the Royal Clarence Victualling-yard, the Marine Barracks at Forton and the Marine Artillery Barracks at Eastney. In the evening their Lordships entertained some of the heads of departments at dinner on board the Enchantress, and returned to town on Friday.

THE ATALANTA INQUIRY.

The inquiry into the loss of the Atalanta was resumed yesterday morning at the Sessions House, Westminster, before Admiral A. P. Ryder, having been adjourned from Aug. 24 for the attendance of Admiral Sir George Greville Wellesley, K.C.B., who was then on the Continent, and who on now being called stated that he was Senior Naval Lord from Nov. 1877 to Aug. 1879. The Juno was fitted out as a training-ship before he held that position. No doubt he had seen a report stating that the Atalanta lurched over 40° frequently under close-reefed topsails and courses. The reports of sailing qualities of ships applied generally, and he should not attach much importance to the statement that a vessel lurched 40°, beyond that she might have got into a heavy sea. He had no reason to doubt that the Atalanta, when she started on her first cruise, was a sound, stable, and seaworthy ship. She was properly found, equipped, stored, and ballasted, and her rigging was sufficient and suitable. Her equipment, including boats and pumps, was adequate. The executive officers were sufficient in number for carrying on the special duties of a training-ship. She had three or four lieutenants, three sub-lieutenants, besides warrant officers. The complement of the crew—as distinguished from the young seamen to go in training—was sufficient. He did not go into the question of whether the alteration in the distribution of weights, rendered necessary by the conversion of the Juno into a training-ship, affected her safety. He did not know of any mode of ascertaining to what extent a vessel lurched being adopted at that time except from judging by the eye and putting up a rough batten. He did not attribute much importance to the entry of the lurching of from 20 to 40 deg. Even if proved that she lurched 40 deg., it would not have raised any alarm in his mind as to her safety. He did not concur in the statement made to the Court that if she lurched 40 deg. she ought to have been broken up. Mr. Rothery: Would you have any objection, if the Admiralty gave permission, to furnish us with a copy of your minutes with regard to the Atalanta?—None whatever. Capt. Batt: In your recollection of sailing-ships, was it customary in those days to note the amount of lurching of ships?—I think not. I do not think we had pendulums then. The witness continued that he had no doubt that official reports of the behaviour of the Atalanta were sent to him. He should examine her log-book, as the log-books of the ships always came to him; but to say that he read them through would be absurd, because no man's time would allow him to read through the logs of 150 to 200 ships. If it were frequently repeated in the log-book of the Atalanta that she lurched 40° and pitched very heavily, it would be unusual, unless she had got into very bad weather. The vessel belonged to a class of ship perfectly well known in the Service, and she had been at sea before, and was not an untried ship. Mr. Waymouth: We have had it stated by officers that the entries as to the lurching were of such an alarming nature that they could not credit them as correct.—I quite agree with them as to the lurches; but as to the other points, about the ship being in a leaky state, &c., they were sent to the officials to report upon. With these serious reports, should the vessel have been sent to sea without investigation?—The ship was not sent to sea without proper investigation. If the return be correct which was made by Capt. Stirling as to the alterations made to the ship upon her return from the West Indies, and the taking away of the bilge keels, what would have been the result?—That is a question I cannot answer. The witness stated that he was not consulted as to the alteration of the weights. The Atalanta's displacement was practically the same as the Juno's. Although he had never gone into the question of the science of shipping, he stated that as a general thing, if great weight was placed at the bottom of the ship it would give the ship great stability and make her swing immensely. To Mr. Waymouth, who put a question as to whether the Lords of the Admiralty took the advice of their subordinate officers, Admiral Wellesley said that he did not think that was a question which he ought to answer.—Mr. Waymouth: If Mr. Barnaby reported from his professional knowledge that it would be wrong to make the alterations, it would be a serious matter for consideration when so many lives were involved?—I do not know whether Mr. Barnaby has stated that he thought it would compromise the safety of these people. If he did, it never came to my notice. I cannot believe that the removal of two 64-pounders, or the shortening of the masts, or the taking off of the bilge keels, would compromise the safety of the crew. The witness added that he believed the Atalanta was as good a ship as was ever sent to sea. To a question with regard to training officers, the witness objected, observing that he did not think it came within the scope of the inquiry; but upon the president ruling it to be a legitimate question, but that he (the witness) might decline to answer, Admiral Wellesley said that he had no objection to answering the question, but that it was a subject which had for years occupied the attention of naval men, who greatly differed as to whether the training system was good or bad, whether there should be more or less training-ships, and whether there should training colleges ashore or afloat. This concluded the oral evidence, and the Committee adjourned.

THE WIMBLEDON SCANDAL COURT-MARTIAL.

On Monday, the first witness was Colour-Serjt. Luke Meakin, 4th Cheshire, who said that on the day of the competition for the Martin's Cup, in 1878, Stokes came into his tent in civilian dress, ready for going home. He spoke of his bad luck, and said he was going home. There were two or three other persons present, and they undressed him and put on his uniform. The witness accompanied Stokes and Scott to the firing-point, and watched the firing. Looking at the prisoner, the witness said he had never spoken to him in his life. He had been in the Volunteers 21 years, and had never been ordered to appear before his own or any other officer in consequence of a dispute. Cross-examined: He shot for the Burroughes and Watts Prize in 1877, when Stokes and another tied for the first prize. The witness was third in that competition, and therefore won £25. His son was fourth, and won £7. There was no question between the four top men as to the division of the money. He knew a jealous-minded man named Scathe, according to whom if he himself did not win those who did win always won unfairly. He was a member of the Stockport Shooting Club, which had about twenty-eight members, each of whom had a pecuniary interest in the success of any one of the members, as they paid to the club a percentage on their winnings, and that money defrayed the expenses of sending other members to Wimbledon in the following year. The commanding officer of the regiment was president of the shooting club, but he did not often attend its meetings.—Serjt. Thomas M'Carthy, Royal Marines, said he attended the Wimbledon Meeting of 1880. He was at butt 21 to 30 during the whole of the meeting. On July 23 he had twenty men of the Royal Marine Artillery under him, and after he had changed them from one target to another Lieut. Houghton changed them again. The prisoner never made witness any proposition with the view of fraudulent marking. He did not hear prisoner say he was anxious to secure the Olympic for any particular competitor. The prisoner did not ask him to request the men under his charge to assent to any fraudulent marking. The prisoner had on no occasion offered witness money. (To the Court): He could not know what was going on in the next butt, because he had quite enough to do to look after his own men. The Court: It has been said that the prisoner stated that he had full control over the targets Nos. 1 to 30. What do you understand by that?—I do not know that he had any possible control over one. (To the prisoner) : The same men were always in witness's butts. He was not aware that the prisoner could have influenced them. The prisoner was never in his (witness's) butt. The prisoner was changed from his butt once or twice, but by the order of the pay-serjeant.

A number of witnesses for the defence was called at the further sittings of the Court, but yesterday was devoted to the reading of a second speech for the defence. Prisoner, through Lieut. Edye, said he had now been under arrest for more than seven weeks, and during that time he had endured public scorn and execration, but no matter how great his suffering had been he had throughout been supported by a consciousness of his own innocence. From the date of the arrest up to the time when he last addressed the Court, he had kept silent while his assailants had spared no artifice to spread abroad the most unscrupulous calumnies. He asked the Court not to believe a word that the witness Sage had uttered; for, while he had endeavoured to show that he had entered into an arrangement to win the Olympic of 1878, yet, when the regulations of the Association were pointed out to him, he denied that he had been guilty of bribery; but he did, nevertheless, go so far as to say that he was ashamed of himself, and became disgusted with his whole conduct. But he contended Sage would never have been disgusted had his schemes met success, for after entering into the arrangement in 1878, he told them he had made no report of his fraudulent transactions, but went to Wimbledon, and there he hoped to win the money, dividing it between himself and his accomplice Adams, and the prisoner alluded briefly to the benefit for Adams at the Grecian Theatre, pointing out that Sage had just enough to do in the affair to save himself from unpleasant consequences, but with the chance of doing something for himself, and then called attention to Sage's dispute with Jennings. Sage was not aware that he had won anything in 1878, yet they found him paying £22 to Jennings as his share of the winnings, and afterwards there was a county-court suit, Jennings claiming a full half of the winnings according to the agreement with Sage, who could only refund expenses, and Jennings lost his case simply for want of witnesses. Would they not rather, then, believe the old soldier, twice decorated by his Sovereign, than a creature who had been dug out of the purlieus, and who had associated only with blacklegs and tricksters. To such men as Sage the prisoner's ruin was essential, for it was only upon his ruin that they could hope to establish their own reputation. It was their primary object to bring about a change at Wimbledon, by which all military rule and authority would be eliminated, and to degrade the National Rifle meetings into a gambling hell, where men of Sage's class might barter for prizes. The way in which they proceeded was to destroy individual character, and he (prisoner) was their first victim. Reading a letter from Capt. Sidebottom, of the 13th Cheshire Volunteers, the prisoner showed that no officer, non-commissioned officer, or private of that corps attended the Wimbledon meeting of 1880, either as competitor or spectator; and in reviewing the evidence of Mr. Humphrey, he pointed out that, as misses were not recorded by the butt-markers, it was impossible for anybody in the butts to know whether Stokes or Capt. Pilley were firing.

The inquiry was proceeding when the above report was forwarded.

INDIA.

The *Times of India* says :—" Brigdr.-Gen. G. R. Burrows, whose name is now so prominently before the public, arrived in India a cadet early in 1844, and was soon after posted to the 15th Regt. N.I. He served with his corps up to September, 1852, when (through the interest of his father-in-law, Lieut.-Col. Goodfellow, Bombay Engineers), he was appointed to the Quartermaster-General's Department, in which he remained up to Sept. 1865. In May of that year, Lieut.-Col. Burrows went to England, and on his return in Nov. 1866, he was placed on general duty at Poona. In March, 1867, he was appointed to the command of the regiment which he had left fourteen years previously as a lieutenant, and which is one of the regiments which have been selected to reverse the defeat which he recently suffered at the hands of the enemy in Afghanistan. In Sept. 1870, he re-entered the Quartermaster-General's Department as officiating deputy-qrmr.-gen., and in October, 1871, reverted to the command of the 15th N.I. Lieut.-Col. Burrows again entered the Department in May, 1872, and remained until Jan. 1880, when he proceeded to command a brigade on service."

At a meeting of the United Service Institution at Simla, Gen. Olpherts, V.C., C.B., advocated the immediate annexation of all Afghanistan up to the Oxus. Gen. Massy preferred the milder course of holding the Khyber as far as Lundi Kotal, making over the Kurum to the Turis under our protectorate, and keeping a good grasp upon Candahar, which we should never allow to slip out of our hands.

The Lahore paper says :—" A very welcome piece of news to many comes to us from Cabul, namely, that six months' batta wlll be given to all who have crossed the frontier since September 3, 1879, and by the frontier, we presume, is meant the old frontier as it existed before the advance on Ali Musjid, and not the new one as defined by the treaty of Gundamuck. We are also happy to notice that Government is going to grant compensation to native cavalry for losses sustained during the war. This is as it should be, and if compensation were not given, we fear that we should have, for some years at least, our Bengal cavalry mounted on very inferior horses, as the drain on the funds for new horses to supply the place of those killed or worn out would be so great, that only a lower average price than that given at present could be afforded, and therefore the class of horse bought would necessarily be an inferior one to that now purchased. By Government's well-timed act of justice—it is nothing more—the native cavalry will be enabled to keep their remounts up to the proper standard."

GENERAL ROBERTS' VICTORY AT CANDAHAR.

The story of Ayoub's defeat is told as follows by the correspondent of the *Times*, in a letter telegraphed from Candahar on the 2nd inst. :—The Army reached Robat, 17 miles from Candahar, on the 28th ult., and Gen. Roberts, justly considering that his men required repose after their great exertions for the last 20 days, halted on the 29th. He then made Candahar by two easy marches, arriving there on the 31st ult. On the afternoon of the 31st a bold reconnaissance of the enemy's position was made by the whole of the Cavalry Brigade, accompanied by Col. Chapman, chief of the Staff. The fire of the enemy was drawn in all directions, and their positions accurately discovered. The cavalry retired late in the evening, covered by the 15th Sikhs, under a heavy fire. The 3rd, or Macgregor's Brigade, held an advanced position for the night. The enemy's position was found to be as follows :—Their camp was pitched behind the screen of a high-banked ridge of hills, extending from near the Argandab in a north-easterly direction. The western extremity of this ridge is called Pir-Paimal. There are two passes through this ridge from Candahar, the Baba Wali and the Morcha. The first is easy, but it was strongly held by the enemy, with several guns on its crest. The second, which was more difficult, was on the right of the position, and was covered by several parallel canals, derived from the Argandab, which, though very dry at present, formed a most formidable obstacle. A detached hill, in the rear of the position, and separated from the outer ridge by gardens and orchards, further strengthened the enemy's flank. Nevertheless, Gen. Roberts decided to make this his point of attack, perceiving that if once the village of Pir-Paimal, at the foot of the hill of that name, were captured, his troops would take the whole position in flank, when a determined advance must roll up the whole of Ayoob's line, and infallibly lose him his guns. Orders were accordingly given assigning this operation to Hardy, with the Cabul Brigades, while the Baba Wali and Morcha Passes should be watched and menaced by the Candahar garrison, and the guns on the Baba Wali be silenced by the heavy battery. Gen. Gough's cavalry was to act independently on the left, and cut off fugitives from the main attack. At 9 a.m. the troops were in position, and at half-past 10 a commanding village in front of the infantry had been stormed by the 92nd, the 2nd Goorkhas, and the regiments of the 1st Brigade, after being heavily shelled by Baty. C 2 of the Royal Artillery and by the screw-gun battery C 8 Royal Artillery. This brigade was then joined by the 2nd, or Baker's Brigade, and the two advanced along the line of the canals until they were lost to sight round the shoulder of Pir-Paimal. The fighting was severe during this advance and in taking the village of Pir-Paimal, but the 3rd Brigade (Macgregor's) was in reserve to afford support, if necessary. It was intended that the troops should halt for some time in Pir-Paimal and reconnoitre further, but the enemy showed continued confidence, and it was found advisable by Major-Gen. Ross, who conducted the operation, to push on. The enemy resisted stoutly, and it was here that the principal loss was sustained. Two small advanced camps were then sighted and captured, together with some guns. After a brief struggle, the alarm caused by this success was communicated to Ayoub's main camp further on, and a general flight ensued. Guns were captured by our troops at each step, and 32 had been taken before they drew breath at the village of Mazra, far beyond the Baba Wali Pass. Here Gen. Ross halted his brigade at 1 p.m., further infantry pursuit being impossible and useless. As soon as Gen. Roberts saw how matters were proceeding, he sent for the 3rd Bombay Cavalry and the 3rd Scinde Horse from the front of the Baba Wali Pass to Mazra, and ordered them to carry on the pursuit for 15 miles further. They met Gen. Gough's cavalry returning, and returned with them to Candahar. The cavalry pursued the fugitives in the direction of Khakrez, and killed between 200 and 300, 70 of whom fell to the sabres of the 3rd Punjab Cavalry in one place. They then swept round and met the Bombay Cavalry, as before mentioned. At the enemy's main camp was found the lifeless body of poor Lieut. Maclaine. Some native soldiers, prisoners in Ayoub's camp, reported that when the Afghans were about to fly, the guard at his tent called him out and deliberately murdered him,—a deed for which Ayoub will be for ever execrated. Remains of bread, which the poor fellow had been eating, his journal, his pipe, and other trifles, were found in the tent half an hour later by Euan Smith. The 1st Brigade bivouacked for the night at the enemy's camp, in charge of the captured guns, among which were the two Horse Artillery guns lost at Khushk-i-Nakhud. The rest of the troops returned to Candahar by the Baba Wali Pass, arriving at 6 p.m. When Gen. Roberts, at the end of the action, rode up to the different regiments to thank them for their conduct, he was loudly and repeatedly cheered, showing how entirely he possesses the confidence and the affection of the troops. The feeling of the whole of the Cabul force is that the victory of yesterday fully repays them for their past exertions. The action was fought throughout on a scientific plan, without accident or mistake, and was certainly creditable to the British arms. Ayoub will probably find his way, a discredited man, to Herat, and some of the other chiefs to Zemindawar, but it is not likely that they will be able to induce their followers soon to repeat the experiment of braving an English force. Col. Brownlow's loss is deplored by the whole force, as that of one of the best and bravest soldiers who ever led a British regiment. Capt. Straton had rendered great service as the head of the Signalling Department from Char-Asiab up to his death. He was shot in the leg by a Ghazi as he was riding, almost unattended, to establish a heliograph station on the Baba Wali Kotal. His death was promptly avenged by a signaller of the 72nd. Early orders are expected for the return of the Bengal troops to India. Gen. Roberts has appointed Protheroe to the charge of the city. Euan Smith proceeds to reopen the line of communications and restore order in the Atchakaxe country. The casualties yesterday were as follow :—72nd — killed, 7; wounded, 17. 92nd—killed, 11; wounded, 51. 60th Rifles—wounded, 1. Native regiments—killed, 11; wounded, 72. The officers killed were Col. Brownlow and Capt. Frome, both of the 72nd Regiment, and Capt. Straton, of the 22nd. The officers wounded were Capt. Murray and Lieut. Monro, of the 72nd; Lieuts. Menzies and Stewart, of the 92nd; Lieut.-Col. Battye, of the 2nd Goorkhas; and Major Slater, of the 2nd Sikhs.

The force under Gen. Roberts, when he started from Cabul, comprised the following :—Infantry Division, under the command of Major-Gen. Ross.—First Brigade—92nd Highlanders, 2nd Goorkhas, 23rd Pioneers, and 24th Native Infantry. Second Brigade—72nd Highlanders, 5th Goorkhas, 2nd Sikhs, and 3rd Sikhs. Third Brigade —60th Rifles, 15th Sikhs, 4th Goorkhas, and 25th Native Infantry. Cavalry Brigade, under Brigdr.-Gen. Gough, C.B., V.C.—9th Lancers, 3rd Punjab Cavalry, 3rd Bengal Central India Horse, and fifty volunteers 1st and 2nd Punjab Cavalry. Artillery, under Col. A. C. Johnson—6-8 Royal Artillery, 11-9 Royal Artillery, and No. 2 Mountain Battery.

ACTUAL *v.* RELATIVE RANK IN THE ARMY MEDICAL DEPARTMENT.

" Surgeon-Major " writes :—" With reference to the comments of your correspondent in a recent number of the *Army and Navy Gazette* on this subject, I cannot understand the reasonableness of the objections to medical officers holding actual rank in their own corps. They hold it in the American, Italian, and Turkish Services; and there is nothing novel in the idea, as in former days they not only purchased their commissions, but held combatant ones, in addition to the medical. It would be, after all, only a restoration. But to come to more recent times, I will give you an instance, common enough in the Volunteers,—a citizen force, filled by men of rank and intellect :—The late Dr. Keith, of the Aberdeen Infirmary, a skilful surgeon, was elected in 1869 captain of a company of Volunteers. Shortly afterwards he became captain-commandant of two strong companies, and ultimately lieutenant-colonel of the administrative battalion, a post he held until his death in 1875. 'Relative rank' is an anomalous term implying and maintaining a sense of inferiority of one class of educated gentlemen to another, which in civil life is unknown. Take, for instance, the case of a serjeant-major of 20 years' service, with a superior relative rank, but without any distinct designation to show that his position differs from an officer of 12 years in the Army. He may continue for 14 years longer, if unpromoted, to become a grey-headed veteran, with no means of showing to the public that he has reached the relative rank of a lieutenant-colonel, except his uniform, which he does not constantly wear. Why is not his commission and rank defined as it was by the Royal Warrant of 1858? Every rank should be defined in an army. In the Medical, it is not, nor can it be, until we obtain actual not relative commissions."

Reviews.

A Son of Mars. By Major Griffiths. (Remington and Co.)—This is one of Major Griffiths's lively tales of military life which have already been appreciated by not a few readers. It is almost impossible to treat of " barrack life," " mutinies," " Victoria Crosses," &c., without travelling over familiar ground. The present tale, written in two concise volumes, is full of bustle, and may be regarded as up to the author's standard. It is, however, more likely to attract the attention of juveniles (if there be such persons at present in the world) than that of others. We find in it the dark, mysterious lady of high rank, who in a most mysterious manner pounces on an almost beggar-child, and claims him as heir to an old title and fine estates. Then we have the cruel husband, who works out his own plans in opposition to hers; afterwards, the barrack-room and the acceptance of the Queen's shilling by the real heir, and the gazetting of the false heir as ensign into the regiment which the other had selected,—altogether, a state of things out of which strange events are carved by the author's facile pen. Of course the regiment is ordered on foreign service, and there is fighting and a mutiny, and the mock heir proves a coward and the true one gets the Cross, and subsequently confounds the scheming old man by succeeding in a law-suit and ousting him from the estate, and marrying the girl that was from the first intended for him. Altogether, there is a great deal of action accomplished in these two small volumes.

Love and Law. By Carl Max. (Remington.)—To any person who wishes to take a companion on a short railway ride, we can recommend this very pretty little book. It contains two not over-long stories, which will neither weary the reader nor prove fatiguing by being too deeply interesting.

British Bee-Farming. By James Robinson. (Chapman and Hall.)—" Bee-farming " will, at first, appear a strange title; but after a perusal of this little book, the reader will be probably inclined to admit that both pleasure and profit may be acquired by the pursuit. The author has treated the subject in the simplest form, so as to make it intelligible to the rudest village " yokel," his object being to encourage bee-farming and show that it is not only a pleasing recreation, but if properly attended to, an undoubted source of income. Fenimore Cooper, very many years ago, introduced into one of his novels the subject of bee-farming, and in doing so, drew one of his most pleasing sketches. An extraordinary amount of information can be gleaned from a close study of this useful manual.

The Wandering Naturalists. By J. A. Lawson. (Remington.)—This is quite a story of adventure under an unpretentious title. The wandering naturalists " went in " for excitement *con amore*, and found many opportunities of gratifying their tastes. The book is quite worth reading.

Obituary.

Lieut.-Col. A. M. Shewell, Bombay S.C., Deputy-Comy.-Gen., died at Candahar, on the 1st inst., of wounds received in action during the sortie of the 16th ult., aged 40 years. The deceased served with the rank of lieut. in the Commissariat Department, in Abyssinia, specially mentioned in final despatch, medal, and brevet of major on attaining the rank of capt. He joined the Army, Dec. 13, 1856; became lieut., Sept. 2, 1857; capt., Dec. 13, 1868; brevet Major, Dec. 14, 1868; major, Dec. 13, 1876; and brevet lieut.-col., Oct. 1, 1877. Major-Gen. E. Howard Vyse, writing to the *Standard*, says:—"With reference to this officer, I think the following extract from a paper entitled 'A Transport Service for Asiatic Warfare,' read on June 23 last at the Royal United Service Institution, deserves to be published:—'At Eree-ka-Dur there was a Commissariat officer who had been up the line on duty, and returning to Sukkur. . . . . . The Commissariat officer whom I have just mentioned delayed his return when the cholera appeared, and was alone at first, afterwards with one medical subordinate to assist him. He attended those struck down by this fell disease as if they had been his brothers. Night and day he sat by the side of the sick, ministering to their wants, able only at long intervals to snatch a few minutes of that repose so greatly needed, so hardly earned. And remember that his work was not in the well-ventilated, well-arranged wards of a hospital, but in rudely-constructed grass sheds, exposed to the burning, and I may say, almost deadly heat of June in the Cutchee Plain. Not until the disease had been got fairly under, and those who survived had joined the rest of the train at Dachers, did he leave his post. Gentlemen, this officer was Lieut.-Col. Arthur Shewell, of the Bombay Commissariat. I saw Col. Shewell after his return to Kurrachee during the summer of 1879, but with his innate modesty, he would say but little about his heroism. He did, however, admit that it was 'trying' when he had to bury 17 poor natives in 24 hours."

Lieut.-Col. G. J. D. Heath, Madras S.C., Assist.-Comy.-Gen., 3rd class, died at 6 South Parade, Southsea, on the 3rd inst., aged 48 years. He joined the Army, March 3, 1850, and became lieut., March 3, 1876; served with the Saugor Field Force, in Central India, and was present at the relief of Kirwee (medal with clasp).

Com. Henry Lewis, R.N., the senior retired commander, died at his residence, 5 Devonshire Street, Portland Place on the 31st ult., in his 95th year. He entered the Navy Sept. 24, 1801, as A.B. on board the Diana, Capts. J. P. Beresford and T. J. Maling, and served successively in the Mediterranean, Channel, and West Indies. On Feb. 3, 1806, being at the time prize-master on board a detained American brig, he had the misfortune to be taken prisoner by a French privateer off the Scilly Islands, and was carried to France. In Dec., 1809, he effected his escape, and on Feb. 10, 1810, was promoted to Lieut. He subsequently served in the Resolution, Capt. Hardy, in the Baltic from Feb. 1810, until Jan. 1811, when he was transferred to the Conquestador, Capt. Lord William Stuart, with whom he was for two years employed in the North Sea and Channel. He was afterwards employed in the Orontes, Capt. N. D. Cochrane, on the Irish and West India stations, and again in the Channel from Oct. 1813 until Sept. 1815. He became retired commander July 7, 1849, and was promoted to the List under Order in Council of 1816, July 11, 1861.

INSTEAD OF TAKING AN ORDINARY COD LIVER OIL, and attempting to disguise its flavour by all sorts of devices and mixtures, they (Allen and Hanburys) have studied anew the processes of manufacture of Cod Liver Oil, for which they have always had a great reputation; and as a result of this study, they have produced a Cod Liver Oil which is so delicate in flavour as to be free from all the usual nauseous properties of fish oil, and has almost the delicacy of salad oil.—*British Medical Journal.* All who have difficulty in taking Cod Liver Oil should insist on having Allen and Hanburys' Perfected Oil. Sold only in capsuled imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade-mark, a Plough. Of all Chemists.

PURCHASE SUBALTERNS.

"One of Many" writes:—"As one of those who paid his shilling instead of taking it, allow me to thank you for your very sensible remarks anent Purchase subalterns, and their exceedingly legitimate cause of grievance. Our case is briefly this,—we invested many hundreds of pounds, and remained in the Service with a 'light heart,' for did not Mr. Cardwell assure us that we should not suffer for the very practical interest we had shown in our profession? At the end of twenty years, we shall find ourselves no better off than our non-Purchase brethren as regards pension, and infinitely worse off in every other respect, for we invested sums which we cannot afford to lose, and which, by every principle of justice, ought to have assured us at least a better retiring pension than falls to the lot of those who paid nothing. I may add that the interest of my regulation and over-regulation Purchase-money, at five per cent., amounts to £60 a year."

A Reuter's telegram dated Gibraltar, Sept. 3, says:—"The United States man-of-war Trenton, having on board Admiral Howell, Commander-in-Chief of the American fleet in the Mediterranean, has arrived here from Southampton. The Admiral landed to-day and visited Lord Napier of Magdala, the Governor. The Trenton will proceed eastwards to-day."

ROWLAND'S ODONTO is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that ROWLAND'S ODONTO will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

USE MARGERISON'S REGISTERED WHITE WINDSOR SOAP, PRESTON.—The best and cheapest Soap in England for washing clothes, or any household purpose. Ask for MARGERISON'S Soap, and see that the word MARGERISON is on every bar, as there are so many worthless imitations. Sold at Stores.

Sold by Chemists throughout the World.

CAUTION.—See that "DINNEFORD and CO." is on every Bottle and Label.

WATCHES.—JEWELLERY.—WATCHES.

The Rev. Robt. Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Ladies' Gold Lever Watch received from you for 70s in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

The Rev. James Arthur Kemp, Lew Down, North Devon, also writes, March 8, 1880:—"The watch I ordered of you at 25s, for my servant arrived quite safely, and I am exceedingly well pleased with it in every way. It is an excellent timekeeper, very neat and handsome in appearance, and in my opinion worth far more than those that cost treble the money. I do not think anybody should be without a watch, when they can obtain from you such an excellent article at so reasonable a price."

THE MIDLAND COUNTIES WATCH COMPANY supply their celebrated Watches direct to wearers, at very lowest wholesale cash prices. They guarantee watches supplied by them to be most perfect timekeepers, and honestly assert their price to be under one-half those charged by watchmakers; and as a guarantee of good-faith they undertake to return the full amount paid for any Watch if not to the satisfaction of the purchaser.

The Company's chief manufacture are their celebrated Crystal Glasses, which dispense with all risk of breakage. Their LADIES' and GENTLEMEN'S SILVER WATCHES, at 25s, and their LADIES' GOLD LEVERS, at 70s, are acknowledged to be the cheapest Watches in the world.

Catalogues, containing list of testimonials, and beautifully illustrated descriptions of more expensive watches, gold and silver jewellery, electroplate, &c., are sent gratis on application. We may safely assert that the prices in same will be a surprise to all who see them.

GENTLEMEN'S FINE SILVER, flat crystal glass, heavy cased, superior movement, 25s.

LADIES' FINE SILVER, handsomely engraved, flat crystal glass, highly-finished movements, 25s.

YOUTHS' FINE SILVER, flat crystal glass, highly-finished movements, 25s.

LADIES' very heavy cased GOLD LEVERS, in exquisitely chased cases, with highly-finished extra-jewelled movements, 70s.

These watches are frequently sold for treble the money.

Cheques or Post-Office Orders must be made payable to the Company's Manager,

Mr. S. HISSEY, Vyse Street, Birmingham.

On receipt of which any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

THE UNITED SERVICE ESTABLISHMENT for the purchase of Wedding Presents in Antique Silver, China, Jewelry, Diamonds, &c., is at MAURICE MOSES', 201 Oxford Street, W.

THE NOSE MACHINE, applied to the Nose for an hour daily, so directs the soft cartilage of which the member consists, that an ill-formed nose is quickly shaped to perfection. 10s 6d, sent free for stamps, secretly packed.—ALEX. ROSS, 21 Lamb's Conduit Street, High Holborn, London, near the Foundling.

SPANISH FLY is the acting ingredient in ALEX. ROSS'S CANTHARIDES OIL. It speedily produces hair and whiskers. It is an astringent that tightens the pores, and thus prevents falling; a stimulant, and thus gives growth. 3s 6d; sent for 54 stamps.—21 Lamb's Conduit Street, High Holborn, London, near the Foundling.

A FACT.—HAIR-COLOUR WASH.—By damping the head with this beautiful Wash, in two hours grey hair becomes its original colour. 10s 6d, sent for stamps, secretly packed.—ALEX. ROSS, 21 Lamb's Conduit Street, High Holborn, London.

UNITED SERVICES PROPRIETARY COLLEGE,

WESTWARD HO, NORTH DEVON (on the coast).
(With the approval of H.R.H. the Duke of Cambridge, K.G.)

The primary object of this School is to enable officers—especially those on foreign service—to obtain for their sons a public education of the highest class adapted to their peculiar needs at the lowest cost compatible with efficiency. There is a Junior School for Boys under twelve, and a Dame's School for Boys under ten within half-a-mile of the College.

Pupils can board all the year round.

Two boys direct from the School were successful for Woolwich in the July examination. The senior cadet of Sandhurst in the July list passed direct from the School last year.

There are fourteen Tutors, of whom nine are Graduates of Oxford and Cambridge.

Chairman of Council—General Sir H. C. B. DAUBENEY, K.C.B.

Head Master—CORMELL PRICE, M.A., B.C.L., (eleven years Head Master of the Modern Side, Haileybury College).

Secretary—Lieutenant-Colonel BURTON (late 91st Highlanders).

For Prospectus, list of pupils, &c., apply to the HEAD MASTER or SECRETARY.

N.B.—NEXT TERM commences September 17.

SALISBURY SCHOOL.

Head Master—Rev. W. H. EMRA, M.A., late Open Scholar of Exeter College, Oxford, Classical Honourman in Moderations and Final Schools; Assistant Classical Master of the King's School, Bruton, 1867; Rector of Gt. Blakenham, 1871.

Second Master—CHAS. MORGAN, Esq., B.A., Senior Optime, late Scholar and Mathematical Prizeman of Jesus College, Cambridge.

With an efficient staff of Assistants.

This Proprietary School was founded in 1876 expressly to enable gentlemen of moderate means to obtain for their sons—

A high-class education in accordance with modern requirements.

A liberal and well-appointed dietary and domestic ménage.

The best associations of a Public School and companions exclusively of their own class.

The work is tested yearly by Public Examiners, whose reports are published, and one of the first pupils at the School has already passed with credit into Cooper's Hill College.

The sanitary and domestic arrangements will also be inspected and reported on periodically.

The New Buildings, on a fine site of ten acres, and fitted with every modern appliance, were opened in September last.

Terms, £51 a year.

A full prospectus will be sent on application to the Head Master, Salisbury School, Salisbury; or to the Warden, Batcombe Rectory, Evercreech.

DERBY SCHOOL.

FOUNDED, 1160, A.D. RESTORED BY ROYAL CHARTER, 1554.

In the Modern School, Boys are Prepared for Woolwich, the Indian Civil Service, Sandhurst, and Cooper's Hill. Sons of Officers in the Army and Navy have certain advantages at Derby. TWENTY House, Rowland, or School Scholarships, tenable for two or three years, are awarded by Half-yearly Examinations. — Address, the Rev. WALTER CLARK, B.D., Head Master; or the SECRETARY, the School, Derby.

TRENT COLLEGE.

Patrons.—The Duke of DEVONSHIRE, K.G.,
Colonel Sir HENRY WILMOT, V.C., M.P., &c.
Head Master.—Rev. T. F. FENN, M.A.

Fees, £51 a year.

A Church of England Public School of 200 Boys.

There are many Sons of Officers in the Army in the School.

Next Term begins on September 16.

Full particulars on application to the HEAD MASTER, Trent College, near Nottingham.

SANDHURST.—Successful preparation for Admission Examination. Nominal fees. Payment based upon results. Highest references. —THOS. LYLE, B.A., F.R.Hist.S., Fern House, 48 Navarino Road, Hackney, N.E.

ARMY AGENCY.—WOOLWICH, SANDHURST, STAFF COLLEGE, MILITIA.—Prospectuses of the most successful Tutors on application to the SECRETARY 32A George Street, Hanover Square; also Prospectuses of Civil Service and other Tutors.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses, having been built expressly for the safe keeping of goods, are peculiarly convenient and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

BILLIARD BALLS, Chalks, Cues, and Tips, at HENNIG BROS'. Ivory Works, 11 High Street, London, W.C. Cheapest house in the trade for Billiard-Table Requisites and Ivory Goods in general. Old Balls Adjusted or Exchanged and Tables Re-covered. Price Lists on application Established 1862.

HOLLOWAY'S PILLS.—Pure Blood. As this vital fluid, when in a healthy state, sustains and renovates every part of the living system, so, when it becomes impoverished or impure, it exerts a precisely contrary effect. It is abundantly manifest that any medicine which does not reach the circulation can never exterminate the disease; but any preparation capable of exercising a sanitary influence over the blood must with it be carried to every living fibre of the frame. The lungs, heart, liver, kidneys, and skin all receive benefits from its more wholesome condition. Holloway's purifying Pills operate directly, powerfully, and beneficially, upon the whole mass of blood, whether venous or arterial. They strengthen the stomach, stimulate the liver and kidneys, expel disease, and prolong existence.

ARMY, NAVY, AND CIVIL SERVICE EXAMINATIONS.
SYSTEMATIC AND SUCCESSFUL PREPARATION FOR THE ABOVE AT
ST. JAMES'S COLLEGIATE SCHOOL,
HIGHLANDS, JERSEY.

Upwards of 300 successful Candidates in these Examinations have gone up direct from the School, many of them taking very high places, especially in the Examinations for entrance into Woolwich and Sandhurst. Among recent ones are a third place in French out of 162 Candidates at the Militia Examination in April, 1880, and twelfth place with 5,104 Marks at the last examination in July, 1880, for entrance into the Royal Military College, Sandhurst.

Inclusive terms for Boarders from Fifty Guineas.

NEXT TERM COMMENCES ON TUESDAY, SEPTEMBER 7.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

THE ARMY, viâ Sandhurst, Woolwich, or the Militia.—The Rev. WALTER BAKER, M.A., late Scholar of his College, &c., assisted by able tutors of special experience, offers careful PREPARATION for the QUALIFYING and COMPETITIVE EXAMINATIONS. Few pupils taken, and great individual attention given to each. References to parents of former pupils who have taken high places, as well as to successful Militia and University Candidates.—Batcombe Rectory, Evercreech, Bath.

ARMY.—21 Berners Street, London, W. —Mr. LAWRENCE has passed all his Candidates for Sandhurst or Examination for Militia Lieutenants, since 1877. Preparation for the Military Competitive.—For particulars, address as above.

THE ARMY.—Rev. W. FULFORD, M.A. (Oxon.), and Mr. J. ENRIGHT, B.Sc. Honours (Lond.), PREPARE CANDIDATES. References to Pupils who have taken 2nd, 3rd, 9th, &c., places for Sandhurst. Ninety per cent. successful. Class for competitive Militia Military Examinations.—32 Hogarth Road, South Kensington.

ARMY EXAMINATIONS.— Woolwich, Line, Staff College, Militia.—Captain DE CARTERET BISSON, Author of "Our Schools and Colleges" (officially recognised by the Queen and H.R.H. the Commander-in-Chief), sends (gratis) PROSPECTUSES of the most successful TUTORS for all these Examinations.—Reference permitted to late Secretary of State for War.—3 Berners Street, London, W.

STAFF COLLEGE.—OFFICERS of the Army PREPARED by a former STAFF OFFICER, of great experience in Tuition.

MILITIA COMPETITIVE EXAMINATIONS.—Classes and Private Tuition in Fortification, Tactics, Military Surveying, Law, and Administration, &c. —For Terms and References, apply to Captain DEMANGEL, 19 Aldridge Road Villas, W.

LIEUTENANTS of MILITIA. — A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY. — Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

LIEUTENANTS of MILITIA desirous of competing, this year or next, for Line Commissions can be RECEIVED by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major R. V. DICKENS (late 11th Foot), who, besides having passed the Staff College, and held several Staff appointments, has for some time past been successfully engaged in coaching Lieutenants of Militia, and also Sandhurst Cadets for their final examination in the same subjects. Other competent Tutors assist in preparing for the qualifying Examinations.

BEAUMARIS SCHOOL,
N. WALES.

Governing Body—The LORD BISHOP OF BANGOR, Colonel HAMPTON LEWIS, Captain VERNEY, R.N., and others.

Head Master—STEPHEN D. ORME, M.A.

Assistant-Masters—H. W. RICHMOND, B.A., late Scholar of Magdalen Coll., Cambridge; S. WADE, B.A., late Scholar of Balliol College, Oxford, and others, &c.

This School has a mild and healthy situation, by the sea; and valuable Scholarships attached.

Inclusive terms, for Sons of Clergymen and Officers, £50. Next Term begins April 30.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the examination required for the above.

At the recent Competitive Examination (June, 1880) of Candidates for Assistant-Clerkships in the Royal Navy, of the Fifteen successful competitors, FIVE were pupils of this Establishment.

MR. G. M. HICKS, M.A., has a FEW VACANCIES for PUPILS reading for Sandhurst or Woolwich. In the recent Examination for Woolwich, Two Pupils out of Three passed, and another obtained twenty-fifth place for Sandhurst.—Apply, 5 South Row, Blackheath.

COLLEGE EDUCATION.—High-Class Boarding House, exclusively for Young Ladies, Students of Queen's College, London, under sanction of the Council and Committee of Education, who will speak for the care, attention, and unusual comforts which the young ladies will receive. A large and cheerful house close to Park and College. Term commences September 29.—For particulars and private references, apply, Miss KNOTT, Devonshire Lodge, York Gate, Regent's Park, W.

Which are calculated to deceive the Public, LEA and PERRINS have adopted a NEW LABEL, bearing their signature, "LEA and PERRINS," which signature is placed on every bottle of

WORCESTERSHIRE SAUCE,

And without which none is genuine.

Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.—By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet*, *British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser.*

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—PUNCTUAL ATTENDANCE EVERY THURSDAY AT 4 HIGH STREET, ALDERSHOT, FROM 11 TILL 5.

ZOEDONE.—OHNE PHOSPHOR, KEIN GEDANKE.—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases. A small extra charge in smaller cases. See Pamphlet.

ZOEDONE & GROUSE SHOOTING.

H.R.H. PRINCE EDWARD of WALES, R.N.,
H.R.H. PRINCE GEORGE of WALES, R.N.

Since the establishment of her Majesty's Training Ships in August, 1857, Mr. E. A. Seagrove has had the honour to equip and furnish his ADMIRALTY PATTERN REGISTERED

NAVAL SEA CHEST
TO OVER ONE THOUSAND NAVAL CADETS,
(on joining the Service.)

COMPLETE LISTS of OUTFIT, with ESTIMATES, SENT FREE on APPLICATION, for ALL OFFICERS.

N.B.—Agent for the sale of the new ADMIRALTY PATTERN WATERPROOF COAT and CAPE.

⁂ Orders forwarded to any part of the world.

THOMAS NEARY,

MILITARY TAILOR
TO THE
1ST KING'S DRAGOON GUARDS, 3RD HUSSARS,
5TH LANCERS, & MIDDLESEX YEOMANRY.

NAVAL AND MILITARY OUTFITTER.

LADIES' RIDING HABITS.
CIVIL AND DIPLOMATIC UNIFORMS.
OUTFITS TO ALL PARTS OF THE GLOBE.
LIVERIES.
PORTABLE FURNITURE.

4 HANOVER STREET, HANOVER SQUARE.

HAWKES & CO.,
14 PICCADILLY, LONDON, W.,
HELMET, ARMY CAP, AND ACCOUTREMENT MANUFACTURERS,
TAILORS AND MILITARY OUTFITTERS.
Inventors and Sole Manufacturers of
HAWKES'S CORK PATENT HELMETS FOR INDIA.
DISCOUNT TEN PER CENT. FOR CASH.

Agent in Ireland, JOSEPH WRIGHT, 33 Westmoreland Street, Dublin.

H. PEAT & CO.,
173 PICCADILLY, LONDON,
SADDLERS AND HARNESS MAKERS
To their Royal Highnesses the PRINCE of WALES and the DUKE of EDINBURGH.

FISHER'S GLADSTONE BAG.

THE PERFECT DRESSING BAG.
THE PERFECT TRAVELLING BAG.
FISHER'S STEEL BANDED, SOLID-LEATHER PORTMANTEAUS. *A New Article, registered.*
FISHER'S DRESSING BAGS.

CATALOGUES POST-FREE.

FISHER, 188 STRAND.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 10s. 4d. per annum; viâ Brindisi, £1 14s. 8d.

IT is not without interest to note the jealous care with which the Germans watch the progress of their Army. The wars of 1866 and 1870 have accustomed Europe to look upon Germany as the leading military power; and only a few days ago the German Emperor had no hesitation in asserting the military supremacy of his beloved Fatherland. It is, therefore, remarkable to learn that authorised and well-known critics in Germany are not altogether satisfied that their Army has attained the high standard of efficiency for which public opinion in Europe gives it credit. Colonel Von Boguslawski, in a pamphlet which has just been published in Berlin, finds fault with the present drilling, so far, at least, as infantry is concerned. Prussian infantry has been considered, ever since the time of Frederick the Great, as one of the best, if not the best, and its fame only temporarily obscured in the days of Jena has received a new lustre from the Austrian and French campaigns; so that every one expected to hear that the approaching Autumn Manœuvres would show the German infantry at its best. It would, nevertheless, appear that there is something wrong somewhere, since Colonel Von Boguslawski states that he finds in the rules for the drilling of infantry errors which may lead to the gravest dangers. He first deprecates the idea that the success of a campaign may depend upon the superiority of one side in cavalry and artillery, forgetting that the plans so well matured by Field-Marshal Von Moltke could never have been carried out but for the thorough training and efficiency of his cavalry, which rendered such invaluable services when acting either as scouts and advance parties, or as a curtain to the movements of his infantry. The gallant colonel admits that, during the Franco-German war, in many instances the incontestible superiority of German artillery carried the day; but he takes for granted that since then the progress made by all nations in the efficiency of their artillery has very nearly equalised the chances in that respect. It is to infantry that Colonel von Boguslawski directs chiefly his attention. He says, not without reason, that infantry is the backbone of an army, and with it rests the ultimate fate of battles and wars to come. After remarking that subsequent to the adoption of breechloaders and the experience of '66, extended lines of skirmishers had become the rule, he goes on to say that the experience of the French war had demonstrated the dangers arising from that system, in consequence of the tendency such extended lines had to become mixed together, the men belonging to the several corps being thus withdrawn from the control of their respective commanding officers. In order to remedy that inconvenience, a very close order was adopted, in which skirmishers were not more than three or four paces distant from each other. This was only avoiding one danger to fall into another, since in the new formation the front presented to the enemy has all the thinness of a line of skirmishers, and is therefore incapable of making a defensive stand, while the propinquity of the men offers to the enemy nearly as good a target as a compact formation,—hence heavy losses of life should be apprehended. In order to avoid both the looseness of extended lines and the risk of life attending close formations, the gallant colonel proposes to replace the spaces in the firing front by an increase in the range, and therefore recommends commencing firing at long distances, thus trusting to the long range of breechloaders in general, and the superiority of German weapons in particular. Here we fail to see the consistency of the argument by which Colonel von Boguslawski supports his proposal. We expected to see him assert that with superior weapons and good marksmen, volley-firing at long ranges might prove disastrous to an enemy, especially if the latter be not so well appointed in those respects; instead of that, he confesses, first, that he does not expect much immediate and profitable result to arise from his lavish expenditure of ammunition, but that it will have for effect to keep up the spirit of the troops, and later on, he says, that he would advocate the adoption of the same system in the attack of fortresses, as concentrated volley-firing may, in certain cases, prove sufficient to reduce some isolated fortifications, and, he adds, that according to his estimation, detached forts should be easily carried. The pamphlet concludes with some sharp criticisms on the laxity of the instructions given to field-officers in sham-fights, and also in the insufficiency of the theoretical instruction given to privates and non-commissioned officers in regimental schools, where a higher standard of books should be in use. It is not without astonishment that we see Colonel von Boguslawski advocating more severity in the Articles of War, which he considers as no longer sufficient to uphold effectual discipline in the Army.

The history of the *Norway Pilot*, Part II., is certainly sufficiently peculiar to merit some notice, It appears, from papers published in the "Proceedings" of the Royal Geographical Society, and the "Journal" of the Society of Arts, that it is now some six years since Lieutenant Temple first conceived the idea of preparing sailing directions for the coast of Norway, which he found by personal experience was much needed. He kept this object steadily in view, and collected the necessary materials under difficult circumstances. Returning to England in the autumn of 1875, he laid the results of his voluntary labours before the Hydrographer at the Admiralty, and his offer to compile a volume of sailing directions for the Norwegian coast was at once accepted. The relations between the Hydrographic Department and Lieutenant Temple, who made another voyage to Norway in 1876, appear to have been quite satisfactory on both sides until July, 1879, when the manuscript was completed. Very shortly after that, the work was taken out of the author's hands, and has been prepared for the press by an officer who has never been to Norway, and has no knowledge of Scandinavian languages. That an author should in all cases, if possible, edit his own work, or at least revise his own proofs, is too obvious to require demonstration; but where, as in the present instance, a single mistake or omission might involve such grave consequences as the loss of a ship and crew, the necessity of taking every possible precaution to ensure accuracy is doubly apparent. Yet we find that Lieutenant Temple's repeated offers of assistance were persistently declined, that months were wasted in fruitless correspondence, and that during that time several vessels were wrecked on the west coast of Norway! Lieutenant Temple drew attention, at the Society of Arts, to the inaccuracy of the Admiralty list of Norwegian lights, and took Kin Light for an example. This light, as he pointed out, is really placed on the inner side of the island, to lead vessels through the inner channels; but according to the Admiralty List, it is on the outer side of the island, and throws its light seaward, so that seamen seeking shelter on this part of the coast, and running with confidence for a light which is really invisible between the bearings given, might find themselves surrounded by rocks before the mistake was discovered. His representations with regard to the Light List only elicited bare official acknowledgments, and Kin Light was not correctly placed on the Admiralty chart until he called on the First Sea Lord and laid the list before him. Now, if a mistake of this kind is possible on one coast, it may also occur on others; and as there is at present no system for keeping the charts used in the Mercantile Marine corrected up to date, we have here another source of maritime disaster. We see in this case that not only is voluntary labour refused, and unnecessary expenditure of time, energy, and money incurred, but when at last the results are presented to the public, they are inferior to those which actually only waited acceptance! In short, the principle seems to be to allow charts to remain imperfect and uncorrected, rather than "stultify the Office" by a manly admission that the staff is unequal to the work. It is evident that Lieutenant Temple's professional acquirements were considered satisfactory, or his work would not have been published; and that he was not allowed to revise and complete it is, therefore, altogether inexplicable on public grounds, surely the only grounds which in such a case should be considered. We must look elsewhere for the solution of the riddle, and we find it in the present constitution of the Hydrographic Department. Men who have held comparatively subordinate positions until quite late in life seldom possess the qualities requisite for a high command, and in many cases they are incapable of applying those unwritten laws on which so much depends. The chair of Sir Francis Beaufort should be occupied by an Executive officer of high standing and character, and we trust that soon their Lordships will see that in no other way can the efficiency, well-being, and prestige of her Majesty's Surveying Service be restored.

The trial of Serjeant William Marshman, of the Royal Marines, on charges of fraud at the late Wimbledon meeting, has now come to a conclusion, and it is to be hoped that the result generally, will be that of deterring any unprincipled employé from making any future similar supposed attempt, and of opening the eyes of future competitors. Should they, however, be tempted to participate in a proposed fraud, they should, without loss of time, bring the tempter to justice. The Council of the National Rifle Association will doubtless endeavour to adopt such measures as will effectually prevent any similar scandal in future contests. It is a humiliating fact to dwell upon, that there should have been a possibility of such frauds as those with which Serjeant Marshman has been charged at a national competitive meeting, where the very soul of honour should have existed, from the highest official in the Council tent to the lowest marksman in the butts. The fact of this scandal having been brought to light will throw a shade over the glories of many an honest winner, and give his enemies a loophole through which to cast a doubt, not only upon his skill, but upon his honour. Why Serjeant Sage and others so long kept the matter secret can scarcely be explained, although it is possible that Serjeant Sage waited in the hope of getting an opportunity to enable him to bring home the matter with certainty against the accused, without the chance of failure. Still, it would have been wiser to have made a clean breast of the proposal when it was alleged to have been first made by Serjeant Marshman in 1878, when the conversation took place at the Putney railway station, relative to the division of the Olympic Prize. Or, again, in 1879, when another conversation is alleged to have occurred between Serjeant Marshman, Private Bullmore, Serjeant Sage, and others; and when Captain Smith was stated to have been present, and within earshot. And yet nothing was done until the close of this year's meeting. Such a course, to say the least of it, was calculated to throw suspicion on the probity of some of those concerned, and we repeat, it would have been far wiser to have brought the alleged attempt at foul-play to light in the first instance. In his defence, the prisoner submitted that there was much discrepancy between the evidence of Serjeant Sage and that of other witnesses, and that the former was not to be believed. That if the Court found him guilty, they must also necessarily convict the Cheshire team of fraud, and the Tower Hamlets team of being parties to the fraud. He also contended that the whole of the alleged transactions were false, and asserted that fraud at the firing points was an impossibility, and inferred that the charges brought against him were to cover disappointment through failure in obtaining prizes. As, however, we have before said, we do not desire now to comment upon the evidence, which has of course been fully considered by the Court; but we would urge upon the Council of the National Rifle Association the desirability—nay, the absolute necessity—of steps being taken to prevent a repetition of the scandal which has caused so much excitement, and which all seemed to think would end in a conviction of the non-commissioned officer against whom the charges were laid. Serjeant Marshman has been pronounced, after full inquiry, to be innocent of the charges preferred against him. We congratulate him upon the result of the inquiry, but we cannot help thinking that he has been very fortunate, and he has reason to feel thankful to those who have conducted his case with so much ability.

H.R.H. the Prince of Wales, with Princes Albert Victor and George of Wales, proceeded to Portsmouth on Tuesday, where the young Princes joined the *Bacchante* for her cruise to Vigo, before joining the Detached Squadron, under the command of Rear-Admiral the Earl of Clanwilliam, C.B. The Prince of Wales returned to town in the evening.

A Captain's Naval Pension of £80 per annum has fallen vacant by the death of Captain Arthur Morrell, who was awarded this pension in August, 1879. A Commander's Naval Pension of £65 per annum is also available by the death of Retired Captain Joseph Rundle, who was awarded the pension in January, 1879.

Captain Heneage has, we learn, received from the Admiralty an expression of their Lordships' pleasure at the report of inspection of the *Achilles* on her being ordered to be paid off, and he has been specially complimented on the general efficiency and discipline of the ship while under his command. It gives us more than ordinary satisfaction in being able to make this known, for statements as to dissatisfaction existing among the men at their being detained in the Channel after returning from the Mediterranean, reached us from more than one source. But whatever passing annoyance might have been felt at not getting home so soon as was expected, it is plain that there was never the slightest ground for supposing that the discipline of the ship was anything but perfect.

The reconstruction of the squadron on the China station, which was begun some time since by the substitution of a few larger ships for several gunboats, is, we believe, likely to be carried still further. The maintenance of a number of small craft, formerly considered advisable, will probably be no longer adhered to. If this be so, the chances of senior lieutenants and commanders obtaining commands will be considerably lessened.

An order has been received at the Royal Naval College at Greenwich from the Admiralty, directing that in future no officer below the rank of commander shall be excused from undergoing his examination on quitting the College, unless he shall be removed by a special order from the Admiralty.

We understand that an amended Naval Discipline Act is being prepared, and will be brought before Parliament early next Session. We hope that the question of licences for the sale of refreshments on Naval recreation-grounds may not be lost sight of, and that the Navy may be placed on the same footing as the Army in this respect.

Petty officers are evidently becoming scarce, owing to the restrictions as to the advancement of men by their commanding officers when they may see fit. As a consequence, a number of men of good character are to be drafted from the Ports into the Channel ships for the purpose of being given higher ratings, should they prove themselves worthy of such advancement. But what will the men already serving, and who, doubtless, believe themselves quite worthy of being made petty officers, think of new arrivals specially sent to take the plums out of their hands? This arrangement will scarcely add to the harmony of the lower deck, and we question if the introduction of such a system is wise. Either it is not fair, or the men now serving in the Channel ships must be exceptionally wanting in good qualities if a mere handful of petty officers cannot be selected from among such a large number of leading seamen and A.B.'s. It would be better to rate men as they prove themselves fit, and then draft them to the receiving ships for disposal, if there be no vacancies for them in the Channel ships.

Lieutenant Tristram Beresford and Navigating-Lieutenant Thomas James have both been compulsorily retired for non-service, neither of these officers having been employed since obtaining promotion to their present rank.

At the funeral of Major Arbuckle, Royal Marines, whose sad death at Chatham is reported elsewhere, the whole of the officers of the Royal Marines and the naval officers at the port, and the officers of the several corps at Chatham, followed the body to the railway station, whence it was conveyed to Deal, there to be interred. The shops and private houses in Chatham and Rochester along the route taken by the funeral procession were partially closed. Major Arbuckle stood at the head of his list, and would shortly have been promoted to Lieutenant-Colonel.

Captain Gervais, of the French Navy, who, as Naval Attaché, is so well known at the Ports, is, we hear, about to return to active service, and will shortly be given a command. Captain Léon de la Chauvinière relieves Captain Gervais at the French Embassy.

Captain Stephenson, C.B., having commissioned the *Carysfort*, will, we presume, be shortly relieved of the post of equerry to H.R.H. the Prince of Wales, an appointment he has held for the past two years, and in which he has been decidedly popular. It is hoped that the Prince of Wales will select another Naval officer to fill Captain Stephenson's place.

The battery of Naval Artillery Volunteers of the London Brigade, embarked in the *Esk* for a cruise, have completed their course of training afloat, and have returned to London. When the *Esk* was at Cowes, H.R.H. the Prince of Wales took the opportunity of inspecting the Volunteers, and expressed himself highly pleased with what he saw of them and the manner in which they performed their duties.

Navigating-Lieutenant William F. A. Greet, on the Retired List, has, we learn, been offered employment in command of a river steamer in Central America, and leaves by an early mail to take up the appointment.

The hurricane at Jamaica on the night of August 18 did great damage to the naval establishment at Port Royal. It is said that the water at one time was three feet deep in some parts of the dockyard. The main buildings were only slightly injured, owing to the precautionary means adopted by the Commodore in having rigged hurricane-ropes over the principal buildings. The covered ways leading to the work-sheds, the palings, fences, and trees were nearly all demolished. Steam-launches, sailing boats, tank vessels, and other small craft were lost, or much damaged. The newly-elected recreation building at the Royal Naval Club had its foundation undermined, and it is feared the entire building will prove a wreck. The sea in the billiard-room at one time threatened to swamp the building, but fortunately the water found an outlet through the library into the garden. The hospital suffered most severely. One of the official residences was blown down, and the main building had portions of the roof blown away. Large stones, weighing several hundredweight, were hurled through the iron gate as though discharged by cannon. The loss to the Crown is estimated at £12,000, and it may be questioned whether the maintenance of this yard is so necessary as to justify its being fully restored. This is a matter on which we shall have some further remarks.

Captain Edward Byam, R.M.L.I., has been selected for appointment as instructor of musketry at the Chatham Division, in the place of Major Farquaharson, promoted.

Lieutenant Marx, who had been nominated for appointment to the *Excellent*, for the purpose of qualifying as a torpedo lieutenant, will not now go through the course, but his place will be filled by Lieutenant King Harman. The officers selected to qualify for torpedo service will join the *Excellent* on the 30th inst.

The French ironclads *Friedland* and *Suffren* having arrived at Ragusa on Tuesday, the international fleet now consists of 20 vessels, commanded by a Vice-Admiral and four Rear-Admirals. The fleet is manned by 7,300 men, and carries 136 guns. A despatch from Vienna contains particulars of the instructions received by the Commanders of the Fleet. The chief command falls to Vice-Admiral Sir B. Seymour. The instructions to the Commanders neither authorise nor prohibit the bombardment of Dulcigno. Should the contingency of a bombardment present itself, the question will be submitted to the Commanders in council, under the presidency of the Commander-in-Chief. It is stated that there can be no question of a disembarkation. Vice-Admiral Seymour will assume command on the 20th inst.

On Saturday the Grand Duke Constantine, High Admiral of the Russian Fleet, returned to London from Glasgow. Captain Stephenson, R.N., C.B., Mr. N. Barnaby, C.B., and Lieutenant Prince Louis of Battenberg, R.N., were among those who called to pay their respects to the Grand Duke.

A brilliant parade of the Corps of the Guard took place at Berlin on Monday, in presence of the Emperor, the Duke of Cambridge, the Duke and Duchess of Connaught, Prince Rudolph of Austria, and the King and Queen of the Hellenes, attended by a numerous suite of officers. The appearance of the troops as they marched past the Emperor was the subject of general admiration, and the whole spectacle was of a most imposing character. On his way to the parade-ground the Duke of Cambridge had a narrow escape from what might have been a serious accident. As his Royal Highness, accompanied by his aide-de-camp, was driving through the streets in a four-horse carriage, the horses slipped on the asphalte and fell, drawing the carriage over the wheelers. The vehicle was in imminent danger of being overturned, when the Duke and his companion leaped to the ground and escaped without hurt. His Royal Highness then proceeded on his way in a droschke.

A telegram from Cape Town states that news has been received there of an attack made by the Basuto chief Lerothodi upon a force of the Cape Mounted Riflemen. The news of the attack is officially confirmed. It is stated, however, to have been an unsuccessful attempt. The *Daily News* has published a letter from its correspondent at King William's Town. At the time when this correspondent wrote, just a month back, the whole of Basutoland was practically in the hands of a few insurgent chiefs, the leader of whom was Lerothodi. The magistrates of the region were all shut up in their residences, expecting to be attacked; while the Basutos in arms seem to have had full command of the country and all the ways of communication. The Colonial Secretary, Mr. Sprigg, had left King William's Town with the commandant of the Colonial forces for the disturbed district. The father of Lerothodi had promised our authorities to use his influence to bring the rebellion to a stop, and Mr. Sprigg appears to have had some faith in his own influence for the same purpose.

Among the various points which were in dispute in May last between Major-General Donovan, commanding at Hong Kong, and the Governor of the Colony, Sir J. Pope Hennessy, there was the question of 2nd Lieutenant Cox being allowed to act as the A.D.C., and the question of Colonel Hall, R.A., being *ex officio* a member of the Executive Council. These two points have now been dealt with by the Home Authorities. As regards Lieutenant Cox, the case was this:—During the absence of General Donovan in the Straits, Colonel Hall, as the senior officer commanding the garrison, took the oath as member of the Executive Council, and allowed Lieutenant Cox to act as A.D.C. to the Governor, subject to the approval of the Commander-in-Chief, to whom the case was referred, with the observation that Lieutenant Cox, having less than four years' service, was not eligible for the permanent appointment. This observation was added by Colonel Hall, with the knowledge and approval of the Governor. On the return of General Donovan, however, Colonel Hall's action in the case was censured by his immediate superior, as illegal, on the ground that Colonel Hall had no right to act as a member of Council during the absence of his chief, and that the appointment of Lieutenant Cox ought to have been made subject to his approval. General Donovan accordingly reported against Colonel Hall. Not only has General Donovan's view of the case met with disapproval at home, but as he, on his recent departure for Japan, renewed his orders to Colonel Hall not to take a seat at the Executive Council, and further enjoined him to assign no reason for the refusal, it is noteworthy that a telegram was despatched from the Horse Guards ordering Colonel Hall immediately to tender his oath, and to take his seat as a member of the Executive Council.

We understand that Surgeon-Major J. Anderson, medical officer on the Staff of the Marquis of Ripon, will arrive home shortly, to meet and escort Lady Ripon to India, and that Surgeon-Major Skey Muir takes his place with the Viceroy.

The question of range-finders is one of such great importance, and those now being issued appear to have caused such general disappointment, that we are glad to learn on the best authority that the young German Hensoldt, the inventor of the range-finder tried last year at Chatham, having been attracted by the notices of his invention which have appeared in our columns, has returned to England, for the purpose of again submitting his instrument for trial by our War Office. Hensoldt has met with unlooked-for success in Germany, the experiments hitherto carried out to test the accuracy of his instrument having produced results which are spoken of as marvellous, so quickly and accurately have the distances been ascertained. We are, indeed, most pleased if any remarks of ours have been of effect in bringing the young German and his invention again within reach of the War Office, when all sight of him seemed for the time to have been lost.

In his annual report on the Royal Canadian Military College of Toronto, Lieutenant-Colonel E. O. Hewett, R.E., the Commandant, states that the term which came to a close on June 30, commenced on February 5. The total number of cadets was 93, divided into four classes. Seventeen candidates having passed the entrance examination in December, joined the College at the commencement of this term, the standard of education of these gentlemen continuing to show general improvement. Three cadets having failed to come up to the required standard of their respective terms, were withdrawn from the College, and two cadets voluntarily retired on payment of the exemption fee. The first of the annual instead of semi-annual competitive examinations was held during the month of June, when 26 candidates presented themselves, and the successful ones will join the College in September. The change from the semi-annual to annual entrance examinations enables the number of classes to be reduced from eight to four. Gradually the junior divisions will be eliminated, and the complete amalgamation of the divisions into four unified classes will be consummated in June, 1881. Allusion is made to the organisation of the College by the formation of the cadets into four companies, and the advantages obtained by this arrangement. The duties of the offices of Secretary, Pay and Quartermaster, combined with those of Instructor of Infantry, are now performed by an officer known as Staff Adjutant, who will now become what he ought to be, the confidential assistant of the head of the Colege. The cadets, Colonel Hewett says, performed their duties as non-commissioned officers most satisfactorily, and their conduct during the year has received his commendation. For the first time during the past year-term the theoretical course of instruction was complete as originally intended; the practical course was, however, still incomplete in two important subjects,—equitation and torpedo or submarine mining,—the former for the want of horses, and the latter for the want of instruments and other facilities. The Commandant thinks that the notification of the Government of Canada of its intention to appoint graduates of the Royal Military College to commissions in the Militia, with subsequent regular periodical promotion, provided they annually perform certain military duties, and further to record in the *Army List* the class of certificate and special honours they may obtain, and also any Government employment they may hold, together with the decision to appoint graduates of the College when qualified by the necessary age, rank, and seniority (but not till then), to all permanent militia appointments, affords valuable encouragement to the cadets, who fairly represent all classes of the community, and as a whole are drawn from those most likely to remain in the Dominion. "The few," he says, "who may obtain commissions in the Regular Army only leave Canada to gain that most valuable education for any career, but especially for that of a soldier—practical, thorough, and varied knowledge of countries, people, and experience, and will most certainly return here should any emergency require their service. The Royal Military College should be the training-school, the centre and head of the military force, and it is difficult to conceive any person of reasonable intelligence and knowledge, whether in or out of the force, being jealous of or indifferent to its work and success. Two facts are evident: (1) that at no period of history as at present has it been so necessary for a country to possess specially and highly trained officers; (2) that the necessity is greater according as the defensive forces of a nation are deficient in completeness and thoroughness of organisation." "The Commandant hopes that as it is not possible for Canada to afford permanent military employment to all the graduates of the College, she will employ those who do not obtain it in such other capacities as their college records denote their being most fitted for. He anticipates and trusts that in a few years some of the best of the graduates will seek for and obtain employment on the College Staff. He again draws attention to the fact that the College is in a position to afford instruction to officers of Militia in several subjects, and he is assured that before long the privileges will be taken advantage of.

Particulars have been received of the French expedition up the Niger, which started on April 2 under the command of Capt. Gallieni. The party started from Bafanlabe, and was well received as far as Kita, but encountered much opposition in the province of Beladongon, the inhabitants of which were at war with the Sultan of Segon. The whole place was in a state of turmoil, and on May 11, near the village of Dis, a band of about a thousand Barbara natives attacked the party, and a desperate fight took place. It lasted several hours, and Capt. Gallieni eventually had to abandon his baggage, leaving fourteen men killed, while about eleven were wounded. He was obliged to retrace his steps to Kita, but had decided to proceed on his journey by another route.

THE ROYAL MILITARY COLLEGE.

The Report of the Board of Visitors for the Royal Military College, Sandhurst, which was issued on Saturday, states that the condition of the building and the sanitary arrangements are satisfactory. The normal establishment consists of 300 cadets, and there are at present 298 actually under instruction. Of this number 27 are Queen's or Queen's India cadets, receiving a free education; about 120 are sons of officers in the Army or Navy, and are admitted at reduced rates, ranging from £40 to £80 per year; and the remainder are sons of professional or private gentlemen, who pay £125 per annum. The Governor reports that discipline has been satisfactorily and easily enforced, and that no serious offence calling for rustication or expulsion has occurred during the past year. The progress made by the cadets in their military studies has been, on the whole, very fair. The Professor of Fortifications reports that, although the average standard of qualification in this subject is maintained, both the quality of work and rate of progress are below what might be attained, if the cadets on joining were better instructed in the elementary subjects of geometrical drawing, the use of instruments, construction of scales, and representation of solids by plans, sections, and elevations. At present, quite one month out of a short course of eight working months is necessarily devoted to teaching these subjects, thereby seriously diminishing the time available for military instruction. To remedy this, the Professor suggests a somewhat higher standard of qualification in geometrical drawing at the half-yearly competitive examinations for admission to the College, and the allotment of a larger number of marks to this subject, and considers that this could be done without any serious addition to the work of preparation for the examination. The Board are of opinion that the matter is worthy of consideration by the educational authorities. In tactics and surveying the quality of the work done in the field and in the class-room has been quite equal to, if not in advance of, the required standard. The proficiency of the cadets in drill, riding, and gymnastics was the subject of special remark and commendation from H.R.H. the Field-Marshal Commanding-in-Chief, on the occasion of his visiting Sandhurst last year. Although the knowledge of foreign languages may not, perhaps, in a strict view of the subject, be included in the purely professional curriculum to which the College studies are limited, yet, considering their importance to officers of all arms, the slender acquaintance with them usually possessed by those who enter the College, and the ease and rapidity with which they are forgotten by those thus slightly possessed of them, the Board venture to propose, for the consideration of the military educational authorities, whether it might not be desirable to provide facilities for the prosecution of this important branch of knowledge, by securing the presence of French and German professors, who might give instruction in these languages to those cadets who desire to continue their studies in them; these subjects being voluntary, and not compulsory. The Board observe that they were struck with the healthy appearance of the general body of the cadets, who in physique and stature would compare favourably with any equal number of youths of their age.

THE ROYAL MILITARY ACADEMY.

The Board of Visitors of the Royal Military Academy, Woolwich, report for the present year that the normal establishment of cadets is 195, but there are only 180 at present at the Academy. Since the last inspection there has been a marked decrease in the minor offences, and the general conduct of the cadets has, with few exceptions, been excellent. It was found necessary, however, to rusticate four cadets, for serious breaches of the rules. In order to supply the existing deficiency in numbers, there will be 80 admissions to the Academy in the autumn, instead of 40. The Board made inquiries with reference to the amount of proficiency attained by the cadets in modern languages, and the facilities afforded for their instruction in French and German. They gather, from information supplied to them by the respective Professors that, upon an average, more than half the cadets possess some knowledge of colloquial French at the time of their entering the institution. The Professor of French, however, remarks, with reason, that as only six hours a week are allotted to modern languages, the time devoted to practice in conversation is too limited to admit of much improvement. The cadets, as a rule, have but little acquaintance with the German language when they join the Academy, and although most of them on passing out are able to read it with facility and make themselves understood, no great proficiency can be expected with the present limited time for study. The rules require that each cadet should qualify in either French or German by obtaining half-marks. Permission is granted to cadets, with the consent of their parents, to learn Italian and Spanish, with masters independent of the Academy, at hours which do not interfere with their military studies. The Board understand that at present only two senior classes are taught riding. Considering the number of cadets who enter the Academy wholly unaccustomed to riding, or very imperfectly practised in it, and how essential it is that officers should be good horsemen, they think it desirable that some instruction should also be provided for the second and third classes.

THE 100-TON GUN AT WOOLWICH.

The 100-ton gun and the model *emplacement* in which it is mounted at the proof butts in the Government marshes, adjoining the Royal Arsenal, Woolwich, were the objects of experiment on Monday. The recently-appointed Inspector-General of Fortifications, Major-Gen. Gallwey, R.E., superintended the arrangements, assisted by Col. W. H. Noble, R.E., Inspector of Works at the Royal Arsenal; Col. Eardley Maitland, R.A., Superintendent of the Royal Gun Factories, Royal Arsenal; and Capt. Morley, R.A., proof officer; while there were among the spectators, Major-Gen. Gordon, R.A.; Major-Gen. Fisher, R.A.; Admiral Boys; Col. J. Inglis, R.E.; Col. O'B. Woolsey; Col. MacFarlane, R.A.; Capt. C. Bridge, R.N.; Col. Alderson, R.A.; Capt. Fairfax Ellis, R.A., Secretary of the Ordnance Select Committees; Major Porter, R.A.; Major E. S. Gordon, R.A.; Capt. O'Brien, R.E; Capt. Courtney, R.E. It was explained that the four 100-ton guns purchased of Sir William Armstrong some two years since are to be mounted on the defences of Malta and Gibraltar, and that as it has been considered desirable to load them by hydraulic machinery, this experiment had been proposed in the hope of gaining some experience before proceeding extensively in permanent preparations. Gen. Gallwey will proceed to the Mediterranean stations very shortly, to superintend what has been already begun there, and an officer of the same department, with copies of the plans of the Woolwich model, has preceded him, to set about the foundations. Only one shot was fired on Monday. The first anxiety was to examine the structure, and the inspection was perfectly satisfactory, for nothing whatever had suffered from the discharge, and the durability of concrete even for real fortifications had become a subject for consideration. In this work upwards of 3,000 tons of concrete has been used, about half of which is below and half above the ground, the lower half being compounded of cement and Thames ballast, and the upper half of cement and furnace slag. The latter was prepared with great labour, owing to the difficulty of crushing the refuse metal, and it is believed that it would stand a fair cannonading as well as the famous Gozo coraline with which the Maltese works are constructed. The hydraulic lever at the Mediterranean forts will be furnished with an arrangement similar to that used in Monday's experiments—an accumulation weighted up to 67 tons, with a 16-in. ram and an 8-ft. stroke. This can be raised by a steam sapper, or traction-engine, in one minute, or 40 men can pump it up by hand in seven minutes. The one round fired on Monday is but the first in a series of experiments of a similar character, and it will be some time before the gun leaves Woolwich for its final destination in one of the Mediterranean fortresses.

THE PATRIOTIC FUND.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Can you kindly inform me for whose benefit the Patriotic Fund was established? I have hitherto been under the impression that it was intended for the relief of the widows and orphans of those who had served during the Crimean war, but on applying for relief for the widow of a late Staff Commander, R.N., I was informed that on no account could any assistance be given, unless a medical certificate was produced to show that his death was caused by injuries received during the Russian war, the fact of having served through the whole war being no claim on the fund. I may add that this staff commander was actively employed during the war in the Lynx, and later on in the Sampson, during the Chinese wars, 1856-60. He died at Yarmouth Hospital on the 15th ult., from general paralysis produced by softening of the brain; and his widow is now informed that unless she can prove this illness to have resulted from the Crimean war, no assistance can be given her.—I am, &c.,

LYNX.

MAJORS AFLOAT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Majors afloat in the Royal Marines will always prove a burning question. Individually I was always opposed to the institution of that rank, and predicted while the matter was in committee all the troubles that would ensue. In the Navy, a lieutenant, after eight years' standing, has given to him a rank corresponding with a major in the Army, and he now wears a distinctive uniform designating that grade. Looking ashore we also see in the Guards officers carrying with their rank a higher title, such as "lieut. and captain," and "captain and major," &c. It has always seemed to me as a fitting compromise, and eminently suitable for the Marine Corps, if an arrangement could be made whereby captains, after eight years' service, should have the additional rank of major, similar to the Guards, and equivalent to the advantages of Naval lieutenants. There is, I believe, at present a temporary rank provided for captains after eight years' service; but this has reference merely to their status while on board. On disembarkation they are virtually reduced, while the Naval lieutenant retains his relative rank. It is all very well for the Admiralty to establish a rank which has by Regulations certain inseparable attributes and duties, and then presumptuously to exceed their power by signifying that officers are to have assigned to them duties subordinate to those legitimately appertaining to that rank. I ask would an admiral submit to perform the duties of captain, or a captain those of a commander, or a commander those of lieutenant? On the other hand, I am perfectly aware their Lordships are in this fix,—they have no space in these modern "iron pots" to stow a field-officer, besides providing requisite accommodation for the company officers. Under any circumstances, it is undignified for a branch of the Legislature to go on threatening to abolish the rank, if servants thereof insist upon their rights. Better do it at once, and resort to the measure suggested as the only practical one which will ever meet the exigencies of the Marine Service.
—I am, &c., W. J. B.

The new fort which is being constructed at Borsted, near Rochester, for the defence of Chatham and the approach to London, is assuming immense proportions. When complete, the fort will be armed with very heavy artillery, which will be able to sweep both the Thames and the Medway, as well as the country for miles round. The work is being executed by convicts, some hundreds of whom are daily employed there.

It is directed by Fleet Circular No. 25 S. of July 31, 1880 that in future all the hydraulic jacks in the gunners' charge shall be considered, as regards their care, on the same footing as the iron gun-carriages and slides, and the gunner will be held responsible for their efficiency. The Queen's Regulations and Admiralty Instructions at page 276, Article 811, and at page 298, Article 908, are affected by this order.

INDIA.

The Government of India have sanctioned, for the time that the troops remain in Afghanistan the holding of lower-standard examinations in Persian. The reward for passing is to be 180 rs.

According to a Bombay journal, there seems to be no truth in the report that Bangalore, as a British cantonment, is to be given up.

It is announced that on their withdrawal from the Khyber most of the troops returning to India from Cabul will be hutted at Campbellpore, near Rawul Pindee. The Punjab Government has been directed to put up shelter there with all possible speed for 11,000 men.

It is announced that, on the recommendation of the Government of India, her Majesty's Government has been pleased to confer a good-service pension on Col. R. H. Bolton, Madras S.C., from April 10, 1880, in room of Surg.-Gen. G. Smith, M.D., retired. Dates of commissions:—Ensign, March 2, 1843; lieut., March 16, 1847; brevet capt., March 2, 1858; capt., July 11, 1858; brevet major, March 2, 1863; major, Feb. 20, 1865; lieut.-col., March 2, 1869; brevet col., March 2, 1874. Appointments.—Acting deputy-assistant-quartermaster-general, Centre Division, May 9, 1856; acting deputy-assistant-quartermaster-general of the army, July 24, 1857; adjutant, Madras Rifles, Sept. 12, 1857; brigade-major, Malabar and Canara, Jan. 1, 1860; acting brigade-major, Bangalore, May 4, 1863; brigade-major, Bangalore, Nov. 13, 1865; wing officer, officiating 2nd in command, 28th N.I., April 1, 1867; wing officer, officiating 2nd in command, 24th N.I., April 24, 1867; acting-assistant-quartermaster-general, Nagpore Force, March 25, 1868; officiating deputy-assistant-quartermaster-general, Nagpore Force, April 1, 1870; deputy-assistant-quartermaster-general, Nagpore Force, July 22, 1870; deputy-assistant-quartermaster-general, Ceded Districts, Aug. 22, 1870; officiating assistant-quartermaster-general, Mysore Division, Feb. 3, 1873; assistant-quartermaster-general, Hyderabad Subsidiary Force, Nov. 20, 1874. War Services.—On field service in Bengal during the Mutiny, from Oct., 1857, to Aug., 1858 (medal).

A farewell dinner was given on Aug. 5 by the Political Staff at Cabul in honour of Lieut.-Gen. Sir F. Roberts, V.C., and the forces marching with him to Candahar. Mr. Lepel Griffin proposed the health of the General, and spoke of the cordial and sincere friendly relations existing between the military and political officers at Cabul.

The *Times* correspondent telegraphs on Sept. 12, from Calcutta:—"The news that her Majesty has been pleased to confer the Grand Cross of the Bath on Gens. Stewart and Roberts reached us yesterday. There is no difference of opinion as to these gallant officers having well earned the honour, and this recognition of their distinguished services will give much pleasure to all classes throughout India. It is felt, too, that no better appointment could have been made than that of Gen. Roberts to succeed Sir Neville Chamberlain in command of the Madras Army."

The *Times* correspondent at Calcutta telegraphs on Sept. 12:—"It is announced that Gen. Sir Edwin Johnson, K.C.B., in consequence of a communication from the Secretary of State to the effect that he had incurred the censure of her Majesty's Government in connection with the failure of the War Estimates, has resigned his office as Military Member of Council; but, at the Viceroy's request, he has agreed to retain his seat until to-morrow, when he will be relieved by Lieut.-Gen. Sir Donald Stewart, K.C.B. It has been notorious for some time past that Sir Edwin Johnson's health is such as wholly unfits him for the laborious and responsible office he held, and the news that he is making way for a more vigorous and better-known man has been received with general satisfaction. It is rumoured that Col. Johnson, Bengal S.C., Secretary to the Government in the Military Department, will shortly retire, and be succeeded by Col. George Chesney, R.E."

It is stated that the chiefs of the Khyber tribes and of that portion of the Shinwarri tribe which holds Largi and Lundi Kotal will be summoned to Peshawur, for the purpose of making arrangements for keeping the Pass open, and for securing us a right of way through. Pending final arrangements regarding the frontier, Brigdr.-Gen. C. Gough, lately commanding the Second Infantry Brigade of the Second Division of the Cabul Field Force, will command the brigade which is to hold the Khyber line from Lundi Kotal to Jamrud. The troops will be—No. 1 Mountain Battery, the 5th Bengal Cavalry, the 18th Foot, and the 16th and 41st N.I. In the event of the troops returning from Cabul being encamped at Hassan Abdal, Brigdr. Gib will command the camp.

A telegram to the *Times*, dated Simla, Sept. 12, says:—"The last regiments of the Cabul army have now passed through the Khyber, with the exception of those forming the brigade which temporarily garrisons the Pass. The troops have not suffered from the march, nor has there been any sickness. Four cases of cholera were reported three days ago in the 9th Regt. at Peshawur, but none of them have proved fatal, and it is believed that they were not true cases of cholera."

It was rumoured at Simla when the mail left that Lieut.-Gen. Sir Michael Kennedy would come home this month, and that on his departure the Transport and Supply Department will be merged again in the Commissariat.

It is stated that improved pensions for the three Presidential Staff Corps have been sanctioned.

THE INFANTRY FORAGE CAP.

"A Colour-Serjeant" writes:—"While a change is being effected in the style of forage cap worn by officers (and presumably by staff serjeants), I trust it will not be considered untimely to suggest an inexpensive change in the style of cap worn by serjeants, viz., for parade and recreation purposes a round cloth cap with oak-leaf band (no peak), substituting the glengarry for manœuvres and on active service, as in the case of officers. It is hardly necessary for me to add that this slight boon would be accepted with considerable satisfaction by that body of non-commissioned officers."

THE NON-COMMISSIONED RANKS.

"Cavalry" writes:—"Attention has been frequently called in Parliament to the deterioration of the non-commissioned ranks of the Army, and the Military Authorities have endeavoured on several occasions to improve their position, so as to induce a few of the better class of young men to join the ranks; but their attempt hitherto has not been a success, for the simple reason that they will not disabuse their minds of the fact that times are changed; that School Boards, cheap literature, and daily papers have had their effect on the Army, as well as in civil life; and that the good old soldier-machine is fast becoming extinct, and in his place are young men who are apt to read and think for themselves, forming opinions of the changes that are constantly taking place around them, both at home and abroad. In the non-commissioned ranks this is greatly on the increase; discussion and criticism are of frequent occurrence, and must still increase, as the influence of education becomes more and more extended. In civil life, the authorities have long since acknowledged the force of circumstances, and it is now possible for a respectable young fellow, by perseverance and ability, to push his way on to wealth, honour, and distinction, which many with the advantages of birth fail to attain, but would give all they have to possess. How different would have been that young man's lot, had he joined the Army! Perseverance and ability would soon advance him to the rank of serjeant; but here his ambition must cease; to attempt to qualify himself for an officer, or acquire any further knowledge in the art of war, would be viewed as insubordination by his superiors. He must, therefore, learn to rest content, which he probably will do for a few years, priding himself on the gold lace that adorns his uniform, the rattling of the sword, and the jingling of the spurs on his boot-heels. But the glitter of these things fades away as years advance, and life becomes a stern reality. It is then that the zealous non-commissioned officer looks forward for some advancement, but views with deep regret the few openings there are for him, and those few not worth accepting, the one of riding-master being refused by almost all serjeant-majors of experience who are fit to be qualified for the appointment, preferring to remain in their present position to accepting one in which the pay and emoluments are not adequate to the risk and responsibility. Surely the Royal Commission who have under their consideration the present unsatisfactory position of the non-commissioned officers will consider the advisability of placing the cavalry ridingmaster on an equality with other combatant officers, as formerly, and not act as if the monopoly of promotion was invested in one class of officers only, and that officers from the ranks were unworthy of the slightest consideration. Such a distinction is painfully conspicuous to the dullest mind, and adverse to Liberal administration. It is, therefore, hoped that a fair chance of promotion will be given, so as to ensure our getting the best possible non-commissioned officer for the appointment, thereby creating a healthy outlet from the non-commissioned ranks, stimulating good soldiers to do their duty, and also inducing respectable youths to join the Army, with a possibility of promotion. The profession at present is not held in the highest esteem by respectable people, and the subject needs the serious consideration of the authorities who have the welfare of the Army and their country at heart."

PROMOTION BY SELECTION.

"Fifteenth Year" writes:—"Seeing in your paper of last week that you call attention to the promotion by selection of subalterns by length of service, might I direct your notice to the unfair way in which these steps are offered, in order that seniors may derive the benefit of their seniority? At present it appears a matter of chance whether a regiment is offered you abroad or at home, so that a junior is often offered a step which a senior would accept. For example, promotion in the 9th was offered to the senior subaltern to a regiment just gone abroad; 2nd subaltern to a regiment at home; 3rd subaltern to a regiment in Halifax, which would probably go to the West Indies; 4th subaltern to a regiment at home, with several years to stay at home; 5th subaltern to a regiment at home, with a probability of staying at home four years or so. The first three were refused for various reasons, the latter two accepted; whereas the three seniors might have been offered the regiments the two last accepted, especially in one case, as it was the officer's county regiment, and to which he had endeavoured to get to before."

REGIMENTAL TITLES.

"Esprit de Corps" writes:—"I see in the *Times* of Sept. 8 that the completion of the new organisation of the Infantry is now under the consideration of the War-Office Authorities. The new designations suggested by Colonel Stanley's Committee for each pair of the battalions of the Line which are now linked together are there stated, and if carried into effect would, I should fear, do away with the *esprit de corps* of most regiments, especially the following, which are all proud of their numbers and designations:—26th Cameronians, 74th Highlanders, 27th Inniskillings, 32nd Cornwall Light Infantry, 33rd Duke of Wellington's Regiment, 41st the Welsh, 42nd the Black Watch, 79th Queen's Own Cameron Highlanders, 71st Highland Light Infantry, 72nd Duke of Albany's Own Highlanders, 91st Princess Louise's Argyllshire Highlanders, 87th Royal Irish Fusiliers, 88th Connaught Rangers, 92nd Gordon Highlanders, 93rd Sutherland Highlanders, and many others. A word on the subject in your valuable paper might do some good to prevent these changes."

The Midland Counties' Watch Company, of Vyse Street, Birmingham, supply their celebrated watches direct to wearers at the very lowest wholesale cash prices. They guarantee the goods supplied by them to be the most perfect time-keepers, and, as a guarantee of good-faith, they undertake to return the full amount paid for any watch not to the satisfaction of the purchaser, if sent back within one month.

"THE CAMERONIAN 'HIGHLANDERS.'"

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The absurdity of so incongruous a title for the amalgamation of two regiments, the origin of which was of a totally opposite character, has already given rise to letters in the *Times* and other papers; and I recollect some years ago, on the "linking" of the 26th Cameronians to the 74th Highlanders, there was a letter on the subject of the term "Cameronian" in the *Army and Navy Gazette*. Can any of your readers, who trouble themselves about such matters, explain the curious appellation of Cameronian "Highlanders?" The Cameronians were, as already explained, a fanatical sect of religious enthusiasts, who had gone so far as to give umbrage to the Presbyterians of the day. "From the freedom with which he (Richard Cameron) asserted the spiritual independence of the Church of Scotland, he excited the hostility of that portion of the Presbyterian clergy who had taken advantage of the Act of Indulgence, 1672, and he was reproved at a meeting of them held at Edinburgh, 1677." "Richard Cameron," says his biographer, "a zealous preacher and martyr, and . . . . . . was the son of a small shopkeeper at Falkland, Fife" (certainly not belonging to the Highlands), "and was at first schoolmaster and precentor of his native parish, under the Episcopalian clergyman. He was afterwards converted by the field preachers. . . . ." It seems, therefore, as if the War Office, or some pundit therein, were either quite ignorant of the farrago (as regards historical association) he was about to combine, or that he was bent upon inserting in the *Army List* a joke, with which to regale its already too serious students. When the Cameronian flock was incorporated in the Regular Army to aid in holding in check the Highlanders, so great was the alarm that their services were too gladly seized upon, and a gallant regiment has the 26th ever proved itself to be; but as for coupling it with that of its ancient foes, it would be quite as humorous to name a corps the "Covenanter, or John Knox," or even the "Wesleyan, or Baptist Highlanders."—I am, &c., QUONDAM.

Reviews.

The Navies of the World. By Lieutenant E. Very, U.S.N. London: Sampson Low, Marston, and Co.

It would be difficult to overrate the value of this treatise. It gives concise descriptions of the plans, armament, and armour of the Naval vessels of twenty of the principal nations, together with the latest developments in ordnance, torpedoes, and Naval architecture, concluding with a concise summary of the principal Naval battles that have taken place during the last twenty years. The compilation of such a work, requiring as it does the nicest accuracy in dealing with so great a mass of statistical matter, must have proved a long and exhausting task. It has, however, been accomplished by a young officer holding a commission in the United States Navy, and it may safely be assumed that the book now published will shortly be recognised as a standard work on all matters connected with the Navies of the world. The great importance and practical value of a compilation like this may be easily estimated, by taking into consideration the rapid and universal changes in the "matériel" of which fleets are composed which have taken place during the last twenty years, and the consequent impossibility of forming any true estimate of the strength of the Navy of any maritime Power which would be of value beyond a very limited time. If the estimate be formed on the best possible data, and assisted by the closest attention and the most favourable circumstances, Naval officers will even yet find difficulty in comprehending the magnitude of the general result. During many years that have passed away, the craze for Naval development was so furious, that until recently it had not subsided into such a slow and steady advance as would afford a favourable opportunity for measuring the actual strength and resources of the Navies of the world. That opportunity has, however, been afforded within the last two years, and the author has consequently prepared this work, his principal object being that of representing in as detailed a manner as possible all the elements which go to make up the actual Naval strength, leaving to those who, in their search for information, may have recourse to the data herein presented to estimate the values of those elements as they are developed and combined in different navies, and to judge for themselves of the true value of the results obtained. Lieutenant Very's volume has been brought out in the best possible manner as regards type, paper, and binding, and what is still more important, as regards the high finish of the plates with which it is so abundantly illustrated.

Indian Notes. By F. R. Hogg. (J. and A. Churchill.)—Several of the papers in this volume have already been published in the *Medical Times* and the *Indian Medical Gazette*. In their present form they present a useful compilation, which will be especially appreciated by Europeans who take an interest in hearing health facts investigated; at the same time, it will prove agreeable reading to the daily-increasing numbers whom the present wonderful facilities of travel are inducing to visit India.

Notes on Game and Game-Shooting. By J. Manley. (The "Bazaar" Office.)—This will be found a very useful book by sportsmen, as it contains a great number of miscellaneous observations on birds and animals, and also on the sport they afford for the gun in Great Britain. It is written clearly and to the point, and will serve as a sportsman's manual. "Hares and Rabbits" have chapters all to themselves, which seems to be only fair, when it is remembered how completely they occupied the attention of Parliament during the recent session, and still more how they assisted *Punch* with brilliant suggestions.

THE ANNUAL RELIEF, 1880-81.

With the sanction of the Government of India, the following movements in relief of British and Native troops for 1880-81 are directed to take place as herein ordered :—

Royal Horse Artillery.—E Baty. A Brig., from Peshawur to Meerut; G Baty. A Brig., Lucknow to Morar; G Baty. A Brig., Peshawur to Sialkot; A Baty. B Brig., Afghanistan to Umballa; A Baty. C Brig., Umballa to Peshawur; B Baty. C Brig., Meerut to Meean Meer; C Baty. C Brig., Morar to Lucknow; I Baty. C Brig., Umballa to England; D Baty. C Brig., England to Umballa.

Royal Artillery.—H. Baty. 1st Brig., from Mooltan to Bombay Presidency; A Baty. 3rd Brig., Meerut to England; B Baty. 3rd Brig., Benares to England; C. Baty. 3rd Brig., Afghanistan to England; D Baty. 3rd Brig., Nowgong to England; E. Baty. 3rd Brig., Kohat to England; F Baty. 3rd Brig., Dinapore to England; G Baty. 3rd Brig., Afghanistan to England; H Baty. 3rd Brig., Ferozepore to England; A Baty. 4th Brig., Agra to Bombay Presidency; C Baty. 4th Brig., Kurrum to Sitapur; L Baty. 5th Brig., Afghanistan to Mooltan; O Baty. 5th Brig., Cawnpore to Peshawur; G Baty. 4th Brig., Afghanistan to Meerut; B Baty. 1st Brig., England to Ferozepore; G Baty. 1st Brig., England to Benares; K Baty. 3rd Brig., England to Nowgong; L Baty. 3rd Brig., England to Dinapore; M Baty. 3rd Brig., England to Meerut; N Baty. 3rd Brig., England to Cawnpore; O Baty. 3rd Brig., England to Agra; No 6 Baty. 8th Brig., Afghanistan to Jutogh; No. 9 Baty. 8th Brig., Aden to England; No. 10 Baty. 8th Brig., Fort William to England; No. 11 Baty. 8th Brig., Rangoon to Aden; No. 13 Baty. 8th Brig., Bombay to Aden; No. 14 Baty. 8th Brig., Aden to England; No. 16 Baty. 8th Brig., Lucknow to Aden; No. 17 Baty. 8th Brig., Mhow to Bombay; No. 2 Baty. 9th Brig., Aden to England; No. 4 Baty., 9th Brig., England to Rangoon; No. 11 Baty. 9th Brig., Afghanistan to Murree Hills; No. 12 Baty. 9th Brig., Afghanistan to Morar; No. 14 Baty. 9th Brig., Quetta to Kandahar; No. 5 Baty. 11th Brig., Kandahar to Mhow; No. 6 Baty. 11th Brig., Afghanistan to Lucknow; No. 8 Baty. 11th Brig., Bombay to Fort William; No. 11 Baty. 11th Brig., Afghanistan to Khyra Gully.

Sappers and Miners.—No. 2 Company, from Afghanistan to Roorkee; No. 3 Company, Afghanistan to Roorkee; No. 4 Company, Afghanistan to Peshawur; No. 5 Company, Afghanistan to Rawul Pindee; No. 6 Company, Rawul Pindee to Roorkee; No. 7 Company, Rawul Pindee to Roorke; No. 10 Company, from Rawul Pindee to Peshawur; A Company Madras Sappers and Miners, Afghanistan to Bangalore; C Company Madras Sappers and Miners, Afghanistan to Bangalore; I Company Madras Sappers and Miners, Afghanistan to Bangalore.

British Cavalry.—6th Dragoon Guards, from Afghanistan to Sialkot; 8th Hussars, Nowshera to Rawul Pindi; 9th Lancers, Afghanistan to Umballa; 10th Hussars, Rawul Pindi to Lucknow; 13th Hussars, Lucknow to Muttra; 15th Hussars, Afghanistan to England; 1st Dragoon Guards, the Cape to Meerut.

British Infantry.—2nd Batn. 1st Foot, from Jubbulpore and Saugor to England; 2nd Batn. 2nd Foot, Bareilly to Peshawur; 1st Batn. 5th Foot, Afghanistan to England; 1st Batn. 6th Foot, Aden to England; 2nd Batn. 8th Foot, Kurrum to Meean Meer; 2nd Batn. 9th Foot, Afghanistan to Subathu and Jutogh; 1st Batn. 12th Foot, Cherat to Fyzabad; 2nd Batn. 14th Foot, Afghanistan to Nowshera; 1st Batn. 17th Foot, Peshawur to Jhansi and Gwalior; 1st Batn. 18th Foot, Afghanistan to Lundi Kotal; 1st Batn. 23rd Foot, England to Chakrata; 2nd Batn. 24th Foot, Gibraltar to Bombay Presidency; 1st Batn. 25th Foot, Afghanistan to Peshawur; 39th Foot, Jhansi and Gwalior to Jubbulpore and Saugor; 1st Foot, Afghanistan to Bareilly; 59th Foot, Afghanitan to England; 2nd Batn. 60th Rifles, Afghanistan to England; 61st Foot, Malta to Bombay; 62nd Foot, Morar to Aden; 65th Foot, Dinapore to Morar; 66th Foot, Afghanistan to England; 68th Foot, Meean Meer to Meerut; 70th Foot, Subathu and Jutogh to Dinapore; 72nd Highlanders, Afghanistan to Lucknow; 73rd Foot, Lucknow to England; 77th Foot, England to Sitapur and Benares; 83rd Foot, Belgaum to England; 85th Foot, Kurrum to England; 89th Foot, Rangoon to Belgaum; 92nd Foot (Highlanders), Afghanistan to England; 98th Foot, Malta to Kurrachee; 100th Foot, Sialkot to Kurrum, subject to modification; 1st Batn. Rifle Brigade, England to Bellary.

Bengal Cavalry.—1st Bengal Cavalry from Kohat to Cawnpore; 2nd ditto, Segowlie to Lucknow; 3rd ditto, Afghanistan to Meean Meer; 4th ditto, Afghanistan to Rawul Pindi; 5th ditto, Afghanistan to Lundi Kotal; 6th ditto, Sitapur to Segowlie; 7th ditto, Morar to Kurrum, subject to modification; 8th ditto, Mooltan to Nowgong and Jhansi; 10th Bengal Lancers, Afghanistan to Sialkot; 11th ditto, Peshawur to Umballa; 13th ditto, Kurrum to Peshawur; 14th ditto, Murdan to Morar; 15th Bengal Cavalry, Dehra Ghazi Khan to Mooltan; 17th ditto, Afghanistan to Bareilly; 19th Bengal Lancers, Bareilly to Peshawur; Central India Horse, Peshawur to Goona.

Native Infantry.—1st N.I., from Peshawur to Nowshera, subject to modification; 3rd ditto, Dinapore to Morar; 6th ditto, Peshawur to Moradabad and Shahjehanpur; 8th ditto, Afghanistan to Rawul Pindi; 9th ditto, Afghanistan to Jhansi and Nowgong; 11th ditto, Rawul Pindi to Lucknow; 13th ditto, Kurrum to Bareilly; 15th ditto (Sikhs), Afghanistan to Delhi; 16th ditto, Afghanistan to Khyber; 18th ditto, Buxa to Dinapore; 19th ditto (Punjab), Afghanistan to Sialkot; 20th ditto, Kurrum to Jullundur; 21st ditto, Kurrum to Talagang; 22nd ditto, Afghanistan to Meean Meer; 23rd (Punjab Pioneers), Afghanistan to Meean Meer; 24th ditto (Punjab), Afghanistan to Mooltan; 26th ditto (Punjab), Jhelum to Kurrum, subject to modification; 27th (Punjab), Afghanistan to Lundi Kotal; 28th ditto (Punjab), Afghanistan to Peshawur; 29th ditto (Punjab), Kurrum to Agra; 30th ditto (Punjab), Afghanistan to Jhelum; 31st ditto (Punjab), Afghanistan to Peshawur; 32nd ditto (Punjab Pioneers), Afghanistan to Rawul Pindi; 33rd ditto, Delhi to Barrackpore; 36th ditto, Barrackpore to Fyzabad; 37th ditto, Bareilly to Buxa; 39th ditto, Nowshera to Morar; 40th ditto, Gorakhpur to Benares; 41st ditto (Gwalior), Afghanistan to Peshawur, subject to modification; 45th ditto (Sikhs), Afghanistan to Peshawur; 1st Goorkhas, from Afghanistan to Dharmsala; 2nd ditto, Dharmsala to Dehra; 3rd ditto, Dharmsala to Almorah; 4th ditto, Afghanistan to Bakloh; Deoli Infantry, Kurrum to Deoli; 1st Madras N.I., Afghanistan to Secunderabad; 4th ditto, Afghanistan to Bangalore; 13th ditto, Meean Meer to Jubbulpore; 15th ditto, Afghanistan to Bangalore; 21st ditto, Mooltan to Trichinopoly; 27th ditto, Morar to Bellary; 30th ditto, Dera Ghazi Khan to Trichinopoly; 2nd Regiment Hyderabad Contingent, Jhansi, as ordered.

THE WITHDRAWAL FROM AFGHANISTAN.

The following programme has been drawn up and issued by the Quartermaster-General's Department in India, for the disposal of the troops returning to India from Afghanistan :—

Royal Artillery.—E-A R.H.A., from Peshawur, to remain at Peshawur until relieved by O-5 late in the season; E-A R.H.A., from Peshawur, to Sealkote, to move out of valley and march direct to Sealkote, as soon as carriage for large tents is available; A-B R.H.A., from Front to Campbellpur, on arrival at Peshawur, to march to Campbellpur, and remain there until the ordinary marching season; C-3rd R.A., from Front to Agra, will arrive at Peshawur about Aug. 22, to march to Campbellpur, and will move from camp to Agra by route-march early; G-3rd R.A., from Front to Meean Meer, will arrive at Peshawur about Sept. 2 or 3, and move thence to camp Hassan Abdal, marching thence to Meean Meer early; G-4th R.A., from Front to Peshawur, will remain temporarily in cantonments at Peshawur until relieved; L-5th R.A., from Front to Lucknow, will arrive at Peshawur about Sept. 13, and proceed to camp Lawrencepur, marching thence in December for Lucknow; 12-9th R.A., from Front to Morar, to receive elephant equipment from 6-11th and to halt at Nowshera until Attock bridge is ready, when it will move to Morar; 6-11th R.A., from Front to Lucknow, on arrival at Peshawur to make over elephant equipment to 12-9th, and be pushed on at once by route-march and rail to Lucknow; 10-11th R.A. remains at Peshawur; 11-11th R.A., from Front to Murree Hills, to proceed at once to Murree Hills; No. 1 M.B. remains at Lundi Kotal; No. 4 M.B., from Front to Edwardesabad, proceeds direct *viâ* Kohat Pass to Edwardesabad immediately on arrival at Peshawur.

British Cavalry.—6th Dragoon Guards, from Front to Sealkote, arrive at Peshawur 20th, 23rd, and march direct to Sealkote, on receiving suitable carriage for large tents; 8th Hussars, from Nowshera to Campbellpur, move across Indus to Campbellpur, as soon as relieved by 14th Foot at Nowshera, and remain at camp until reserve there is finally broken up.

British Infantry.—1-5th Foot, from Front to Lawrencepur, arrive at Peshawur about August 20, move to camp Lawrencepur, where they will remain until required for embarkation; 2-9th Foot, from Front to Lawrencepur, arrive at Peshawur about August 22, march thence to camp Lawrencepur, where they will remain until reserve is finally broken up; 12th Foot, from Cherat to Fyzabad, remain at Cherat until regular marching season, when they march to Fyzabad; 2-14th Foot, from Front to Nowshera, on arrival at Peshawur will proceed direct to Nowshera, arriving there about Aug. 21; 17th Foot, remain at Peshawur until relieved; 18th Foot, remain at Lundi Kotal; 25th Foot, from Front to Peshawur, will be quartered at Peshawur; 51st Foot, from Peshawur to Lawrencepur, on arrival at Peshawur about Aug. 22 will proceed to camp Lawrencepur, and remain there until required to proceed to Bareilly; 59th Foot, from Peshawur to Hassan Abdal, arrive at Peshawur about Sept. 10, to be marched to Jhelum as soon as transport for large tents is available, and rail thence to Umballa (if transport for large tents is delayed this regiment must move across the Indus to camp Hassan Abdal, marching with small tents); 67th Foot, from Peshawur to Hassan Abdul, arrive at Peshawur about Sept. 10, and proceed as above noted for 59th, railing direct from Jhelum to Bangalore.

Native Cavalry.—4th Bengal Cavalry, from Front to Rawul Pindee, on arrival at Peshawur will march through to its destination; 5th Bengal Cavalry, remains in Khyber; 10th Bengal Lancers from Peshawur to Sealkote, move out of Peshawur Valley direct to Sealkote, on relief by 17th Bengal Cavalry; 11th Bengal Lancers, from Peshawur to Nowshera, will march to Nowshera, where it remains temporarily; 14th Bengal Lancers, from Mardan to camp at Hutti, on relief by the Guides will proceed to camp at Hutti, until the reserve there is finally broken up; 17th B.C., from Front to Peshawur, on arrival will remain there temporarily; 19th B.L., from Front to Peshawur, remain at Peshawur as part of the garrison.

Native Infantry.—1st N.I., from Peshawur to Nowshera, on relief; 6th N.I., from Peshawur to Lawrencepur, on relief; 8th N.I., from Front to Rawul Pindee, on arrival at Peshawur Aug. 17, 20, to proceed direct to Rawul Pindee; 9th N.I., from Front to Lawrencepur, on arrival at Peshawur about Aug. 20 to be sent on to camp Lawrencepur, and remain there until camp is broken up; 11th N.I., from Rawul Pindee to Lucknow, to move from Rawul Pindee to Jhelum, *en route* to Lucknow, as soon as relieved by 8th Native Infantry; 16th N.I., remains in Khyber; 19th N.I., from front to Sealkote, arrive at Peshawur about Sept. 7, proceed direct to Sealkote, after British troops have moved off; 22nd N.I., from Front to Meean Meer, arrive at Peshawur about Sept. 10, proceed as soon as practicable to Jhelum, and rail thence to Meean Meer; 27th N.I., remain at Lundi Kotal; 28th N.I., from Front to Peshawur, to form part of Peshawur garrison; 30th N.I., from Front to Jhelum, arrive at Peshawur about Sept. 10, to march direct to its destination; 31st N.I., from Front to Peshawur, remains as part of Peshawur garrison; 32nd Pioneers, from Front to Rawul Pindee, arrives at Peshawur Aug. 17, 20, proceeding to destination as soon as practicable; 39th N.I., from Nowshera to Lawrencepur, on relief by 1st Native Infantry to camp at Lawrencepur, remaining there until camp is broken up; 41st N.I., from Front to Peshawur, arrive at Peshawur Sept. 7-8, and remain as part of the garrison; 45th N.I., from Front to Peshawur, form part of Peshawur garrison; 1st Goorkhas, from Front to Lawrencepur, on arrival at Peshawur, about Aug. 22, to march direct to camp Lawrencepur, remaining there until reserve is broken up; 3rd Goorkhas, from Front to Almorah, arrive at Peshawur about Sept. 10, to march direct to Jhelum, and rail to Bareilly for Almorah.

Bengal Sappers.—2nd, 3rd, 6th, and 7th Companies, from Front to Roorkee, will march direct to Jhelum as soon as possible after arrival at Peshawur, and rail thence to Sahrunpore for Roorkee; 4th and 10th Companies, from Front to Peshawur, remain in Peshawur garrison; 5th Company, from Front to Rawul Pindee, proceeds direct to Rawul Pindee.

Madras Troops.—Madras Sappers.—A, C, and S Companies, from Front to Hassan Abdal, proceed to camp Hassan Abdal, and remain there until camp is broken up.

Madras Infantry.—1st Madras N.I. arrive at Peshawur about Sept. 10; 4th Madras N.I. and 15th Madras N.I. from Front to Hassan Abdal, proceed as soon as practicable to camp Hassan Abdal, and remain there until reserve is broken up.

Punjab Frontier Force.—Punjab Cavalry.—1st Punjab Cavalry, from Front to Dera Ismail Khan, on arrival at Peshawur to march *viâ* Kohat Pass to Dera Ismail Khan; 2nd Punjab Cavalry, from Front to Dera Ghazi Khan, on arrival at Peshawur to march *viâ* Kohat Pass to Dera Ghazi Khan; Guides Cavalry, from Front to Hoti Mardan, on arrival at Peshawur to march to Hoti Mardan at once.

Punjab Infantry.—Guides Infantry, from Front to Hoti Mardan, as Guides Cavalry; 5th Punjab Infantry, from Front to Dera Ismail Khan, on arrival at Peshawur to proceed *viâ* Kohat Pass to Dera Ismail Khan.

OUR POSITION IN AFGHANISTAN.

We have received the following copy of a telegram from the Viceroy, dated Simla, Sept. 12, from the India Office for publication :—"A brigade of Cabul-Candahar force, under Gen. MacGregor, marched from Candahar on September 8 for Killa Abdulla, to ease pressure regarding supplies. Gen. Roberts goes with it, and will meet Sandeman at Killa Abdulla, to discuss questions of transport and supplies between Sibi and Candahar. Convoys of carts are reaching Candahar, but road requires improvement. A brigade consisting of three infantry and two cavalry regiments was to march from Candahar on the 10th in the direction of Kushk-i-Nakhud, to collect supplies and bring in some guns believed to be lying on the road. St. John telegraphs, under date 9th, that Ayoub Khan and other fugitive sirdars passed Zemindawar some days ago. Ayoub is now said to have fled to Herat with his chief followers and two or three hundred horsemen, the Herat infantry having scattered over the country. Reports of a serious insurrection at Herat; the Governor left by Ayoub said to have been murdered."

The *Daily News*' correspondent telegraphs from Candahar on Sept. 14 :—"A court of inquiry has been ordered to assemble to inquire into the disaster at Kushk-i-Nahkud. Gen. Phayre will be the president, and Col. Smith, R.A., and Col. Wilkinson the members. Ayoub's colonel of artillery, who was among the prisoners, states that Ayoub meant to pass Gen. Burrows by forced marches to reach Sinjun. Thence he intended to sweep down on the garrison of Candahar, whose exact strength he knew. The capture of Candahar being accomplished, he then proposed to overwhelm Gen. Burrows's brigade. Gen. Burrows, however, intercepted him after the first forced march, at Maiwand, and forced a fight. Ayoub's Herati regiments twice retired under our artillery fire, but our infantry breaking at the Ghazi attack gave Ayoub an unexpected victory."

The *Times*' correspondent, telegraphing from Candahar on Sept. 9, says :—"For the last week Gen. Roberts's force has been enjoying the repose to which its great exertions last month entitle it. The British regiments have obtained shelter in the several cantonment buildings, but the native regiments are still in their tents. The Cavalry Brigade is at Yorkeran, about six miles west of Candahar, on the Argandab, whither also have been sent all the sick and the transport animals. Gen. Phayre accompanied by his staff, rode into Candahar on the 6th to confer with Gen. Roberts, but has since returned to his division, which encamped, for greater convenience of supplies, twelve miles south of Candahar, between the junction of the Arghestan and Tarnak rivers with the Dori. Gen. Roberts has gone to Peshin, where the climate is said to be better than it is at present at Candahar, and where it is sincerely to be hoped that his health will be completely restored. He retains, of course, the chief command of all the troops at and about Candahar, Gens. Ross and Primrose commanding respectively the Bengal and Bombay Divisions under him. The 3rd Brigade of Bengal troops and the Central India Horse accompanied Gen. Roberts to Peshin, and will doubtless go on thence to India, the other brigades anxiously expecting the order to follow. The Candahar Valley, rich as it is in grain, is clearly unable to support for long the 20,000 troops now occupying it, and necessity, no less than policy, makes it desirable to reduce the number as soon as possible. As far as is yet known, Ayoub Khan has gone straight to Herat with a small following, but it is thought extremely likely that he will find the gates closed against him. He is without money, though he squeezed one year's revenue out of the Heratis before his expedition against Candahar. His poverty will not induce harmony between him and the other refugees from the fight of September 1."

Epps's Chocolate Essence.—Product of a special refining process. It is chocolate devoided of its over-richness and substantiality. Sugarless and, when made, of the consistency of coffee. An afternoon chocolate. Sold only in packets, 6d and 1s, labelled, "James Epps and Co., Homœopathic Chemists, 48 Threadneedle Street, and 170 Piccadilly, London."

The Army.

1st Life Guards. An excellent selection has been made in filling the vacant appointment of veterinary surgeon, Vet.-Surg. Walker having been transferred to the regiment from the 7th Hussars.

1st (King's) Dragoon Guards. A correspondent writes from the Cape :—"The sale of horses and mares belonging to the King's Dragoon Guards, to be held at Newcastle on Aug. 21, will afford horse-breeders another (indeed, the last) opportunity of obtaining English mares for breeding purposes, and there is little doubt that Newcastle will be largely thronged with visitors from all parts of the country on the occasion. The catalogue comprises 200 animals, the larger proportion mares, and as they have been pretty well acclimatised by this time, they will doubtless be much sought after."

4th Dragoon Guards. The London correspondent of the *Irish Times* says :—"The friends in Ireland of the 4th Royal Irish Dragoon Guards will be pleased to learn that the regiment has reached Aldershot in splendid condition, after its long march from York. No corps ever entered the camp in a more perfect state of discipline and efficiency, and it reflects no little credit upon Lieut.-Col. Gunter, his officers, and non-commissioned officers, that the young soldiers who fill the ranks have been brought to so high a standard, which could not be exceeded by any army in the world."

6th Dragoon Guards (Carabiniers). A correspondent writes from Cabul on August 7 :—"Capt. Burnley has been appointed aide-de-camp to Gen. Hugh Gough, V.C., commanding Cavalry Brigade, Cabul. The brigade accompanies the Division which marches from Cabul to Candahar, *vià* Ghuznee. The Carabiniers are in camp at Sufaid Sung, and are expecting orders daily to return to India."

7th Dragoon Guards. The following appointment was gazetted on Tuesday :—"Capt. F. T. Blunt, inspector of immigrants in Mauritius, to be Chief Civil Commissioner for the Seychelles Islands." We lately prepared our readers for this announcement.

2nd Dragoons (Royal Scots Greys). The polo competition for the cup presented by the All-Ireland Polo Club took place last week at Dublin. The first match for the cup was on the 7th inst., between the All-Ireland polo team and the Scots Greys, when the Greys won by five goals to nothing. On the 8th, the 3rd Batn. Rifle Brigade played the Dublin team, the former winning by four goals to two. On the 9th (Thursday), the final match was played between the Rifle Brigade and the Greys, and proved a very good game. For the first 40 minutes neither side succeeded in scoring ; after that, Mr. Wolfe made the first goal for the Greys. The Rifle Brigade, however, almost immediately afterwards secured a goal. Then, shortly before time was called, Mr. Hippisley secured a second goal for the Greys, thus winning the match. The sides were :—Scots Greys : Lieuts. Hippisley (captain), Torrens, Wolfe, and Middleton. Rifle Brigade : Lieuts. Harding (captain), Hornby, Luttrell, and Crake.

4th Hussars. We are glad to hear that the authorities have ordered this regiment into barracks, instead of huts and canvas stables, as, we believe, was at one time intended. The regiment has had a rough time of it lately. The ranks are full of very young soldiers, and the greatest credit is due to both officers and men for the splendid way they have turned out under trying circumstances. There is no smarter or better-drilled regiment in the Service.

6th Dragoons. Mr. M. L. Dames, J.P., formerly of the regiment, whose death has recently occurred at Cheltenham, in his 88th year, entered the Army in 1812, and served as junior lieutenant of the regiment at Waterloo, where the Inniskillings, under Gen. Sir Joseph Straton, formed part of Sir William Ponsonby's heavy cavalry brigade. He passed unscathed through the great struggle, and accompanied the advance to Paris, retiring on half-pay after the peace. His immediate senior in the Inniskilling Dragoons was Lieut. Count Ruffo, who, as Prince Castelcicala, was afterwards Neapolitan Minister to London, and as a survivor of the great fight was present at the last Waterloo banquet.

7th Hussars. Vet.-Surg. Walker has been selected for the vacancy in the 1st Life Guards. Mr. Walker has been with the regiment since August 6, 1866, and has earned the good-will of everybody by the quiet way in which he has carried out his duties ; whilst the skill he has displayed in his profession marks him as an officer who is certain to make headway in the Service.

9th Lancers. The *Times of India* says :—"The news of Col. Cleland's death, briefly announced in our last, is confirmed. He only obtained the command of the 9th Lancers little more than a year ago, and, the Lahore paper says, was wounded in two places on that fatal day, in December last, when he so gallantly led a portion of his regiment against dense masses of Afghans, in the hope of checking their onslaught and giving time for our guns to retire. He was removed in the early spring to Rawul Pindee, and afterwards to Murree, at which place he died on Aug. 7. It is believed that an abscess that had formed was one of the causes of his death. Col. Cleland will be much regretted in the regiment, and among a large circle of friends. He was a gallant and essentially a 'smart' officer, and worthily upheld the traditional glories of the 9th Lancers."

16th Lancers. The London correspondent of the *Irish Times* writes :—"Capt. R. T. Maillard, 16th Lancers, is to be allowed, I hear, to complete his five years as cavalry brigade-major at Aldershot. It was reported some time ago that he was to be deprived of his appointment in favour of a Staff College officer, but he has worked so well and is so favourably reported upon that the Duke is most anxious that he should be allowed to complete his term, which does not expire until April, 1882. This is, of course, disappointing to the cavalry captains with Staff College certificates, of whom there are several available now for staff appointments, though there happened to be none at the time that Capt. Maillard was selected."

17th Lancers. Her Majesty has permitted Lord Braye to hang up the sword of his elder brother, the Hon. E. V. Wyatt-Edgell, who was killed at Ulundi, in the Braye Chapel at St. George's, almost immediately over the body of Sir Reginald Braye. At first it was understood that her Majesty intended placing the statue of the Prince Imperial either in the Braye Chapel or in the nave, but now it is probable that a more convenient site will be chosen in the aisle north of the chancel, near the grave of Edward IV.

19th Hussars. 2nd Lieut. Anderson, who was lately promoted to a commission from the ranks of the Carabiniers, in recognition of his services when employed in Zululand—his gallantry at the battle of Ginghilova will be in the recollection of our readers—has since resigned his commission, in order to accept a Government appointment at Mauritius. Mr. Anderson is a gentleman by birth, and entered the ranks of the Army for the purpose of qualifying in this way for his commission. But for his having been offered the desirable appointment, which he lately left England to take up, he had intended to join the 19th Hussars, of which he was to have been appointed adjutant.

ROYAL ARTILLERY.

Major C. R. E. Wheatley, 7th Brig. (late Madras), late adjutant of the Dublin City Artillery, will embark next week for Halifax, N.S., to take over command of the battery into which he has been promoted.

Lieut. F. G. Pownall, Coast Brigade, was entertained at a banquet in the Woolwich Skating Rink on Tuesday night by the Manchester Unity of Odd Fellows and District, and presented with a testimonial in honour of his elevation to the supreme position of Grand Master of the Order. He has for many years been associated with the work of the society in Woolwich and other places.

Lieut. J. A. L. Coker, 9th Brig., died at Singapore, of fever, on the 9th inst., aged 25 years. The deceased, who was second son of Major Coker, of Bicester House, Bicester, entered the Army Aug. 19, 1875.

Capt. Sir C. Larcom, Bart., has resigned the adjutancy of the Sligo Artillery, in anticipation of his appointment to the R.H.A.

The experiments at Dartmoor and Okehampton to test the durability and serviceability of the new breech-loading 12-pounder guns have thus far been highly satisfactory. The short experience acquired in the Dartmoor practice is, however, convincing that, with even ordinary care, the weapon may be kept in a perfect state in the worst of weathers, and the officers and men of Major Rawlin's battery, who have temporary charge of the six guns, are very favourably impressed with their behaviour. In all, 160 rounds have been fired, and the breech-action is pronounced rapid, safe, and sure. Capt. Skinner, R.A., assistant-director of experiments, is with the battery to give instruction in the use of the new guns, and Major Walton, R.A., who will take charge of the guns when the present trial is completed, and drill his battery with them at Woolwich, is also present to witness the practice. The only noticeable defect experienced is the recoil, which is somewhat lively, owing to the lightness of the carriage and equipment, and for this there is no remedy without sacrificing that mobility which has been one of the special objects aimed at.

Brevet Major G. T. Pretyman and Capt. the Hon. W. C. Rowley, 8th Brig., accompanied Gen. Sir F. Roberts from Cabul to Candahar, as aides-de-camp.

Capt. A. J. C. Rawlins, 11th Brig. (late Bengal), died at Ferozepore on the 11th ult. The deceased entered the Army Dec. 9, 1859, and became capt. Feb. 4, 1874.

In accordance with a recommendation of the referees, Col. H. A. Smyth, R.A., Lieut.-Col. Eardley Maitland, R.A., and Major S. Nicholson, R.H.A., who recently awarded the gold medal of the Royal Artillery Institution at Woolwich to Major Kemmis, that the referees should be allowed "greater latitude in making their award," so that when a case arose in which the best essay did not in their opinion seem to merit the gold medal, the silver medal might be awarded, or even both might be withheld, a meeting of the committee of the Institution has been held, and a resolution in favour of the change adopted. A rule to give effect to the same was framed.

Lieut.-Col. C. E. Newport, 11th Brig. (late Bombay), sailed for Gibraltar on Thursday, in H.M.S. Tamar. Major J. P. Morgan and Lieuts. H. T. Hawkins and W. E. Kerrich, 10th Brig., have proceeded to Malta in the same transport.

ROYAL ENGINEERS.

Capt. A. S. Creyke, on the Half-Pay List, died at Harpenden on the 14th inst., aged 51 years. The deceased served in the Crimea from Sept. to Nov. 1854, including the siege of Sebastopol (medal with clasp and Turkish medal). He joined the Army, Dec. 1847 ; became 1st lieut., Jan. 28, 1852 ; capt., Sept. 10, 1856 ; and retired upon half-pay, Feb. 20, 1867.

The Pontoon Troop, R.E. Train, under command of Major Bond, at the close of a month's pontoon practice in the reaches of the Upper Thames, between Egham and Old Windsor, struck their tents at the Runnymede camp on Saturday morning, and returned to Aldershot.

Col. Gordon informs the *Celestial Empire* that he has not resigned his position in the British Army. He says it is not at all necessary for him to do so, as officers of thirty years' standing are freed from obligation by the regulations embodied in the new Army Warrant. The Hong Kong *Daily Press* reports that the Colonel left Shanghai for the North on July 16. On his arrival at Tientsin, he was to be the guest of Li Hung-chang, and it is said that he is not going to Peking. There is said to be no doubt that the Colonel has no intention of entering the service of the Chinese Government, though he will doubtless lay before Li Hung-chang a scheme for the reorganisation of the military and naval forces of the Chinese Empire. The *Celestial Empire* says :—"A new version is placed upon Col. Gordon's mission to Peking by the Hong Kong *Daily Press*, which says that 'his own statement is that he has not been specially invited to come, but that he wanted a change, that he obtained twelve months' leave, and is going to Peking to see his "friend Li." He intends returning to England at the end of the year, probably by way of Japan and America.' This hardly agrees with what the Colonel himself told us, and confirms what we said previously, that Col. Gordon does not know his own mind. It seems to us that he has now become unable to sustain any very great mental strain, and we shall only be stating a fact when we say that he has told several persons in Shanghai that 'people consider him mad.' It is certainly to be *hoped* that such is not the case."

Capt. E. Wood and Lieuts. Heath, Thompson, Layard, and Lawson, with the 17th Company, left England on Thursday in H.M.S. Tamar for Malta ; also Lieut. Askwith, Capt. Anstey, and Lieuts. Hawkins and Cameron, with the 33rd Company, embark in the Tamar at Queenstown, for Malta.

Coldstream Guards. The *Standard* says :—"Col. Lyon Fremantle, commanding the Coldstream Guards, in the name of his officers, has lately forwarded to Canada a handsomely got-up record of the services of the Coldstream Guards, from its formation in 1650, for presentation to the Governor-General's Foot Guards at Ottawa." Capt. Pole-Carew accompanied Gen. Sir F. Roberts from Cabul to Candahar as aide-de-camp.

Scots Guards. The remains of the late Lieut. E. W. Williams-Wynn, 2nd Batn., who was drowned at Windsor on the 8th inst., as already reported, were taken on Saturday to Cefn, St. Asaph, North Wales, for interment, the removal from Windsor being accompanied by military honours. About half-past eight the available portion of the battalion left the Victoria Barracks, and were posted along the streets to the Great Western Railway station. Shortly after nine the funeral *cortége* left the barracks. It was preceded by a firing-party with arms reversed, each soldier having a black-crape band on his arm. The regimental band with the drums and fifes and pipers of the battalion came next. The coffin was carried by soldiers, the pall, a Union Jack, being borne by four officers of the battalion, Mrs. Williams-Wynn, a son, and a daughter followed in a carriage, the whole of the officers of the battalion, with the Rev. Arthur Robins, chaplain to the Windsor garrison, several officers of the 1st Life Guards, and the deceased's company closing the procession. On arriving at the station, the firing-party drew up at the side of the Queen's waiting-room, while the band opened out for the procession to pass through. As the coffin was placed in the train all the heads of the bystanders were uncovered, and the band played the "Dead March" in *Saul*. The firing-party then marched on to the platform and presented arms as the carriage, which was attached to the 9.45 a.m. train, moved out from the station. The arrangements at the station were conducted by Capt. Bulkeley, a director of the company, and Mr. Smythe, the station-master. The deceased was exceedingly popular in his battalion with officers and men, and as a mark of respect the drums and fifes and pipers of the battalion have not played in relieving the Castle guard, nor a tattoo in the barrack yard of an evening. The Rev. A. Robins made the melancholy occurrence the subject of a touching allusion at Holy Trinity Church on Sunday morning, the 2nd Batn. Scots Guards and the 1st Life Guards being present. The funeral took place on Monday at Cefn Church, in the presence of a large concourse of persons. The funeral procession walked from Cefn Hall across the park to the church. The coffin, which was covered with the Union Jack, and laden with wreaths, was borne by workmen on Mrs. Wynn's estate, the following brother-officers of the deceased walking on either side : —Col. Jones, Lieut. Abercrombie, Lieut. Barnet, 2nd Lieut. Damer (who was with the deceased when the accident happened), and 2nd Lieut. Astley. The mourners included Mrs. Williams-Wynn, Mr. H. and Mr. R. Wynn (brothers), and Miss Wynn ; Capt. and Mrs. Godsall, Sir W. Grenville Williams, and the Rev. W. H. and Mrs. Williams. The officiating clergy were the Dean of St. Asaph, the Ven. Archdeacon Ffoulkes ; the Rev. D. Edwards, vicar of Cefn ; and the Rev. D. R. Thomas, Mefoid, formerly of Cefn. The body was interred in the family vault by the side of the late Col. Wynn, his father. The coffin, of polished oak, bore the inscription :—"Ed. Watkin Williams-Wynn. Born June 3, 1857. Died Sept. 8, 1880."

4th King's Own. Capt. Moore, 2nd Batn., has been appointed an officiating D.A.Q.M.G., Bombay, vice Capt. Dundas, 15th Regiment, proceeded on service to Afghanistan.

7th Fusiliers. A telegram, dated Candahar, Sept. 8, states that "Gen. Roberts has ordered the brigade under Col. Daubeny to march to Maiwand and Kushk-i-Nakhud to-morrow, with the object of burying the remains of the dead who were killed in action, and of recovering the six guns belonging to the Wali, which were abandoned near Kokeran. They are also to search the villages for followers who are supposed to be held prisoners, and to recover the property lost on our retreat. Col. Daubeny takes with him the 7th Fusiliers, two regiments of Bombay Native Infantry, two of Native Cavalry, and a battery of field artillery."

8th King's. The report of Brigdr.-Gen. Newdigate's withdrawal from his command in Kurram is confirmed. He has resigned, and Col. Grogan, 2nd Batn., succeeds to the brigade command.

10th Regiment. The 1st Batn. has arrived in Portsmouth garrison from Colchester, and taken up duty.

17th Regiment. Lieut. C. G. Whitby, killed at the battle of Kushk-i-Nakhud, was the eldest son of Dr. Whitby, of Leamington. He was well known throughout India by his contributions to numerous journals. His "Jottings of a Subaltern" in the *Times of India* were especially interesting, and up to the time he left Candahar with Burrows's brigade he was editor of the *Candahar News*. He had served throughout the whole of the Afghan campaign—first at Quettah and Khelat, attached to Jacobs' Rifles, and afterwards in the Bolan, and at Candahar with the 1st Grenadiers. He was educated at Wellington College, where he obtained an open scholarship, and at Keble College, Oxford. He entered the Army in 1875 in the 17th, which his grandfather at one time commanded. He served with the corps for some time in the Punjab, and then became a probationer for the Bombay Staff Corps, and was on the point of being gazetted permanently to that force, when the battle took place in which, while acting wing-officer to the 1st Grenadiers (the regiment that suffered most in the engagement), he lost his life.

19th Regiment. The 1st Batn. is to be conveyed from Bermuda to Halifax, N.S., in H.M.S. Crocodile, which is under orders of readiness to leave England next month.

20th Regiment. Major Smyth left England for the Mediterranean on Thursday in H.M.S. Tamar, to join the 1st Batn., on promotion. Lieut. Feilden will embark in the Tamar at Queenstown.

26th Cameronians. Capt. Jebb has leave from Malta to England from the 4th inst. to Nov. 30.

35th Regiment. Capt. Buscarlet has been granted leave from Malta to the Continent and England from the 2nd inst. to Nov. 30. Capt. Kelly left England on Thursday for Malta, to join head-quarters, on appointment.

46th Regiment. Lieuts. Dumaresq and H. W. Carden sailed for Gibraltar on Thursday in H.M.S. Tamar, in charge of a draft, to join head-quarters, from the depôt.

ROYAL MARINES.

A shocking accident occurred at Rochester on Friday afternoon, the 10th inst., by which Major Arbuckle, of the Chatham Division of the Royal Marines, lost his life. The major was riding at the side of his regiment, which was marching out to take part in some siege operations at Wouldham. The drum-and-fife band suddenly commenced playing, and frightened the major's horse, which, after scattering the bandsmen and injuring some of them, dashed at a fearful speed down a steep thoroughfare called Star Hill. The road at the bottom of the declivity is excavated for drainage operations, and in endeavouring to avoid the obstacle, the horse rushed on to the pavement, and the major's head struck against a shop-blind. The horse fell, rolled over his master, and crushed him so severely that he died a few minutes afterwards. Of the injured bandsmen, two drummers, named Carmon and Hamilton, had to be taken to the military hospital. Several children were knocked down by the runaway horse, but were not seriously hurt.

Lieut.-Col. Maskery and the officers' head-quarters, Royal Marine Battalion, quartered at Kinsale, gave their first "at home," lawn-tennis, &c., on Saturday last. The weather was all that could be wished, and the hosts, although very recent arrivals in the land of Erin, had the pleasure of receiving more than a hundred of the *élite* of Kinsale and County Cork. During the afternoon, the improvised drum-and-fife band performed a selection of music.

The following promotions and appointments have taken place in the R.M.L.I. :—Capt. E. W. G. Byam to be instructor of musketry, at the Chatham Division, vice Farquharson, promoted; Lieut. H. S. Thompson to be adjt., at the Chatham Division, vice Chapman, promoted; Capt. and Brevet Major and Musketry Instructor Joseph Philips to be major, at the Chatham Division, vice Wroot, retired (all three dated Aug. 26); Capt. J. M. W. Silver to be major, at the Chatham Division, vice Macdonald, retired (Aug. 28); Lieut. and Adjt. George Hobart to be capt. at a division to be hereafter named, vice Philips (Aug. 26); Lieut. and Assist. Musketry Instructor W. P. Rumley to be capt., at the Plymouth Division, vice Silver (Aug. 28); Capt. and Gunnery Instructor H. H. Strong to be major, at the Plymouth Division, vice Macintosh, retired; Lieut. H. H. Morgan to be capt., at a division to be hereafter named, vice Strong (both dated Sept. 1).

50th (Queen's Own). The *Irish Times* says:—"The retirement of Col. J. Thompson from the command of the 50th Regiment deserves notice. An Irishman by birth and parentage, and a soldier by instinct, Col. Thompson joined the ranks of the 50th as a youth. For over 40 years he has followed the colours of the gallant 'Queen's Own,' and after a most honourable career he lays by his sword, having passed through every grade from private soldier to colonel in command. He retires with the respect of all ranks, never having done, throughout his long service, one discreditable act."

52nd Light Infantry. The *Daily Telegraph* says:—"Some excitement has been caused by the absconding of a non-commissioned officer of the 52nd Regt., in garrison at Chatham, with £100. He has not been heard of since the 7th inst."

57th Regiment. Capt. Wade-Dalton completed his term of service with the depôt at Hounslow on the 8th inst., and will shortly return to head-quarters. Capt. Hughes-Hallett left England on Thursday for Malta, in H.M.S. Tamar, to take up his appointment as garrison instructor at that station. A Press Association telegram states that, "Whilst walking on the shore at Burling Gap, East Dean, Sussex, a coastguardsman the other day discovered the dead body of a soldier, which had apparently been washed ashore. The body was attired in the uniform of the 57th Regiment, and the hands were handcuffed together." It may be remembered that a detachment of the regiment, consisting of 2 officers and 89 men, under Capt. Dewar, embarked on board Messrs. Hartley's steamer, Lady Wodehouse, at Dover on the 29th ult., for Dublin, and that one of the men jumped overboard during the night.

65th Regiment. Brevet Lieut.-Col. Wolseley, a younger brother of Sir Garnet Wolseley, has been appointed Assistant-Adjutant-General at Peshawur, in recognition of his services during the earlier part of the Afghan war, when he was employed as a Staff officer with the Quetta column under Sir Michael Biddulph.

73rd Regiment. Qrmr.-Serjt. Cartledge having lately been discharged to pension after a service of over 19 years, during 15 of which he had been a member of the serjeants' mess, his comrade serjeants have presented him with a very handsome tea service as a mark of their respect, the testimonial being suitably inscribed.

78th Highlanders. It seems that Lieut. Christopher has not, after all, rejoined the 78th, for we observe that he is gazetted acting aide-de-camp to the Governor of Bombay from Aug. 6, vice Lieut. the Hon. G. Fitzroy Somerset, Grenadier Guards, who left Bombay to become orderly officer to Major-Gen. Phayre, in Afghanistan.

86th Regiment. H.M.S. Crocodile is in readiness to leave England with the head-quarters and service companies for Bermuda, in the course of next month.

89th Regiment. Capt. J. Cuthbert died in London on the 8th inst., aged 32 years. The deceased entered the Army Feb. 1, 1867; became lieut., June 23, 1869; and capt., Aug. 12, 1876. Lieut. Gordon will most probably obtain the company thus rendered vacant.

92nd Highlanders. The *World* says:—"The quickest going ever known in India was performed by Major White, of the 92nd Highlanders, the other day. He had six days to do the distance between Simla and Cabul, in order to march with Roberts, and he did it. Of course a Military Secretary can get over the ground quicker than other people." A telegram to the *Daily News*, dated Candahar, Sept. 8, states that "Major White, of the 92nd, starts for India to-day to resume duty as Military Secretary to Lord Ripon."

93rd Highlanders. Capt. Squirl sailed for Gibraltar on Thursday, in charge of a draft, to join head-quarters from the depôt.

97th Regiment. H.M.S. Crocodile is in readiness to leave England for Bermuda and Halifax, to carry out the movement of the regiment from the latter station to Gibraltar.

108th Regiment vacated its quarters in Clarence Barracks, Portsmouth, on Monday, and proceeded to the Gosport side, where it has gone under canvas.

109th Regiment. Lieut. Cole has been recommended for the adjutancy of the 67th Brigade Depôt, vice Lieut. Owens, 100th Regt.

Rifle Brigade. The 2nd Batn. is to be brought home from Gibraltar in H.M.S. Crocodile, which leaves England immediately on a round of troop-service. Lieut. Sherston, 4th Batn., is acting as A.D.C. to Gen. Sir F. Roberts in Afghanistan.

Ordnance Store Department. Assist.-Comy. J. C. Stanley, on the Half-Pay List, died at his residence Manor Street, Dublin, on the 9th inst., in his 43rd year. He was appointed sub-assist.-comy., Oct. 31, 1875, while serving in the Quartermaster-General's Department at Aldershot; became assist.-comy., Oct. 31, 1877, and retired on the re-organisation of the department.

Medical Department. Letters of administration of the estate and effects of the late Surg.-Major J. H. Porter, who died at Sherpur on Jan. 9, were lately granted by the Bombay High Court to Mr. F. Y. Smith, solicitor, the constituted attorney of Mrs. Mary Jane Riddel Porter, the widow and sole executrix of the deceased. The personality of the deceased has been sworn under Rs. 34,600. Brig.-Surg. R. C. Lofthouse, M.D., sailed for Malta on Thursday in H.M.S. Tamar.

The Auxiliary Forces.

MILITIA.

The annual training of the 159 Regiments constituting the Militia Force of England and Wales, Scotland, and Ireland, which commenced this year, in the case of the recruits, as early as the beginning of February, and in the case of men previously called out in April, is now practically over, only one regiment remaining to be dismissed. The official reports on the results of the training are, with the exception of a few isolated cases, very favourable. Much stress is, as might have been anticipated, laid on the benefits derived from the large attendance in barracks and at camps of exercise and instruction, for which special facilities have been offered this year. Out of the 98 regiments in England and Wales, the following have trained in camp and barracks for the full period:—The Royal Cumberland, on Brackenber Moor; the Devon Artillery, at Tregantle Fort; the Dorset, at Weymouth Barracks and camp; the 2nd, or North Durham, at Redcar camp; the Hertford, in camp; the 3rd Royal Lancashire, at St. Anne's-on-Sea camp; the 5th Royal Lancashire, at Redcar camp; the 6th Royal Lancashire, at Kingholm camp; the Royal East Middlesex, the 3rd Middlesex (Royal Westminster), the 4th or Royal South Middlesex, and the 5th Middlesex (Royal Elthorne), all at Hounslow; the Northumberland, at Alnwick; the Northumberland Artillery, at Dunbar camp; the 1st (King's Own) Stafford and the 3rd (King's Own) Stafford, at Whittington Heath camp; the 2nd and 3rd Royal Surrey, at Guildford; the Sussex Artillery, at Eastbourne camp; the Westmoreland Light Infantry, at Brackenber Moor; the Worcester, at Worcester; and the East York, West York Rifles, 3rd West York Light Infantry, and the 6th West York, all in camp. Of the 16 Militia regiments in Scotland, six have trained in camp and barracks:—The Edinburgh Company, the Fife Artillery, at Dunbar Barracks; the Highland Light Infantry, at Muir of Ord camp; the 1st Lanark, at Lanark Muir camp; the Renfrew (Prince of Wales's), at Irvine Muir camp; and the Scottish Borderers at Kingholm camp. In Ireland 45 regiments have been called out, of which the following have trained in barracks and camp:—Antrim Rifles and Carlow Rifles, in camp; 1st or North Cork Rifles, in camp; Cork City Artillery, at Kinsale camp; the North Down Rifles and the South Down, in camp; Dublin City Artillery, at Wicklow camp; the Kerry, Kilkenny Fusiliers, King's County Rifles, Londonderry Light Infantry, Queen's County Rifles, Tyrone Fusiliers, Longford Rifles, Louth Rifles, South Mayo Rifles, Tipperary Artillery, and the Waterford Artillery, in camp and barracks. Besides the above, several regiments were trained at Aldershot with the Regular troops in June, the total number of regiments which have been afforded camp and barrack quarters being over 50.

YEOMANRY CAVALRY.

The annual training of the Yeomanry Cavalry of Great Britain is now, with the exception of three regiments, which will be dismissed in the course of a few days, practically concluded. Since April, thirty-nine regiments have been called out, and the reports of the trainings and of the annual official inspections are said to be very satisfactory. Many regiments show a satisfactory increase in numbers, and all in efficiency. The total establishment for 1880-81 is fixed at 14,511, made up of 39 lieutenant-colonels, as many majors, adjutants, surgeons, and serjeant-majors, 243 captains, 243 lieutenants, 122 second lieutenants, 25 veterinary surgeons, 243 troop serjeant-majors and quartermasters, 243 permanent staff serjeants, 729 serjeants, 729 corporals, 243 trumpeters, 10,206 privates (minimum), and 11,496 maximum. In the Northern District, the number of Yeomanry Cavalry regiments is far in excess of those in the Eastern, Western, Southern, South-Eastern, Home, and North British—viz., 17, of which the celebrated Queen's Own Staffordshire has the largest establishment, 648. If every other important county contributed as largely as Staffordshire, the Yeomanry would be more than three times its present strength. The number of men of this regiment, which, under the command of Col. Bromley-Davenport, assembled for permanent duty this year, was 418. The next largest establishments are the Cheshire (538), and Leicestershire, also 538. In 1879 the latter regiment had on parade for inspection 453 officers and men, but this year there are considerably fewer, 380. Col. the Hon. E. Thesiger, the inspecting officer, remarked of this regiment, when he inspected it, it was the best parade he had ever seen of Yeomanry Cavalry, and in some of the movements the Regulars might take pattern from them. Next to these are the Yorkshire Hussars, 434; the 1st West York, 434; the Warwickshire, 434; the South Notts, 405; the Montgomery, Northumberland, Shropshire, Westmoreland, and Cumberland, 375 each; the Lancashire 374; Derby, 291; 2nd West Yorkshire, 271; and the Denbighshire, Lancashire Hussars, and Notts (Sherwood Rangers), 251 each. The Derby had 211 for inspection by Col. Thesiger; the South Notts, 321; the North Notts (Sherwood Rangers), 170; the Yorkshire about 380, 100 recruits having joined during the year; while the Shropshire regiment exhibited a decrease. In the Eastern District, the Herts and Suffolk have establishments of 271 and 273. In the Western, the largest are the Royal 1st Devon, Royal North Devon, Gloucestershire, North Somersetshire, West Somersetshire, and Worcestershire, 434 each; and the Pembroke, 251. The Gloucestershire Hussars had only about 220 for inspection. In the Southern, the Dorset, Hampshire, and Wiltshire have establishments respectively of 375, 327, and 498. The Royal Wilts had 253 sabres for inspection; the Dorset did not show well, under 200. In the South-Eastern District the Royal East Kent and the West Kent have establishments of 375 and 251 respectively. In the Home District the Royal Bucks has the largest establishment, 498, next to which are the Oxfordshire, 375, and the Berks and Middlesex 251 each.

ARMY GAZETTE.

War Office, Pall Mall, Sept. 14, 1880.

Royal Engineers—Lieut. C. H. Bagot to be Capt., vice Cruickshank (late Bombay), killed in action (Aug. 17); Lieuts. G. S. Clarke, from the Seconded List, to be Capt., vice Booth, seconded upon appointment as Adjt. of the 1st Lanarkshire Engineer Volunteers; G. W. Bartram to be Capt., vice Bell, V.C., seconded for Staff service (both dated Aug. 22); J. C. MacGregor to be Capt., vice Calrow, seconded upon appointment as Adjt. of the 1st Lancashire Engineer Volunteers (Sept. 1); H. E. McCallum has been placed upon the Temporary Reserve List, on appointment as Deputy-Surveyor-Gen. of the Straits Settlements (Aug. 3).

Staff—Lieut.-Gen. the Hon. L. Smyth, C.B., to be placed on the Staff of the Army serving at the Cape of Good Hope as a Lieut.-Gen., with a view to his commanding the troops at that station (Nov. 10).

MILITIA GAZETTE.

[Where not otherwise specified, the following commissions and announcements bear date Sept. 15, and the current year must be understood.]

War Office, Pall Mall, Sept. 14, 1880.

ARTILLERY.

YEOMANRY CAVALRY GAZETTE.

War Office, Pall Mall, Sept. 14, 1880.

Duke of Lancaster's Own—William Charles Jones, jun., gent., to be 2nd Lieut. (supernumerary) (Sept. 15).

An order has been given that no more biscuit in bags be issued to the First Reserve ships. All that will be taken on board is to be in tin-lined cases, so as to keep it fresh and crisp, and of that only sufficient to provision the ship for fourteen days will be kept on board. All biscuit in bags now on board these ships is to be returned as opportunity offers.

A telegram from San Francisco, dated the 1st inst., states that a despatch has been received at that port from Victoria, a district at the northern extremity of America, to the effect that the barque Malay has arrived there from Ounalaska, bringing no tidings of the Jeannette. The Malay reported that at Ounalaska the Jeannette was given up for lost, on account of the severity of last winter. A despatch from Washington, in reference to the above rumours, ridicules the idea that the Jeannette has met with a mishap, inasmuch as she was made as strong as human ingenuity could contrive, and especially equipped and provided for the service on which she was sent.

"ATALANTA" RELIEF FUND.

The sum required for the relief of the numerous dependent relatives is £20,000.

Subscriptions are earnestly requested to be paid to "ATALANTA" RELIEF FUND, at Bank of England; Messrs. DRUMMOND and Co., London; at any local bank at Portsmouth; or by

Commander JOHN W. F. HARVEY, R.N., Hon. Secretary.

Portsmouth Branch, H.M.'s Dockyard, Portsmouth.

Outfits of Saddlery for Colonies, India, China, &c., specially adapted for the country, despatched for prompt shipment.

PAIR-HORSE, SINGLE, AND TANDEM HARNESS KEPT READY FOR USE.

A Large Assortment of Hunting, Jockey, and Riding Whips for selection, also Ladies' Whips, Bridles, Spurs, Dog Collars, Slips and Couples, &c. Saddles and Harness Let on Hire. Waterproof Garments, good and cheap. Riding, Driving, and Walking Coats and Capes, Coachman's Box Coats and Reversible Knee Wrappers, Hunting Aprons, Shooting and Riding Leggings, &c. Officers' Regulation Waterproof Cloaks.

EXPORT ORDERS SHIPPED FREE OF THE USUAL AGENT'S CHARGES.

EARTH TO EARTH.—REFORMED FUNERALS upon the principles advocated in the *Times*, and dispensing with all procession. Explanatory pamphlet, with list of charges, gratis on application.

LONDON NECROPOLIS COMPANY, 2 LANCASTER PLACE, STRAND, W.C.
Patent "Earth to Earth" Coffins.

THORNHILL'S
NEW SHOOTING KNIFE.

THE GERMAN-SILVER SIDES FORM TWO CARTRIDGE EXTRACTORS.

PRICE, ON RECEIPT OF REMITTANCE, 10s 6d, POST FREE.

WALTER THORNHILL AND CO.,
144 NEW BOND STREET, LONDON.

NOTICES TO CORRESPONDENTS.

LANARK.—None of the regiments in question have colours.

NOTICE.—We are obliged to hold over a number of letters in type, owing to the demands on our space. We shall hope, however, to publish the majority of them next week.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e del Genio; Organ der Militär-Wissenchaftlichen Vereine; "Vedette;" Deutsche Heeres Zeitung; Militärische Zeitschrift; Army and Navy Journal of New York;* in addition to all the home and colonial professional periodicals and journals.

Army and Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 18, 1880.

WITH a view to obtaining fuller details, we have deferred till now writing on the subject of Sir Frederick Roberts's brilliant victory of the 1st instant. It now turns out to have been even more complete than was first thought. Not only have our own two guns been recaptured, but the whole of Ayoub Khan's artillery, thirty-six pieces, have been taken. The Afghan army was completely defeated and utterly dispersed, with a loss of 1,000 killed and at least double that number wounded. Ayoub himself fled at once to Herat, and so great is the moral effect of our success that the Trans-Helmund tribes, though there are no symptoms of our crossing that river, have sent in to apologise for joining Ayoub Khan, and to offer their submission. In the face of so signal a triumph, only dashed by the brutal murder of Lieutenant Maclaine, it seems ungracious to criticise. Nothing succeeds like success, and as long as a feat of arms has been accomplished, people care little what was the mode in which it was performed. Nevertheless, it may not be without instruction if we submit to the judgment of our readers whether General Roberts might not, by adopting different tactics, have literally, instead of only technically, destroyed Ayoub Khan's army. A glance at the excellent map of the environs of Candahar published by the Intelligence Department will show that above the Kotal-i-Baba Wali is a second pass, situate about three and a-half miles from the former. Had General Roberts sent a strong detachment—say, 2,000 men—to occupy this pass—called the Murcha Pass—with orders to descend into the valley if the enemy showed signs of retiring in that direction, we think that a Sedan on a small scale would have been the result. No doubt, many will say that General Roberts had to fight an enemy superior—perhaps nearly double, numerically—to his own army; that the enemy in question had proved himself a most formidable foe, and that he possessed thirty-eight guns with good gunners. Under these circumstances, it will be asserted, General Roberts would have been culpably rash had he divided his force. We grant this, but we maintain that it was not necessary for the General to have detached a single man from the force which he employed to deliver the blow. General Primrose, reinforced by the garrison of Khelat-i-Ghilzai, had about 5,000 available combatants. Of these 1,000 would have sufficed to have held the citadel, and 2,000 would have been ample, if properly handled, to perform the duty actually assigned to him, of making demonstrations against the Kotal-i-Baba Wali. This would have left 2,000 men for the Murcha Pass. This force would not have compromised itself by exposing itself to an attack by superior forces. In the first place, the enemy would not have dared to weaken the centre and right by detaching any large force to the left. In the second place, the detachment might have kept itself concealed till the moment for acting arrived. Then it could have descended into the valley, and have completely barred the flight of the Afghans up the Argandab. We confess that we do not regret that more Afghans were slain, for they have invariably proved themselves false, treacherous, cruel, and bloodthirsty. The fewer there are of them, the better for civilisation. We feel particularly bitter against them at the present moment, on account of the base murder of Lieutenant Maclaine; but that act, after all, was only of a-piece with the national character and numerous precedents. With regard to the question of the occupation or evacuation of Candahar, that is a point apparently not yet settled by the Government, who are too much occupied with the wicked Irish landlord to pay any attention to the Afghans. In the meantime, Sir Frederick Roberts is constructing a strong entrenched camp. This does not look as though he anticipated an evacuation.

We have the highest authority for stating that Major-General Sir Frederick Roberts, K.C.B., will shortly proceed to England from Afghanistan, and will, on arrival, receive the personal thanks and congratulations of her Majesty.

We have been requested to state that the reports in circulation as to the intention of the Government to recommend her Majesty to confer a baronetcy on Sir Frederick Roberts, have not emanated from the members of his family, who are entirely in ignorance of the steps it is in contemplation to take to recognise the services of their distinguished relative. Premature announcements of this nature often have the effect of seriously injuring an officer's case, and we trust that the Government may not be influenced in the present instance by the statements which have appeared.

The impression evidently exists that the Good-Service Pension granted by the Government of India—not the Horse Guards, as we see it stated—has been conferred upon Major-General Sir Frederick Roberts as a reward for his services lately in defeating Ayoub Khan's army at Candahar. It is as well, therefore, that we should made it known that this £100 which General Roberts has had added to his income, was granted some weeks back, though the official intimation has only just appeared.

It may be interesting to learn that the Grand Cross of the Bath which, the Calcutta correspondent of the *Times* says, it is proposed to confer upon Sir Frederick Roberts and Sir Donald Stewart, is due to those officers for the services performed by them previous to the recent operations against Ayoub Khan.

The absurdity of the statements with regard to the measures to be taken to reward General Roberts's brigadiers and others who have come to notice in the march upon and relief of Candahar are so apparent, that it is scarcely necessary for us to draw attention to them; and we should not do so, were it not that we consider it a duty to the officers in question to point out that these announcements can contain no particle of foundation. Sir Frederick Roberts's despatches have not yet arrived in England, and until they do, no names will be submitted to her Majesty. What makes these anticipations the more ridiculous is that H.R.H. the Duke of Cambridge and the Secretary of State for War are both of them absent from London, and until they return to their official duties the subject of rewards cannot possibly be considered.

Having regard to the fact that Sir Garnet Wolseley received £25,000 for his services in bringing to a successful conclusion the campaign against King Koffee of Ashantee, in 1873-74, it is, of course, highly probable that Sir Frederick Roberts will be granted a monetary reward in recognition of his recent operations in Afghanistan. The importance of the services rendered by the two officers will not bear comparison, and the Government could not, even if they wished to do so, allow General Roberts's claims to go unrecognised, for his has not been any sudden spurt of victory. He has been employed in the field now for a period of close upon two years, and in that time he has added victory after victory to the long roll of achievements which have marked his military career; and his successes having culminated in the dashing march and brilliant engagement before Candahar, by which the character of the British Army has been retrieved, the Service will demand that he shall be adequately rewarded.

We are indeed glad to learn that when the *Gazette* announcements appear notifying the names of those upon whom her Majesty has been pleased to confer distinctions for service in Afghanistan, one officer will, in all probability, be mentioned who has since died of wounds received in action, but whose gallantry will live for ever in the annals of the distinguished regiment he commanded at Cabul,—we refer to the late Lieutenant-Colonel Cleland, 9th Lancers. H.R.H. the Duke of Cambridge, we are told, is deeply sensible, as is also her Majesty, of the services rendered by Colonel Cleland in the action on December 11th, 1879, and of his great sufferings which only terminated in his death lately; and if certain difficulties can be overcome—and there ought to be no reason why they should not—the friends and comrades in arms of the deceased soldier will have the gratification of learning that he would not have been overlooked had he lived, but that his Sovereign would have been recommended to have granted him some special mark of her most gracious approval of his heroism and devotion.

In another column will be found the official programme of Indian reliefs for the season 1880-81, which will be seen on examination to be, so far as out-going and home-coming regiments are concerned, the same in its main features as that which we published some months ago. A few changes have been rendered necessary, in consequence of the state of affairs in Afghanistan. For instance, the 66th Regiment has taken the place of the 48th in the list of corps ordered to England, and the 2nd Battalion 24th, 61st, and 98th Regiments have been despatched to India from the Mediterranean, instead of the 38th and 41st; but in all other respects the original programme, as drawn up by the Quartermaster-General's Department in the spring, stands good.

The decision of the Horse Guards to bring home the 66th Regiment this winter is a wise one, considering the condition in which the regiment must necessarily be, after having suffered as it has done at the hands of the enemy in Afghanistan. The regiment stands some way down the roster, but it would most probably have come home next winter under ordinary circumstances.

The decision with regard to the 66th Regiment will affect its link, the 49th, which will now be placed on the roster of regiments first for service, and will doubtless proceed abroad in the course of the relief season 1881-82.

All the regiments coming home have their links abroad, with the exception of the 85th and 83rd. The regiments affiliated with these corps are the 52nd and 86th. The latter corps is, as our readers are aware, under orders to embark for Bermuda, whilst the former will doubtless embark for India in 1881-82.

Some of our contemporaries have been rather "out of it" as regards the arrangements which the Quartermaster-General's Department at Simla had made for the quartering of the regiments which have been lately dispatched to India, as the programme now to hand will show.

A correspondent makes a suggestion with which we cordially agree, the subject having lately received attention in our columns. We consider the matter of so much importance that we give "Fair-play's" letter the prominence it deserves. Our correspondent says:—"The 50th Regiment has been at home upwards of eleven years, and remains so; the 86th Regiment has been but five and a half years at home, and is under orders to proceed to Bermuda. The 97th Regiment, linked to the 50th Regiment, has been seven years on foreign service, and is to proceed from Nova Scotia to Gibraltar, to relieve the 2nd Battalion Rifle Brigade, which, after but just six years at that station, is to return to England. If it desired to bring into full operation the linked-battalion system, with a minimum of injustice to regiments, the 50th Regiment should relieve the 1st Battalion 19th Regiment at Bermuda, and its linked battalion, the 97th Regiment, be brought home, the relief of the 2nd Battalion Rifle Brigade being postponed for another year, or if necessary, carried out by the 86th Regiment."

A careful examination of the new *Quarterly Army List* will show that the five senior subalterns in the Regular Land Forces, who have not exchanged since they obtained their first commission, are all in the same regiment, viz., the 32nd Light Infantry. They all purchased their promotion with the exception of one, who got his lieutenancy through a full-pay retirement step in his regiment. Within the last four months, the six senior subalterns of the 32nd have been offered companies in other corps, but they have all declined to accept them. Does not this speak for itself, as the unsatisfactory working of the present Regulations? We doubt whether there is any similar case on record where the five senior subalterns in the Army (not counting those who have exchanged or those who have been on half-pay), belonged to the same regiment, and that a single battalion. Few words are required to explain the chief reason why the officers in question have refused promotion. They cannot see the slightest chance of getting their regimental majorities before the not far-distant period arrives, when they will be politely bowed out of the Service, and consequently they do not care to leave their old corps, of which they naturally feel proud, and are fond, for a little easier and less disagreeable work and a small increase of pay.

We learn from Hobart Town by last mail that the case of Lieutenant-Colonel Windle St. Hill, 19th Regiment, late Private Secretary to Governor Weld, and Commandant of the Local Forces, is creating great excitement throughout the colony, and that the utmost sympathy is expressed for Colonel St. Hill in the unfortunate position in which he finds himself placed. So high, in fact, does feeling run that the matter was to have been brought before the Colonial Parliament, and was to have been made the subject of a vote of want of confidence in the Ministry, two out of four of the Members of which avowed themselves in the officer's favour. Colonel St. Hill was coerced last January into sending in his papers to retire from the Army, and though he telegraphed home to be allowed to withdraw them, he has not been permitted to do so. It deserves to be mentioned that when Colonel St. Hill arrived in Tasmania in 1877, there was not a single Militiaman or Volunteer in the island. He organised the force as it now stands, in fact, inaugurated the whole system of defence, and vacated his appointment, leaving the colony in possession of between 800 and 900 men, properly armed, drilled, and equipped. And yet, notwithstanding the great service he had rendered to the colony, he has been dismissed the Army on some paltry plea, and ruined for life. Such treatment of a deserving soldier is not creditable to those concerned.

The *Times*' correspondent at Berlin gives a list of the English officers attending the German manœuvres. He says:—"With the Duke of Cambridge there are Colonels Hale and Stephens, A.D.C.'s; with the Duke of Connaught, Colonel Sir Howard Elphinstone, R.E., Major Viscount Downe, 1st Life Guards, Major Lane, and Lieutenant Bartle Frere; with Sir Garnet Wolseley, Colonel Boisragon, Bengal Staff Corps, Captain Wardrop, 3rd Dragoon Guards, and Captain Turner, R.A.; while Colonel Villiers, the English Military Attaché in Russia, has stolen a few days from the excellent work he is doing at St. Petersburg, to take the opportunity of seeing the famous German Guard.

We stated some time ago that it had been determined to provide new quarters for officers at Belfast, the old buildings having been condemned after fever in a most virulent form had attacked more than one officer of the 104th Fusiliers, occupying the station. We learn now that a contract has been entered into for the erection of the buildings, at a cost of £10,000.

A sum of £75,000 will have to be expended in preparing the fortifications at Malta and Gibraltar for the reception of the 100-ton guns which it is proposed to add to the armament of those two fortresses, and orders have been given for the works to be proceeded with at once, in anticipation of the despatch of the guns from England, as soon as they are ready to be placed in position.

When will the authorities awake to the necessity of ensuring that the Militia shall possess the means of instruction in the use of their weapons? At this moment, of our 135 Infantry Battalions, 64 only, or nearly one-half, are provided with qualified musketry instructors; and, although it is expressly laid down in the Militia Regulations that these appointments should be held by subalterns, there are only 16 instructors of that rank. It is high time that a deficiency so serious should be remedied, and commanding officers should be called on without delay to send in the names of suitable subalterns for instruction. We cannot believe that many regiments can be so wanting in spirit as not to be able to furnish one competent officer, were the duty put plainly before them. Till they have done so, they have small claim to that efficiency which the country expects from them.

There is another respect in which the Veterinary officer suffers in comparison with other departmental officers. By the present Warrant, he is entitled after 20 years' service to retire on 9s. a day. Now the medical officer, after the same period of service draws £1 per diem—a difference of 11s., or more than half. Such a marked contrast between the pay and position of the members of two sister professions cannot be desirable, putting aside all questions of justice.

The sum of £1,400 is now expended annually in providing good-service pensions for officers of the Army Medical Department. The sister department enjoys the magnificent sum of £50 per annum! The oldest veterinary officer now living is Staff Veterinary-Surgeon J. W. Gloag. Mr. Gloag was principal veterinary-surgeon in the Crimea, and has been close on fifty years in her Majesty's Service, was senior of his rank at the time he was retired, and is in possession of the most flattering testimonials ever perhaps granted to a departmental officer. Yet, as the *Army List* shows, he is neither decorated with the Bath, or in receipt of a reward for distinguished service. Such inconsiderate treatment of a body of most deserving officers is not creditable to those in authority. Now that the medical officers have succeeded in obtaining a further grant of £700 per annum to be distributed in distinguished-service rewards, the claims of the Veterinary Department can no longer be overlooked, and we shall hope shortly to learn that men like Mr. Gloag have been selected to receive some measure of recognition for the service they have rendered to the State.

The Navy.

ADMIRALTY, Sept. 11, 1880.

Royal Marine Forces.—The following promotions, dated Aug. 26, 1880, have taken place in the Royal Marine Light Infantry, viz.:—Captain and Musketry Instructor Matthew Henry Farquharson to be Major, vice Rodney, retired, unfit for further service; and Lieutenant and Adjutant Arthur Emerson Chapman to be Captain, vice Farquharson.

ADMIRALTY, Sept. 14, 1880.

The following promotions have been made from Sept. 11, 1880:—Lieutenant John Pakenham Pipon to be Commander in her Majesty's Fleet; Sub-Lieutenants Henry Culling Burrows, Hon. Gerald Fitz-Maurice Digby, Claud Gore Lindsay, to be Lieutenants in her Majesty's Fleet.

The following Retired Commanders, having attained fifteen years' seniority as Commander, have been permitted to assume the rank and title of Retired Captain from the 11th inst., in accordance with the provisions of her Majesty's Order in Council of July 21, 1876, viz.:—Edward Barkley, Francis Bland Herbert, Francis Rhodes Hartwell.

Chaplain the Rev. John Brabazon, M.A., has been appointed Naval Instructor in her Majesty's Fleet, with seniority of 9th inst.

ADMIRALTY, Sept. 15, 1880.

Fleet Surgeon Henry Fegan, C.B., M.D., has been promoted to be Deputy-Inspector-General of Hospitals and Fleets in her Majesty's Fleet, from the 11th inst.

ROYAL MARINE FORCES.

The following promotions have taken place in the Royal Marine Light Infantry, viz.:—Captain and Brevet Major and Musketry Instructor Joseph Philips to be Major, vice Wroot, retired (Aug. 26, 1880); Captain Jacob Mortimer Weir Silver to be Major, vice Macdonald, retired (Aug. 28, 1880); Captain and Gunnery Instructor Henry Harford Strong to be Major, vice Mackintosh, retired (Sept. 1, 1880); Lieutenant and Adjutant George Hobart to be Captain, vice Philips (Aug. 26, 1880); Lieutenant and Assistant-Musketry Instructor William Powell Rumley to be Captain, vice Silver (Aug. 28, 1880); Lieutenant Horatio Horace Morgan to be Captain, vice Strong (Sept. 1, 1880).

APPOINTMENTS.

Captains—H. F. Stephenson, C.B., to the Carysfort; R. E. Tracy, R. H. Boyle, E. C. Drummond, F. S. Clayton, H. J. Carr, and H. B. Stewart, to the Royal Naval College for study (to join Sept. 30, 1880).

Commanders—H. T. Hughes-Hallett, to the Duncan, for the Superb; C. P. G. Hicks, to the Hector; E. H. M. Davis, G. H. Rainier, O. Churchill, and G. L. Atkinson, to the Royal Naval College for study (to join Sept. 30, 1880).

Lieutenants—James Henry Corfe, to the Moorhen (in command), vice Carey, whose period of service has expired; the Hon. Francis R. Sandilands, to the Mosquito (in command), vice Grey, whose period of service has expired; J. E. Cochrane, to the Hercules; R. O. Polwhele, to the Tamar; Castel Sherard, to the Assistance; H. J. Robilliard, E. Payne, P. C. Underwood, R. B. Sayce, T. F. Pullen, R. Powell, J. S. Muggeridge, E. L. Wilson, H. Preedy, A. S. Mills, H. M. W. P. Johnson, E. B. B. Levett, E. J. W. Slade, A. E. Rawnsley, K. Wade, G. Hewett, H. Lyon, F. M. Royds, and H. C. Kingsford, to the President, additional, to study at the Royal Naval College.

Navigating Lieutenants—W. M. Savage, B. St. G. Deane, C. E. Drake, J. Henderson, T. E. B. Cope, H. Buckler, and A. R. P. Bawden, to the President, additional, to study at the Royal Naval College.

Sub-Lieutenants—J. P. Rolleston and T. Burnand, to the Inconstant.

Midshipmen—C. W. M. Plenderleath, E. L. D. Boyle, Sir C. Cust, Bart., C. de la Glanville, F. H. E. Shipton, P. A. Lloyd, and A. C. Sim, to the Carysfort.

Naval Cadets—R. T. M. Berkeley, C. F. Henderson, and R. Morris, to the Achilles.

Chaplain and Naval Instructor—Rev. J. A. Dougherty, to the Carysfort.

Staff Surgeon—R. G. Bird, to the Carysfort.

Paymasters—J. T. Greet, to the Royal Adelaide; E. Tisdall, to the Tourmaline.

Assistant-Paymasters—R. C. Hodder, to the Duncan; W. H. Rae, to the Alexandra; W. A. Harvey, to the Express.

Surgeons—G. J. Fogerty, to the Carysfort; M. O'C. McSwiny, to the Revenge; William Pearson, M.D., to the Royal Marine Artillery.

Engineers—T. F. Brown, to the Pembroke; W. Walker (a) and E. C. Spencer, to the Indus.

Clerk—C. H. Smith, to the Tourmaline.

Assistant-Clerk—H. H. Share, to the Tourmaline.

Chief Gunner—J. T. Freeman, to the Asia.

Acting Gunner—W. Phillips, confirmed in rank of gunner.

Boatswain—Thomas Clemas, to the Belleisle.

PROMOTIONS.

Lieutenant—J. P. Pipon, to be Commander.

Sub-Lieutenants—H. C. Burrows, Hon. George F. Digby, and C. G. Lindsay, to be Lieutenants.

Chaplain—Rev. John Brabazon, to be Naval Instructor.

Assistance, Capt. Claude Buckle, has been appropriated to convey troops and Marines between Portsmouth, Plymouth, and Ireland. She left Portsmouth on Wednesday, and will return from Queenstown to Portsmouth and Plymouth on the 18th inst.

Bacchante, Capt. Lord Chas. Scott, left Spithead on Wednesday evening for Vigo, and probably to Lisbon, previous to becoming attached to Lord Clanwilliam's flag. The Prince of Wales, accompanied by Princes Albert Victor and George, and attended by the suite, left Marlborough House shortly after 10 o'clock on Tuesday morning, *en route* for Portsmouth, and quitting London at 10.55 a.m. by special train, arrived at the South-Western Railway Jetty at half-past 12. The Royal party at once embarked on board the Osborne, Royal yacht, and were conveyed to Spithead. Here they left the yacht and proceeded to the Bacchante in a steam launch, and were the guests of the officers at luncheon. The Bacchante sailed at half-past 5, and was brought up off Cowes. The Prince of Wales returned to Portsmouth in the Osborne at half-past 6, and left immediately for London. The Bacchante put into Portland yesterday through stress of weather.

Blanche, Capt. G. F. Knowles, which has been on a visit to Prince Edward's Island, was to join the flag at the end of August.

Carysfort. Capt. Henry Frederick Stephenson, C.B., who commissioned this ship at Sheerness on Wednesday, entered the Navy in 1855, and obtained his commission as lieutenant June 7, 1861. He served in the Emerald with the Channel Squadron from the following Sept. until appointed, in May, 1862, to the Cormorant, and sailed shortly afterwards for the East Indies. In Jan. 1863 he removed into the Euryalus, flagship at China, and in May became senior of the Rattler, under Com. Webb, also at China. He remained in the Rattler until Feb. 1865, when he again joined the Euryalus, and in her returned to England, and was paid off in Sept. In March, 1866, he obtained command of the Heron, gunboat, fitting for the West Indies and North America station, and was engaged on the Canadian lakes during the Fenian scare. On Jan. 31, 1867, he was appointed flag lieutenant to the Hon. Sir Henry Keppel, Commander-in-Chief on the China station, and was promoted to the command of the Rattler in the vacancy caused by the death of Com. John T. Swann, with seniority from April 26, 1868. The Rattler was, unfortunately, lost on the north coast of Yesso, Japan, in Sept. 1868. On Oct. 1, 1870, he was appointed second captain in the Vanguard, Capt. E. H. G. Lambert; on April 1, 1871, was turned over to the Iron Duke, and in Aug. was transferred to the Caledonia, in the Mediterranean. On Jan. 6, 1872, he became second captain in the Royal yacht Victoria and Albert, Capt. the Prince of Leiningen, G.C.B., from which he was posted, Jan. 6, 1875. He commanded the Discovery with the Arctic Expedition, under the leadership of Capt. George S. Nares, F.R.S., from April, 1875, until Dec. 1876. Capt. Stephenson, who has received four medals and two clasps for his services, was nominated C.B. Dec. 9, 1876, and was afterwards gazetted to be equerry-in-waiting to H.R.H. the Prince of Wales, vice Major John Cecil Russell, resigned, and who was appointed an extra equerry to his Royal Highness.

Cleopatra, Capt. F. Durrant, moved out of harbour into Plymouth Sound on Wednesday, to prepare for her steam trials.

Druid, Capt. W. R. Kennedy, had, by late accounts, gone to help a steamer ashore about 18 miles from St. John's. The Contest, Flamingo, and Druid were to be at St. John's on Aug. 25, and after giving leave to the crews, would proceed on the 10th inst. on a second fishing cruise, returning in Oct. to St. John's, and afterwards proceeding to Halifax.—*Portsmouth Times.*

Elk, Com. H. Clanchey, arrived at Monte Video on Aug. 1 from Buenos Ayres, and had been ordered to proceed on a short cruise at sea.

Esk, Lieut.-Com. Haszard, detailed for the service of the Royal Naval Artillery Volunteers, has arrived at Sheerness. Whilst off Cowes the Esk was inspected by H.R.H. the Prince of Wales, attended by Capt. Stephenson, C.B., and Com. Lord C. Beresford. His Royal Highness took great interest in the Volunteers, and expressed himself very pleased with the state of the vessel and the appearance of the crew. This detachment of Volunteers, under the command of Sub-Lieut. Browning, concludes the cruising for this year.

Forester, Lieut.-Com. S. Smith, which has been visiting the ports of New Brunswick, was to join the flag at the end of August and pay a visit to Quebec.

Forward, Lieut.-Com. Brickdale, was at Monte Video on Aug. 8, and was expecting to arrive at Buenos Ayres very shortly.

Garnet, Capt. Loftus Jones, had returned to Monte Video from Buenos Ayres and Maldonado on Aug. 8, and was to leave almost immediately for a visit to Rio de Janeiro.

Griffon, Com. F. R. Boardman, arrived at Trinidad on Aug. 24 from Barbadoes, having visited St. Lucia, St. Vincent, and Grenada on her way down. Lieut.-Governor Young was expected there that day from Demerara to administer the Government, pending the arrival of Sir Sandford Freeling. Free passes to officers and men of the Griffon had been issued by the officials of the Trinidad Government Railway.—*Western Morning News.*

Hornet, Com. Eaton, which left England on Jan. 19, 1869, and was recommissioned at Hong Kong in February, 1877, was paid off at Portsmouth on Saturday into the fourth division of the Steam Reserve.

Invincible, Capt. the Hon. E. Fremantle, C.B., C.M.G. A Reuter's telegram from Malta, dated Sept. 12, says:—"Her Majesty's ironclad Invincible proceeded for Syracuse last evening."

Iris, Capt. E. H. Seymour. The statement of a contemporary, that it had been decided to order three new vessels of the Iris class, is premature. The remark that these three vessels would cost more than £400,000 is certainly true, inasmuch as the Iris and Mercury alone have cost considerably more than that for hull and machinery. Then there are the extensive steam-trial experiments, trials of all sorts of screws until they happened to get one that they thought would do, and the alterations in rig, to be paid for. And even after all that had been done, the Iris took another £1,500 out of the yard before she was fit to start for a trip to the Mediterranean. The latest reports from the ship are not very encouraging, and if poor Mr. Ward Hunt were alive he would be inclined to tell the designer that he had been led to hope for too much when he believed what he was told at the time the ships of this class were designed. But the department has not lost all hope, for the Mercury remains for them to experiment with, and when they have spent a few more tens of thousands in trial-trips, &c., we may have a despatch-vessel of this class nearly equal to what is required of her.—*Hampshire Telegraph.*

Jackal, Lieut.-Com. Hon. R. Bingham, having completed her duties on the west coast of Scotland while the herring fishery lasted, has now been ordered to the east coast of Scotland, and has arrived at Inverness.

Kingfisher, Com. R. H. Thornton, arrived at Sheerness on Saturday evening, having been absent from Sheerness on a ten days' trial of her engines and machinery in the Channel. Everything was found to answer very satisfactorily. She takes in her powder and other necessary stores, and leaves for the Pacific, where she will relieve the Osprey.

London, Capt. Brownrigg. A report has been received of the capture of another dhow and the liberation of a slave. That these captures should be made is a sufficient proof of the vigilance of the boats of that ship, and I only regret, for the sake of the men, that the reward is not greater. But the traffic has been greatly reduced owing to the watchfulness of our cruisers, and as a result only a few comparatively small seizures are now to be made. The share of the lowest class for the bounty awarded for the capture of twelve slaves was only 5d. The Captain's share was £5, that being just the difference between being "the skipper" and "the boy." But the total shows that even we do not put an extraordinary value on the head of a slave, although we take a vast amount of trouble to prevent anyone else from having him and selling him at a high price.—*Hampshire Telegraph.*

Martin, Lieut. A. C. B. Bromley, arrived in Plymouth Sound on Saturday night from Portsmouth.

Minotaur, Capt. Rawson, bearing the flag of Vice-Admiral Hood, commanding the Channel Squadron, is to be out of the dockyard hands at Portsmouth by the 20th proximo. In consequence of the great demands which are being made upon the Chief Constructor's Department, it will not be possible to carry out the programme of defects and improvements to its full extent. It is hoped that there will be time to fit the Brush system of electric lighting to the ward-room, engine-room, and the Admiral's quarters, but this is by no means certain. It was intended to provide the projectiles for her 9-inch guns with gas-checks, which would necessitate new shot-racks and magazines, but this will be deferred for the present, as well as the proposed supply of Nordenfelt guns. Her boilers, which had been previously reduced to a pressure of 25 lb., have been drilled and examined, and it has been proved that by still further diminishing the pressure to 23 lb. to the square inch, they will serve for another commission of 18 months.

Northampton, Capt. J. A. Fisher, flag of Vice-Admiral Sir L. M'Clintock, was at Halifax on Aug. 20, and was to proceed to Father Point by the end of the month.

Orontes, Capt. Kinahan, left Bombay for Natal on the 7th inst., and there embarks troops for passage to Bombay, whence she will return to England with reliefs and time-expired men.

Pelican, Com. F. R. Dicken, has just paid a visit to Honolulu, her arrival at that place at the end of July having been reported.

Rambler, Com. Hon. A. Littleton, was commissioned at Sheerness on Wednesday for the West Indies station. Her seamen have been selected from the Royal Naval Barracks, while the Marines and stokers have joined from Chatham, and a detachment of seamen-gunners has been sent from the gunnery-ship Excellent.

Rupert, Capt. E. J. Pollard, arrived at Portsmouth late on Friday night last from Gibraltar, and proceeded to Sheerness on Saturday to prepare for paying off.

Serapis, Capt. Twiss, is being completed for sea with all dispatch at Portsmouth, as she is to embark troops for India on the 3rd prox.

Swallow, Com. J. B. Warren, has been on a round of visits to the Parana aad Uruguay River, and on arrival at Monte Video received orders to remain as senior officer's ship during the absence of the Garnet.

Tamar, Capt. Royse. The following is a programme of the intended movements of the Tamar:—Arriving: Queenstown, Sept. 17; Gibraltar, Sept. 23; Malta, Sept. 29; Cyprus, Oct. 5; Malta, Oct. 10; Gibraltar, Oct. 17; Barbadoes, Nov. 2; Jamaica, Nov. 12; Bermuda, Nov. 18; Portsmouth, Dec. 13.

Tenedos, Capt. E. S. Adeane, C.M.G., senior officer of the Windward Division, remained at English Harbour, Antigua, on Aug. 27.

Tourmaline, Capt. R. P. Dennistoun, arrived at Sheerness on Saturday afternoon from the North American and West Indies station. She was commissioned at Sheerness on Oct. 25, 1876, and is to be paid off in her present condition and recommissioned. She will then undergo a thorough refit, in view of joining the Detached Squadron.

Triumph, Capt. A. H. Markham, flagship of Rear-Admiral Stirling, was under orders to leave Esquimault for Honolulu on Oct. 1, and at that place she will be joined by the Penguin from Callao.

Valorous, Capt. G. D. Morant, in Keyham Yard under repairs, was placed in dock on Tuesday.

Victoria and Albert, Capt. Frank Thomson. The following is an epitome of the services of the officers promoted from her Majesty's yacht:—Com. John Pakenham Ripon served as sub-lieut. in the Zealous, Capt. Richard Dawkins, under the flags in the Pacific of Rear-Admirals the Hon. G. F. Hastings, C.B., and Arthur Farquhar, from Sept. 25, 1868, until 1870. He subsequently served in the Hercules, Capts. Lord Gilford and W. M. Dowell, with the Channel Squadron from July 1, 1870, until April, 1872, when he joined the Sealark, Lieut. P. C. Johnstone, tender to the Implacable at Devonport, and was promoted to lieut. Sept. 3 following. He afterwards studied for some time at the Royal Naval College at Greenwich, and on Jan. 1, 1874, was appointed to the Modeste, Capt. Frank T. Thomson, fitting for China, and continued to serve in the same ship under Capt. Alexander Buller, C.B., until June, 1877. On Oct. 17 following he was appointed to the Elk, Com. Alexander Tupman, on the south-east coast of America, from which ship, on Oct. 28, 1878, he was transferred to the Victoria and Albert.—Lieut. Henry Culling Burrows served as a naval cadet and midshipman on board the Ariadne, Capt. the Hon. Walter C. Carpenter, until Aug. 1873, when he was appointed to the Royal Alfred, Capt. H. F. Nicholson, bearing the flag, on the North America and West Indies station, of Vice-Admiral E. G. Fanshawe, C.B.; in Jan. 1874 removed into the Druid, Capt. A. G. R. Roe, on the same station; and in Jan. 1875 was transferred to the Bellerophon, Capt. R. Wells, flagship of Vice-Admiral G. G. Wellesley, C.B., and continued to serve in the same ship under Capt. Hugh Campbell and the flag of Vice-Admiral Sir A. C. Key, K.C.B., until promoted to acting sub-lieut., July 19, 1876, into the Encounter, Capt. Richard Bradshaw, and remained until 1877. He subsequently studied at the Royal Naval College at Greenwich, and on Jan. 15, 1878, joined the Shannon, Capt. W. B. Grant, with the Channel Squadron, from which ship he was transferred to the Bacchante, Capt. the Right Hon. Lord Charles T. M. D. Scott, and in April last was appointed to the Victoria and Albert.—Lieut. the Hon. Gerald FitzMaurice Digby served as a naval cadet in the Royal Alfred, Capt. H. F. Nicholson, under the flag, on the North America and West Indies station, of Vice-Admiral E. G. Fanshawe, C.B., from Aug. 1873 until Dec. following, when he removed as midshipman into the Bellerophon, and remained until the close of 1876. On Jan. 2, 1877, he was appointed to the Alexandria, Capt. R. O'B. Fitzroy, fitting for the flag, in the Mediterranean, of Vice-Admiral G. T. P. Hornby, and on March 20, 1878, was promoted to sub-lieut. He subsequently studied for some time at the Royal Naval College at Greenwich, and from June 4, 1879, until appointed to the Victoria and Albert in April last, served in the Liberty, tender to the Implacable, Lieut.-Com. George O'Connor.—Lieut. Claude Gore Lindsay served as midshipman in the Hercules, under the flag, in the Mediterranean, of Vice-Admiral the Hon. Sir James R. Drummond, K.C.B., from March, 1874, until March, 1877, when he was transferred to the Sultan, Capt. H.R.H. the Duke of Edinburgh, and was promoted to sub-lieut., April 14, 1878. He subsequently studied at the Royal Naval College, and from May, 1879, until April last, when he was appointed to the Victoria and Albert, served in the Dido, Capt. C. E. Domville, at the Cape of Good Hope and West Coast of Africa.

CHILI AND PERU.

The movement set on foot by Italy to effect a cessation of hostilities between Peru, Bolivia, and Chili, which was readily concurred in by England and France, has now received definite shape by the offer of the United States Government to interpose its good offices. This offer has been accepted by the belligerent Powers.—*Reuter*.

An officer of the Thetis, which has been stationed at Lima, in a letter to the *Western Morning News*, says that the then attitude of the belligerents (August 3) was one of respectful abstention. "Peru had suffered terribly from the late operations on the sea coast; less from actual legitimate fighting than from the fearful scenes of carnage, plunder, and worse, which attended the sacking of Arica and Tacna. Both these places were still a prey to utter lawlessness. Chilian officers profess to deplore these scenes, and excuse them on the plea of their inability to restrain the raw soldiery excited by victory and drink; but in some cases the shooting of victims was done by the orders of officers, and certainly the efforts to prevent pillage were not conspicuous. It is admitted that by 'accident' theBritish and other consulates were broken into, and people who had obtained refuge there were dragged out and massacred. The Chilians were preparing for their announced attack on Lima, but they said it would not take place for three months at least. The Chilians, indeed, seem to be drained almost dry both of money and men by their terrible expenditure of both, and peace would be welcomed by military and civilians on the side of the victors almost as much as by thePeruvians, the majority of whom seemed in a terror of apprehension."

THE PHAETON.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In a leading article of the *Army and Navy Gazette* of the 11th inst., touching on the gale experienced by the Phaeton on her way from Halifax to Bermuda in December, 1863, there are some inaccuracies which, as I commanded her at that time, I desire to notice. It is there stated that the ship at the time was commanded by Capt. Tatham, whereas I assumed that command in the previous September. The ship is described as being in very imminent danger, and only saved from destruction by steam-power. I never considered her to be in imminent danger, though her mainmast was so for a time, and nothing in my official letter to the Commander-in-Chief on the subject points to such a conclusion. The closing paragraph of that etter is as follows:—"The ship, with the assistance of the screw, behaved remarkably well." It is also stated that the ship was detained five months at Bermuda, in consequence of the magnitude of her defects, chain plates drawn, &c. The fact was, the ship had to wait there for a new set of lower rigging, previously ordered from England, in consequence of which all the vessels in the hands of the dockyard were completed before she was taken in hand. The only chain plate drawn was the small one for the main topmast backstay. It is further stated that the ship had to be ordered home, condemned, and broken up. The ship, in fact, continued to be actively employed on the station to the full extent of her commission, being paid off by me at Sheerness in March, 1865, after which event she remained many years in the Active List of the Navy. Kindly favour me by inserting this letter in your paper.—I am, &c.,

G. L. BOWYEAR,
Retired Vice-Admiral, formerly Capt. of H.M.S.
Phaeton, from Sept., 1863, to March, 1865.

Harbledown, Canterbury, Sept. 16.

[In inserting the above letter, it may be stated that the particulars we gave of the gale in which the Phaeton suffered so severely were furnished by an officer who was then serving in the ship. The lapse of time seems to have occasioned some defects of memory.—ED. *A. & N. G.*]

The following men have been awarded the long-service and good-conduct medal:—Henry Bentley, quartermaster, Royal Naval Barracks; Abraham Smith, leading stoker, Tourmaline; Frederick Lewis, gunner's mate, Defence; James Willcocks, stoker, and Thomas Thomas, leading stoker, Indus; Harry Richards, quartermaster, Excellent; Moses H. Cornford, stoker, H.M.'s yacht Victoria and Albert; Henry Bushell, leading stoker, Asia; and Walter Warner and Patrick Twoohig, boatmen, Coastguard.

USE MARGERISON'S REGISTERED WHITE WINDSOR SOAP, PRESTON.—The best and cheapest Soap in England for washing clothes, or any household purpose. Ask for MARGERISON'S Soap, and see that the word MARGERISON is on every bar, as there are so many worthless imitations. Sold at Stores.

THE SOUTH-AMERICAN WAR.

(FROM A NAVAL CORRESPONDENT.)

The war which is now being waged between Chili and the allied Republics of Peru and Bolivia does not naturally excite much interest among English people in general, and except those who are engaged in trade with these countries, and those who are so unfortunate as to hold Peruvian or Bolivian bonds, few, perhaps, give more than a passing glance at the occasional paragraphs on the subject. A few notes, however, upon the blockade and bombardments of Callao, from a naval point of view, may be interesting to those who watch the developments of naval warfare. The contending forces, both sea and land, are, of course, comparatively small; but Chili has taken advantage of all recent improvements, and we, who are on this distant station, may well put our pride in our pockets, if, indeed, we are allowed to possess any, after the lamentable loss of naval prestige resulting from the *Shah* and *Huascar* affair, and humbly take notes concerning what we are now silent spectators of. The last few months have probably been among the most eventful that the 250,000 inhabitants of Lima and its seaport have ever experienced, although earthquakes, wars, and revolutions are by no means uncommon in the history of Peru, for on April 10, 1880, the fleet of their hated and victorious antagonist appeared in the offing, and established the blockade of Callao and its adjacent ports. Callao, the strongly fortified seaport of Lima, from which it is distant about eight miles, is built on a low, sandy point, stretching out into the Pacific. A magnificent bay is formed on its northern side by the off-lying rocky island of San Lorenzo, and here, sheltered from the constant southerly wind and swell, lay several Peruvian and foreign men-of-war, and a large number of merchant vessels of all nationalities, crowding in and around the commodious docks which have recently been constructed. The shore is literally lined with batteries. Two huge 1,000-pounder smooth-bore Rodman guns on the Point command the narrow channel called the Boqueron, between the mainland and San Lorenzo; and twelve other batteries, including two revolving armoured turrets, protect the town. In these are mounted eighteen heavy guns,—500-pounder Rodman, and 300-pounder rifled guns, Armstrong, Blakeley, and Vavaseur, besides a large number of 32-pounder smooth-bores, which did good service in beating off the Spanish Fleet in 1866. The Island of San Lorenzo was, doubtless for some good reason known only to the Peruvian authorities, but quite incomprehensible to any one else, left undefended. Probably the Peruvian Fleet was deemed invincible, and sufficient to protect the bay without fortifying the island, but now the only vessels that remain, the *Atahualpa*, a harbour-defence monitor, and the fast corvette *Union*, both protected by booms, lay, with several transports, close to the town. On the morning of April 10, 1880, an event occurred which was startling to the neutral ships, as well as to the Peruvians. At 5 a.m., while it was still very dark, all were awakened out of dreams of security by the sound of a loud explosion near the *Union*. This was followed by a storm of musketry and Gatling fire, bullets flew at random in all directions, striking the ships and whistling through the rigging in a most alarming manner. The firing gradually died away, and presently daylight revealed the presence of the Chilian Fleet at the entrance of the bay. The Chilian Army having been safely landed for the attack on Tacna and Arica (since taken), the squadron had been sent 600 miles farther north to Callao, to blockade it. It consisted of the *Blanco Encalada*, flagship, a short, powerful central-battery ironclad; the *Huascar*, now flying an enormous Chilian ensign, and armed with Armstrong 70-pounders, in addition to her 10-in. turret guns; the *Pilcomayo*, a gun-vessel just captured from the Peruvians; the *Angamos*, the "quondam" Cork pig-boat, still armed with her celebrated long-range breech-loading gun, with which she could probably bombard Gibraltar, without the least danger to herself. A transport with coal, and two torpedo-boats, one a 22-knot Yarrow, the other a 15-knot American-built boat, completed the squadron. It was soon known that the 15-knot American torpedo-boat had come during the night to endeavour to sink the *Union*, the corvette the Chilians dread as a possible *Alabama*. The expedition failed, however, and of the two outrigger torpedoes, one was broken by a collision with a buoy, and the other had to be exploded under the spars which protected the Peruvian vessel. The result was, that the ship escaped with a severe shaking, and the torpedo-boat had to beat a hasty retreat in the darkness, accomplishing this, however, in safety, in spite of the hot Gatling and musketry fire which followed her. Here it may be noted that from the position the boat had attained unobserved (twenty yards from the vessel), it is perfectly certain that the *Union* would have been sunk by a Whitehead, had the Chilians possessed them; as it was, the much talked about moral effect was such, that during the day both ships were withdrawn inside the docks, and fenced in with booms, so that they could neither move nor use their guns. Admiral Riveros now sent on shore an official notification of blockade, giving neutral vessels ten days to clear out before he should commence hostilities. Then ensued such an exodus as is rarely seen. The 50,000 inhabitants commenced clearing out, bag and baggage. The road to Lima for ten days was one continuous stream of vehicles of every description. Trains ran night and day. The merchant vessels began to leave, and the Pacific Steam Navigation Company closed their works, and, with their numerous steamers, hulks, and lighters, emigrated in a body to a northern port. The foreign men-of-war anchored among a host of vessels about three or four miles north of the town. All business was stopped, and by the given day, April 20, the harbour and the town were empty, only the poorest people and the troops remaining. At one p.m. on April 22 the Chilian Squadron steamed out from San Lorenzo, where, as the island was not fortified, they lay quietly at anchor every day, five miles from Callao, and placed themselves in position for opening fire on the Peruvian ships in the docks, the *Huascar* and *Pilcomayo* at a distance of 6,000, and the *Angamos* at 7,000 yards. The *Blanco Encalada*, with her six 9-in. M.L.R. guns, identical with those in the English Service, remained in rear, unable to take part in the bombardment without going within range of guns that could easily pierce the 6-in. armour round her battery. The scene that ensued was rather exciting, though a game of very long bowls. During the afternoon the Chilians fired 81 projectiles, making excellent practice, shell after shell falling close to the Peruvian vessels, some striking their upper works showing above the dock wall. These, on bursting, killed and wounded several men, but did not do any very serious damage to the ships. In the town, several houses behind the docks were wrecked; but this was almost accidental, as the Peruvian ships were the real objects of attack. On the other hand, the guns in the forts with extreme elevation could not range as far as the Chilian men-of-war, and though 127 projectiles were thrown, they simply dropped into the sea, generally far short of the attacking squadron. At dusk the Chilians withdrew, and renewed what soon became a monotonous blockade. In the daytime they lay at anchor under the outer extremity of San Lorenzo, leaving one ship on guard in the bay; but at night they all kept out at sea, keeping a sharp look-out for Peruvian torpedo boats. In night blockading work the Chilian torpedo-boats proved themselves very useful, and, indeed, without them the ironclads could not possibly have prevented the escape of the *Union*, had she attempted to do so, Callao Bay being nearly seven miles wide; but these fast and almost invisible boats could remain unnoticed within a mile of the docks, and, besides being dangerous antagonists themselves, would have signalled to the ironclads if they observed any movement of the Peruvian corvette. Both the *Blanco Encalada* and *Huascar* were fitted with the electric lights; these were occasionally used at night, but being of inferior power were practically not much good. It was obvious that a powerful light would have been extremely useful for several purposes, viz., for a night bombardment, for detecting and preventing the escape of the *Union*, for discovering Peruvian torpedo-boats, and for signalling to their own, usually four miles away. On April 23, the Yarrow torpedo-boat made a night torpedo-attack, which failed, as she was unable to pass the booms at the entrance of the docks. She escaped, though fired at. The Chilian corvette *O'Higgins* having joined the squadron, another bombardment took place, on May 10. The *Blanco* and *O'Higgins* made a combined attack on the 1,000-pounder battery on the Point, at a distance of about 3,000 yards. After some very narrow escapes from the Rodman "smashers," they had to withdraw without dismounting the guns or doing much damage to the battery; 40 soldiers were killed. The other ships bombarded from a position beyond the range of the Peruvian guns until the *Huascar*, venturing to steam closer in, in order to use her turret 300-pounders, was struck below the water-line and a water-tight compartment filled. She at once withdrew out of range, but was able to continue the action with her long-range 70-pounders on the quarter-deck. At 5 p.m. the Chilians withdrew. Most of the Peruvian vessels were struck, but the dock walls, now surmounted with a breastwork of sand-bags, protected them from serious injury, as on the first occasion. Not much damage was done to the town. Two other long-range bombardments took place, on May 27 and 29, fully proving the value of Sir W. Armstrong's breech-loading guns of recent construction with which the Chilian ships, except the *Blanco Encalada*, were armed. These bombardments were occasioned by the discovery of some mechanical torpedoes (constructed on McEvoy's plan of a vibrating weight releasing a trigger) drifting about near the Chilian ships. They were sunk by being fired at, and in retaliation the squadron opened fire again, this time sinking a coal hulk and a sailing sloop which were inside the docks. The only event of note during the month of June was the loss of the Chilian Yarrow torpedo-boat. Many accounts, very different from each other, have been published of this, but the most probable is the following, obtained from the *Blanco*. On a very dark night, the Yarrow boat, armed with a stem and two side-swinging boom torpedoes, came across a large Peruvian steam-launch not far from the docks. The Chilian at once attacked, and tried to place her stem outrigger torpedo under the Peruvian boat (a decked steamer of some ten or twelve tons); this failed, and then another attack was made with the port swinging-side torpedo. Unfortunately, the boats were almost side to side, and there was not room for the spar to swing out. The Chilian lieutenant in command thinking that the torpedo was clear of his own boat, pressed the firing-key, the torpedo exploded, blowing in the sides of both launches.

The Peruvian sank at once, and many lives were lost. The Chilian sank shortly after, most of her crew being picked up by the torpedo-boat which accompanied her. This was a serious loss to the Chilians, as she had been brought out from Europe at great expense. However, in less than a month another similar launch arrived from Valparaiso. The blockade still continues, and will probably be kept up until the Chilian army arrives to make the grand attack on Lima, for which great preparations are now being made. The result is hardly doubtful,—on the one hand, the Chilians, confident from repeated victories, well armed and equipped, well commanded, and with splendid artillery; on the other, the Peruvians, already crushed, their army and navy almost destroyed, only their overbearing pride remains, and this it seems too likely will make them refuse all terms until they are annihilated as a nation, without a hope of recovery for years to come.

THE WIMBLEDON SCANDAL COURT-MARTIAL.

The court-martial on Serjt. Marshman, on charges of fraud as a marker, was resumed on Tuesday. Major A. H. Ozzard, R.M.L.I., appeared to prosecute, assisted by Mr. Alexander Staveley Hill, Q.C., M.P. (Counsel to the Admiralty and Judge-Advocate to the Fleet), instructed by the Solicitor to the Treasury, and Mr. Edwin J. Harvey, Admiralty law agent at Portsmouth. The prosecutor delivered an elaborate reply to the speech for the defence. It was contended that at the Wimbledon meeting of 1878, the prisoner formed the idea of obtaining for a pecuniary consideration false scores, and that on subsequent occasions he had stated that he had the power to secure a winning score, and was willing, for remuneration, to use such power. The prosecutor then defended Serjt. Sage from the aspersions the prisoner had cast upon him, and contended that the charges against the accused could be substantiated, even without relying on Sage's evidence at all, and that the prisoner had actually carried out his plan of fraudulent marking. The prosecutor, in conclusion, pointed out that the prisoner had said in his first speech that if the case for the prosecution was true, they had no less than 42 men, meaning the whole of the gunners engaged in marking at butts 11 to 20, engaged in this alleged fraudulent transaction, and with a view to meet such a case he proposed to call the whole of the men of the Marine Artillery who were engaged in marking in that butt, and no doubt if the fraud had been carried out in the way in which the defence would thus suggest that it was done, this difficulty would have arisen; but it was to meet this, he hoped impossible, contingency of his being able to find such a number of men willing to act in the fraudulent transaction that the prisoner was driven into the difficulty of taking an improbably high score, because inasmuch as he could not ensure but that some very high score would be made at some of these targets, he, if he would secure the top score for the person with whom he was engaged, was driven to the necessity of having signalled to him such a score as was signalled up to Runtz. There was, then, no necessity for arranging with, or even influencing, any other persons than those who were marking at the very target at which the shots were being fired. The prisoner had sought, in the cloud of witnesses brought forward, to hide the guilty men. Their evidence had really no bearing on the case. All that had to be done was to secure the one, or at most the two, markers at that target. The prosecutor concluded as follows:—With regard to the conversations on the subject of the charges, the questions for the Court are:—First, were these statements made by the prisoner; second, were they made with a fraudulent intention, if they have been proved to have taken place, and to have been with the intention of inducing persons to whom they were thus spoken to join him (the prisoner) in an attempt to defraud the National Rifle Association and others, their fellow competitors, for the prizes offered them? The first, the second, the fourth, and sixth charges have been proved, and it will be the duty of this Court to find a verdict of guilty against the prisoner upon those charges; and if the prisoner, being in butt 11 to 20 on the 23rd day of July, did cause to be signalled up by the marker in that butt a false score, being the score which he had previously arranged, being the score which the two men then at the firing-point expected to find allotted to Runtz—then, looking at the manner in which the score had been arranged and was obtained, it must, I submit, be your duty to find a verdict of guilty also against the prisoner upon that charge. The prisoner has, in conclusion, in answer to these charges, called before you witnesses as to his character; but I must ask the attention of the Court to this fact, that whilst those witnesses have been called to speak as to their satisfaction with him in his military duties, whether at the preliminary drill, or at the firing-point, or in other military work, it has been thought prudent by the prisoner not to ask them one single question as to his general character for honesty, which is the question at issue here. For myself, sir, I have had to discharge a most difficult and, I I may say, painful duty, in bringing this case before the Court, involving issues fraught with considerable risk to the well-being of an association in which I, certainly not less than others, have taken a very deep interest, but involving also the duty of bringing home a charge of dishonesty against a man who has long been a serjeant in my own corps, and whom I have known so well that he has felt it his duty to call me as a witness to his character. I now, sir, however, lay the whole of this evidence before the Court, feeling sure that they will look simply to the evidence that we have laid before them, that they will throw off, as far as they can, all the extraneous matter that has been imported into this case, and will say whether or not it has been proved before them that the prisoner is guilty of the charges now brought against him.—The Court then adjourned to allow the Deputy-Judge-Advocate time to complete his summing-up.

On Thursday, the last stage of this long inquiry was reached by Major Blake, deputy-judge-advocate, summing up. He said it was a necessary ingredient in the case that there must have existed fraudulent intent, and it was the duty of the prosecution to prove it. He submitted the question, first, whether upon the whole of the evidence the Court considered Serjt. Sage to be a trustworthy witness, and, secondly, whether his evidence established fraudulent conduct on the part of the prisoner. Upon his own statements, Sage more than two years ago received proposals from the prisoner which he believed to be fraudulent, yet he took no steps to report the matter. Again, in the following year he did not report having listened to similar proposals. Referring to Sage's demeanour, Major Blake pointed to the fact of the witness complaining that his hand shook too much for him to write the word "Alexandra;" and, referring to the entries in Sage's book, alleged to have been made by the prisoner, he said that they might have been made with an honest intention. When they came to Adams, they found that he did not corroborate Sage, although they were standing close together. Adams said he heard no fraudulent conversation, but he acknowledged having joined in the fraud without making any report to the authorities. Both might therefore be credited with dishonest motives, although that did not imply that they could be considered guilty of perjury. If they found the prisoner guilty on the first charge that would help them on all the issues. The allegation on the first charge was that the prisoner promised Sage any of the top prizes, but it was in evidence that all the top prizes were shot for by large numbers of competitors and at various targets. Therefore the prisoner, to be able to obtain these prizes fraudulently, must have had control over a considerable number of register-keepers and markers. On the second charge, they would have to consider whether the words, as alleged by Sage, were really uttered, and then, supposing they were uttered, whether they might not have been the result of mere brag. The third charge rested principally on the evidence of Sage, and it was a matter to be borne in consideration that the prosecution had withdrawn it. The fourth charge also rested on the word of Sage, but Runtz being introduced into it was an all-important feature, and they would have to consider what kind of man this which he showed himself to be. On the one hand, it would seem unlikely that Sage would trust his plans to a man of the culture of Runtz; and on the other, it might be urged that Sage considered the introduction of Runtz, a gentleman of unquestionable reputation, would be a good means to carry them out. As to the fifth charge, they had the direct testimony of Gunner Tifler and of Chester against the circumstantial evidence of Runtz and Humphry, and it was for the Court to decide which they would accept. With regard to the sixth charge, unless they believed that the evidence in the other charges established fraudulent conduct, they would not convict upon that, because the circumstances were very similar.

Major Blake's address occupied an hour in delivery, and the Court at its conclusion was cleared for deliberation. In twelve minutes the doors were thrown open, when Major Blake said:—"The Court was cleared for deliberation, and the finding is now pronounced. The Court finds 34th Company Serjt. William Marshman, Royal Marines, not guilty of the charges."

The President (to the prisoner): "Serjt. Marshman, you are released from arrest, and will return to your duty."

The announcement was cheered by the persons who had assembled outside the court.

NAVIGATING AND PILOTAGE DUTIES OF THE FLEET.

With reference to Article 6 of the Addenda (1880), my Lords Commissioners of the Admiralty are pleased to issue the following additional regulations in Fleet Circular No. 30, N.:—1. A navigating sub-lieutenant who elects the lieutenants' list on promotion will be promoted to the rank of acting lieutenant. 2. If he pass in gunnery on the completion of the prescribed period of instruction, he will be confirmed with the seniority originally awarded him. 3. Should he fail, he will be re-examined at the end of a month; if he then pass, he will be confirmed as lieutenant, with the loss of one month's seniority. 4. If the officer is again rejected, he will be placed on the list of navigating lieutenants, with the seniority which would have been awarded him had he elected promotion to that list; and the time during which he was under gunnery instruction will reckon only as half-pay time. 5. In the event provided for in the preceding Article, the officer's pay and half-pay will be those of a lieutenant from the date of his ceasing pay as a navigating sub-lieutenant, on promotion, to the date of the order for him to revert to the Navigating List; but for all other purposes, including time, he will be considered as a navigating lieutenant from the date of his seniority as such. 6. Officers already promoted will be subject to these rules, except that they will not be deprived of seniority on rejection. 7. All existing regulations relative to the transfer of officers from the Navigating to the Executive List remain in force, except as superseded or modified by the provisions of this circular.

A Lloyd's telegram, dated Sept. 8, announces that the stone lighthouse on First Point, Tanjing Koolong, west coast of Java, has been thrown down by a violent earthquake. The light was of the first class, and was for the guidance of vessels entering Prince's Strait, in the Straits of Sunda.

The Trade Unionists of Southern Russia have sent word to the officers of the arsenal at Kiev that unless the grievances of the workmen at that establishment are redressed within a fortnight, a secret trial of the officials will be held by the Unionists, who will also take steps to carry out any sentences they may pass.

MESSRS. ALLEN AND HANBURYS have as nearly as possible succeeded in depriving Cod Liver Oil of its nauseating smell and taste. They present in their "Perfected" article the oil in a beautifully bright and but very little coloured state. Many persons to whom the taste of the oil has hitherto been an obstacle will doubtless be able to take it in this more perfected form.—*Lancet*. No nauseous eructations follow after it is swallowed.—*Medical Times and Gazette*. All who have difficulty in taking Cod Liver Oil should insist on having Allen and Hanburys' "PERFECTED" OIL. Sold only in capsuled imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade-mark, a Plough. Of all Chemists.

Obituary.

Col. Sir J. S. Wood, K.C.B., died somewhat suddenly at the close of last week at Ryde, I. of W., from an attack of inflammation of the lungs. He was in his 68th year. Sir J. Wood was born in the year 1813, and was educated at the Royal Military College, Sandhurst. He served in the Coorg campaign in 1834, in the light company of the 48th Regiment, and subsequently through the Afghan campaigns of 1838-42, in which he acted as aide-de-camp to Sir R. Sale and adjutant to the 13th Regt. He took part in the storming of Ghazni, and was present at the battle of Jellalabad. He was also in the storming party of the Jugdallak Pass, and at the recapture of Cabul. He served, too, in the Eastern campaign of 1854-55, as assist.-adjt.-gen. to the 3rd division of the forces, and subsequently to head-quarters, and took part in the battles of the Alma and Inkerman, the capture of Balaklava, and most of the siege operations before Sebastopol (Knight of the Legion of Honour, 4th class of the Medjidie, and the Turkish medal). From 1863 down to his retirement in 1876, he held the Inspector-Generalship of the Royal Irish Constabulary. He was nominated a C.B. in 1855, and was promoted a K.C.B. in 1870.

Col. E. C. Wilford, who died at his residence, Tunbridge Wells, on the 6th inst., at the age of 82, was educated at Sandhurst, and, from the Royal Military College, gazetted to the Royal Staff Corps, joining the contingent of it, serving in 1815 with the army of the Duke of Wellington in Belgium. Upon the reduction of the Staff Corps he remained on half-pay for many years, and returned to full pay when the Crimean war broke out. At the close of this war he was appointed by the late Lord Hardinge, Commander-in-Chief, assistant-commandant and principal instructor to the School of Musketry, then established at Hythe. In course of the several years of his Staff appointment, he became well and publicly known as the main spirit in advancing the practice of musketry from the comparatively rude art it had been in the hands of the soldier, to a high practical skill based on the study and application of scientific technical laws. When the great national Volunteer movement arose twenty years ago, most of the leading chiefs of it resorted to Hythe, to avail themselves of the instruction under Col. Wilford, whose naturally gifted powers as a lecturer further led to requests for him to give discourses at the United Service Institution and the Society of Arts, with similar invitations from elsewhere. He retired from the Service in 1862, and his latter years were passed wholly in retirement.

Major Raymond Inglis, late Royal Fusiliers, and formerly in the 18th and 2nd Queen's Regiments, died at his residence, Druimuan, near Pitlochry, N.B., on the 2nd inst., aged 54 years. This officer joined the Army Nov. 22, 1843; became lieut., Feb. 11, 1848; capt., March 15, 1850; brevet major, June 6, 1856; and major, Sept. 19, 1856. He served with the 18th Royal Irish in the Crimea, from Dec. 30, 1854, including the siege and fall of Sebastopol, assault and capture of the cemetery on June 18 (medal and clasp, Turkish medal, and brevet major). Major Inglis was second and youngest son of the late Sir Wm. Inglis, K.C.B., colonel of the 57th Regiment.

Capt. Arthur Morrell, R.N. (on the HIK List), died at Erith, Kent, on the 13th inst., aged 92. This gallant officer entered the Navy Aug. 6, 1801, on board the Doris, Capts. C. Brisbane and W. Cumberland, and after serving in the Channel, joined, in Aug. 1802, La Pique, also commanded by Capt. Cumberland, and proceeded to the West Indies, where he continued uninterruptedly employed for a period of nine years in the same ship, and in the Suffisante, Capt. H. Laroche; the Redbridge, Lieut.-Com. E. Burt; the Polyphemus, Capt. W. P. Cumby, flagship for some time of Vice-Admiral B. S. Rowley; the Avon, Capt. H. T. Fraser; the Sparrow, the Thalia, and the Elk. Independently of numerous boat services performed during that period, and many engagements fought with privateers, he witnessed, in 1803, the evacuation of Aux Cayes and the surrender, with the remains of Gen. Rochambeau's army from Cape François on board, of the three French frigates, the Surveillante, the Vertu, and the Clorinde, the last-mentioned of which he assisted in conducting, under Sir N. J. Willoughby, to Jamaica. In the following year he took part in the unsuccessful attack upon Curaçoa. In the Redbridge, of which vessel he was master's mate, he was wrecked off Nassau, New Providence, Nov. 4, 1806; and, when holding the same post on board the Polyphemus, he commanded the pinnace belonging to that ship at the capture of the French schooner Calibre. After acting for three months as lieut. of the Avon, he was confirmed, July 28, 1809, into the Sparrow. Having paid off the Elk at the close of 1811, he was next in succession appointed to the Ocean, attached to the force off Toulon; to the Termagant, sloop, stationed at first in the Mediterranean (where he beheld the fall of Genoa), and afterwards in the East Indies, whence he returned to England, and was paid off in Oct. 1816; Jan. 14, 1818, to the Dorothea, hired ship, Capt. D. Buchan, whom he accompanied on a perilous voyage discovery to the neighbourhood of Spitzbergen; Jan. 19, 1820, to the Révolutionnaire, in the Mediterranean; and Nov. 11, 1822, to the Tartar, fitting for South America. While in the Révolutionnaire, he, with her barge and pinnace under his orders, succeeded, on the night of May 18, 1821, in effecting the capture, in the harbour of St. Jean, in the Gulf of Patras, of two Greek pirate boats, after a hard struggle, in which his party sustained a loss of one man killed and three wounded. He himself received several sabre-cuts in the face, but was not advanced to commander until April 18, 1823. His next appointment was, June 2, 1841, after 18 years of solicitation, to the Calcutta, stationed in the Mediterranean. The Calcutta being paid off in the latter part of 1842, he obtained, May 25, 1843, command of the Espoir, equipping for the coast of Africa, where he made prize of two slave-vessels, one of them laden with 546 negroes. From the Espoir he was transferred, Dec. 6, 1844, to the Tortoise, and nominated Governor of Ascension. Although the latter appointment had been conferred upon him as a permanence, he was superseded, without compensation, in Nov. 1846, by an officer holding post rank. He came home in command of the Hydra, at the commencement of 1847, and was promoted to captain on the Retired List, April 1, 1856. He was awarded a Commander's Greenwich-Hospital pension June 11, 1866.

Capt. Joseph Sparkhall Rundle, R.N., on the Retired List, died at East Park, Newton Abbot on the 8th inst. This gallant officer was born Aug. 5, 1815, in the county of Norfolk, and entered the Navy Oct. 21, 1829. He passed his examination Oct. 12, 1836, while serving on board the Fairy, Capt. W. Hewett; and for his gallant conduct as mate of the Volage, Capt. H. Smith, at the capture of Aden (on which occasion he had the honour of planting the first British flag, and aided in taking possession of the island of Seerah), was strongly recommended by his captain, and was promoted to the rank of lieutenant May 1, 1839. Continuing in the Volage until the return of that ship with Rear-Admiral Elliot to England in 1841, he command her pinnace in an attack upon some Chinese war-junks in Cowloon Bay Sept. 4, 1839, and assisted in another made upon a fleet of them off Chuenpee Nov. 4 following. His next appointment was, July 28, 1841, to the Monarch, Capt. S. Chambers, on the Mediterranean station, whence, in March, 1843, he invalided from the effects of fever generated at Xanthus, while employed in embarking the valuable collection of marbles made by Mr. Fellowes, now in the British Museum. He subsequently served again in the East Indies, as 2nd and 1st lieut. in the Fox, Comdre. Sir H. M. Blackwood, from Oct. 19, 1843, until paid off, Aug. 5, 1848; was lieut.-com. of the Ceylon, receiving-ship at Malta, from April 8, 1850, until May, 1854; and from Jan. 8, 1855, until promoted, Feb. 21, 1856, to com., served in the Impregnable, under the flag of Admiral Sir W. Parker, Bart. He was 2nd capt. in the Brunswick, Capt. H. Broadhead, on the North-America and West-India station, from Aug. 28, 1856, until July 30, 1857, and was inspecting officer in the Coastguard Service at Carlisle from Jan. 1860 until Jan. 1865. He became retired com., March 31, 1866; capt., Feb. 21, 1871; and was awarded a Naval pension, Jan. 3, 1879.

Paymaster C. Barrs, R.N., died at Dinan, Côtes du Nord, France, on the 8th inst., in his 53rd year. He attained the rank of assistant-paymaster Jan. 1, 1852, and on Oct. 4, 1853, was appointed to the London, Capt. C. Eden, on the Mediterranean station. On Aug. 24, 1855, he was transferred as acting paymaster to the Diamond, Capt. C. B. Hamilton, and on Feb. 4, 1856, was appointed assist.-pymr-in-charge to the Wrangler, Capt. H. T. Burgoyne. The London had 4 men killed and 18 wounded in the general attack on the forts of Sebastopol, Oct. 17, 1854. He was subsequently employed in the Dee, Master-Com. T. C. Pullen, on particular service, from May 19, 1857, until Aug. 30, 1861, when he was promoted to the rank of pymr. On March 18, 1862, he was appointed to the Cornwallis, Capt. S. Grenfell, Coastguard-ship in the Humber, and on July 4 following was transferred to the Rattler, Com. E. H. Howard, fitting for the East Indies and China station, and continued to serve in the same ship, under Com. J. W. Webb, until Jan., 1866. On Oct. 27 following he joined the Reindeer, Com. E. Nares, fitting for the Pacific, and returned with her to England, and was paid off Feb. 15, 1871. He was afterwards paymaster in the Audacious, Endymion, and Iron Duke, in the River Humber, from May 1, 1873, until July 28, 1876; and on Sept. 4, 1877, was appointed to the Blanche, Capt. C. G. F. Knowles, fitting for North America and the West Indies, where he remained until placed on the Retired List at the close of 1878. He had received the Crimean medal.

ROWLAND'S ODONTO is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that ROWLAND'S ODONTO will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

HOT WEATHER.—How to Invigorate the Nervous System by Natural Means. Mental Prostration.—"Having suffered much from headache and mental prostration, I was induced to try ENO'S FRUIT SALT, the effects of which have been most satisfactory, resulting in invigorating my entire nervous system, and removing the frequent headache to which I was subject. You are at liberty to make any use you think proper of this testimonial, as I consider Eno's Fruit Salt an indispensable adjunct to the Household."—TRUTH, Sigdon Road, Dalston, E. Caution.—Examine each bottle, and see the Capsule is marked, "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d.

MARRIAGES.

ATCHISON—BRATT.—On Sept. 8, at Trinity Church, Borough, by the Rev. Daniel A. Moulton, John D. Atchison, Esq., of Boxmoor, Herts, second son of the late Edmund M. Atchison, Esq., of Kennington Park Road, to Ann Louisa, widow of Thomas Jenner Bratt, Esq., of Preston House, Bexhill, Sussex, and only surviving child of the late William J. Bratt, Esq., of the City of London.

PASSY—ROLLESTON.—On the 16th inst., at St. Mark's, Regent's Park, by the Rev. Thomas Wood, M.A., Rector of North Bourn, Francis Octavius Passy, Esq., late R.N., youngest son of the late Colonel E. W. W. Passy, of H.M.'s 56th Regiment, to Georgina Catherine Vilett, third daughter of the late George Rolleston, Esq., of Pan Manor, Isle of Wight.

DEATH.

SIMMONS.—On Friday, the 10th inst., at her residence, Rosiemore, St. Helier's, Jersey, in her 82nd year, Anne Corbet le Breton, widow of Major George Simmons, late Rifle Brigade, and daughter of the late Sir Thomas le Breton, Kt., Bailiff of the Island of Jersey.

MESSMAN wanted, for Officers' Mess, 1st Battalion, 16th Regiment, at Belfast.—Apply to the MESS PRESIDENT.

MAN COOK WANTS SITUATION. Officers' Mess, Club, &c. Testimonials good.—Address, "A.B.C.," News Rooms, 4 Ludgate Circus.

A LADY wishes to procure a COMPANIONSHIP for her friend, who, in consequence of the breaking-up of her home, seeks a Situation. She is of a cheerful disposition, and is very musical. Good references given and required. —Address, Miss WHITAKER, Sion House, Mount Sion, Tunbridge Wells.

TO PARENTS ABROAD SEEKING an ENGLISH HOME for their CHILDREN.—A Gentleman returned from the East having purchased an Estate within three miles of Epsom, comprising a fine residence, beautiful grounds, and small farmery attached, most healthy and bracing atmosphere, is open to RECEIVE into his family ONE or TWO CHILDREN, not under 4½ years old, to bring up and educate with his own. References exchanged.—Address, "S. 16," at C. H. May and Co.'s General Advertising Offices, 78 Gracechurch Street.

SAMUEL ROBERTS,
Late of the Commander-in-Chief's Office,
ARMY EXCHANGE & GENERAL AGENT,
28 LEICESTER SQUARE, LONDON.

Any instructions given to Mr. ROBERTS will be personally attended to.

He was for over 28 years in the Public Service.

HOLLOWAY'S PILLS.—Invalids distracted by indigestion and discouraged in their search for its remedy should make trial of this never-failing medicine. A lady, long a martyr to dyspeptic tortures, writes that Holloway's Pills made her feel as if a burden had been taken off her. Her spirits, formerly low, have greatly improved; her capricious appetite has given place to healthy hunger; her dull, sick headache has departed, and gradually so marvellous a change has been effected that she is altogether a new creature, and again fit for her duties. These Pills may be administered with safety to the most delicate. They never act harshly, nor do they ever induce weakness; they rightly direct deranged and control excessive action.

A CHEERFUL HOME for TWO or THREE CHILDREN, ages 4 to 13 (Indian or others), is offered in the family of a Country Vicar, with private means. First-rate educational advantages, fine air, easy access of London or the North. No other children. Terms, £60 each per annum.—Address, "T. E.," May's Advertising Offices, 159 Piccadilly, London.

TO ARMY and NAVY SURGEONS RETIRING.—TO LET, in a small country town, in one of the Home Counties, a good Family HOUSE, with stabling and a large garden, at a moderate rent. It has been a medical man's house for many years, and for reasons which can be explained, some practice may be had if desired.—Address, "B. F. W.," care of Messrs. MACKEY and CO., Bouverie Street, Fleet Street, London.

AVRANCHES, NORMANDY.—Small comfortably-furnished HOUSE to be LET, containing drawing-room, dining-room, seven bedrooms, and two kitchens. Stabling attached. Use of plate and good piano. Terms, £8 per month, paid quarterly in advance.—Address, "C. A. B.," care of Mrs. Brimacombe, 32 Rue de Lille, Avranches, Manche.

TO LET, Furnished, for six months, from October 1, a COMFORTABLE RESIDENCE at Bassett, two miles from Southampton, containing dining and drawing rooms and Library, two bedrooms, with dressing-rooms, two single rooms, two or three servants' rooms, good stabling for three horses, coach-house, with man's room over. Rent to careful tenant, 6 guineas a week, including cook's, housemaid's, and gardener's wages, who will be left.—Apply, PERKINS, House Agent, Southampton.

A HAPPY HOME, with every care and Educational advantage, for BOYS under 12 in a Country Rectory, near Harrogate.—Address, "A. N. G.," Messrs. Dawson and Sons, 121 Cannon Street, London, E.C.

ARMY and NAVY CO-OPERATIVE SOCIETY (Limited),
117 VICTORIA STREET, WESTMINSTER, S.W.

UNITED SERVICES PROPRIETARY COLLEGE,
WESTWARD HO, NORTH DEVON (on the coast).
(With the approval of H.R.H. the Duke of Cambridge, K.G.)

The primary object of this School is to enable officers—especially those on foreign service—to obtain for their sons a public education of the highest class adapted to their peculiar needs at the lowest cost compatible with efficiency. There is a Junior School for Boys under twelve, and a Dame's School for Boys under ten within half-a-mile of the College.

Pupils can board all the year round.

Two boys direct from the School were successful for Woolwich in the July examination. The senior cadet of Sandhurst in the July list passed direct from the School last year.

There are fourteen Tutors, of whom nine are Graduates of Oxford and Cambridge.

Chairman of Council—General Sir H. C. B. DAUBENEY, K.C.B.

Head Master—CORMELL PRICE, M.A., B.C.L. (eleven years Head Master of the Modern Side, Haileybury College).

Secretary—Lieutenant-Colonel BURTON (late 91st Highlanders).

For Prospectus, list of pupils, &c., apply to the HEAD MASTER or SECRETARY.

N.B.—NEXT TERM commences September 17.

SALISBURY SCHOOL.

Head Master—Rev. W. H. EMRA, M.A., late Open Scholar of Exeter College, Oxford, Classical Honourman in Moderations and Final Schools; Assistant Classical Master of the King's School, Bruton, 1867; Rector of Gt. Blakenham, 1871.

Second Master—CHAS. MORGAN, Esq., B.A., Senior Optime, late Scholar and Mathematical Prizeman of Jesus College, Cambridge.

With an efficient staff of Assistants.

This Proprietary School was founded in 1876 expressly to enable gentlemen of moderate means to obtain for their sons—

A high-class education in accordance with modern requirements.

A liberal and well-appointed dietary and domestic ménage.

The best associations of a Public School and companions exclusively of their own class.

The work is tested yearly by Public Examiners, whose reports are published, and one of the first pupils at the School has already passed with credit into Cooper's Hill College.

The sanitary and domestic arrangements will also be inspected and reported on periodically.

The New Buildings, on a fine site of ten acres, and fitted with every modern appliance. were opened in September last.

Terms, £54 a year.

A full prospectus will be sent on application to the Head Master, Salisbury School, Salisbury; or to the Warden, Batcombe Rectory, Evercreech.

DERBY SCHOOL.

FOUNDED, 1160, A.D. RESTORED BY ROYAL CHARTER, 1554.

In the Modern School, Boys are Prepared for Woolwich, the Indian Civil Service, Sandhurst, and Cooper's Hill. Sons of Officers in the Army and Navy have certain advantages at Derby. TWENTY House, Rowland, or School Scholarships, tenable for two or three years, are awarded by Half-yearly Examinations. — Address, the Rev. WALTER CLARK, B.D., Head Master; or the SECRETARY, the School, Derby.

SANDHURST.—Successful preparation for Admission Examination. Nominal fees. Payment based upon results. Highest references. —THOS. LYLE, B.A., F.R.Hist.S., Fern House, 48 Navarino Road, Hackney, N.E.

EDUCATION.—Mr. THOMAS JONES, F.G.S., F.R.A.S., formerly a Master in the Woolwich Common and Oxford Military Schools, RECEIVES a FEW BOARDERS. Thorough grounding, careful training, and home comforts. Terms moderate.—Address, Broomhill, Shooters' Hill, Kent.

COLLEGE EDUCATION.—High-Class Boarding House, exclusively for Young Ladies, Students of Queen's College, London, under sanction of the Council and Committee of Education, who will speak for the care, attention, and unusual comforts which the young ladies will receive. A large and cheerful house close to Park and College. Term commences September 29.—For particulars and private references, apply, Miss KNOTT, Devonshire Lodge, York Gate, Regent's Park, W.

PUBLIC SCHOOL EDUCATION.—TRINITY COLLEGE SCHOOL, Stratford-on-Avon.—The Warden, Richard F. Curry, M.A., is assisted by Seven Resident Masters, Two being specially for Modern Languages. Classical and Modern Sides. Special preparation for the Universities, Army, Navy, and all competitive examinations. Large playgrounds, gymnasium, &c. Terms, 50 and 60 Guineas.—Apply to the WARDEN.

ARMY, NAVY, AND CIVIL SERVICE EXAMINATIONS.
SYSTEMATIC AND SUCCESSFUL PREPARATION FOR THE ABOVE AT
ST. JAMES'S COLLEGIATE SCHOOL,
HIGHLANDS, JERSEY.

Upwards of 300 successful Candidates in these Examinations have gone up direct from the School, many of them taking very high places, especially in the Examinations for entrance into Woolwich and Sandhurst. Among recent ones are a third place in French out of 162 Candidates at the last Militia Examination in April, 1880, and the twelfth place with 5,104 Marks on the General List; with the first place in Mathematics, at the last examination held in July, 1880, for entrance into the Royal Military College, Sandhurst.

Inclusive terms for Boarders from Fifty Guineas.

THE TERM COMMENCED ON TUESDAY, SEPTEMBER 7.

EDUCATION.—GERMANY, HEIDELBERG.—Dr. KLOSE'S School guarantees thorough knowledge of German and French, for Army Examinations, Public Schools. Experienced English University Tutors for Mathematics, Classics, English, Geometrical Drawing. Highest Army references. Terms, from £15, quarterly. Cricket, swimming baths, English diet.

THE HEAD MASTER of an Endowed First-Grade School wishes to negotiate with a Retired Officer, with a view to ESTABLISHING a MILITARY DEPARTMENT. — Address, "HEAD MASTER," care of Messrs. Slatter and Rose, Oxford.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

THE ARMY, viâ Sandhurst, Woolwich, or the Militia.—The Rev. WALTER BAKER, M.A., late Scholar of his College, &c., assisted by able tutors of special experience, offers careful PREPARATION for the QUALIFYING and COMPETITIVE EXAMINATIONS. Few pupils taken, and great individual attention given to each. References to parents of former pupils who have taken high places, as well as to successful Militia and University Candidates.—Batcombe Rectory, Evercreech, Bath.

ARMY.—21 Berners Street, London, W. —Mr. LAWRENCE has passed all his Candidates for Sandhurst or Examination for Militia Lieutenants, since 1877. Preparation for the Military Competitive.—For particulars, address as above.

THE ARMY.—Rev. W. FULFORD, M.A. (Oxon.), and Mr. J. ENRIGHT, B.Sc. Honours (Lond.), PREPARE CANDIDATES. References to Pupils who have taken 2nd, 3rd, 9th, &c., places for Sandhurst. Ninety per cent. successful. Class for competitive Militia Military Examinations.—32 Hogarth Road, South Kensington.

ARMY EXAMINATIONS.— Woolwich, Line, Staff College, Militia.—Captain DE CARTERET BISSON, Author of "Our Schools and Colleges" (officially recognised by the Queen and H.R.H. the Commander-in-Chief), sends (gratis) PROSPECTUSES of the most successful TUTORS for all these Examinations.—Reference permitted to late Secretary of State for War.— 3 Berners Street, London, W.

STAFF COLLEGE.—OFFICERS of the Army PREPARED by a former STAFF OFFICER, of great experience in Tuition.

MILITIA COMPETITIVE EXAMINATIONS.—Classes and Private Tuition in Fortification, Tactics, Military Surveying, Law, and Administration, &c. —For Terms and References, apply to Captain DEMANGEL, 19 Aldridge Road Villas, W.

LIEUTENANTS of MILITIA. — A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY. — Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

LIEUTENANTS of MILITIA desirous of competing, this year or next, for Line Commissions can be RECEIVED by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major R. V. DICKENS (late 11th Foot), who, besides having passed the Staff College, and held several Staff appointments, has for some time past been successfully engaged in coaching Lieutenants of Militia, and also Sandhurst Cadets for their final examination in the same subjects. Other competent Tutors assist in preparing for the qualifying Examinations.

BEAUMARIS SCHOOL,
N. WALES.

Governing Body—The LORD BISHOP OF BANGOR, Colonel HAMPTON LEWIS, Captain VERNEY, R.N., and others.

Head Master—STEPHEN D. ORME, M.A.

Assistant-Masters—H. W. RICHMOND, B.A., late Scholar of Magdalen Coll., Cambridge; S. WADE, B.A., late Scholar of Balliol College, Oxford, and others, &c.

This School has a mild and healthy situation, by the sea; and valuable Scholarships attached.

Inclusive terms, for Sons of Clergymen and Officers, £50. Next Term begins April 30.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the examination required for the above.

At the recent Competitive Examination (June, 1880) of Candidates for Assistant-Clerkships in the Royal Navy, of the Fifteen successful competitors, FIVE were pupils of this Establishment.

MR. G. M. HICKS, M.A., has a FEW VACANCIES for PUPILS reading for Sandhurst or Woolwich. In the recent Examination for Woolwich, Two Pupils out of Three passed, and another obtained twenty-fifth place for Sandhurst.—Apply, 5 South Row, Blackheath.

SPA, BELGIUM.—PUPILS prepared for Army and Navy COMPETITIVE EXAMINATIONS.—A comfortable home; separate bedrooms; healthy situation; excellent table kept; resident German Professor and French Masters; English Principal. Terms, from £70 per annum. First-class references; Prospectus sent. English Principal will leave England about September 20th, with his pupils.—Address, "B. W.," Park House, Spa.

SPA, BELGIUM.—A limited number of PUPILS have every facility for acquiring a thorough knowledge of modern languages and of preparing for Public Examinations. High-class references. Terms, 70 to 80 Guineas, according to age. The English Principal will be in London in September to take back pupils.—Address, "W. and L.," care of Messrs. Orellana, Collis, and Cuffe, 32A George Street, Hanover Square, London, W.

WORCESTERSHIRE SAUCE,

And without which none is genuine.

Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.— By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet*, *British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser*.

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' 'Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—PUNCTUAL ATTENDANCE EVERY THURSDAY AT 4 HIGH STREET, ALDERSHOT, FROM 11 TILL 5.

London: BAILLIÈRE and Co., King William Street, Strand.

WATCHES. — JEWELLERY.— WATCHES.

The Rev. Robt. Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Ladies' Gold Lever Watch received from you for 70s in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

The Rev. James Arthur Kemp, Lew Down, North Devon, also writes, March 8, 1880:—"The watch I ordered of you at 25s, for my servant arrived quite safely, and I am exceedingly well pleased with it in every way. It is an excellent timekeeper, very neat and handsome in appearance, and in my opinion worth far more than those that cost treble the money. I do not think anybody should be without a watch, when they can obtain from you such an excellent article at so reasonable a price."

THE MIDLAND COUNTIES WATCH COMPANY supply their celebrated Watches direct to wearers, at very lowest wholesale cash prices. They guarantee watches supplied by them to be most perfect timekeepers, and honestly assert their price to be under one-half those charged by watchmakers; and as a guarantee of good-faith they undertake to return the full amount paid for any Watch if not to the satisfaction of the purchaser.

The Company's chief manufacture are their celebrated Crystal Glasses, which dispense with all risk of breakage. Their LADIES' and GENTLEMEN'S SILVER WATCHES, at 25s, and their LADIES' GOLD LEVERS, at 70s, are acknowledged to be the cheapest Watches in the world.

Catalogues, containing list of testimonials, and beautifully illustrated descriptions of more expensive watches, gold and silver jewellery, electro-plate, &c., are sent gratis on application. We may safely assert that the prices in same will be a surprise to all who see them.

GENTLEMEN'S FINE SILVER, flat crystal glass, heavy cased, superior movement, 25s.

LADIES' FINE SILVER, handsomely engraved, flat crystal glass, highly-finished movements, 25s.

YOUTHS' FINE SILVER, flat crystal glass, highly-finished movements, 25s.

LADIES' very heavy cased GOLD LEVERS, in exquisitely chased cases, with highly-finished extra-jewelled movements, 70s.

These watches are frequently sold for treble the money.

Cheques or Post-Office Orders must be made payable to the Company's Manager,

Mr. S. HISSEY, Vyse Street, Birmingham.

On receipt of which any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

THE ARUNDEL & CALEDONIAN HOTELS.

The ARUNDEL is near the New Law Courts, in the Strand, being next door to the Temple Station.

The CALEDONIAN is on the Adelphi Terrace, and close to Charing Cross.

These two old-established Family Hotels, from their especially advantageous position, both overlooking the Thames Embankment, combine light, air, and perfect quiet, although in the centre of London. They are now under one management, AND AT EITHER ESTABLISHMENT VISITORS CAN ARRANGE FOR FULL BOARD AT A FIXED CHARGE OF SEVEN SHILLINGS AND SIXPENCE PER DAY, which includes a good Bedroom, Breakfast of hot and cold meats, Luncheon, Dinner of six courses, and Tea and Coffee in the evening; also the use of large, well-appointed Sitting-rooms, including an ELEGANTLY-APPOINTED DRAWING-ROOM.

These Hotels, containing upwards of 200 Rooms, have been for many years largely patronised by Members of Parliament, the Clergy, and by Military and Naval Officers and their Families, by reason of their central, but retired localities, affording all the comforts and luxuries of high-class Hotels.

ZOEDONE.—OHNE PHOSPHOR, KEIN GEDANKE.

—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases. A small extra charge in smaller cases. See Pamphlet.

London Office—25 Abchurch Lane, E.C.

DINNEFORD'S MAGNESIA.

For over Forty Years the Medical Profession have approved of this pure Solution as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the safest aperient for delicate Constitutions, Ladies, Children, and Infants.

Sold by Chemists throughout the World.

CAUTION.—See that "DINNEFORD and CO." is on every Bottle and Label.

GOUNDRY'S CONSOLIDATED TEA.

Is much better and Cheaper than Loose Tea.

For full particulars, apply to

181 UPPER THAMES STREET, LONDON, E.C.

E. & E. EMANUEL,

3 THE HARD (3 DOORS FROM H.M.'s DOCKYARD), PORTSEA.

WATCH AND CLOCK MAKERS.
GOLDSMITHS, SILVERSMITHS, & JEWELLERS
to the QUEEN and ROYAL FAMILY.

English and Foreign Watches and Clocks.
Regimental, Prize, and Presentation Plate.
Electro-Plate. Table Cutlery.
Rare China, Antique Plate, Bronzes, and Curios.
Collections valued and purchased.
Old Plate, Jewels, and Epaulettes bought. Foreign Money exchanged.
Miniature Copies of all Medals and Decorations.
Race, Field, and Opera Glasses. Nautical Instruments.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179, of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactory."

Sole Address—**3 THE HARD, PORTSEA.**

NAVAL CADETS, &c.

E. A. SEAGROVE,

ROYAL NAVAL AND MILITARY OUTFITTER,
22 & 23 The HARD, PORTSEA, PORTSMOUTH
(near the Dockyard).
ESTABLISHED 1795.

Under the Distinguished Patronage of
H.R.H. the PRINCE of WALES,
H.R.H. PRINCE EDWARD of WALES, R.N.,
H.R.H. PRINCE GEORGE of WALES, R.N.

Since the establishment of her Majesty's Training Ships in August, 1857, Mr. E. A. Seagrove has had the honour to equip and furnish his ADMIRALTY PATTERN REGISTERED

NAVAL SEA CHEST
TO OVER ONE THOUSAND NAVAL CADETS
(on joining the Service.)

COMPLETE LISTS of OUTFIT, with ESTIMATES, SENT FREE on APPLICATION, for ALL OFFICERS.

N.B.—Agent for the sale of the new ADMIRALTY PATTERN WATERPROOF COAT and CAPE.

⁂ Orders forwarded to any part of the world.

THOMAS NEARY,

MILITARY TAILOR
TO THE
1ST KING'S DRAGOON GUARDS, 3RD HUSSARS,
5TH LANCERS, & MIDDLESEX YEOMANRY.

NAVAL AND MILITARY OUTFITTER.

LADIES' RIDING HABITS.
CIVIL AND DIPLOMATIC UNIFORMS.
OUTFITS TO ALL PARTS OF THE GLOBE.
LIVERIES.
PORTABLE FURNITURE.

4 HANOVER STREET, HANOVER SQUARE.

HAWKES & CO.,

14 PICCADILLY, LONDON, W.,
HELMET, ARMY CAP, AND ACCOUTREMENT MANUFACTURERS,
TAILORS AND MILITARY OUTFITTERS.
Inventors and Sole Manufacturers of
HAWKES'S CORK PATENT HELMETS FOR INDIA.
DISCOUNT TEN PER CENT. FOR CASH.
Agent in Ireland, JOSEPH WRIGHT, 33 Westmoreland Street, Dublin.

H. PEAT & CO.,

173 PICCADILLY, LONDON,
SADDLERS AND HARNESS MAKERS
To their Royal Highnesses the PRINCE of WALES and the DUKE of EDINBURGH.

FISHER'S GLADSTONE BAG.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 10s. 4d. per annum; viâ *Brindisi, £1 14s. 8d.*

THE efforts of the Indian Medical Department to ameliorate the conditions of their service have so far resulted that Lord Hartington has received a deputation from them, and promised the subject his consideration, and the Viceroy is said to have the intention of making a thorough investigation into the causes of complaint. With this example to encourage them, the officers of the Staff Corps are about to form an organisation for the purpose of bringing their grievances to the notice of the Authorities at home, and for this purpose funds and active co-operation are now asked. The difficulty in such matters is to find the individuals who are not only able, but willing, to be the leaders in the movement, to act as committee, secretaries, and deputation, and initiate the necessary action which the undertaking involves. The entire body of officers growl as one man, and all will probably be willing to share any expenses incurred in formulating their grievance into a presentable and tangible shape. Many are ready, some clamorous, with advice and suggestions, and hopes; but few are willing or able to step to the front, and represent their comrades at head-quarters at home. It appears now, however, that this difficulty will be likely to be overcome, many letters that have recently appeared in the *Pioneer* having taken a very firm and decided tone, and a "Field Officer" having not only volunteered to undertake the duties of secretary, but having already commenced proceedings by requesting the co-operation of Messrs. Grindlay and Co. as agents, and making enquiries as to the expenses of the undertaking. The grievances of the Staff Corps are confined to the question of pension, but include three points; these are,—(1), That service prior to first arrival in India is not reckoned towards service for pension; (2), that all leave of absence is not so reckoned; (3), that the rates of pension are unreasonably low. With regard to the first point, the argument of the Government of India has probably been that service prior to arrival in India has not in any way benefited India; that the pensions are paid out of Indian and not Imperial funds; and that, therefore, a reasonable *quid pro quo* must be given. At the first glance, this argument seems irrefutable, but it is founded on mistaken premisses. The service of an officer prior to his arrival in India is of substantial pecuniary benefit to India, inasmuch as India is saved the expense of educating and training her young officers, and receives the full value of their labour from the first day on which she enlists their services. This is an important consideration. The cost of the training of the young officer falls generally entirely on the Imperial Government, and though some may be sent out to India almost immediately on receiving their first commissions, there are many who have to serve first at home or in the Colonies before their opportunity of reaching India arrives, and every year of such service tends to develop the value of the product which is eventually utilised by the Indian Government. Moreover, a military officer is a public servant, and gives his services for the use of his country in whatever department he may be working, and from a moral point of view, it is undoubtedly wrong that service performed for Imperial ends in one part of the world should not be entitled to recognition in the consideration of pension, because the subsequent service has been given to a particular subordinate factor of the Empire. If India declines to be responsible for service not directly devoted to its own purposes, the Imperial Government should make good the loss. This might be done either by granting an addition to the pension awarded from Indian funds, or by the gift of a compensating gratuity on the transfer of the services of an officer. An argument for the justification of the second point seems more difficult to imagine even than for the first. An officer may obtain leave of absence beyond the fixed limits to which he is entitled by regulation, on two grounds, ill-health or private affairs. If his health has been injured by Indian service, it seems scarcely just that the few months, more or less, which may be necessary to restore him to a state fit for further service in India should not be reckoned as service for India. There must, of course, be a limit to sick-leave, but the present regulations on this head have been drawn up in a somewhat ungenerous spirit. As to leave on private affairs, it is always within the prerogative of Government to withhold it. If it is granted, it is on the understanding that the Government do not in any way lose by the concession. Why, then, should the officer? If an officer is granted leave of absence on private affairs, it is presumed that his services are not at the time in any demand; if, therefore, his services are not required, why should he not be permitted to avail himself of the fact, without entailing any pecuniary loss to himself? If the Government does not lose anything by the grant of extra leave, why should it insist on gaining something? The third ground of complaint is founded on a comparison with the rates of pension granted in the British Service. In the British Service, an officer of any rank retiring after 12, 15, or 18 years' service, receives a gratuity of £1,200, £1,600, or £2,000, respectively. In the Indian Service, *nil.* In the British Service, an officer of twenty years' service, reckoned from the date of his first commission, or from the age of 18, and inclusive of all leave of absence, receives a pension, varying according to age, from £170 to £200 per annum. In the Indian Service an officer of 20 years' service, plus all service prior to his first arrival in India, and plus all extraordinary leave of absence, receives a pension of £191 12s. That is to say, 20 years' service in the British Army may be rewarded with a better pension than perhaps 25 years' *total* service of the Staff Corps officer. The highest rate of Indian pension, £750, seems, indeed, magnificent in comparison with the highest rate of British pension, £420, but, here, again the figures are somewhat misleading. The former can only be obtained after 38 years of *reckoned* service; the latter by a brevet colonel after five years' command of a regiment, with a total service of perhaps less than 30 years. Moreover, the average Staff-Corps officer who becomes entitled to this pension of £750 will be at least 60 years of age, and a British officer of that age on the Active List will have at least been drawing for some time £1 5s. per diem, as an unattached General officer, and be close upon, if not actually enjoying, £1,000 per annum as a regimental colonel. The above are the views of the subject taken by the Staff Corps; it behoves the Government, however, to regard it from a further point. Officers do not devote themselves to permanent Indian employ from any love of the country or of the Service, but solely from pecuniary considerations, to "better themselves,"—that is. The subject of pension enters largely into this consideration, and present advantages are not alone thought of. If, therefore, matters are allowed to remain as they are, and no manifest superiority to the British Service in this respect be offered, one important inducement to officers to enter the Indian Service will be withdrawn.

In alluding last week to the damage done to the Naval establishments at Port Royal by the recent hurricane by which Jamaica was visited, we observed that it might be questioned whether the maintenance of this dockyard was so necessary as to justify its being fully restored at the great outlay that it is anticipated will be needed to make good the damage done. Port Royal has never been a popular station, and the death-rate has at times been exceptionally high, and terrible losses of life from visitations of yellow-fever has given the place such a bad name, that appointment to the stationary ship there is looked upon as the reverse of good-fortune. But if it were absolutely necessary for the proper security of that portion of the British Empire that Port Royal should be retained as an important Naval station, we should certainly hesitate to suggest its abandonment. There is, however, good reason for believing that the time has come when the advisability of maintaining the Naval establishments as heretofore may be seriously considered. We question whether this little yard is not, for its size, the most expensive of any, and also the most exposed, both to the encroachments of the sea and to the fire of an enemy's ships. The sea of late years has encroached much on the outer beach, at the point, and between the coal wharf and the dockyard, and it seems to be but a work of time for a considerable portion of the bank upon which Port Royal stands to be washed away. The yard, hospital, coal store, and other buildings are so exposed, that fire could be opened upon them by a hostile squadron at long range; and, under cover of the night, an enemy might come almost close in and shell the place before a vessel would get out of the harbour to meet and fight her. In the opinion of many, it would be more advisable to shift the Commodore to Bermuda, and make that the head-quarters of the second-in-command of the North America and West Indies station, Bermuda then being, of course, connected by telegraph with Halifax, as it ought to have been years ago. Its present isolated position has been referred to in these columns more than once, and the folly of leaving so important a Naval depôt in such complete isolation has been forcibly pointed out. We have reason to believe that the Committee on Colonial Defences has admitted the error of leaving Bermuda thus long without telegraphic communication with Halifax and England, and we therefore trust that this may be the last occasion on which we shall have to call attention to a point which does not reflect credit upon those responsible for the maintenance of the defences of Greater Britain. But in this matter, divided responsibility is partly to blame, and for that which is everybody's business, nobody is apparently responsible. The Admiralty has waited for the Colonial Office to take the initiative, and that Department has waited for the Admiralty, or perhaps the War Office, to take up the question. And thus years have gone by since the general adoption of telegraphic cables, and a most important coaling and repairing station of immense value to a maritime nation like England, has been left "all at sea" and in so isolated a position, that it has been possible that the first intimation of England being at war with another Power might arrive at Bermuda in the shape of attack by the enemy's ships. How greatly the importance and safety of this station would be enhanced by telegraphic communication with the Mother-country, is patent to all, and we live in hope that the Government may at last see fit to sanction the expenditure needed to bring Bermuda within a day of England. As regards the protection of British possessions in the West Indies, the reduction of the importance of Port Royal would scarcely affect that question. A corvette and a couple of sloops constantly on the move among the islands would be sufficient, as a rule. Starting with the Windward Group, and going round by Jamaica, the Spanish Main, Cuba, and the Bahamas, patrol could be kept up efficiently and economically. The annual expenditure devoted to the naval establishments and the stationary ship at Port Royal is sufficiently large to make it worthy of consideration whether the suggestion here given might not be put in practice, for we feel convinced that half the sum spent upon Bermuda would give far better results, while the Navy would be relieved of one of the most unhealthy of its stations. As regards the hospital, it would, of course, be impossible to entertain the idea of reducing its staff while the place is made the head-quarters of the ships on the West Indies division; but by introducing the system of cruising, and removing the shore establishments, we might hope to see the hospital reduced to "sick quarters" only; and we believe that much might be saved both in life and treasure by the withdrawal of the head-quarters of the division to Bermuda. When Mr. Shaw-Lefevre was last in office, the abolition of dockyards and Naval establishments was a pet idea of the Board; but these operations were confined to home. Perhaps the First Secretary will now induce the Board to look into the cost of maintenance of the Port Royal establishments, the amount of work done at the yard, the possibility of transferring that work to Bermuda, and the consequent removal of the stationary ship.

A letter from Vice-Admiral Bowyear appeared in our last issue, questioning the accuracy of certain statements made in an article on September 11, in which a comparison was drawn between the capabilities of the old sailing-frigate *Atalanta* and those of the converted steam-frigate *Phaeton*, under similar assumed conditions of wind and weather. Adverting to the more important matters to which Vice-Admiral Bowyear refers, he states that he "never considered the ship to be in imminent danger," although he admits that "her mainmast was so for a time." But he does not challenge the statement that she was saved by her steam-power. Indeed, the quotation from his official report to the Commander-in-Chief distinctly states that "the ship, with the assistance of her screw, behaved remarkably well." The fact, therefore, remains that the mainmast of the *Phaeton* "was in imminent danger," but that, with the assistance of her steam-power, she was extricated from the gale. What would have been the position of the *Atalanta* under similar adverse circumstances? Several gales of extreme violence swept across her path about the time she was lost. Let us assume that she behaved remarkably well, but that suddenly, as with the *Phaeton*, her sails are blown to ribbons, her cross-jack yard goes in the slings, her mainmast is in imminent danger; then a heavy sea strikes her, and she has no screw to assist her to behave "remarkably well." At the same time, the port hammock-nettings and spare spars in the chains are washed away. The quarter boats have been got inboard. The upper deck is flooded. A maindeck-gun breaks adrift, while the ship is straining sufficiently to open her waterway seams four-and-a-half inches. Under such conditions, would not the *Atalanta* have been "in imminent danger?"—remembering, too, that her crew differed materially from that of the *Phaeton*, being composed for the most part of young hands. That was the main point which it was desired to bring forward in the article. Vice-Admiral Bowyear, referring to the statement that "the ship had to be ordered home, condemned, and broken up," lays stress on the fact "that the ship, in fact, continued to be actively employed on the station to the full extent of her commission, being paid off by me at Sheerness in March, 1865, after which event she remained many years in the Active List of the Navy." But she was never again employed. Her active employment, after a thorough refit at Bermuda, which occupied five months, during which time she was stripped to a gantline and was recaulked inside and out, consisted in spending eight or nine months in the quiet regions of the Gulf of Mexico, waiting to be relieved. It is quite true that she remained many years on the Active List after being paid off; but that has not been an uncommon event in times past, in proof of which we may cite the large clearance of "dummy ships" from the Active List made by the late Mr. Ward Hunt when he took office at the Admiralty. The *Phaeton*, over-strained, not worth the expense of further repairs, and unseaworthy, remained, as many other vessels have done, on the Active List, until it pleased the Admiralty to issue the orders to break her up. In giving those orders the Admiralty evidently considered that the *Phaeton* was unfit for further service, even for that to which her sister-ship, the *Arethusa*, is now devoted in the Thames. Consequently, we may still maintain that "the most charitable thing we can suppose is that the department responsible for selecting and equipping the *Atalanta* was in perfect ignorance of her unfitness for such service. This, however, is no excuse."

Rear-Admiral H.R.H. the Duke of Edinburgh is expected at Eastwell Park on October 8, and will proceed to Hull on the 11th and inspect the Coastguard and Naval Reserve men of the district.

Their Royal Highnesses Princes Albert Victor and George of Wales are now clear of the Channel, the *Bacchante* having finally sailed from Portland for Vigo on Monday afternoon. It is somewhat remarkable that she had three hitches in leaving England, being first delayed a little in weighing at Spithead, owing to her having hooked a lost anchor from some other ship; then by having to put into Portland through stress of weather; and lastly, by the search for a lost Whitehead torpedo.

In accordance with the provisions of an Order in Council, dated June 28, 1880, the Admiralty directs that a limited number of gunnery instructors who are first-class gun and rifle shots shall be allowed to qualify in the *Excellent* for the new rating of captains of turrets. When actively employed in this capacity, captains of turrets will receive 3d. a day in addition to the extra pay as gunnery instructor and seaman gunner.

The following account of the gallant conduct of a seaman of the *Wild Swan* is well worthy of our largest type, and we only regret that his name is not given:—Whilst cruising off Mozambique, the *Wild Swan* sighted and pursued a slave-dhow, and, after a long chase, captured her. In the process of transferring the slaves to the man-of-war, a slave boy slipped overboard, and a shark instantly darted upon the poor lad and bit off his right leg at the knee. The blood tinging the water soon attracted the attention of other sharks, and almost in an instant the boy's other leg was severed from his body. At this moment a sailor on the *Wild Swan* jumped overboard, armed only with his knife, and got the boy into a boat moored alongside the ship, escaping himself unhurt. The injuries inflicted upon the boy were such, however, that he died the same evening. As may be supposed the gallant seaman's shipmates were loud in their praises of his heroic conduct, and we do not doubt that Commander Dacres will bring the matter before the Admiralty, and recommend the man for the Albert medal.

The appointment which has been conferred upon Captain Gervais, who was formerly the Naval Attaché at the French Embassy in London, is the command of the *Triomphante*, which leaves Brest shortly as flagship for the Pacific, with the Commander-in-Chief, Admiral Baron de Brosard de Corbigny.

Captain George Tryon, C.B., A.D.C., who has been staying with his Excellency the Right Hon. G. J. Goschen, at the Embassy, Therapia, was expected on the 12th inst. to leave in a few days to rejoin his ship. Captain Tryon's visit is believed to have been not altogether of a private nature, but to have some connection with the Naval Demonstration.

We learn that the statement that the *Minotaur* has been ordered to get ready with all despatch to proceed to the Mediterranean is devoid of foundation. There is no intention of withdrawing the *Minotaur* from the Channel Squadron, and unless more active operations than the present parade of the Demonstrative Squadron are decided upon, there will certainly be no need of the service of Vice-Admiral Hood, C.B., in the Mediterranean. Vice-Admiral Sir Beauchamp Seymour, K.C.B., can doubtless go through the present little performance, difficult though his position may be.

Lieutenant the Hon. Hedworth Lambton, flag-lieutenant to Sir Beauchamp Seymour, has compiled a handy set of international signals to facilitate communication between the ships of different nations lying at Gravosa.

It is not surprising that already a voice comes from her Majesty's ships at Ragusa, hinting that the honour of having been selected to represent Great Britain in the European Demonstration is rather an expensive matter. The reports of the doings of the Fleet show that hardly a day passes without the interchange of hospitalities, and, there being so many nationalities represented, it is absolutely necessary that each and everyone should be entertained, as any omission of an invitation on the part of the British officers might be construed into a slight. The cost of this banqueting and keeping "open house" for callers is very great, and far more than the country ought for a moment to expect Naval officers to defray out of their own pockets. Their pay is small enough, and, as is well known, their messing is so conducted as to avoid extravagance, so that those who have not the good-fortune to possess private means may be able to make the two ends meet. But to suddenly be called upon to give a series of dinners, such as officers would feel it a duty to provide for foreign guests, is a strain which the funds of a mess will not stand, and which must be borne by the officers, unless the Admiralty will come forward and meet the extra expense to which the ships have been placed by being called upon to undertake so special a duty as that upon which they are now engaged. We have the less hesitation in referring to this matter, as in many foreign services it is the rule to defray the cost of entertaining at foreign ports out of the public funds We hope, therefore, that their Lordships will lose no time in issuing directions for a similar course to be adopted in the case of the ships representing England in the International Demonstrative Squadron, for although the mere question of cost would not cause officers to hesitate for a moment in entertaining in a manner befitting the country and Service which they represent, it would be a great comfort to the married men to know that they are not incurring expenses which they can ill afford.

The Earl of Northbrook, G.C.S.I., will return from the North early in October, and will then proceed with the other members of the Board of Admiralty to pay the usual visit of inspection to the Western Yards, which has this year been so far delayed by the late sitting of Parliament.

Vice-Admiral Lord John Hay, C.B., has paid visits to Chatham and Portsmouth yards since the official inspection by the Board, and is inquiring into details connected with the proposed shipbuilding programme for the Estimates of 1881-82.

The late First Lord of the Admiralty, Mr. W. H. Smith, has paid a visit to the Fleet at Ragusa, he being now on a cruise in his yacht. It is thought not improbable that another ex-First Lord, Mr. Goschen, may give the Fleet a call, should he be able to leave his post at Constantinople at so critical a moment.

The Russian Navy is experiencing a *mauvaise quart d'heure* just now. The frigate *General-Admiral* has proved to be 500 tons heavier than projected by Admiral Popoff, and suffered a break-down of her engines last week, while on her way from Cronstadt to Brest; the Imperial yacht *Livadia* is reported to be a failure; the floating gun carriages constructed for the Baltic have proved too weak to carry their 25-ton guns; and the transport *Krasni Gorka*, with 200 naval cadets on board for Sveeborg, has been stranded on the shoals of the Gulf of Finland for nearly a fortnight. All these mishaps, occurring at the same time, have made matters warm for Admiral Popoff in Russia. Of course he is not to blame for the stranding of the *Krasni Gorka*, nor is the breakdown of the *General-Admiral's* engines so much a fault of his as of the unskilled engineers placed in charge of them, but it is exclusively due to his improvements in course of construction that the *General-Admiral* has come out 500 tons heavier than she ought to be, and the same cause must be assigned for the weakness of the *Booran* and other gunboats of similar type. Should the Imperial yacht turn out to be the failure she is reported to be, Admiral Popoff cannot expect a very gracious reception from the Czar on his arrival at Livadia.

We hear that upon receiving the news of Captain Carter and Mr. Cozenhead having been killed in an affray with some of Mirambo's men, when plundering a village, the Sultan of Zanzibar decided to send up the country some two hundred troops, under the command of Lieutenant Mathews, R.N., temporarily employed in the Sultan's service, to see that order is restored, and that the roads are free from these marauders.

The two composite sloops now building at Devonport Yard, of the *Doterel* and *Mutine* class, are to be named the *Heroine* and *Hyacinth*. No date has yet been fixed for their completion, but they will be advanced rather more than one-half during the present financial year.

We hear that a new edition of Naval manœuvres has been approved of by the Admiralty, and further that much has been done in this edition to clear up certain vague points which existed in the former work.

The Lord Chief Baron, Sir Fitzroy Kelly, whose death is reported in his eighty-fourth year, was a son of Captain Robert Hawke Kelly, R.N., who was killed at the capture of Seringpatam in May, 1799.

We are glad to find that the Directors of the Royal Sailors' Home, at Portsmouth, have assumed the charge of money entrusted to the care of the Superintendent by the seamen of the Fleet. Mr. Thorne has transferred to the Directors £7,000, the amount which was remaining in his charge. At the last meeting of the Directors, Admiral Gambier moved, and the Rev.

E. Jacob (Vicar of Portsea) seconded, and it was unanimously resolved, that the best thanks of the Directors be accorded Mr. Thorne, for the full, clear, and satisfactory statement of accounts relative to the allotments he had placed in their hands at that meeting. Mr. Thorne, by the request of the seamen and the Directors, has consented to act as managing director, superintendent, and agent of the allotment branch. In expressing our satisfaction that this step has been taken by the Directors, we wish to especially add a tribute of praise at the admirable manner in which the superintendent, Mr. Thorne, has always carried out the duties of his post. It was well that the grave responsibility of the charge of so large a sum of money, belonging to such a host of men, should be vested in the hands of a body, rather than rest upon one. But from the first we regretted the tone adopted by some who brought this question forward, for there was not a word that could be fairly said against the manner in which Mr. Thorne had always acted towards those who had sought his assistance, and had trusted him as their friend. The Directors have given him a vote of thanks, and if the Service could express its feelings with regard to him, it would do so in no uncertain voice, for the unbounded confidence felt in him by our seamen is shown by objections raised to any alteration in the arrangements hitherto in force.

The German war-vessel *Prinz Adalbert*, which arrived at Plymouth from Ferrol, was visited on Monday by a Queen's messenger, who waited upon Lieutenant H.R.H. Prince Henry, son of the Crown Prince of Germany, with a letter and present from her Majesty, the Prince having attained his legal majority, eighteen years of age. The *Prinz Aldabert* sailed on Tuesday.

The Hereditary Grand Duke of Mecklenberg Schwerin embarked at Ryde on board the *Fire Queen* on Monday, and proceeded to inspect the Kicker and Noman Forts, and subsequently proceeded to the dockyard, and inspected that establishment, and returned to Ryde in the *Fire Queen*.

The Grand Duke Constantine of Russia, who has returned from Paris, will join the yacht *Livadia* at Plymouth, probably about October 5. Admiral Popoff, who is the guest of Mr. William Pearce, in Glasgow, has been confined to the house, but is fast recovering from his indisposition.

Commander William Hall, of the *Flamingo*, has received, through the Commander-in-Chief of the North America station, an expression of their Lordships' recognition of the zeal and intelligence shown in repairing the ship after her serious collision with an iceberg. The prompt steps taken to temporarily repair the bows of the ship at so trying and perilous a moment gave proof of the readiness of those in command, and of the admirable discipline of the crew.

The return of the Franklin Search Expedition, with relics of the *Erebus* and *Terror*, after having been successful in withstanding what is alleged to be the greatest cold ever experienced by white men, will, doubtless, cause the Arctic Committee to appeal to the public with redoubled confidence. No hasty retreat has been beaten, for the exploring party appears to have been free from attack by scurvy, and to have leisurely and safely pursued the search. As yet nothing but a bare telegram has been received from New York, and further details of the proceedings of the Franklin search may show that, like our own expeditions, this one has not escaped with a whole skin. But the success of this expedition will add to the chances of the new British Polar Expedition leaving our shores, and we are glad to hear that since the idea of depending too much on ballooning has been dropped, subscriptions have been flowing in more steadily. France has now shown an interest in the matter, and the President of the French Balloon Society is coming over to assist in some ascents, with the view to make further observations and experiments in continuation of those recently made by simultaneous ascents.

Lieutenant Victor Von Donop, who was originally appointed to the command of the *Decoy* when she was commissioned in September, 1878, and who suffered in health from service on the West Coast of Africa, has been reappointed to the command, on the vessel being ordered to the Mediterranean. In the last *Navy List* the *Decoy* had a vacancy for a lieutenant-commanding, the ship being apparently in charge of Sub-Lieutenant Luscombe.

Admiral the Hon. G. Brydone Elliot, C.B., Commander-in-Chief at Devonport, has this week been to Falmouth to inspect the training-ship *Ganges*.

Admiral Lessovsky, the new Commander-in-Chief of the Russian Siberian Fleet, arrived at Nagasaki on September 13. It is said that, if war eventually does occur between Russia and China, the Czar's third son, the Grand Duke Alexis, will proceed to the Pacific as the Commander-in-Chief of the Russian Fleet.

The reappointment of Mr. W. H. Martin, paymaster of the *Hibernia*, as secretary to Rear-Admiral M'Crea, has, we regret to hear, been caused by the invaliding of Mr. Hirtzel, who, together with Lieutenant Thomas, of the *Condor*, also invalided, has returned to England.

The pension of £65 a year vacant by the death of Retired Captain Arthur Morrell, on the 13th inst., has been awarded to Retired Captain John Wells, R.N.

Very just comments have been made on the length of time occupied in the trial of Serjeant Marshman, of the Royal Marines, by general court-martial; and an explanation is offered in the fact that no less than 2,673 questions were asked, all of which had to be reduced to writing and submitted to the President of the Court before being put. Some time ago, when speaking of the conduct of courts-martial, we suggested that, to avoid these prolonged sittings, a shorthand writer, sworn to do his duty, should be employed to write questions and record the proceedings. A steady non-commissioned officer (possibly one employed in the office of the General commanding in each garrison) could be instructed in shorthand, for which he should receive extra pay when doing duty before the Court, and for subsequent fair transcripts of his record of the trial. The extra cost would be trifling, and would be otherwise more than saved by the shortened sittings of the Courts.

Another Major of Marines has retired—Major Mackintosh, who some time ago received serious hurt by being thrown from his horse. This is the fourth Major of Marines who has retired during the present month, and it is rather remarkable that they are all of seniority of 1878.

Captain Sir Michael Culme-Seymour, A.D.C., has, by the death of his father, the Rev. Sir John Hobart Culme-Seymour, succeeded to the baronetcy, which was created in 1809.

At the last meeting of the Royal Humane Society, medals were presented to William Winter, for saving Harold Williams, both of them, with another man, being thrown into the water from the dingey of the *Cruiser*, in Bastia Roads, on the 2nd ult. And to George Wroe, for saving William Winter, who sank from exhaustion, after saving Harold Williams. Also to E. A. West, for jumping from the after-gangway of the *Audacious* to the rescue of G. F. Tomlins, who attempted suicide by jumping from the bow port, and was being rapidly carried away by a very strong current, at Hull, on the 25th ult. A testimonial, recording the services rendered and the acknowledgments of the Society, was also given to Lieutenant N. E. C. Legh and Mr. Johnston, boatswain, of the *Audacious*, for jumping overboard to the rescue of William Page, who was in danger of drowning at Portland on July 5.

The Commissioners of Customs, in their Report just issued, after referring to the exceptionally large seizures of tobacco-stalks made in Portsmouth last year, amounting to 1,664 lb., call attention to the practice which prevails in the Royal Navy of serving out the tobacco which the crews are allowed to purchase on board for consumption, duty free, in the leaf, and unstripped from the stalk, to be afterwards manufactured according to the fancy of the consumers. This practice, being apparently unattended by any regulation requiring the collection or destruction of the stalks rejected in the process of manufacture, causes considerable risk to the revenue, from the temptation which it offers to the sailors to sell the stalks to unprincipled persons on shore for the purpose of manufacture or adulteration, or for conversion into snuff, to be afterwards tendered for the drawback of a duty which has never been paid upon it. Whether by some restrictive regulations, or by stripping the stalk from the leaf before the tobacco is issued, the risk pointed out can be obviated or reduced, the Commissioners have no means of determining; but they think it right, in view of the apparently increasing amount of smuggling which is being carried on by this means, that the subject should be noticed. We would suggest that the best remedy would be to allow the men a drawback on all stalks returned to store, and that each man or mess should be given a pound of tobacco for every pound of stalks returned into store. The stalks could then be disposed of by the Admiralty.

The unsatisfactory rule barring seamen who are in receipt of a pension of not less than £45 per annum from participating in the benefits of Greenwich Hospital funds, is not likely to be set aside at present, as the funds of the Hospital will not bear the strain put upon it by the greater number of men who now draw pensions. But that it should cause dissatisfaction among pensioners is not surprising, for it simply amounts to curtailing the benefits of good conduct and long and meritorious service. A man who has such an amount of petty time and such good certificates as to be awarded a high pension, must have been a valuable servant to his country and a thoroughly reliable man afloat. But because he has conducted himself in so exemplary a manner throughout his career in the Service, he is debarred from drawing anything from the Greenwich Hospital funds; whereas a man who may have been troublesome in his younger days and failed to get on in the Service as well as he should, receives assistance from Greenwich to make up for the small pension to which his conduct and services afloat have entitled him. The sooner their Lordships devise some new means for curtailing the demands upon the Greenwich funds, the better pleased the old servants of the Crown will feel; for now they say that they have been robbed of a portion of that for which they served so faithfully.

H.R.H. the Duke of Cambridge is expected in London, to resume his official duties at the Horse Guards, in the course of the ensuing week.

Lieutenant-General the Hon. Leicester Smyth, C.B., leaves England about the 20th inst., to take up his command of the troops at the Cape.

If "considering," "committeeing," "commissioning," and "reporting" could give the British nation an efficient army, Mr. Childers might await possible calls on the War Office with equanimity, and the Government might regard possible complications in Europe, or out of it, with comparative ease of mind. We have in these Isles a martial population nearly equal to that of France, and not very far inferior to that of Germany, and we have in India and elsewhere fields for recruiting which, properly worked, should be quite inexhaustible. Our military budgets for India and the Imperial Army far exceeds £30,000,000 a year, collateral charges included. We have the money, and we ought to have the men, but it is certain that the supply of recruits in India is dwindling fast away, and that boys, not men, fill the ranks at home. If Mr. Childers. who has so many things to consider, will apply his mind to study the various reports which have been made by Parliamentary and Departmental Committees, he will not fail to discover that all professional soldiers concur in the opinion that our officers are generally capable and zealous, and that it is among the non-commissioned officers and the rank and file that the need of better elements is felt, and he will moreover be convinced, we think, that changes in our system, based solely on Continental models, are to be avoided. A War Minister, even if he be a civilian, ought not to need the weighty words of the German Emperor to convince him that the first great necessity for an army is discipline, but discipline in peace time cannot be coexistent with a large amount of military crime, and we fear the result of an inquiry into the internal condition of our home battalions under that head would be far from satisfactory. To a reforming War Minister, surrounded by new military brooms, and by old ones with new bottoms, the temptation to remedy existing evils, often the offspring of injudicious changes, is very great, and we are told that startling projects are entertained in high places. At such a crisis as it may prove in our miltiary history, the exercise of the duty of selecting officers for important commands should be free from the influence of fear, favour, or affection, especially as there is a tendency in certain quarters to ascribe all our defects not to the system, but to the administration of it, and as there is a strong party in the country bent on taking away the control of the Army from the Crown and giving it to those who represent the corruption and passion of caucuses of an ignorant democracy. Those who read these words may not all of them understand what is meant, but those whom they most nearly concern would do well to lay them to heart. It will be pitiable if those charged with the responsibility of directing the Army are influenced by any considerations save those which relate to the promotion of the national weal.

The Secretary of State for War stated lately in the House of Commons that the question of Ridingmasters fairly puzzled the War Office. No one can be surprised that this should be the case, when it is considered that officers commanding cavalry regiments are at times sorely perplexed, and that the ridingmasters themselves are even more so than any one else. The question has been frequently asked,—Is the ridingmaster really a combatant or a non-combatant officer? As yet, however, it has never been authoritatively answered, and these unfortunate officers are left at a great disadvantage, for while retaining the duties of combatants, the rank which those duties should carry has been taken away from them, with apparently little prospect of its being restored. Hence the constant misunderstandings which arise, in consequence of different commanding officers taking different views on points upon which there ought to be no doubt. In some cases, the same officer will view the position of his ridingmaster in a different light, according as circumstances change. As an instance of this, a ridingmaster was sent, some time ago, on the line of march in charge of young horses. The veterinary surgeon, who was relatively the senior officer, being present, wanted to take charge. But the commanding officer ruled that the ridingmaster, being a combatant officer, had a right to the command. The same ridingmaster was some time afterwards ordered to assume command of the depôt during summer drills, two other officers being present, both of whom held relative rank senior to him. After he had been in command some time, a lieutenant joined and claimed command; but the ridingmaster objected, stating that he was senior, and that the commanding officer had placed him in command by virtue of his position as a combatant officer. On the return of the regiment, the commanding officer intimated that the ridingmaster should have given over the command to the lieutenant, he being a "*bonâ fide* combatant officer." Now, the questions naturally arise,—If the ridingmaster was not a combatant officer, by what right did the commanding officer place him in authority over the veterinary surgeon on the line of march? Why was he left in command of the depôt, when two senior officers were present; and further, if he was a combatant officer, why should he have been called upon to hand over the command to a junior lieutenant? These are questions the War Office should decide, and not place commanding officers in such an awkward position as to leave them to decide on every occasion what positions their ridingmasters are to hold for the time being. Such an unsatisfactory state of things is liable to lead to continual disputes and irregularities in regiments, which might be easily obviated by the ridingmasters being allowed to occupy their former position as combatant officers, when they would be available for any duty the commanding officer required them to perform.

The new regulations for the reorganisation of the Engineer Corps of the Austrian Army have received the sanction of the Emperor. According to them, the Austrian Engineers will, as before, be formed into two regiments, each regiment consisting of five field battalions of four companies each, eight reserve companies, and a depôt battalion of five companies. In time of peace only the cadre of the depôt battalion, and of the detached battalions, those of the depôt companies, will be kept under the colours. The detachments of miners of the field railway corps, the entrenching-tool columns, and the principal Engineer park, are incorporated with the Engineer regiments. The officers of the Engineers will rank with those of the Engineer Staff. The Engineer officer must, therefore, be equally competent to serve in either capacity. The active officers receive their training in the Technical Military Academy and the School for Engineer Cadets. The Reserve officers will be selected from among the one-year volunteers, reserve cadets, and active officers having joined the Reserve forces.

The announcement in the Tiflis papers, inviting supplies for the "temporary" military hospitals at Tchat and Tchikishlar up to "January, 1882," is a tolerably clear indication that the Russians believe the Turkomans will take longer to conquer than is generally assumed in this country. For the moment, Skobeleff is forced to abandon the offensive—*i.e.*, forced to cease raiding operations against the Tekkes, and not to retire to his base, as erroneously telegraphed by the St. Petersburg correspondent of the *Daily News*. To evacuate Bami would be to completely put a stop to the campaign, and place at the mercy of the triumphant Tekkes the railway labourers laying down the line from Michael's Bay to the Akel Oasis at Kezil Arvat. Skobeleff has taken so much trouble to fortify Bami, the Akhel fort guarding the Berdesen Pass, and controlling the two roads running from Tchikishlar to Geok Tepe, and has collected such a quantity of supplies there, that to abandon it at a moment when its retention is absolutely indispensable to cover the Krasnovodsk railway, would be a most serious strategical error. Under the most favourable circumstances, the railway cannot be completed before December, and it will be wiser for Skobeleff, in the meanwhile, to strengthen the flank line running from Tchikishlar to Bami, and fully reconnoitre the Kopet Dagh region, than to indulge in any more of the daring enterprises of the character of the one recently undertaken against Geok Tepe.

The question of a suitable head-covering for the French Army is at present undergoing considerable discussion, and it will soon be decided, theoretically at least, whether helmet, chako, or képi is to have the preference. Latterly the suitability of a head-covering as a protection in action, not so much as a defence against sword cuts as even against infantry fire, has been much considered. It is a well-known fact that a rifle ball striking a firm object with rounded surface and failing to penetrate it, is easily deflected from its course. It has happened in warfare that projectiles, on striking a rib or the skull, have made some curious deviations, without penetrating the body. It may be assumed as certain that at the usual distances at which troops now fight each other (about 1,200 yards and over), but very few rifle-balls will be able to penetrate a firm and well-rounded helmet. Now, contrary to all hitherto received notions, and probably in consequence of the practice of firing from under cover, wounds in the head are the most numerous among injuries received, in proportion to the average surface of the exposed soldier. The figures here cited will show this in a remarkable manner. In the Crimea war, the number of head wounds were 5,238; in the Italian war (1859), 1,734; in the American Civil War, 9,217; in the Franco-German war, 8,355,—total, 25,544 wounds in the head, as against 19,855 wounds in the breast or back. Those figures, which have been taken from a work on military hygiene, are based on detailed investigations of Drs. Didiot and Chenu, whose reliability may well be depended upon. It can no longer be assumed that the above proportion was a mere accident in four great wars,—the most important of modern times, and fought out in different quarters of the globe; it may be taken as proved that wounds in the head will be much more numerous than injuries to the breast or other parts of the body. If this conclusion be correct, it recommends itself as the safest way to introduce a well-rounded leather helmet for the infantry soldier in general, but especially for the crouching sharpshooter, of whom, as a rule, little more than the head is exposed It remains to be seen whether those views will prevail with the French military authorities.

OUR POSITION IN AFGHANISTAN.

The most important information which has reached England this week is contained in the telegraphic despatch of the *Standard* correspondent, dated Candahar, Sept. 21, in which we are told that "Gen. Macgregor's Brigade, consisting of the 60th Rifles and three Native Bengal regiments, are ordered to return to India, viâ the line of the Harnai Railway, and upon their way down to punish the Marris, who slaughtered and looted our retiring troops six weeks since. Gen. Baker's brigade, now at Pishin, is ordered to punish the Khojac tribes in a similar manner, as it is absolutely necessary that these marauders should be taught to respect parties traversing the roads. Gen. Roberts is at Quetta. Lyall is expected to arrive there on the 3rd of next month. The delay of the Government in deciding upon a definite policy, one way or the other, causes much embarrassment. Opinions here differ as widely as ever as to the policy of annexation. The political officers are in favour of the step, while military men are for the most part opposed to it. Many experienced officers strongly support the idea of maintaining a subsidised Afghan force, under British officers, for the protection of the line of railway and the preservation of peace. The question will, perhaps, be more fairly and judicially considered and decided in England than in India, as all political officers here are personally interested in the question, and are necessarily biassed by their own interest. There is considerable dissatisfaction among military men that political officers are allowed to correspond for the newspapers, whereas they are strictly forbidden to do so. This is no question of pecuniary advantage, but turns upon the point that the two sections differ in opinion as to the right course to be pursued; and allowing one party to use the Press for the dissemination of their views, while the other is debarred from so doing, is considered to allow an unfair advantage to the political branch of the Service. Generally, however, in Afghanistan a better feeling than usual has prevailed between the military and political officers, the latter being, as a rule, intensely unpopular with the combatant arm of the Service. The latest trustworthy news from Cabul is fourteen days old. All was well then, but it is rumoured that Abdul Rahman is very far from having overcome the hostility which exists against him on the part of the main bulk of the population. The distrust and dislike with which numerous men of influence in Afghanistan regard Abdul Rahman are due to the universal belief in his Russian predilections. At present none trust him, and all parties unite in the opinion that we must for the present hold Candahar, and lay a light line of railway up through the Bolan to this place. This would be a great commercial success, it would in no case be a waste of money, and it would do more to make British influence paramount on this side of the Indus than anything else could do. Should Abdul Rahman turn out an eventual success, all Afghanistan will wish to go over to him, and Candahar might then be asked to decide upon its own future. At present the Ameer is said to be in pecuniary difficulties, and to be unable to obtain credit."

SIEGE OPERATIONS.

The Siege Operations Committee appointed for the purpose of investigating the influence of rifled guns and small arms upon the prevailing systems of fortification have just concluded a lengthy series of practical and valuable experiments at Dungeness. It has been previously pointed out that the rules of attack and defence established on the principles laid down by Vauban and Cohorn in the early days of artillery had remained virtually unchanged until now, that, although the old-fashioned system might have answered fairly while only smooth-bore ordnance was in use, the conditions of the question were materially altered when rifled arms came into play with increased power at much longer ranges, and that the period had arrived for working out the various problems afresh and promulgating a new formula. The Committee was, therefore, appointed by the War Office, with instructions to make a thorough investigation of the whole subject — on the one hand to ascertain the most effective means of employing modern guns, shells, and fuses in attacking fortresses and entrenchments; on the other to ascertain such improvements as may be desirable in the methods of resisting the increased effect of rifle fire—and to lay down such laws on the whole subject as would bring it up to date. The members to compose the Committee were consequently selected from various branches of the Army, Gen. Sir F. E. Chapman, G.C.B., Royal Engineers, a former Inspector-General of Fortifications, being the president, and having for his colleagues Col. H. A. Smyth, R.A.; Col. Sir J. Stokes, K.C.B., Commandant of the School of Military Engineering, Chatham; Col. W. Crossman, C.M.G., R.E., Inspector of Submarine Defences; Col. G. H. Adams, 86th Regiment; Col. Eardley Maitland, R.A., Superintendent of the Royal Gun Factories, Woolwich; and Major T. Fraser, R.E. (secretary). The Committee determined first to ascertain the capabilities of musketry as represented by the Martini-Henry rifle of the Service, and then to try the effect of the guns and howitzers which compose the siege train. With the infantry arms were employed the machine guns of the Service, otherwise known as the Gatling mitrailleurs, and the attack was made at various ranges, from over 1,000 yards to within 300 yards of the works assailed. The defenders, supposed to be in rear of the parapets, were represented by dummies, purposely made bullet-proof, in order to arrest any bullets which might strike them, but surrounded by pervious targets of paper or other material, in order, as far as possible, to record the whole history of the "bullet rain." The attacking force of infantry and the machine (Gatling) guns had only unseen objects for their aim, but by a careful study of high-angle firing they contrived to lodge a fair per-centage of their bullets among the targets behind the breastworks, and their effectiveness was tried in various ways, such as mass firing and grouping in large and small bodies, while even in the darkness of night they were enabled to acquire some useful information and make some practice, which, without foreknowledge, would be unattainable in time of warfare. The relative safety of the positions in rear of the parapet was noted down from the perforated targets, with the view of instructing men how to avoid exposure; and "dummies," in the shape of men standing, kneeling, and lying down, were employed to ascertain the extent to which they were respectively in danger. The difference of firing with and without fixed bayonets, according to the probable conditions of active service, was also the subject of investigation, and the effects of using mechanical and delicate sights, fixed rests, and rough supports for the rifles were all duly ascertained. Night sorties from the fortresses were also imagined and provided for. The electric light was sometimes pressed into service, and discovered the enemy, a ready mark for the rifleman; but at other times total darkness prevailed, and the infantry had to sweep the front with their fire according to the best of their judgment, the positions which they assume while at this practice being found to have important bearings upon the results. Distinct experiments were made to ascertain how far it was possible by musketry fire to prevent the repair of a breach during the night, and the best methods of resisting an advance of the enemy's works were covered by saps and rollers. Neither in the open nor behind the 7-ft. parapet would have been found a safe place against men who had had a few weeks of this training. The infantry having completed their work, the siege guns were brought into action, and their penetrative and destructive effects were ascertained with common shell against defences of different materials—masonry, concrete, brickwork, &c., the bursting charges being sometimes gunpowder and sometimes the far more potent gun-cotton. The new howitzers, so vastly superior to the ancient mortars, which they have quite driven out of the field, were also brought to bear, and their battering-power with the Palliser chilled shell illustrated, even at such angles as would allow a drop of 18 to 30 degrees at the end of their trajectory. The delayed-action fuse, which permits the shell to bury itself deeply in the fortifications before bursting, was also tried in different ways, and with admirable effects; and then the two howitzers were set the task of making each a couple of breaches at long ranges, as might be done in real siege operations during the attacks upon a first-class work. The task was rendered more difficult by the object fired at being out of sight, hidden by inequalities of ground and other obstructions, and the distance even uncertain. The situation being ascertained by the gunners' best devices, the necessary direction was given by "laying back" on Capt. French's system, and the range was soon found by a well-planted curved fire. The experiment showed that about one hundred rounds from the 8-inch howitzer, at ranges between 1,500 and 2,500 yards, the object being unseen from the battery, would be sufficient to make a practicable breach in a fairly substantial work. The 6·6-inch howitzer was necessarily less effective, but it was found that, roughly speaking, even this comparatively small weapon could, at the same ranges—that is, beyond a mile's distance—and under the same disadvantageous conditions, make a thorough breach in 300 rounds. In these, as in the musketry experiments, minute observations were made and recorded, and, although the details will not be published, the experience gained at Dungeness will be collected and preserved in a permanent form, and made available for useful purposes in the siege operations of the future.—*Times*.

THE LUCKNOW DINNER.

The *Citizen* says:—"Next Saturday, at the Albion, several of the officers who took part in the relief of Lucknow will dine together. It will be of interest to give the names of all officers living who took part in this feat of arms. They are:—Gen. Lord Napier of Magdala, G.C.B., G.C.S.I., R.E.; Lieut.-Gens. Crommelin, C.B., R.E.; M'Intyre, C.B., late 78th Highlanders, and Olpherts, C.B., V.C., R.A.; Major-Gens. Dodgson, C.B.; Sir V. Eyre; C.B., K.C.S.I., R.A.; Gallwey; Gordon, C.B.; Sir H. Havelock-Allan, Bart., C.B., V.C., M.P.; Lockhart, C.B., late 78th Highlanders; Macpherson, C.B., V.C., late 78th Highlanders (now commanding brigade in Afghanistan); Rattray, C.B., late 90th Light Infantry; Spurgin, C.B., C.S.I., late 101st Fusiliers; Shute, late 64th Foot; and Willis, C.B., late 84th Foot; Surg.-Gen. Sir A. Dixon Home, K.C.B., V.C., A.M.D.; Deputy-Inspr.-Gens. Joseph Jee, C.B., V.C., and Domenichetti, M.D.; Cols. G. D. Barker, 64th Foot; Chalmers, Bombay S.C.; Delafosse, C.B., 101st Fusiliers; Goldsworthy and Graham, V.C., Bombay S.C.; Hudson and Lamond, R.E. (Bengal); Lynch, 10th Foot; Maitland, R.A.; Maude, C.B., late R.A.; Palliser, 10th Bengal Lancers; Penton, 89th Foot; Russell, late R.E. (Bengal); Rennie, V.C., late 90th Light Infantry; Smithett, R.A.; and Chambers, R.A.; Lieut.-Cols. Blake, late Military Train; Bouverie, late 78th Highlanders; Hastings, 62nd Foot; Haydock, 41st Foot; and Wade, late 53rd Foot; Majors W. A. Battine, 2nd Dragoon Guards; Birch and Clayland, late 102nd Foot; Creagh, 5th Fusiliers; Finlay, late 78th Highlanders; Sir H. H. Goodricke, Bart., late 90th Light Infantry; Hall, 101st Fusiliers; Johnson, late 12th Irregular Cavalry; H. B. Savory and Skrine, late 78th Highlanders; G. Agnew, half-pay; and Woodhouse; Surg.-Major Popplewell, A.M.D.; Capts. Barry, late 84th Foot; Beaumont, Grant, and Greene, late 102nd Fusiliers; Humphrey, late 84th Foot; Jackson and Knight, late 90th Light Infantry; Magrath, late 84th Foot; Massey, late 5th Fusiliers; Oakley, Parry, and Pearson, late 84th Foot; Phipps, late 90th Light Infantry; Walker and Robertson, late 78th Highlanders; Lieuts. Griffin and Lippard, late 84th Foot; Qrmrs. Nally, late 84th Foot; and Drake, 5th Fusiliers."

USE MARGERISON'S REGISTERED WHITE WINDSOR SOAP, PRESTON.- The best and cheapest Soap in England for washing clothes, or ay household purpose. Ask for MARGERISON'S Soap, and see that te word MARGERISON is on every bar, as there are so many worthles imitations. Sold at Stores.

THE 100-TON GUN AT SHOEBURYNESS.

A disappointment which occurred in a second attempt to fire the 100-ton gun at the proof butts on the Government marshes adjoining the Royal Arsenal, Woolwich, some days since, tended to increase the interest in a renewal of the experiments on Monday. It appears that in firing the first round the wooden socket used to strengthen the cartridge did not leave the gun, and at the second loading got between the vent and the powder, which, in these circumstances, could not be ignited. With the aid of ladders, Capt. Morley, R.A., the proof officer, and his assistants laid the gun on Monday so as to direct the projectile through the two electric screens which stand before the butts to measure the velocity of [the shot a wire from the instrument-room was connected with the vent, and the warning bell was sounded. Then it was found that Col. Inglis, R.E., who is president *pro tem.* of the committee, was to occupy the turret while the gun was fired, and after handing to Lieut. Willock an official document which by grim joke was said to be his will, he entered the exposed side of the turret with a lighted lamp, and was fastened in with chain and staple. Major Ellis, R.A., took his stand beside the gun on the open side of the *emplacement*, and Capt. Lewis, R.E., posted himself in the recess on the other side, where are the levers which control the machinery. Without any long interval of suspense the gun was fired. As the spectators run forward, they see Col. Inglis walking out of the turret, the door of which was burst open, breaking the iron staple. He described the concussion, however, as not distressing, and accounts for the door opening by the outside vacuum created by the expansion of the powder gases, which he thinks can hardly affect the permanent works, enclosed as they will be on all sides with heavy masonry. As a man will always have to occupy the turret to work the loading apparatus whenever the gun is in action, it was assuring to have the opinion of Col. Inglis that he should be quite comfortable in the circumstances. The lamp was not extinguished, but when the gun was fired, the flame leaped up, from natural causes well understood. The officers who stood on either side of the gun stated that the effect experienced was much the same as they might experience 50 yards off, and the impression upon the other observers was that the report was not quite so loud as they had heard the other day. This impression was soon confirmed in various ways. The recoil with the increased charge was but 2 ft. 8 in., not much more than half the recoil on the last occasion; the shot, which then went 45 ft. into the sandbank, was now dug out at a depth of only 30 ft.; and, most conclusive of all, the velocity, which with the 425 lb. charge was 1,520 ft. per second, was, measured with the 441 lb. of powder, only 1,040 ft. It was clear that there was something wrong somewhere, and the natural conclusion was that the projectile had slipped forward while the muzzle was depressed after the rammer had been withdrawn. Mr. W. H. Hawdon, who represented Sir William Armstrong, would not allow that this could occur unless a shot were greased on purpose; but the Committee were not satisfied of its impossibility in even ordinary circumstances, as the gun, when brought down 9° from the horizontal line to load, presents a gradient with a very free incline. The gun was, therefore, loaded again with a similar charge—viz., 441 lb. of powder and 2,000-lb. shot, care being first taken to wash the bore well out and search it with a mirror, for obstacles, of which none were found, and all being satisfactory, it was again fired. The report was sensibly heavier, the recoil was increased to 4 ft. 7½ in., the penetration of the sand butts was 45 ft., and finally, the velocity of the projectile was measured at 1,556 ft. per second. As in this round the shot was ascertained to be in its proper position by means of a measuring rod after the gun had been elevated—a precaution which was not observed in the previous round—the suspicion that the shot had slipped forward gained strength, and it will probably be considered requisite to employ wads in future experiments.

INDIA.

Respecting the sortie from Candahar in which Gen. Brooke lost his life, it seems two parties got back safely, but the third party were cut off almost to a man, as they could not extricate themselves. Gen. Brooke was almost the last, refusing to leave Capt. Cruickshank, who was badly wounded. He ordered several men who rushed back to his assistance to go on, and when almost outside the village both officers were cut down. Col. Shewell was shot in the leg while helping a wounded man into a dhoolie just outside Cabul gate. The Rev. Mr. Gordon went from the gate to the Ziarat, where five wounded men were lying. The enemy made a rush, and poured volleys of musketry into the Ziarat, killing Mr. Gordon and several men.

Brigdr.-Gen. T. S. Brown, half-pay, late 83rd Regiment, commanding the Sind District, Bombay Army, had left for the front when the mail was despatched.

The Lahore paper hears that at head-quarters it is considered likely that Col. Sir Charles Brownlow, K.C.B., Bengal S.C., will succeed Col. Allen Johnson as secretary to the Government of India in the Military Department.

Brigdr.-Gen. Barter, who was at first nominated to the command of the 3rd Brigade of Gen. Roberts's force for the march on Candahar, has been compelled to return to India by bad health.

The widow of the late Brigdr.-Gen. J. A. Tytler, C.B., V.C., Bengal S.C., has been granted a military pension during widowhood, from Feb. 15 last, of Rs 74·8 per mensem.

It has been decided to admit natives of the country to the Volunteer Corps in the Madras Presidency.

The *Bombay Gazette* says:—"The personal gallantry of Gen. Burrows and his staff at Kushk-i-Nakhud deserves a word of recognition. The General had two horses killed under him; Capt. Heath was killed, Capt. Harris wounded; young Leach had his horse wounded, and so likewise had the Political, Col. St. John. It is evident that the General and those around him freely exposed themselves in the effort to rally the men and restore the fortunes of the fight. Private letters have now come to hand from officers who were in the action, and from the accounts given it appears certain that the troops were demoralised by the heavy artillery fire to which they were exposed, and that they gave way with unaccountable facility almost before they experienced the shock of the enemy's cavalry and the Ghazis. The men evidently felt that they were hopelessly over-matched. Few of them having been ever under fire before, they were unsteady in a position which would have tried the stamina of seasoned troops, and when the crisis came they gave way in spite of the most energetic and heroic exertions of the General and his staff to restore order and avert defeat. While there is so much to deplore in connection with this melancholy business, it is consolatory to know that so far as determined courage and unsparing personal exposure on their part could do so, Gen. Burrows and those upon whom he immediately relied, upheld the reputation of the country in the hour of disaster."

It is said that the Chief Commissioner of Assam has strongly recommended to the Government of India the retention of an entire native regiment in the Naga Hills, to be stationed at Kohima, or some other central position. It is probable that all the frontier outposts will be transferred from the Military to the Frontier Police, whose numbers will be increased, and who will be armed with breechloaders.

Soldiers belonging to regiments serving in India, whose period of enlistment or of total service, or whose period of army service, is about to expire, are to be detained, and their service prolonged for such further period, not exceeding twelve months, as may be found necessary. This order does not, however, apply to, or authorise, the further detention in India of men who were detained last trooping season under G.O.C.C. dated Sept. 17, 1879, who will be sent home during the ensuing trooping season with all convenient speed; but short-service soldiers who were detained last season may voluntarily prolong their service, if willing and eligible to do so.

The *Times*' correspondent at Calcutta telegraphs on Sept. 19:—"It seems clear that the Government has resolved to abandon the Khyber Pass, and it is even rumoured that Lundi Kotal and Ali Masjid will be made over to the Ameer. On this point public opinion is, perhaps, not quite so unanimous as on that of the retention of Candahar; but I think the great majority of Anglo-Indians are strongly in favour of holding such positions as will give the effectual command of both ends of the Pass. The main arguments of those who support the abandonment of the Khyber are that the pass is unhealthy, and that the future of Cabul is of no great consequence to us, our true line of defence lying rather in the Candahar direction. It is quite true that Ali Masjid is unhealthy, but there is no evidence that Lundi Kotal is worse in that respect than many Indian military stations, and there can be no doubt that many healthy positions for the troops could be found in the vicinity. Moreover, though Cabul cannot rank with Candahar as a strategical point for the defence of India, it is still important, after the events of the last two years, that British influence should be dominant there, and that the city should be capable of easy occupation, if required as a bulwark against any invasion that might be threatened through Balkh or Afghan Turkestan. The future of Herat is another question which begins to be much discussed. That it would be impolitic to hand over that city to Abdurrahman is very generally admitted, and it is urged with much force, and by many persons well qualified to form a sound judgment, that the best course would be to put Persia in possession, first stipulating for the permanent residence there of a British Agent, and for such other guarantees as might be deemed advisable. It is rumoured that Mr. Lyall, the Foreign Secretary, goes shortly to Candahar. It is to be hoped that his visit will result in the speedy formation and announcement of some definite policy as to that province. Nothing is yet finally settled regarding the proposed encampment of the Cabul Field Force at Hassan Abdul, and its being reviewed there by the Viceroy. The plan is decidedly distasteful to the troops, who are anxious to get back at once to comparative luxury and rest at their respective stations."

Lieut.-Gen. Sir Donald Stewart, K.C.B., Bengal S.C., took his seat as a member of the Supreme Council of India on the 14th inst.

Some few additional particulars of the defeat suffered by the Bombay General, received in a private letter from an officer engaged in the fight, have been made public, but nothing official has yet transpired. The Government of India, reproached for withholding information about the disaster, have replied, through the Press Commissioner, that "no report whatever giving an account of Gen. Burrows's defeat has reached the Government, either from that officer or from Gen. Primrose." As nothing about the disaster has since transpired, it is to be supposed that the Government are still without despatches from the Generals. Gen. Primrose should be asked to explain this. It has been suggested that the despatches have been lost, but the Government must have known full well if any had been sent, and would, of course, have mentioned the fact.

Col. H. F. M. Boisragon, Bengal S.C., has been granted a good-service pension of £100 per annum from March 29 last, vice Surg.-Gen. J. F. Beatson, M.D., C.I.E., retired. Dates of commissions—Ensign, June 14, 1845; lieut., Oct. 13, 1854; capt., Nov. 23, 1856; major, Jan. 19, 1858; lieut.-col., March 12, 1865; and col., April 9, 1872. War services—Served in the Burmese war, 1852-53, and was present at the relief of the garrison of Pegu; and commanded a field force against the rebel chief Mong Gouneggie (medal with clasp for Pegu). Served also in the Indian Mutiny campaign, in 1857-58; commanded a wing of the Kumaon Batn., now the 3rd Goorkha Regt., at the siege, storm, and capture of Delhi (dangerously wounded); commanded a force in the Saharunpore district, and on Jan. 10, 1858, encountered and beat back across the Ganges, at Hurdwar, upwards of 1,000 of the enemy, with four guns, destroying many of the enemy, and capturing arms and munitions of war (thanked by Government, medal with clasp, and brevet of major). Has commanded the 4th Sikh Infantry since Oct., 1869.

ARMY GAZETTE.

[Where not otherwise specified, the following commissions and announcements bear date Sept. 22, and the current year must be understood.]

WAR OFFICE, PALL MALL, Sept. 21, 1880.

Royal Engineers—Major E. R. Festing, upon the Permanent Reserve List, to be Lieut.-Col.; Major G. W. Stockley to be Lieut.-Col., vice Maquay, who retires upon temporary half-pay; Capt. and Brevet Major J. C. Ardagh, C.B., upon the Seconded List, to be Major; Capt. W. E. Peck to be Major, vice Stockley; Lieuts. G. A. Cockburn to be Capt., vice Peck; W. W. B. Whiteford to be Capt., vice James, who retires, receiving a gratuity.

Staff—Capt. and Brevet Lieut.-Col. G. U. Prior, 100th Foot, to be Garrison Instructor at Aldershot, in succession to Capt. and Brevet Major Shaw, 102nd Foot, who resigns that appointment (Oct. 1).

Commissariat and Transport Staff—The appointment of Deputy-Comy. S. G. Granville, Commissariat and Transport Department, to be Deputy-Assist.-Comy.-Gen., dated Jan. 31, as notified in the *Gazette* of March 12, and his subsequent promotion to be Assist.-Comy.-Gen., dated April 1, as notified in the *Gazette* of April 2, are cancelled.

Commissariat and Transport Department—Deputy-Comy. S. G. Granville has been retired under Article 58 of the Royal Warrant of Jan. 31, 1880 (Sept. 9).

WAR OFFICE, PALL MALL, Sept. 24, 1880.

ROYAL ARTILLERY.

Col. R. J. Hay, from the Seconded List, to be Col., vice Evans, placed upon the Seconded List on appointment to the Staff of the Army in India (Sept. 25, 1880); Lieut.-Col. and Brevet Col. A. H. Murray, from the Seconded List, to be Lieut.-Col. on the Establishment in India, vice Betty, transferred to the Home Establishment (July 12, 1880); Major S. Penny (late Madras), to be Lieut.-Col., vice Brevet Col. Trevor (late Madras), who retires upon a pension and special annuity; Capts. A. I. Maclaverty (late Madras), upon the Seconded List, to be Major, upon the Seconded List; M. R. West (late Madras), to be Major, vice Penny (late Madras), promoted (all three dated Sept. 1, 1880); H. C. Seton (late Bombay), from the Seconded List, to be Major, vice Ouchterlony (late Bombay), who retires upon a pension with the honorary rank of Lieutenant-Colonel (Sept. 9, 1880); Lieuts. F. E. R. Pollard-Urquhart to be Capt., vice West (late Madras), promoted (Sept. 1, 1880); J. K. Trotter to be Capt., vice Hellard, deceased (Sept. 2, 1880); F. A. Aylmer to be Capt., vice Miles, placed upon the Seconded List, on appointment as Adjt. of the 8th Lancashire Artillery Volunteers (Sept. 9, 1880); R. F. W. Trist to be Capt., vice Crofton, placed upon the Seconded List, on appointment as Adjt. of the Cheshire and Carnarvonshire Artillery Volunteers (Sept. 11, 1880); Capt. L. P. Pennethorne, upon the Seconded List, retires, receiving a gratuity; Lieut. O. Rowe, from the Seconded List, to be Lieut., vice Calder, placed upon the Seconded List (both dated Sept. 25, 1880); Capts. J. M. Tabor to be Adjt., vice Capt. Disney, who has resigned that appointment (Sept. 11, 1880); E. O. Hay to be Adjt., vice Capt. Greer, who has resigned that appointment (Aug. 22, 1880).

The name of the officer promoted to the rank of Lieut.-Col. in the *London Gazette* of Jan. 14, 1879, is "Traill," and not as stated therein.

BREVET.

To be Colonels:—Lieut.-Cols. J. H. Brown, R.A., and W. A. F. Strangways, R.A. (both dated Sept. 8, 1880).

MILITIA GAZETTE.

[Where not otherwise specified, the following commissions and announcements bear date Sept. 25, and the current year must be understood.]

WAR OFFICE, PALL MALL, Sept. 24, 1880.

ARTILLERY.

Antrim—Capt. J. le C. Robilliard, R.M.A., to be Adjt., vice Ogle, promoted.

Royal Carmarthen—2nd Lieut. J. W. Gwynne-Hughes resigns his commission.

Galway—Capt. T. C. Lambert to be Major; 2nd Lieut. J. A. Campbell resigns his commission.

Limerick City—2nd Lieut. G. F. Bunbury to be Lieut.

INFANTRY.

Bedford—2nd Lieut. F. W. Pym to be Lieut.

Royal Berks—Capts. J. W. Allin resigns his commission; C. P. Temple, 49th Foot, to be Adjt., in succession to Murphy, whose period of service as Adjt. has expired (Sept. 20).

1st Devon—Lieut. J. F. Tuthill to be Capt. The under-mentioned 2nd Lieuts. to be Lieuts.:—Edward F. J., Viscount Exmouth, and W. F. Tremayne.

The Essex Rifles—2nd Lieut. P. C. Honywood resigns his commission.

Hertford—Lieuts. G. E. le F. Davys resigns his commission; A. Lydekker to be Capt.

3rd Royal Lancashire—2nd Lieut. H. G. S. Young to be Lieut.

Royal London—Lieut.-Col. L. G. Dundas is granted the hon. rank of Col.

4th, or Royal South Middlesex—Henry Evered Palmer, gent., to be 2nd Lieut.

Shropshire—Willoughby Lynch Cotton, gent., to be 2nd Lieut.

Royal South Wales Borderers—Capt. and Brevet Major W. T. Much, 1st Batn. 24th Foot, to be Adjt., in succession to Capt. Farquhar, 2nd Batn. 24th Foot, who has embarked with his battalion in anticipation of his promotion (Sept. 4).

The (King's Own) 1st Stafford—R. J. E. Eustace, Esq., late Lieut.-Col., 60th Foot, to be Lieut.-Col.

3rd Royal Surrey—The under-mentioned 2nd Lieuts. to be Lieuts.:—C. A. Scobell and A. Chater.

The King's Own Royal Tower Hamlets—The under-mentioned 2nd Lieuts. to be Lieuts.:—H. F. Bowles, J. T. Bowles, H. Huntington, P. de S. Bass, and F. G. Saunder.

The Queen's Own Royal Tower Hamlets—The under-mentioned 2nd Lieuts. to be Lieuts.:—H. F. Coghlan-White, W. B. Young, and J. Missenden-Love.

2nd Royal Lanark—Capt. W. A. Dixon is granted the hon. rank of Major. The under-mentioned 2nd Lieuts. to be Lieuts.:—J. W. M. Lumsden, R. J. Napier, the Hon. L. S. G. Ogilvy, J. C. C. C. Brown, and F. H. Stevenson.

Antrim—Herbert William Long, gent., to be 2nd Lieut.

Cavan—The under-mentioned 2nd Lieuts. to be Lieuts.:—E. J. C. Dease and the Hon. F. R. W. Eveleigh-de Moleyns.

YEOMANRY CAVALRY GAZETTE.

WAR OFFICE, PALL MALL, Sept. 24, 1880.

Suffolk—2nd Lieut. J. H. Robinson resigns his commission (Sept. 25).

MILITARY EFFICIENCY.

"Senex" writes:—"I would call attention to the efficiency (?) of the Army. My eye has casually caught sight in the *Army List* for September of three regiments, viz., 88th, no paymaster, no instructor of musketry; 89th, no instructor of musketry; 90th, no paymaster, no adjutant, no instructor of musketry; all regiments are in India."

The *Pall Mall Gazette* understands that her Majesty has been pleased, on the reccommendation of the Prime Minister, to approve of a pension of £8 being charged on the Civil List, and granted to Mrs. Armstrong, widow of Lieut.-Gen J. W. Armstrong, C.B., late Deputy-Adjt.-Gen. for Auxiliary Forces.

The *Standard* states:—"The Inland Revenue Commissioners have decided that War-Office contracts, or accepted tenders for supplies, and the forms of receipts given by contractors, which have hitherto been held to be exempt from stamp duty under the Act of 1870, must in future bear the proper stamp."

The Perak and Zulu war medals have been struck at the Mint, and are about to be issued to the various stations, for the purpose of having the names of the recipients cut on them by local engravers, after which they will be distributed to the officers and men entitled to receive them with as little delay as possible.

The Army.

◆

2nd Life Guards. Major Viscount Downe has returned from Berlin, where he has been during the German military reviews.

1st (King's) Dragoon Guards. H.M.S. Orontes, which recently left Bombay for Natal, is now at Port Durban, awaiting the arrival of the regiment from the Transvaal, to convey it to India.

3rd Dragoon Guards. Capt. and Brevet Lieut.-Col. Stewart is attending the manœuvres of the 6th French Army Corps, under Gen. Saussier, attached to the staff of Major-Gen. Higginson, C.B.

4th Dragoon Guards. This regiment has removed from its encampment near the North Camp, Aldershot, where it has been since its arrival lately from York, and has taken over the South Cavalry Barracks.

6th Dragoon Guards (Carabiniers). The regiment arrived at Peshawur at the end of last month from Afghanistan, *en route* to Sealkote.

12th Lancers. Capt. Hornby and Lieut. Mack have been detailed for duty at the depôt, Canterbury, for two years, vice Capt. the Hon. W. J. Stewart and Lieut. Case.

13th Hussars. Lieut. Lane has been granted leave from India to England for twelve months, on medical certificate. Lieut. Blagrove has been appointed officiating adjutant, vice Lieut. and Adjt. Christie, promoted. The name of Pte. Farrance appears in the list of those killed in the landslip at Naini Tal on Saturday last.

14th Hussars. Lieut. Ricardo is under orders to join the depôt at Canterbury for two years, vice Lieut. M'Call.

15th Hussars. We learn that the regiment, which arrived at Chaman at the end of August, lost six men at Sibi from heat-apoplexy, and had to leave thirty more on the road.

21st Hussars. Lieut.-Gen. the Hon. J. Macdonald, C.B., who has recently been appointed colonel, inspected the regiment at Edinburgh on the 20th inst. Gen. Macdonald expressed himself to Lieut.-Col. Kaye, commanding, as thoroughly satisfied with everything he had seen. He was especially struck with the general physique of the men, their smart and soldierly appearance, the cleanliness of their appointments, and the admirable manner in which they marched past and performed other evolutions. He was also much pleased with the very good condition of the horses, and the general care and attention paid by the men to their appointments, saddlery, and barracks.

ROYAL ARTILLERY.

In his dispatch announcing "the operations in connection with the withdrawal of the several military posts at Abdal Rayman, Mel Garez, Dubrai, and Guttai, and the concentration thereof at Chaman" in July last, Major Jacobs, 19th B.N.I., reports:—"Major Wace, R.A., commanding the battery here, was good enough to send out a supply of water on mules, Lieut. Winter, R.A., accompanying them, and I am much indebted to these officers, especially the latter, for the assistance he gave in taking the water to the rear-guard, and looking after the men who had fallen out from exhaustion and thirst."

Gen. Roberts reports in his official despatch announcing the defeat of Ayoub Khan's army at Candahar:—"At the enemy's main camp was found the lifeless body of poor Lieut. Maclaine. Some native soldiers, prisoners in Ayoub's camp, reported that when the Afghans were about to fly, the guard at his tent called him out, and deliberately murdered him, a deed for which Ayoub will be for ever execrated. Remains of bread, which the poor fellow had been eating, his journal, his pipe, and other trifles, were found in the tent half-an-hour later by Euan Smith."

In his despatch giving details of the operations in the Mazina Valley from May 18 to 22 last, Brigdr.-Gen. Gib reports:—"My thanks are specially due to L-5 R.A. The guns were brought into action after great labour and difficulty, over such bad ground that, but for its state of efficiency, it would perhaps never have reached the field at all. The credit of having the battery in such good order is fairly due to Major W. R. C. Brough, the commanding officer, who, to my great regret, was unable to accompany it owing to severe illness, though most anxious to do so. The battery, however, was ably commanded by Capt. B. F. Domvile, assisted by Lieut. J. J. Porteous, until the latter was severely wounded. The conduct of the men of the battery under fire was all that could be desired; they were cool and collected, and their practice was admirable, and no doubt but for the guns our loss would have been very much heavier."

Major G. F. Blackwood (since deceased) and Capt. J. R. Slade have been brought specially to notice in despatches by Brigdr.-Gen. Burrows, for their services on the occasion of the mutiny of the Wali of Candahar's troops at Girishk in July last. We read in Gen. Primrose's despatch,—"Before the guns and infantry could get up, the enemy moved off in a direction parallel to the river; but being followed and threatened by the cavalry, came into position again, and opened fire on them with his artillery. In the meantime four guns of E-B, R.H.A., were brought into action, and in the course of half an hour the enemy's guns were silenced and abandoned by their gunners. Brigdr.-Gen. Burrows informs me that he received every assistance from Capt. J. R. Slade, R.H.A., his orderly officer, to whose untiring energy he is indebted for the guns being brought on intact with their carriages into camp. The determined energy with which the artillery was brought up to the front reflects the highest credit on Major G. F. Blackwood, commanding E-B R.H.A." Lieut. G. S. Jones, who acted as galloper to Gen. Nuttall, is thanked for his services in the Service despatch.

Lieut. O. Rowe has been permitted to resign his appointment as probationer for the Indian Staff Corps, and return to duty with a battery.

Lieut.-Col. T. P. Carey, 9th Brig.. commanding the artillery in the Allahabad Division, proceeded to the front last month, on appointment to the command of the Royal Artillery with Gen. Phayre's Reserve Division.

Lieuts. C. Wood, 11th Brig., J. O. English, R. M. B. Kelly, and W. Hume, 3rd Brig., S. C. W. Smith, 1st Brig., and E. G. Nicholls, 8th Brig., and Vet.-Surg. T. J. Symonds, R.H.A., have passed the lower-standard examination in Hindostanee.

Vet.-Surg. T. J. Symonds has proceeded from Bangalore to Jacobabad, to join D Baty. B Brig. R.H.A., for service at Candahar.

A Madras paper says:—"An officer in the Royal Artillery, stationed at Secunderabad, is under arrest on the charge of circulating or causing to be circulated an anonymous communication reflecting in strong language on the character of the family of another officer in the station. There is much difference of opinion as to whether the act, even if proved, can, strictly speaking, be called a military offence. A court of inquiry has been held, with what result is not yet known."

Capt. H. C. Seton (late Bombay) died on the 11th inst., on the voyage home from India. The deceased, who was in command of No. 4 Baty., Hyderabad Contingent, was 39 years of age. He joined the Army June 8, 1860, became capt., Aug. 1, 1872, and served throughout the Abyssinian campaign from Oct. 4, 1867, with a mountain battery, and afterwards with the Land Transport Train (medal). He was gazetted last night to his majority.

The *Wiltshire Times* says:—"Since May the men of the F Baty. 5th Brig. at Trowbridge have been compelled to reside in tents so old and unserviceable that a little rain means a shower bath for those underneath the worn-out canvas, while the storms that we have been lately experiencing flood the men's kits and make their life anything but pleasant. Until recently two blankets only per man was the rule, but the removal of seventeen of the least strong men to the reading and recreation-rooms, temporarily turned into sleeping-rooms, has placed extra blankets at the disposal of the others. At present fifteen tents are in occupation, each by eight men. The floors of the tents are now boarded over, but it is only within the last few weeks that this concession has been granted. The reason for this rough treatment of the men is to be found in the fact that the Trowbridge Barracks are undergoing considerable alterations, which will take until the end of the present year to complete. Mr. L. Moody is the contractor, and he is pushing on with the work as fast as the red-tapeism of the authorities will let him. The upper storey of the old building is being thrown into the rooms beneath, making them lofty, light, and airy. To supply the deficiency caused by the taking-away of the upper rooms, an entirely new building is being erected at the front of the present barracks. Other alterations are contemplated, and the Trowbridge Barracks when completed will be as comfortable and as useful as any of the same size in England. But until then the men are being treated with cruelty, which is only excusable on the presumption that all the other barracks in the kingdom are full, which every one knows is not the case."

Lieut. T. J. Roch, B Brig. R.H.A., is attached to the staff of Major.-Gen. Higginson, C.B., who is representing England at the manœuvres of the 6th French Army Corps, under Gen. Saussier.

Major J. A. S. Colquhoun has been appointed to succeed Lieut.-Col. Lluellyn in the command of No. 5 Baty. 8th Brig. (Mountain Battery) and Lieut. C. W. Kellie has been posted to the same battery.

The following appear in Indian General Orders:—"Major H. I. E. Ford, R.A., is appointed to officiate as deputy assistant-adjutant-general to the Rohilcund District, from July 17, 1880, vice Lieut.-Col. G. B. Wolseley, appointed assistant-adjutant and quartermaster-general, Peshawur District. The Commander-in-Chief is pleased to appoint Major H. I. E. Ford, R.A., officiating deputy-assistant-adjutant-general, Rohilcund District, to officiate as assistant-adjutant-general at Army Head-quarters, vice Major J. Goldie, officiating as military secretary to the Commander-in-Chief, from Aug. 12, 1880."

The following batteries have received orders to hold themselves in readiness to proceed to India early next month, viz.:—K Baty. 3rd Brig. (Major H. P. Darwell); L Baty. 3rd Brig. (Major V. Wing); and N Baty. 3rd Brig. (Major J. H. Lloyd). All these batteries are now at Woolwich.

The official notification of the bestowal of a distinguished-service reward upon Major-Gen. Sir F. S. Roberts, K.C.B., appears in the *Gazette of India*, to hand this week. Gen. Roberts's services are thus recorded:—"On the recommendation of the Government of India, her Majesty's Government has conferred a good-service pension on Major-Gen. (Local Lieut.-Gen.) Sir Frederick Sleigh Roberts, K.C.B., C.I.E., V.C., R.A. Dates of commissions:—2nd lieut., Dec. 12, 1851; 1st lieut., May 31, 1857; capt., Nov. 12, 1860; brevet major, Nov. 13, 1860; major, July 5, 1872; brevet lieut.-col., Aug. 15, 1868; brevet col., Jan. 30, 1875; major-gen., Dec. 31, 1878; lieut.-gen. (local), Nov. 11, 1879. War services:—Served throughout the Indian Mutiny of 1857-58 as deputy-assist.-qrmr.-gen. of Artillery, including the siege and capture of Delhi, from June 28 to Sept. 20 (wounded, July 14; horse shot, Sept. 14); actions of Bulundshuhur (horse shot), Allyghur, Agra, Kanouj (horse sabred), and Bundhera, where he narrowly escaped capture while reconnoitring; present in the skirmishes prior to, and throughout the operations connected with, the relief of Lucknow by Lord Clyde; operations at Cawnpore, from Nov. 28 to Dec. 6, 1857, and defeat of the Gwalior Contingent; action at Khodagunge; re-occupation of Futthghur; storm of Meangunge; action of Koorsee and the various operations ending with the capture of Lucknow (thanked by the Governor-General, Victoria Cross, brevet of major, medal with three clasps). Employed on special service with the expedition of 1863 against the tribes on the north-west frontier of India, and was present at the storming of Laloo, capture of Umbeylah, and destruction of Mulkah (medal with clasp). Served in the Abyssinian campaign from Jan. 1868, as assist.-qrmr.-gen. with the Bengal Brigade, and as senior officer of the department at Zoulla, superintended the re-embarkation of the whole Army; was selected by Sir Robert Napier as the bearer of his final despatches (brevet of lieut.-col. and medal). Served as assist.-qrmr.-gen. and senior staff officer with the Cachar column, Looshai expeditionary force, in 1871-2, and was present at the capture of the Kholel villages, and attack on the Northlang range; commanded the troops engaged at the burning of the village of Taikoom, Jan. 26, 1872 (C.B.). Served also during the Afghan campaign of 1878-79 in command of the Kurum Field Force, including the actions of the Peiwar Kotal and the Sapari Pass, the expedition into Khost, and action at Matun (received the thanks of Parliament and created a K.C.B.). On the occurrence of the outbreak at Cabul in Sept. 1879, resumed command of the Kurum Field Force, and led it over the Shuturgardan; defeated the Afghan army at Charasiah on Oct. 6, and occupied Cabul two days later; subsequently commanded in the operations in the vicinity of Cabul in Dec. 1879, including the defence of the Sherpur cantonment, and the final defeat and dispersion of the enemy on Dec. 23. Was in command of the forces in Northern Afghanistan up to May, 1880, and subsequently in command of two divisions of the Northern Afghanistan Field Force until Aug. 1880, when he marched from Cabul for Candahar in command of the Cabul-Candahar Field Force. He has been twenty-three times mentioned in despatches.

ROYAL ENGINEERS.

Brevet Col. H. N. D. Prendergast, V.C., C.B. (late Madras), commandant of the Madras Sappers and Miners, has been appointed Brigdr.-Gen. of Malabar and Canara, in succession to Brigdr.-Gen. Burton. A Madras paper says of Col. Prendergast, "He is an officer of but 26 years' service, but he has received so much brevet promotion for war services, that he has reached the top of the list of colonels, while still a comparatively young man, and he has for some months stood in imminent peril of being promoted into compulsory retirement."

Major Jacobs, 19th Bengal N.I., in his despatch "on the operations in connection with the withdrawal of the military posts at Abdul Rayman, Mel Garez, Dusbrai, and Guttai, and the concentration thereof at Chaman," in July last, specially mentions the services rendered by Lieut. F. B. G. D'Aguilar. He says:—"This officer was with me at Mel Garez, and has given me most valuable advice and assistance throughout." And again, "Throughout the long march of seventeen miles, Lieut. D'Aguilar was indefatigable in the assistance he gave me."

Lieut. H. L. Wells, who acted as orderly officer to Brigdr. Gib in the operations from May 18 to 22 last in the Mazina Valley, has received special thanks in that officer's despatch for the "assistance he afforded on the march, in the bivouac, and in action."

Among the officers who did duty with Gen. Sir F. Roberts's force at Candahar were Col. Æ. Perkins, C.B. (late Bengal), commanding R.E.; Capts. R. Tickell, W. Nicholson, M. C. Brackenbury, and C. Call, Field Engineers; and Lieuts. T. P. Cather, adjt., E. Glenne, and H. Finnis, Assistant Field Engineers, and F. T. N. Spratt, D.A.Q.M.G., and Lieuts. the Hon. M. G. Talbot and F. B. Longe, attached to Candahar Survey.

Men are now much required for the corps of Royal Engineers, and recruiting has heen opened at the various stations as well as at head-quarters at Chatham. The class of men specially required are clerks, draughtsmen, printers, masons, bricklayers, carpenters, &c., to whom special rates of pay are allowed. The corps at home has been much reduced by the despatch of men abroad during the last year or two.

Capt. H. S. F. Haynes was killed on Saturday last in the landslip at Naini Tal. Capt. Haynes joined the Service, Aug. 20, 1865, and became capt., May 22, 1878.

We learn from Fort St. George that the commandant, "Queen's Own" Sappers and Miners, having reported to the Government with deep regret that Lieut. A. E. Dobson, R.E., attached to the Public Works Department, temporarily doing duty with the Sappers and Miners, died at Safed Sung, Afghanistan, on the 20th ult., the Madras Government have in an order stated that they "much regret the death of this promising young officer."

Grenadier Guards. Lieut.-Col. Hon. G. P. H. Villiers, military attaché to the British Embassy at St. Petersburg, arrived in town at the end of last week from Berlin.

1st, or Royal Scots. Lieut. Ancketill, a probationer for the Indian S.C., has passed the lower-standard examination in Hindostanee. Lieut. Ancketill, attached to the 18th Bombay N.I., has been transferred to the 4th Bombay N.I., on probation.

2nd Queen's. The *Times of India* says:—"It is stated that the 2nd Batn. 2nd Queen's are not to move from Bareilly, at all events at present, and much disappointment is felt by all ranks in consequence. This is the second time within a few months that this regiment has been warned for the 'front.'"

4th King's Own. We learn from Poona, dated Aug. 17, that, "Notwithstanding the departure of three of their companies to Bombay, the non-commissioned officers of the 2nd Batn., aided by their wives, have opened the regimental theatre at Wanowri. The Irish drama, '*The Colleen Bawn*,' was produced last night with good effect, and will be repeated for several nights this week." Lieuts. Penrose and Ridley and 2nd Lieuts. Dolphin and Houghton, 2nd Batn., have passed the lower-standard examination in Hindostanee. The detachment of the 2nd Batn. at Colaba was ordered off rather hurriedly on the 28th ult. to Kurrachee. The order was issued in consequence of information received here regarding the panic. The men numbered in all 180, and were under the command of Capt. Crofton. The other officers were Lieuts. Gawne, Bonomi, and Barber.

5th Fusiliers. The 1st Batn. arrived at Peshawur at the end of last month from Afghanistan, *en route* to Lawrencepore, where it was to wait in camp for orders to proceed to Bombay, for embarkation for England. Lieut. Clark, 2nd Batn., is about to retire from the Service.

6th Regiment. Lieut. Faithfull, 1st Batn., a probationer, officiating wing-officer, 20th Bengal N.I., is about to be admitted to the Bengal S.C., from April 18, 1878. Pte. Helmouth, 2nd Batn., is included in the list of those killed in the landslip at Naini Tal on Saturday last.

8th King's. Lieut. Briscoe, 2nd Batn., has passed the higher-standard examination in Hindostanee.

9th Regiment. The 2nd Batn. was to have arrived at Lawrencepore at the end of last month from Afghanistan, where it was to remain until the Reserve was finally broken up when it was to take over quarters at Sabatho and Jutogh.

11th Regiment. Capt. Nares and Lieut. Priestley, 2nd Batn., have passed the higher-standard examination in Hindostanee.

12th Regiment. The 1st Batn. is to remain at Cherat until the regular marching season, when it proceeds to Fyzabad to take over that station.

13th Light Infantry. Capt. Bellis and Lieuts. Gillon and Napier, 2nd Batn., are under orders to join the depôt for two years.

14th Regiment. The 2nd Batn. arrived at Nowshera at the end of last month from Afghanistan, and took over that station. In his despatch, giving particulars of the Mazina Valley operations from May 18 to 22, 1880, just to hand, Brigdr.-Gen. W. A. Gib says :—"All ranks bore the exposure, fatigue, and discomforts of the expedition most cheerfully. My thanks are especially due to L-5th Royal Artillery, the 2-14th Regiment, and the 32nd Pioneers, and the officers who commanded them, which bore the brunt of the fighting. The 2-14th Regiment, although composed mostly of very young soldiers, behaved with very great steadiness, coolness, and gallantry, and were well kept in hand by the commanding officer, Lieut.-Col. D. S. Warren, assisted by his company officers. The action was one well calculated to produce wild firing, but there was none, and the per-centage of rounds fired, viz., 8 1-20 per man, was marvellously low in a long day's fight." And again, "At one place, near what is marked in the map 'Old Kaffir Fort,' there was a sanga which the guns could not reach, owing to a high bank; this position was obstinately held, but carried finally in a charge led by Capt. A. W. Noyes, 14th Regiment, who was first in, killed the first man who opposed him, and grappled with the second, who was bayoneted by the men, but not before he had wounded Capt. Noyes in the hand. I beg to bring Capt. Noyes' gallant conduct particularly to the notice of the Major-General." Capt. Ogden, 2nd Batn., has been granted leave from India to England for twelve months, on medical certificate.

15th Regiment. 2nd Lieut. Aplin, a probationer for the Indian S.C., attached to the 26th Bombay N.I., has been transferred to the 28th Bombay N.I., as officiating wing-subaltern.

17th Regiment. Lieut. Moores, 2nd Batn., station-officer, has been appointed adjt. of the Deolalee Convalescent Depôt, vice Brevet Major Murray, 78th Highlanders, proceeded on service to Afghanistan.

21st Fusiliers. Lieut. Justice, 2nd Batn., died at Pretoria, Transvaal, of fever on the 12th inst. The deceased entered the Army, July 24, 1869, and became lieut., Oct. 28, 1871. He was musketry instructor Oct. 30, 1878. Lieut. Tuckey, 1st Batn., is under orders to return from India during the winter, to join the regimental depôt.

22nd Regiment. Gen. Roberts says, in his despatch announcing the defeat of Ayoub Khan's army at Candahar :—"Capt. Straton had rendered great service as the head of the Signalling Department from Char-Asiab up to his death. He was shot in the leg by a Ghazi as he was riding, almost unattended, to establish a heliograph station on the Baba Wali Kotal. His death was promptly avenged by a signaller of the 72nd."

23rd Fusiliers. The 1st Batn. was to be stationed at Deolalee, on its first arrival in India, until cholera had disappeared at Jubbulpore and Allahabad, when it was to proceed to Chakrata.

24th Regiment. The 2nd Batn., on arrival in India, was to be stationed altogether at Poona. Lieut. O'Donnell, 1st Batn., a candidate for the Indian S.C., has been appointed to the 44th Bengal N.I. as officiating wing-officer, on probation. The head-quarters and service companies arrived at Bombay on the 1st inst. from Gibraltar, in H.M.S. Orontes. The following officers took passage in the Orontes, viz., Lieut.-Col. Degacher, C.B.; Major Paton, C.M.G.; Capt. Farquhar; Brevet Major C. J. Bromhead; Capts. Harvey and Williams; Brevet Major G. Bromhead, V.C.; Capts. Banister and Halliday; Lieuts. Logan, Trower (adjt.), Dolben, Smyly, Birch, Worlledge, and Armitage (now 1st Batn.); 2nd Lieuts. Kelly, Sugrue, Neave, and Burnett, and Qrmr. Tigar; with 8 staff serjeants, 36 serjeants, 36 corporals, 16 drummers, and 773 privates.

25th Regiment. The draft from the 2nd Batn. under orders to join the 1st Batn. in India will consist of three officers, 256 men, nine women, and eleven children, and will embark in H.M.S. Serapis, under command of Capt. Brereton, 81st Regt., on the 4th proximo. Capt. Rathbone has been selected for appointment as adjutant of the 5th West York Militia, vacant by the expiration of Capt. Stoney's term of service in the appointment. Lance-Corpl. Trister is reported as killed in the landslip last Saturday at Naini Tal.

28th Regiment. Col. Dickins completed his period of service in command of the regiment on the 22nd inst., and is about to be placed on half-pay.

29th Regiment. The two companies at Baroda were to have joined head-quarters at Mhow, on relief by two companies of the 61st Regt. from England. Lieut. Cubitt has passed the higher and Lieut. Pym the lower standard in Hindostanee.

33rd Regiment. Major Campbell has been granted leave from India to England for twelve months, on medical certificate. Capt. Wynter's services with the Transport, when on the march from Cabul to Candahar, are highly spoken of by more than one correspondent, and we are told that his promotion to a brevet majority after the despatches are published may almost be regarded as a certainty. 2nd Lieut. J. B. H. Carmichael, Serjt.-Major Rogers, Serjt.-Instructor Meenan, Serjt. Frood, Lance-Serjt. Graver, and Ptes. Hoyes and Gillan were killed on Saturday last in the landslip at Naini Tal. 2nd Lieut. Carmichael entered the Army, Aug. 13, 1879.

34th Regiment. Capt. A. Balderston lost his life on Saturday last in the unfortunate occurrence at Naini Tal. Capt. Balderston was born on March 16, 1843, and entered the Bombay Army, July 8, 1861; he became lieut., Jan. 22, 1863, and capt., Feb. 12, 1873, and exchanged to the 34th from the 109th Regiment, Oct. 31, 1877. Lieut. Marriott is a candidate for the Indian S.C.

39th Regiment. The name of Private Bart appears in the official list of the killed in the landslip last Saturday at Naini Tal.

40th Regiment. Major M. Morphy and Mrs. Morphy are included in the official list of those who have lost their lives in the Naini Tal disaster. Major Morphy was born on Oct. 16, 1839, and entered the Army as an ensign in the 40th, July 2, 1858; became lieut., Jan. 24, 1861; capt., June 8, 1867; and major, April 25, 1879. He served in the New Zealand war of 1860-61; also in that of 1863-65, and was present in the attack on the Gate Pah (medal). Capt. Dudgeon will, no doubt, obtain the majority thus rendered vacant.

41st Regiment, Brevet Lieut.-Col. Wavell left England on Wednesday for Gibraltar to join head-quarters.

43rd Light Infantry. Capt. Clark and Lieut. Porter are under orders to join the depôt companies for two years. Lieut. and Adjt. Porter has passed the lower-standard examination in Hindostanee.

44th Regiment. Capt. Churchill is a candidate for the Pay Department, and is about to be appointed to the 83rd Regiment. Capt. Edgcumbe and Lieut. Rosser have been placed under orders to return to England from India, to join the regimental depôt. Qrmr.-Serjt. Johnson has been found guilty, at Rangoon, of receiving various sums of money as illegal gratification, and the court sentenced him to four months' simple imprisonment, and to pay a fine of rs. 500, or in default of payment one month's further imprisonment. Several other cases have been disposed of, the prisoners being found guilty and sentenced to terms of imprisonment varying from 12 to 18 months.

47th Regiment, which has been stationed at the Curragh since the summer of 1878, will be removed to Dublin early next month, and quartered in Beggar's Bush Barracks.

48th Regiment. Capt. Ellis has been detailed for duty with the regimental depôt for two years.

49th Regiment. "Dragon" addresses to us the following letter :—"It is stated in the *Times* of to-day (25th inst.) that in consequence of the 66th being about to be brought home, its linked battalion, the 49th Regt., will be sent abroad next year. This is as it should be, but I trust, in common justice to the regiment, it will not be sent to India. The 49th passed ten years in India, five of which were spent in Dessa, one of the hottest stations in the Bombay Presidency. It came home in January, 1875, and so, if it goes abroad next year, it will have had only six years in England. By-the-by, can you inform me why the 49th has been kept at Dover for so long a time? It arrived there in March, 1879, and therefore has already been 18 months at the station. Dover is, no doubt, a nice place, but it is not a good station to keep a regiment too long in. The regiment has now a large number of recruits and very young soldiers, and if it is intended to send it abroad next year, a move to Aldershot this winter, and a participation in the spring and summer drills next year at that station, would do the regiment a great deal of good. A move to Aldershot would be welcomed by officers and men."

ROYAL MARINES.

It is stated that an application will be made to the Government to defray the cost incurred in the defence of Serjt. Marshman, R.M., who has been tried by court-martial and acquitted on charges of fraudulent conduct as a marker at Wimbledon.

Lieuts. J. B. Woon and J. B. R. Butler, R.M.A., probationers for the Indian S.C., have been appointed officiating wing-officers, 4th Bengal N.I., on probation. Lieut. E. T. Paul, R.M.L.I., has been appointed to the 33rd Bengal N.I., and Lieut. C. H. Hayes, R.M.L.I., to the 37th Bengal N.I., Lieut. C. H. Powell, R.M.L.I., to the 40th Bengal N.I., and Lieut. E. V. Goldsmid, R.M.L.I., to the 42nd Bengal N.I., on probation.

A Queenstown correspondent, writing to the *Hampshire Telegraph*, says :—"*On dit*, there was something like an incipient mutiny at Spike last week. What, amongst the convicts? Oh, no! Amongst the Marines. The gallant three hundred refused to disperse after drill, until they had claimed sea pay. They considered themselves entitled to this when out of England. The captain sent for the major, and the major undertook to lay the case before 'My Lords,' whereupon the men dispersed. No reply has yet been received. I hope the 430 Marines coming in the Assistance will like their new quarters better than their predecessors did. The 110 stationed at Haulbowline were especially discontented, and I hear that more of them are defaulters than would be found even in Forton Barracks! But no wonder, the men are dying of sheer *ennui*. They are not allowed to enter a civilian's house, nor will a civilian fraternise with any of them. The Queenstown people regard them as evicting instruments, as 'crowbar-brigade' men, and contemn them accordingly. Poor Joe would consider three years of prickly heat preferable to the coolness of Queenstown for three months."

The following appointments have taken place in the R.M.L.I., viz. :—Capt. R. H. Dwyer to be musketry-instructor at the Recruit Depôt, Walmer, vice Philips, promoted; Lieut. H. O. P. Wright to be adjutant at the Portsmouth Division, vice Hobart, promoted (both dated Aug. 26); Lieut. E. A. M. Liardet to be assistant-musketry-instructor at the Plymouth Division, vice Rumley, promoted (Aug. 28); Major R. F. Way will continue to perform the duties of auditor at the Recruit Depôt, Walmer, until Jan. 5, 1882, to complete five years' service, unless required for embarkation previous to that date; Lieut. R. Denny to be acting-adjutant to the battalion serving in Ireland, vice Thompson, appointed adjutant (Aug. 26); Capt. C. H. Scafe to be gunnery-instructor at the Ports Division, vice Strong, promoted (Sept. 1); Lieut. H. E. Robbins to be acting-quartermaster to the battalion serving in Ireland, vice Corbet, promoted (Sept. 21).

Messrs. A. H. Cox, G. M. Campbell, F. L. Prendergast, H. Slessor, and W. E. Cairnes have been appointed (1st inst.) lieuts. on probation in the Royal Marine Artillery. They will join the Royal Naval College, Greenwich, for study, on the 30th inst.

51st Light Infantry. The regiment arrived at Lawrencepore at the end of last month from Afghanistan, *en route* to Bareilly, where it takes over quarters.

56th Regiment. Capt. Du Vernet has taken up his duties as garrison instructor at Gibraltar on appointment.

57th Regiment. Lieut. Lyde, a probationer for the Indian Staff Corps, attached to the 11th Bombay N.I., has been transferred to the 15th Bombay N.I. as officiating wing-officer.

59th Regiment was to have arrived at Peshawur on the 10th inst., from Afghanistan, *en route* to England. Lieut. Small proceeded from Cabul to Candahar with Gen. Roberts's force, in charge of the Field Treasury Chest.

61st Regiment. Head-quarters are to be stationed at Bombay, with two companies at Ahmedabad and two at Baroda. The following arrived at Bombay on the 1st inst., in H.M.S. Orontes, from Malta, viz., Major Heywood, Brevet Major Murray, Lieut. England, 2nd Lieuts. Baxter and Lawson, with 6 serjeants, 11 corporals, 3 drummers, and 179 privates.

62nd Regiment. Lieut. Justice, a candidate for the Indian S.C., has been appointed officiating wing-officer 9th Bengal N.I., on probation. 2nd Lieut. Fryer, a probationer for the Indian S.C., attached to the 16th Bombay N.I., has been transferred to the 13th Bombay N.I., as officiating wing-officer.

63rd Regiment. Lieut. Angelo, a probationer for the Indian S.C., attached to 9th Bengal Cavalry, has passed the higher standard in Hindostanee.

66th Regiment. With the sanction of the Commander-in-Chief in India, Brevet Lieut.-Col. Hogge vacated his appointment as Commandant of the Deolalee depôt last month, and assumed command of the regiment in Afghanistan, vice Lieut.-Col: Galbraith, deceased. A telegram has been received from an officer of the 7th Fusiliers at Candahar, which states the loss of the regiment at Khushki Nakhud as follows :—Officers, 10; serjeant-major, drum-major,5 serjeants, 287 men; and one colour. In his despatch relating to the proceedings which resulted out of the mutiny of the Wali of Candahar's troops at Girishk, in July last, Lieut.-Gen. Primrose observes :—"Brigdr.-Gen. Burrows reports that the behaviour of all ranks left nothing to be desired; and particularly brings to notice the fact that the men of the 66th Regiment dragged the captured guns rove three miles of difficult country until teams could be obtained for them;" and further, "Gen. Burrows informs me that he received every assistance from his brigade-major, Capt. W. H. M'Math, 66th Regiment; and from his deputy assist.-qrmr.-gen., Capt. T. Harris, 66th Regiment." The *Standard* correspondent at Maiwand telegraphs on Sept. 17 :—"The force here has now completed its melancholy duty of burying the dead, and of identifying, as far as possible, their remains—as painful a task as ever fell to the lot of soldiers to perform. The following are the details of the distribution of the dead, and these throw some light upon the obstinacy of the fighting, and of the comparative loss in the battle itself and upon the dreadful retreat to Candahar. Upon the march up we buried 52 Europeans and 94 natives, showing that the sufferings of the retreat told with about equal severity upon Englishmen and Indians. In the enclosed gardens, where the last stand was made, and the colours of the 66th lost, were found the bodies of 85 Europeans and 37 natives. This is significant of the fact that the British regiments held together to the last. The villagers had already buried those who fell on the field of battle, and although the graves were opened for purposes of identification, and the bodies reburied according to their nationality, some of the graves may have been overlooked. The numbers, however, approximate to 400; total, 666. Besides these, the late Sirdar of Khelat-i-Ghilzai reports that he buried 100 on the line of retreat. The following officers were identified and buried in the gardens :—Major Blackwood, R.A.; Col. Galbraith, Major Oliver, Capt. Macmath, and Lieuts. Rayner and Chute, of the 66th Regt.; Capt. Smith, of Jacobs' Rifles, and an officer who could not be identified. Seven officers are known to have been killed on the battle-field before the retreat began, and three are not accounted for. Representatives of all the regiments present were engaged in the work of identification, under Capt. Beresford-Peirse, of the 66th. The Burial Service of the Church of England and the Catholic Mass for the dead were read over the various graves, and the last military honours were paid to them. Of the number of bodies still missing and unaccounted for many were, no doubt, buried by the villagers, and others straggled away from the line of retreat and were murdered. Thus while the loss on the field of battle seems to have been little above four hundred, nearly twice that number must have fallen after the retreat began, although but three hundred and sixty bodies have been found. The bodies both of the Afghans and our own men who fell on the battle-field were buried, and the huge graves which mark the burial-place of the former show how heavy their loss must have been. The bodies must have been buried as a mark of respect, and not for sanitary reasons, as the dead horses still lie unburied, and their bodies mark the positions of the artillery and cavalry during the battle. The Bombay Grenadiers must have behaved steadily and well until the final break-up, for while the 66th and Jacobs' Rifles were partially protected by a depression of the ground, and their corpses show that their loss was comparatively small, the Grenadiers were on an exposed rise, swept in all directions by the enemy's fire, from which they suffered heavily; but they maintained their ground until the flanking artillery fire and the charge of the Ghazis broke Jacobs' Rifles. Down in the enclosures the fight was very hot. Here the ground is everywhere strewn with shot and shell, and the *débris* of waggons and of accoutrements and remnants of clothing. This was especially the case near the last position taken up by the artillery. We have counted 400 graves of the enemy's regular troops. Those of the Ghazis are scattered everywhere, and many were carried away to die in the villages round. The native reports state that their loss was almost fabulous."

67th Regiment was to have reached Peshawur on the 10th inst., from Afghanistan, *en route* to Bangalore. Capt. Blundell is under orders to join the depôt at Gosport, vice Capt. White, appointed adjt. of the 3rd Hants R.V.C.

70th Regiment. Lieut. Shawe, a probationer, wing-officer, 4th Bengal N.I., is about to be admitted to the Bengal S.C., with effect from Feb. 13, 1878.

72nd Highlanders. Gen. Roberts, in his official despatch announcing the defeat of Ayoub Khan's army at Candahar, says:—"Col. Brownlow's loss is deplored by the whole force, as that of one of the best and bravest soldiers who ever led a British regiment." Lieut. White, a probationer for the Indian S.C., attached to the 15th Bengal Cavalry, has passed the higher-standard examination in Hindostanee. A telegram from the Viceroy, dated Simla, Sept. 23, says:—"Pte. James Macguire, 72nd Highlanders, has died of wounds."

73rd Regiment. Lieut. J. E. H. Sullivan and 2nd Lieut. C. J. L. Halkett, and Privates Turner, H. Brown, Chisholm, and Keneray lost their lives on Saturday last in the landslip at Naini Tal. Lieut. Sullivan entered the Limerick Artillery Militia, Sept. 11, 1873; and was appointed to the 73rd, Feb. 16, 1878; becoming lieut., Dec. 11, 1878. He was born Sept. 11, 1857. 2nd Lieut. Halkett was born Sept. 20, 1858; entered the 2nd Royal Tower Hamlets Militia, Oct. 16, 1875; and was appointed to the 73rd, Oct. 11, 1879.

74th Highlanders. "Highlander" writes:—"Several letters have appeared of late relative to the proposed new title of 'Cameron Highlanders' for the 26th and 74th Regts., but all of them from a 'Cameronian' point of view. Permit me, as an old Highlander, who knows the 74th well, to state that the idea of having its good old number altered to '26th,' and its facings from white to yellow, is anything but palatable to the officers and men of that highly distinguished old Highland corps. A great mistake was made by the War Office in affiliating the two regiments, and it was proposed about five years ago to mend matters by linking the 71st and 74th—in fact, orders to that effect were actually issued; but, owing to a legal difficulty about the enlistment of men then serving in the 55th and 59th Brigades, it was knocked on the head. If any additional title be necessary for such a favourite and well-known corps as the 74th, the 'Campbell Highlanders' would be more appropriate, for the regiment was raised by Sir Archibald Campbell, and had thirteen officers of that name appointed to it on its formation. It is strange that none of the Highland regiments have the very military name of Campbell. Why not link the 74th and 91st, with the title of 'Princess Louise's Campbell Highlanders?'"

77th Regiment. It had been arranged when the mail left India that the regiment should remain at Deolalee until Jubbulpore and Allahabad were reported free from cholera, when it was to be sent on to Seetapore and Benares.

78th Highlanders. The correspondent of the *Times of India* at Poona writes on Aug. 7:—"The rumour that the 78th Highlanders are to be sent shortly to the Persian Gulf gains credence, though it has not been officially announced. The advertisement in your columns for instructors in Arabic and Persian to teach officers in Calcutta seems to lend probability to the rumour." The *Bombay Gazette* gives the following explanation why the 78th Highlanders are for the present to stand fast at Kurrachee. The reason is this:—"When the 15th Regt., which was under orders for the front, was found to have too many men on the sick-list to take the field, the 63rd was ordered to go forward in its place. Subsequently the 15th was pronounced fit for service, and it goes accordingly to the front; so does the 63rd, and consequently for the present the 78th is not required to go forward. This is felt to be a great hardship on many accounts, and amongst others because in expectation of a long spell of duty in Afghanistan, the regiment sold off its kit, and the officers parted with their horses in Poona at the absurdly inadequate prices which chargers that must be sold will bring in a station like Poona. But the worst disappointment is that of not taking part in the relief of Candahar." The *Bombay Gazette* says:—"We observe that the Rev. T. H. Greig, chaplain of the Church of Scotland, Poona, has proceeded to join the 78th Highlanders, on service in Afghanistan. In ordinary circumstances this duty might have fallen to a junior in the service, but Mr. Greig having been for a considerable time pastor to the Highlanders, and being deeply interested in them, volunteered to share their fortunes in the field. His congregation at Poona will deeply feel his loss, but knowing as they do how he is esteemed alike by the officers and the men of the 78th, they will not grudge him to the Highlanders, in the time of their special need." A "Ross-shire Buff" writes:—"As a scheme has been published in the last few days, according to which the individuality of several regiments will be altogether obliterated, I am induced, ere it may be too late, to urge on the Secretary of State for War the reconsideration of this scheme, which strikes directly at the root of our regimental system, a system which has never failed us, and which has worked with the greatest advantage to the British nation and the British Army. I allude more particularly to that part of the scheme in which the 78th Highlanders, the Ross-shire Buffs, and the 71st Highland Light Infantry are to be linked together in one 'territorial' regiment, under the title of 'The Highland Light Infantry,' by which arrangement not only is the old regimental number of the 78th, but its county title is totally suppressed, and an appellation affixed to the 78th for which they have not the slightest sympathy whatever, and themselves merged in a brigade with a battalion with which they have nothing in common whatever, further than that the 71st were originally raised in a part of the country adjacent to that in which the 78th were raised. There is also, in connection with the linking of the two regiments, another most important consideration, in that the uniform is altogether dissimilar, the 78th wearing the kilt and feather bonnet, whilst the 71st wear tartan trews (trowsers) and the chako; and it is therefore feared that if the 78th are to be deprived of their regimental number and county title, they will also be deprived of their dress, the kilt, the old national dress of the Highlanders of Scotland, which would be an unmerited disgrace most deeply felt, not only by the whole regiment, but also by all true Highlanders in the world. History states that in all the actions in which the 78th have been engaged, it has earned the unqualified praise of all the General officers under whom it has served, one of whom publicly stated, 'that the greatest honour he considered could be bestowed upon him would be one day to be made the colonel of the regiment.' I may just mention that this General officer had never served in the 78th Highlanders. What, then, may I ask, have the 78th done to merit the unlooked-for insult, under the 'territorial' scheme? Why are they to be made to give way to the 71st in everything that a regiment holds most sacred and dear to itself? The antecedents of the Ross-shire Buffs are sufficiently meritorious and well-known to enable them to exist on their own merits; they may very possibly be second in numerical order in the *Army List* to the 71st, but in anything else the 78th do certainly not consider themselves second to the 71st. The glorious battles won by the British Army are chiefly owing to the regimental system, by which *esprit de corps* is so vigorously maintained, every man most properly thinking his own regiment the best in the Service, by which means not only is a man made to take the greatest possible pride in his regiment, but is ready on all occasions to do what he can to further its honour and interests. By the 'territorial' scheme not only would the feelings of several regiments be outraged, but *esprit de corps* destroyed, and the prestige, *morale*, and efficiency of a great part of the British Army be very probably seriously compromised. I am quite sure the sentiments I have expressed represent the true feelings of most regiments under the proposed 'territorial' scheme, a scheme the most absurd ever concocted for the British Army. Regiments would be simply 'territorial' in name, as all men are permitted to enlist for any brigade they prefer, and so great is the feeling against the Army that it is a well-known thing that when a young fellow wishes to enlist, he, as a rule, does not go to his county brigade depôt, but to one far from his home, so that he may be away from his relations. If conscription was enforced, there might then be something to say for the scheme of 'territorial' regiments; but I do think this continual tinkering, after a foreign fashion, at the organisation of the British Army is most detrimental to its best interests. If a radical change is for some unaccountable reason required in the organisation of a part of the Army, and the 'territorial' scheme is an absolute necessity, the proper regiment to link with the 78th is the 72nd, which is a Ross-shire regiment, and was, like the 78th, raised by Seaforth. Why should it not be done, giving the 72nd at the same time the kilt, which was formerly worn by them?"

80th Regiment. Gen. Sir R. Wilbraham, K.C.B., col. of this regt., who is at present in Dublin, paid an unofficial visit to the regt. at the Royal Barracks on Tuesday morning. 2nd Lieut. Colomb has been granted leave of absence to Nov. 1, pending his being gazetted to the 66th Regt.

81st Regiment. 2nd Lieut. Phillips, a candidate for the Indian S.C., has been appointed to the 28th Bengal N.I., as officiating wing-officer, on probation.

83rd Regiment. Capt. Stokes, adjt. Bombay R.V.C., has passed the higher and 2nd Lieuts. Harris and Kettlewell the lower-standard examination in Hindostanee.

84th Regiment will proceed to the Curragh early next month from Dublin.

86th Regiment. Lieut. Armstrong is a candidate for the Indian S.C., and is to proceed to India with the draft of the 2nd Batn. 8th Regt., instead of Lieut. Campbell, 85th Foot.

89th Regiment. Lieut. Meade, a probationer, attached to the Corps of Guides, and now doing duty with the 10th Bengal Cavalry, is about to be admitted to the Bengal S.C.

90th Light Infantry. The following have been appointed a committee of paymastership, viz.:—Major Ward (president), and Capts. Rawlins and Bennett.

92nd Highlanders. Extract from a late regimental order:—"The commanding officer has very great pleasure in publishing the following extract from a letter received from Lieut.-Gen. Sir F. Roberts: 'The 92nd have done such excellent service since they came under my command that I should like to do something for the regiment. . . . You must be very proud of commanding a regiment which, I am sure, is second to none, and which I sincerely hope I may have with me if ever I am fortunate enough to hold another command on service.'" Major F. Jacobs, 19th Bengal N.I., in a despatch announcing the operations in connection with the concentration of several military posts at Chaman in July last, specially mentions the excellent services rendered by Pte. J. Sawyers, attached to the Signallers, who did duty with the rear-guard, and did valuable service with his rifle in a skirmish with the enemy.

98th Regiment. It had been arranged, when the mail left India, to quarter the entire regiment at Kurrachee. There never was any intention to send it to the front, as it was lately stated it was proposed to do.

100th Regiment. Pte. Mackenna, attached to the Signallers, is specially mentioned in the report of Major Jacobs, 19th Bengal N.I., in his despatch giving particulars of the concentration of several outposts at Chaman in July last, for "the good service he did with his rifle, when he volunteered to do duty with the rear-guard."

101st Fusiliers. Lieut. Taylor, a candidate for the Indian S.C., has been appointed to the 44th Bengal N.I. as officiating wing-officer on probation. 2nd Lieut. Saulez, also a probationer, attached to the 11th Bombay N.I., has been transferred to the 16th Bombay N.I., on probation.

106th Light Infantry. Major Heathcote reverts to regimental duty from the adjutancy of the North Durham Militia on his recent promotion, and will shortly return to head-quarters at Athlone. Capt. Jervis has left head-quarters at Athlone, and proceeded to Durham to assume duty as adjt. of the North Durham Militia, in succession to Major Heathcote, who returns to regimental duty, on promotion.

109th Regiment. The *Irish Times* hears that Lieut.-Col. Lucas, commanding the regiment at Aldershot, contemplates retiring on the pension of his rank; and that Brevet Lieut.-Col. Bartholomew, has applied for permission to withdraw his application to retire on full pay.

1st West India Regiment. Lieut. Peirce, a probationer for the Indian S.C., attached to the 22nd Bombay N.I., has been transferred to the 27th Bombay N.I., as officiating wing-officer.

55th Brigade Depôt (Fort George). Serjt.-Major T. Macniven was tried by a district court-martial, on the 7th and 8th inst., on a charge of embezzling Government property, and producing a false document for the signature of his commanding officer, Col. Baillie. He was found guilty, and sentenced to reduction to the ranks, imprisonment with hard labour, and the forfeiture of his good-conduct medal and gratuity. The proceedings of the Court were confirmed by the Major-General commanding the district, who, in consideration of the prisoner's former excellent character, remitted 126 days of the imprisonment, and commuted the remaining portion to imprisonment without hard labour. Macniven thus suffers reduction to the ranks, 42 days' imprisonment, and the loss of his good-conduct medal. The result of the trial was made known on Saturday last.

Commissariat and Transport Department. The death is announced of Assist.-Comy.-Gen. H. C. Lewis, Commissariat officer, in charge of the Home District, at the age of 43 years. The deceased entered the Service in 1854, and served throughout the Eastern campaign, including the siege of Sebastopol (medal with clasp, and Turkish medal). He also served throughout the China expedition (medal).

Medical Department. Surg.-Gen. Munro, M.D., C.B. leaves England next week for Gibraltar, to take up the duties of P.M.O. at that station. In his report on the operations in the Marzina Valley May 18 to 22 last, Brigdr.-Gen. Gib reports:—"Fortunately there was very little sickness and very few wounded, and the medical officers attached to the force, of whom the senior was Surg.-Major A. J. Fergusson, had very little to do; but they were all in the field, ready to undertake anything that might be required of them. Surg.-Major D. A. S. Thorburn dressed the wounds of a wounded man of the 14th Regt. under fire so close, that one of his kahars in attendance was mortally wounded." Extracts from India General Orders:—"Deputy-Surg.-Gen. A. Smith, M.D., C.B., to be P.M.O. to the Northern Afghanistan Field Force, with the temporary rank of surgeon-general, from May 15, 1880. Brigade-Surg. J. Ekin, M.B., to be P.M.O. of the 2nd Division, Northern Afghanistan Field Force, with the temporary rank of deputy-surgeon-general, from July 31, 1880, vice Deputy-Surg.-Gen. J. A. Hanbury, M.B., appointed to the 1st Division." The following Madras medical officers had received orders to proceed to Bombay for duty with troops proceeding to the front, viz.:—Surg.-Major A. C. Gaye, 14th Hussars; Surgs. J. M. Cogan, R.A., E. A. Roche, Wellington Depôt, J. Mulrenan, Centre District, and A. Kirwan, St. Thomas's Mount. Surg.-Major J. B. Hannah, M.D., is included in the list of those killed in the landslip at Naini Tal on Saturday last. Dr. Hannah, M.D., was born on New-Year's Day, 1838, and educated at the University of Glasgow, receiving his degree from that University in 1861, and that of Licentiate of the Royal College of Surgeons, Edinburgh, in the same year. He was appointed assist.-surg., March 31, 1862, and served with the 101st Fusiliers in the Indian North-West Frontier war of 1863, being present at the attack and capture of the Crag Picquet, the Conical Hill, and Umbeyla (medal with clasp). He was promoted a surg. in March, 1873, and surg.-major, April 28, 1876. The third and last part of the Shepherd Memorial has now been completed, this being the memorial brass erected in the chapel of the Royal Victoria Hospital, Netley. The inscription runs:—"In memory of Peter Shepherd, M.B., University of Aberdeen, Surgeon-Major, her Majesty's Army, born at Lochel, Cushnie, Aberdeenshire, Aug. 25, 1841, who sacrificed his own life at the battle of Isandlwana, Zululand, Jan. 22, 1879, in the endeavour to save the life of a wounded comrade. Erected by his brother officers and friends." This, with the memorial marble tablet erected in the parish church of Lochel, Cushnie, and the annual gold medal for surgery, presented to the University of Aberdeen, completes the memorial, the carrying-out of which has been in the hands of Major F. Duncan, R.A., Dr. Robert Farquharson, M.P., J. Keith Angus, Esq., Capt. L. M. Carmichael, 5th Lancers, and Deputy-Surg.-Gen. W. Snell.

The Auxiliary Forces.

MILITIA.

"A Non-Pensioner" addresses to us a letter, which we insert with great pleasure, feeling as we do that an injustice is being done to a deserving body of non-commissioned officers who, we have reason to think, with our correspondent, have been overlooked by the framers of the Circular referred to, by reason of the smallness of their numbers. Lieutenant-colonels of regiments ought to represent their case, and endeavour to get it righted. The following are our correspondent's remarks:—"As there are only a few of the non-pensioners now remaining, and at present serving on the Permanent Staff of Militia Regiments for a pension of 6d. a day, after fifteen years' good and faithful service as a serjeant with the Auxiliary Forces, I was surprised to notice a short time back in the Militia Regulations of 1880 and Army Circulars the difference of pay, allowances, &c., granted to men of the Regular Service, and to those of the permanent Staff of the Militia. Having regard, however, to the allowance of fuel and light given to men of the various branches of the Service, I am confident that my fire-place justly takes as much coal to boil my pot as that granted to men who are serving under their Army engagement in Class A, and those who have similarly served and are in Class B. Why should not those unfortunate serjeants now on the Permanent Staff receive the same allowance as those mentioned? It appears manifestly a hardship that the few non-pensioners (serjeants) should be debarred from the enjoyment of any advantage awarded to others of the same rank. I would rather believe the smallness of the number of these non-commissioned officers has been the cause of their being overlooked. These non-commissioned officers perform all the duties that devolve upon men of the same rank who are transferred to the Militia for completion of their Army service, then why should they not receive the same privileges?"

The Indian Army.

◆

[The Editor will be glad to receive Contributions from time to time from Officers of Native Regiments who may desire to render this column interesting to friends in England.]

8th Bengal Cavalry. We are told that the transport at Sibi appears to consist mainly of bullocks:—"The 8th Bengal Cavalry have no other carriage supplied to them, and the detachments 4th Bengal Native Infantry have the same. Considerable difficulty, it is said, attaches to keeping the loads on the backs of these animals, and so much time is consumed in the operation that we are told the men generally march without their rations and bedding, trusting to getting them up some time in the course of the 24 hours." Lieut.-Col. R. W. Sartorius, V.C., C.M.G., Bengal Infantry, has been appointed to officiate as second-in-command, vice Lieut.-Col. H. Chapman, officiating as commandant. Lieut. C. W. Muir, Bengal S.C., A.D.C. to Lord Ripon, has been appointed to do duty with the regiment in Afghanistan.

10th Bengal Cavalry. Capt. S. D. Barrow is specially mentioned by Gen. Palliser in his despatches, giving particulars of the cavalry action at Patkar Shana on July 1, and has been commended by the Government of India and Commander-in-Chief.

3rd Bengal N.I. A successful expedition against the Marris, who raided near Mittri, has just been undertaken by 200 men of the 3rd and 4th Bengal N.I., under Major Douglas. The Marris were dispersed in every direction at the first volley. Their camp was surprised, and a quantity of arms, cattle, and stores was taken. It seems probable that this affair will effectually stop the raiding by that tribe.

4th Bengal N.I. See 3rd Bengal N.I., and 15th Bombay N.I.

8th Bengal N.I. The regiment arrived at Peshawur at the end of last month from Afghanistan, *en route* to Rawul Pindee. Lieut.-Col. H. de Brett, wing-commander, 18th Bengal N.I., has been appointed officiating commandant, vice Lieut.-Col. R. Smith, on furlough to England.

9th Bengal N.I. The regiment arrived at Lawrencepore at the end of last month from Afghanistan, and was to remain there until the camp was broken up, when it was to proceed to Jhansi and Nowgong. The Commander-in-Chief in India has made the following appointments, viz.:—Col. T. E. Webster, second-in-command, to be commandant, vice Hawes, retired; Major F. F. J. Toke, wing-commander, to be second-in-command, vice Webster; Capt. R. A. Price, wing-officer, to be wing-commander, vice Toke.

14th Bengal N.I. Lieut. J. W. Hogge, wing-officer and qrmr., has been appointed adjt., vice Jameson, vacated on promotion; Lieut. H. H. Ozzard, wing-officer, succeeding him as qrmr.

16th Bengal N.I. A correspondent writes from the Khyber Pass, under date Aug. 21:—"This regiment is to remain in the Khyber to garrison Ali Musjid, on the withdrawal of the troops from Afghanistan. Major R. H. Salkeld died last month in England, sincerely and deservedly regretted by every one in the regiment, with which he had served over nine years. The following appointments have been made consequent on the departure on sick-leave of Lieut.-Col. W. G. Cubitt, V.C., second-in-command:—Capt. A. B. Clare, wing-commander, to officiate as second-in-command; Capt. J. T. Whish, qrmr., to officiate as wing-commander; Major A. F. Taylor, to officiate as qrmr."

18th Bengal N.I. A correspondent writes from Baxa, on the 19th ult.:—"The right wing left Julpigoorie on Aug. 1 by train, and arrived at Dinapore on the 3rd to relieve the 3rd N.I., ordered on service to Sibi (Candahar route). Lieut.-Col. H. de Brett has been appointed officiating commandant, 8th N.I., at Jellalabad. Lieut. Vivian has been appointed adjt., vice Sage, promoted. Lieut. Taylor has been appointed qrmr., vice Vivian."

19th Bengal N.I. The regiment was to have arrived at Peshawur early this month from Afghanistan, *en route* to Sealkote. Lieut. E. A. Young, squadron-officer and adjt., has been granted leave to England for one year, on medical certificate.

22nd Bengal N.I, from active service in Afghanistan, was due at Peshawur about the 10th inst., *en route* to Meean Meer, where it takes over quarters.

23rd Bengal N.I. The death is announced from Sibi, Southern Afghanistan, of sunstroke, of Surg.-Major J. Simpson.

30th Bengal N.I. The regiment was due at Peshawur on the 10th inst. from Afghanistan, and was to march thence to Jhelum, to which station it has been told off for duty.

32nd Bengal N.I. (Pioneers). The regiment arrived at Peshawur at the end of last month from Afghanistan, and was to proceed "as soon as practicable" to Rawul Pindee, the station told off to it. In his despatch, giving details of the operations in the Mazina Valley, from May 16 to 22 last, Brigdr.-Gen. Gibs reports:—"The 32nd Pioneers deserve high credit for the manner in which they worked as well as fought. They underwent a great deal of fatigue, making roads and blowing up towers, and were well handled by the commanding officer, Major A. C. W. Crookshank, and the officers of the regiment. The per-centage of rounds fired by this corps was only 9·02." Lieut.-Col. J. Bartleman, wing-commander, 20th Bengal N.I, has been appointed officiating commandant, vice Major A. C. W. Crookshank, granted sick-leave to England. Major C. N. Hodgson, Bengal Infantry, is appointed wing-commander, vice Samuells, deceased.

35th Bengal N.I. Capt. F. T. Goodridge is included in the list of those who were killed in the landslip at Naini Tal on Saturday last. Capt. Goodridge entered the Army as an ensign in the 94th Regt., April 4, 1865, exchanged to the 5th Fusiliers Feb. 3, 1869, was gazetted a lieut. Aug. 16, and was subsequently appointed to the Bengal S.C. He was appointed wing-officer of the 35th Bengal N.I., of which regiment he was for some time officiating adjt., March 16, 1877, and promoted capt., April 4, 1877.

38th Bengal N.I. Lieut. P. A. Buckland, wing-officer, has been appointed adjt., vice Goldney, vacated on promotion.

41st Bengal N.I. The regiment was due at Peshawur about the 7th inst., from active service in Afghanistan, and was to form part of the garrison of that station. Lieut. C. W. Young, from the 12th Bengal N.I., has been appointed wing-officer.

43rd Bengal L.I. Sepoy Nurbanadur has been admitted to the 3rd Class of the Order of Merit, for conspicuous gallantry at the action of Konoma, on Nov. 22, 1879, on which occasion, when a detachment of the regiment was advancing in skirmishing order to attack a breastwork held by the enemy, he rushed ahead under a heavy musketry fire and showers of spears, and was the first to climb over the breastwork and jump into the enclosure.

44th Bengal N.I. It is announced that Lieut. Henderson, who served with the regiment in the expedition against the Nagas, has been appointed to the Assam Commission for service in the Naga Hills.

1st Goorkhas. The regiment arrived at Peshawur at the end of last month, and marched direct to Lawrencepore, where it was to remain until the camp was broken up.

3rd Goorkhas. The regiment was due at Peshawur about the 10th inst., from Afghanistan, *en route* to Almorah.

3rd Hyderabad Cavalry. A large portion of the regiment left Bombay on the 30th ult. for Kurrachee.

4th Hyderabad Infantry. Lieut. H. M. Mason, wing-officer, has been granted leave to England for one year, on medical certificate.

1st Punjab Cavalry. Gen. Palliser's report of the cavalry action at Patkar Shana on July 1 has been published in the official *Gazette* of India. The Government and the Commander-in-Chief concur in giving great credit to Gen. Palliser and the troops engaged, and make special mention of Major Atkinson.

2nd Punjab Cavalry. It is announced by telegraph from India that Col. T. G. Kennedy, commandant, has been appointed to the command of the Punjab Frontier Force. Capt. L. Bishop is specially mentioned in Gen. Palliser's despatches giving particulars of the cavalry action at Patkar Shana on July 1. He has been commended by the Government of India and the Commander-in-Chief.

3rd Punjab Cavalry. We learn from Sibi that Capt. Pringle is recovering from an attack of apoplexy.

1st Punjab Infantry. Lieut.-Col. C. B. Brownlow, wing-officer and officiating adjt., has been appointed qrmr., vice Capt. H. Howell, promoted.

4th Sikh Infantry. Lieut. V. C. Tonnochy, from wing-officer and qrmr., and officiating adjt. 6th Punjab Infantry, has been appointed adjt., vice Capt. C. Dempster, promoted.

1st Madras N.I. The regiment was due at Peshawur on the 10th inst. from Afghanistan.

4th Madras N.I. Capt. J. E. Porteous has been granted leave to England, on medical certificate. Subadar Syed Khader has been admitted to the Order of British India, 2nd Class, with the title of "Bahadur," vice Subadar-Major Ballagooroo, promoted, July 21, 1880.

7th Madras N.I. Subadar-Major Ballagooroo, "Bahadur," has been admitted to the 1st Class of the Order of British India, vice Hon. Capt. Subadar-Major Mahomed Hoossain, "Sirdar Bahadur," deceased, July 21, 1880.

13th Madras N.I. The regiment had been ordered to hold itself in readiness to march, if required, from Meean Meer to Candahar when the mail left India.

26th Madras N.I. His Excellency the Governor-General in Council has been pleased to admit the following native officers to the 1st Class of the Order of British India:—Madras: To the 1st Class, with the title of "Sirdar Bahadur," Subadar-Major Muhummud Ayoub, "Bahadur," 26th N.I., vice pensioned Subadar-Major Mootoosawmy, "Sirdar Bahadur," deceased, May 24, 1880.

32nd Madras N.I. Subadar-Major Vurdarajoo has been admitted to the 2nd Class of the Order of British India, with the title of "Bahudur," vice Subadar-Major Muhummud Ayoub, promoted, May 24, 1880.

35th Madras N.I. Col. W. H. R. Godfrey, commandant, has assumed temporary command of the Saugor District, vice Major-Gen. H. R. Browne, proceeded to England on completing his period of staff service.

2nd Sind Horse. Lieut. J. Monteith, who acted as orderly officer to Brigdr.-Gen. Nuttall on the occasion of the affair with the Wali of Candahar's troops at Girishk in July last, has been specially thanked by that officer for the services rendered by him on the occasion.

3rd Sind Horse. Col. J. H. P. Malcolmson, C.B., commandant, is specially thanked by Brigdr.-Gen. Nuttall in despatches on account of the services rendered by him on the occasion of the mutiny of the Wali's troops at Candahar in July last.

Poona Horse. Major G. C. Hogg, who acted as brigade-major on the occasion, has been thanked in despatches for the services rendered by him when the Wali of Candahar's troops mutinied at Candahar in July last.

2nd Bombay N.I. (Grenadiers). See H.M.'s 66th Regt.

3rd Bombay Light Cavalry. Major A. P. Currie, commandant, has been thanked in despatches for his services at Girishk in July last, when the Wali of Candahar's troops mutinied.

8th Bombay N.I. Major H. C. Morse, S.C., from wing-commander, 9th Bombay N.I., has been appointed wing-commander, vice Lieut.-Col. Brown, deceased.

9th Bombay N.I. We hear that Major Morse was lately wounded in Afghanistan, while dislodging some tribesmen from the sungars—or stone entrenchments—thrown up on this side of the Khojak Pass. The work was very gallantly effected by a party of the 9th engaged, and according to one account ten men were killed and three wounded, amongst the latter being the major. Major C. H. Coles, wing-officer, has been appointed wing-commander, vice Major Morse, transferred to 8th Bombay N.I.

12th Bombay N.I. Lieut.-Col. A. T. Reid returned to India last month from leave in England, and resumed duty as second in command.

13th Bombay N.I. The following officers embarked with the regiment at Bombay for Kurrachee in the ss. Chinsurah on the 17th ult.:—Col. R. Mallaby, Lieut.-Col. J. H. Castell, Major M. D. V. T. Grant, Capts. W. Laing and J. N. Walker, Lieut. C. B. Down, and Surg.-Major Haliday.

15th Bombay N.I. From Sibi it is reported that the regiment arrived there on the 19th ult., and was ordered to go on to Quetta at once, not relieving the 4th Bengal N.I., as was expected. The Lahore paper remarks:—This no doubt has been done to give the Bombay troops an opportunity of showing what they can do after Khushki-i-Nakhud, but it is hard on the 4th N.I., notwithstanding. The latter regiment is 660 strong, with nine British officers, while the Bombay corps has only 450, with six British officers. Lieut. W. Coles, adjt., has been granted leave to England for one year, on medical certificate.

18th Bombay N.I. The regiment left Bombay for Kurrachee on the 1st inst. The regiment, which is 700 strong, arrived from Poona on the 30th ult. A detachment at Tanna was relieved by a detachment of the 25th N.I. from Bombay. The 18th is under the command of Col. J. A. Smith. The other officers are Lieut.-Col. F. P. Forteath, Majors J. G. E. Griffith and O. W. Braine, Capt. H. E. Penton, Lieut. A. W. C. Bell, 2nd Lieut. L. H. Vidal, and Surg. J. P. Greany, M.D.

19th Bombay N.I. In correspondence and despatches just published in the *Bombay Government Gazette*, relating to the withdrawal of the several military posts at Abdul Rahman, Melkarez, Dubrai, and Guttai, and their concentration at Chaman, which was effected by Major W. Jacob, 19th N.I., under orders from Gen. Primrose, immediately after receipt of news of Gen. Burrows's defeat at Kushk-i-Nakhud, Gen. Phayre expresses his "full appreciation of the soldier-like manner in which Major Jacob executed the difficult duty entrusted to him, when surrounded by some hundreds of hostile Afghan villagers for a distance of about 53 miles." The Commander-in-Chief also considers that "Major Jacob executed the very difficult duty devolving upon him with judgment and success."

22nd Bombay N.I. Major De L. R. F. Wooldridge, who has been connected with the transport work from the time Sir Richard Temple went to the front to look after the arrangements, has, we see, been promoted from general Transport officer, 1st Division, Candahar Field Force, to Director of Transport, 2nd Division, Candahar Field Force. The *Times of India* says:—"Next to Brigdr.-Gen. Hogg, who was associated with Gen. Burrows in the Quartermaster-General's office for so long, there is probably no officer on this side who has more experience of the difficulties of the work, and knows better what is necessary to overcome them than Major Wooldridge."

23rd Bombay N.I. Major J. Gatacre, wing-commander, has been appointed second-in-command, and Capt. F. T. Ebden, wing-officer, wing-commander, in succession to Col. Bruce, retired.

24th Bombay N.I. Col. J. H. Henderson, commandant, had been appointed to the command of the line of communications, vice Major-Gen. Phayre, C.B., when we heard from Candahar.

30th Bombay N.I. (Jacob's Rifles). See H.M.'s 66th Regt.

"SPECIAL MILITARY DUTIES."

"One of the Auxiliary Forces" writes:—"Can any of your numerous correspondents define the words, 'special military duties,' as laid down in General Orders for Militia and Auxiliary Forces, as I find that at Pontefract the staff of the Militia are doing duty exactly the same as the brigade depôt, and at present receiving no pay, as it appears that special military duties are not looked upon by every one in the same light? Now, the pay of a Line serjeant is 2s. 3d., with rations; the pay of a Militia serjeant (pensioner) is 2s., without rations; why the one has to perform the same duties as the other for less pay is a thing I cannot understand. And why time-serving men are standing looking on, when the General Order distinctly states that these time-serving men are to be first taken for duty, is a question I hope will soon be settled by those in authority."

AN EXPLANATION WANTED.

"Scrutator" writes:—"I notice that Capt. W. H. James, 38th Regt., has been permitted, contrary to the Regulations of the Service, to remain as adjutant of the 2nd Middlesex Rifle Volunteers since March 24, 1870! He has, therefore, exceeded two terms. Why? Capt. James doubtless is a good and most valued officer, and I do not blame him in the least for sticking on to his appointment as long as he can; but who are the authorities who permit him to hold on to his adjutancy in direct violation of all rules on the subject?"

Four of the Chinese naval cadets who for the last three years have condescended to receive instruction on board her "Tributary" Majesty's ships, returned to the arms of a paternal government a few days ago, and are now located at that tremendous centre of Franco-Chinese enterprise known to "outer nations" as the Mamoi Arsenal. Great results are expected to follow this appalling accession to the staff of the "Infant Navy,"—advantages including, it is almost needless to add, the annihilation of the Muscovite fleet, and the ultimate extirpation of all the "barbarian" fire-ships.—*China Telegraph.*

"ATALANTA" RELIEF FUND.

The sum required for the relief of the numerous dependent relatives is £20,000.

Subscriptions are earnestly requested to be paid to "ATALANTA" RELIEF FUND, at Bank of England; Messrs. DRUMMOND and Co., London; at any local bank at Portsmouth; or by

Commander JOHN W. F. HARVEY, R.N., Hon. Secretary.

Portsmouth Branch, H.M.'s Dockyard, Portsmouth.

THE AMERICAN WALTHAM WATCHES are the best timekeepers in the world.—HENRY W. BEDFORD, No. 67 Regent Street (next to St. James's Hall), has the largest retail stock in England to select from. Silver cases from £2 10s; gold cases from £8 8s. Sent securely packed by mail to all parts of the world.

NOTICES TO CORRESPONDENTS.

CARADOG.—1. Certainly he has to make himself useful in any way that may be required. 2. No, he is not entitled to the extra sum.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e del Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; "*Vedette*;" *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Army and Navy Journal of New York*; in addition to all the home and colonial professional periodicals and journals.

Army and Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 25, 1880.

THE times have changed since the days when Mr. Pitt menaced Spain with war if she meddled with Nootka Sound,—and perhaps the change has been for the better. Certainly the great Minister would have been astonished, had he been told that not only an English Ministry, but the English people and, apparently, the Royal Family would view, without the smallest expression of open resentment, the subjugation and annexation of the kingdom which gave this country its reigning House, and was, till the accession of Queen Victoria, a part of the British Empire. The strongest proof of the fullness of the acceptance of the overthrow of the House of Hanover and of the absorption of the kingdom of the Guelphs in the body corporate of the German Fatherland, is afforded by the appearance of the Duke of Cambridge as a guest at the Imperial festivities at Berlin. It is well known that his Royal Highness for a long time after the event was influenced by feelings he did not care to disguise towards the House of Hohenzollern, on account of the high-handed and, as many think, in this country and out of it—including the great mass of the Hanoverian people—utterly unjustifiable conduct of Prussia to the aged King and his country. But nothing succeeds like success. The House of Hanover has become the House of Great Britain and Ireland and of India, and the heir to the exiled King, who died in Paris, is now an English Duke of the Blood Royal. The Duke of Cambridge was, no doubt, actuated by a high sense of duty in visiting Potsdam, and in attending the autumn manœuvres of the Prussian Guard Corps, which still remains Prussian, and is not German. His Royal Highness has been the object of marked attention on the part of the Royal and Imperial personages who are related so closely to his House, and of the most illustrious and celebrated of the statesmen and soldiers who have made a splendid history for modern Prussia, and exalted their country to such a pinnacle of greatness, without any feeble pretence at a repudiation of the traditions of conquest which gave Silesia and Posen to their forefathers, although modern ideas in other countries regard the retention of conquered provinces as unrighteous. The Duke of Cambridge has also secured the favourable notice of the chroniclers of the events of the day, and is made to occupy a very high place in the daily narrative furnished to the readers of newspapers by special correspondents of English and foreign newspapers. As a Commander-in-Chief of the British Army (few people are at all moved by the difference between "a Field-Marshal Commanding-in-Chief" and "Field-Marshal the Commander-in-Chief"), his Royal Highness has naturally been received with marked consideration and courtesy; and it may be safely inferred that his welcome has not been the less warm because he is cousin of the Queen of England, and that he is known to have felt very keenly the injuries inflicted on his kinsmen. But the national benefits which may accrue from the Duke's presence at Berlin, apart from any personal considerations, may be very appreciable. No one can arrive at sounder conclusions on questions of military organisation than the Duke of Cambridge. He is perfectly well acquainted with the military system of Germany, and he must be convinced—nay, he is so—that the attempts to assimilate the conditions under which the British Army is raised and is obliged to serve with those of the local or territorial German Army, must, "*necessitate* rerum," be utterly abortive. Nothing short of a dire national calamity, or the imminence of a huge catastrophe, could or can induce the British people to accept the conditions under which the German Army is raised and lives. We may trifle with fanciful schemes and nominal organisations, to amuse Parliament and to baffle public intelligence, but the Commander-in-Chief of the British Army ought to insist on the adherence to the system under which alone military efficiency can be obtained in this country.

The officer referred to in the telegrams from the Cape, as having commanded the detachment of the Cape Mounted Riflemen in the recent affair with the Basutos, and spoken of as Captain Carrington, is, of course, Brevet Lieutenant-Colonel Carrington, C.M.G., 24th Regiment. Now, it was only the other day that Colonel Carrington was restored to the duty establishment of his regiment, from the Supernumerary List, as a captain, to fill the vacancy caused by the promotion of Captain Paton, C.M.G. Can anyone explain on what principle the subalterns of the 24th have thus been robbed of a step of promotion which was clearly due to them; and how it is that Colonel Carrington, who is employed thousands of miles away from the head-quarters of his battalion, is restored to the establishment of his regiment, when there is evidently no prospect of his being spared for some time to come from his present scene of usefulness?

We might also ask why the 9th Regiment is still deprived of the step which has been due to it for months past, in consequence of the transfer of Captain A. G. Wavell to a Staff appointment in connection with the Local Forces at the Cape?

It is more than a year now since it was announced that Captain and Brevet Lieutenant-Colonel A. H. A. Gordon, 65th Regiment, had accepted the command of the newly-raised corps of Native Pioneers for service in Cyprus. Colonel Gordon, however, still continues on the establishment of his regiment, as does also his adjutant, Captain E. W. D. Croker, 93rd Highlanders, though other officers appointed subsequently to the corps and holding subordinate positions have been seconded, and their regiments given the benefit of their steps. Do the Authorities work on any principle at all in seconding officers, or is it done as the fit takes them?

The 57th Regiment is the most unfortunate regiment in the Service just now, in one respect. It has three officers absent from head-quarters on Staff or special employ, viz., Brevet Major Lord Gifford, V.C., and Captains Collins and Hayne. Yet the senior subalterns are required to do all the work of captains without either extra pay or the extra rank, and judging by the treatment of other corps, there seems little or no prospect of their cause of grievance being removed, though, to be sure, we hear of Lord Gifford and Captain Collins being likely to be seconded,—that is, when the Authorities awake to the fact that the Warrant lays it down that they should be.

It is close on a year now since the events which brought the 9th Lancers so prominently before the public last December at Cabul, and resulted so disastrously to Brigadier Dunham Massy, yet we look in vain for General Roberts's despatches giving particulars of the action, in which so many officers and men distinguished themselves. Can it be that these documents are, for some reason or other, to be suppressed; or is it that they have been accidentally pigeon-holed somewhere, and are supposed to have seen the light when they have not. It is due to the brave fellows whose gallantry was so conspicuous on the occasion of the events which led to the retirement on Sherpur and subsequent occupation of the citadel, that no longer delay should be occasioned in making public documents the appearance of which have been so eagerly looked for by those who did their duty nobly before the enemy, and deserve the rewards which should be in store for them.

The Constable of the Tower, with the approval of the Secretary of State for War, has appointed a Committee, consisting of Major-General Milman, C.B., Major of the Tower, president; Hon. Spencer Ponsonby-Fane, C.B., of the Lord Chamberlain's Office; Mr. Callender, of the Office of Works; Mr. Owen Morshead, of the War Department; and Assistant-Commissary-General Thorn, of the Ordnance Store, to investigate the objects of interest in the Tower, and frame regulations for the future admission of visitors. Captain FitzGeorge will act as secretary to the Committee.

The *Times* understands that the command of the forces in India, when vacated by General Sir Frederick Haines, G.C.B., G.C.S.I., has been offered to General Sir Neville Chamberlain, G.C.B., G.C.S.I., at present Commander-in-Chief of the Madras Army.

Captain D. O'Brien, Royal Engineers, who has been employed for some time past as assistant-inspector of works at the Royal Arsenal, Woolwich, has been appointed Surveyor-General at Jamaica.

The latest information from the Cape shows that only the Tyali section of the Tambookies have combined with the Basutos against the Colonial forces. The latter have had several successful skirmishes with the Basutos. A detachment of 300 Volunteers will leave Cape Town to-day for Basutoland. Twelve hundred Basutos attacked Mohales Hoek on the 20th inst., and on the following day another body of 5,000 attacked Mafeteng. Fighting continued all day at both places, but the rebels were ultimately beaten off. No information had been received respecting the casualties on the Colonial side. Messrs. Donald Currie and Company have received a telegram from their Cape Town agents, stating that their steamers *Melrose* and *Lapland* are under immediate orders to convey 600 Volunteers to take part in the suppression of the rebellion. The *Melrose* takes 300 men from Cape Town, and the *Lapland* 300 more from Algoa Bay. The destination of the troops is not yet made known, but it is expected they will disembark at East London.

How much longer, we wonder, are the two regiments of Life Guards to remain without Adjutants. Lieutenant Southwood got his troop in the 1st a year ago, and a successor is not yet appointed. Lieutenant Wake retired from the 2nd in May last. We cannot think that the delay in filling the appointments is calculated to promote the welfare of these distinguished regiments.

One of the few good things open now to retired officers, the Governorship of the Military Prison at Gosport, has become vacant by the death of Major A. P. Miller, late 92nd Highlanders. For over a quarter of a century had Major Miller been employed in our military prisons, and few men were better known or more deservedly respected. There will, of course, be no lack of candidates for the vacancy thus created; but it will be difficult to find an officer more thoroughly fitted than Major Miller was to discharge the important duties of a position requiring the exercise of great discretion.

The anomaly exists just now of a Linesman commanding the Home District, Colonel Logan, C.B., of the double Brigade Depôt at Hounslow, having by virtue of his seniority, been called upon to perform General Higginson's duties, while that officer is absent attending the French Manœuvres. But Colonel Logan is not the man to wound the susceptibilities of anybody.

Two captains of the Royal Engineers, holding the appointment of adjutant to Militia and Volunteer regiments, have not yet been seconded, while four others have been. Considering the block in promotion among subalterns of the Corps of Royal Engineers, seniors holding Staff appointments ought to be seconded, as in other corps. A careful examination of the Royal Engineers' List will disclose several officers who should be seconded, *e.g.*, a chairman of a Port Trust (!), &c. With compulsory retirement before them, and while they are being distanced by their compeers in the Royal Artillery, the Royal Engineer subalterns are, at least, entitled to all legitimate steps.

We regret to learn that Brigadier-General A. G. F. Hogg, Quartermaster-General of the Bombay Army, has had to be invalided to Europe. The arduous task he performed in the inspection of the Bengal transport arrangements under Sir Michael Kennedy, and his subsequent exertions in securing the defence of Sherpur while shut up there in December last, have materially affected his health. The sketches furnished to the *Illustrated London News* by this officer while at Cabul are considered very valuable. It may be remembered that General Hogg took an active part in the transport of the native troops to Malta.

There is a general impression in India that had the 3rd Hussars been sent to Candahar from Mhow, or even the 17th Lancers, who relieved that regiment later, General Burrows' hands would have been considerably strengthened; but, as usual, it is expected that a British General must be able to "to throw a handful of troops against any odds." The 3rd Hussars had become thorough experts in the use of the Henry-Martini carbines, thoroughly acclimatised, and were very anxious for service. Their transport to Kurrachee would have been a very easy matter. The 3rd Bombay Cavalry were sent, although 300 or 400 miles further away from the port of embarkation.

The vacant commissions as medical officers of the Household Cavalry have been conferred upon Surgeons W. Maunsell-Collins, M.D., Scots Guards, and P. G. R. Young, from the Staff of the Home District, Mr. Collins being appointed to the Royal Horse Guards, and Mr. Young to the 2nd Life Guards. Mr. Young joined the Service as recently as February, 1878; whilst Mr. Collins has fourteen years' service, during the last ten of which he has worn the uniform of the Scots Guards, which regiment he leaves, to the great regret of all ranks.

The grievances under which the officers of the Veterinary Department suffer may be usefully summarised as follows. 1st. They have to complain of the very disadvantageous terms on which they now join, engaging for ten years, and then taking their dismissal with a bonus of £800, or being re-engaged for another ten years and receiving at the expiration of that period another £800, but without pension. This arrangement, only, however, recently instituted and imperfectly understood, cannot be called an alluring prospect. 2nd. Another grievance is the long period of twelve years before 2nd-class veterinary surgeons become 1st-class, with the relative rank of captain; while officers of the Army Medical Department obtain a similar rank after only six months' service. 3rd. Another subject, giving rise to great discouragement and heartburning, is the absence of reward for distinguished or meritorious service for 1st-class veterinary surgeons, an anomaly under which several 1st-class veterinary surgeons are now suffering, notwithstanding the great commendation received by them for service in the field. 4th. The unfavourable position as regards relative rank. The wish for rank may be by some considered a sentimental grievance, but we know that sentiment in different forms governs the world. Rank is everything in the Army, and no Department deprived of its fair share of it can work well or take its proper position. 5th. The comparative smallness of the pensions received by the Veterinary as compared with other Departments of the Army. 6th. The very disgraceful rule which precludes a veterinary surgeon from the enjoyment of the privilege—extended to all other officers—of being presented at Court. And last, but by no means least, the almost universal absence of recognition and of honours, rewards, and decorations, in spite of the most favourable recommendations made by General and other officers. It would be instructive to know on what principle the above anomalies are allowed to exist.

We should be pleased to find steps taken to acknowledge the services rendered by the Militia officers who lately volunteered their services during the campaign at the Cape. Many of the officers made great sacrifices in order to proceed to the seat of war, and they well merit some recognition.

Major W. G. Brancker, R.A., Instructor in Artillery in the Department of Artillery Studies at Woolwich, has been selected to succeed Major F. S. Stoney, R.A., as Assistant-Director of Artillery Studies, the latter officer's period of Staff service having expired. As we lately announced, Captain P. L. Skinner, R.A., Second Assistant-Superintendent of Experiments at the School of Gunnery, Shoeburyness, replaces Major Brancker as Instructor in Artillery.

We hear that 20 officers and 100 men of the Russian Army are at present under course of training in heliograph signalling, the manuals in use and instruments having been obtained from England. The Minister of War takes the greatest interest in the movement, which has received an impulse during the last three weeks from the favourable report sent in by General Skobeleff of the instruments in use in the Turkoman region.

The question of regimental titles is attracting just now general attention. Two correspondents address letters to us on the subject this week. One of these refers to the proposed affiliation of the 26th and 74th Highlanders, and another to the affiliation of the 71st and 78th. The letters will be found in our regimental columns, and are interesting, as showing what the feelings of the several regiments are on a subject which seems likely to be brought before the notice of Parliament shortly. The War Office would do well to take note of any suggestions which may be offered, and try where it can to profit by them, for much annoyance might be prevented in the future by the exercise of a little tact now on the part of those in authority, if the proposed territorial scheme is really to be carried out.

The Navy.

◆

ADMIRALTY, Sept. 20, 1880.

ROYAL MARINE FORCES.

The under-mentioned gentlemen have been appointed, Sept. 1, 1880, Lieutenants in the Royal Marine Light Infantry :—Messrs. Richard Hugh Montgomery, Graham D'Arcy Anderson, Charles Chamier, John Hall Hill, Augustus George Monckton, Archibald George Brabazon Urmston, Michael Alfred Colin Huggins, Francis Edward Watson, Clarence Herbert Macdonald, Fitzroy Tufton Holt Scott, Gervis Taylor Byrne, and William Price Drury.

ADMIRALTY, Sept. 21, 1880.

ROYAL MARINE FORCES.

The following promotions, dated Sept. 11, 1880, have taken place in the Royal Marine Light Infantry, viz. :—Captain Thomas Palmer Norton to be Major, vice Arbuckle, deceased ; Lieutenant Arthur Domville Corbet to be Captain, vice Norton.

APPOINTMENTS.

Commander—J. P. Pipon, to the Royal Naval College, to study.

Lieutenants—R. C. Sparks, to the Iris ; Charles E. Gladstone, John L. Marks, P. W. Bush, Elphinstone B. D'O. Aplin, and Henry P. Harris, to the Vernon (additional), to qualify for torpedo duties, and to join the Royal Naval College, Greenwich, on the 30th inst. ; William F. Gunn, H. M. White-Thomson, and Augustus L. K. Knapton, to the Excellent, to qualify for gunnery duties, and to join the Royal Naval College, Greenwich, on the 30th inst. ; R. H. Archer, to the Victoria and Albert, vice Pipon, promoted ; G. W. Russell, B. R. Bradford, R. B. S. Wrey, and H. J. D. Laxton, to the Tourmaline ; W. F. D. Walker, to the Excellent ; L. E. Dick, to the Agincourt ; G. L. King Harman, to the Vernon ; Victor E. J. B. Von Donop, to the Decoy, in command ; Edward R. Brietzcke, Hugh H. G. W. C. Massy, and Henry A. Scudamore Stanhope, to the Serapis ; Thomas Macgill, to the Indus, for Hecate ; Francis R. Pelly, to the Asia ; R. M. King, and H. H. Hayes, to the Tourmaline ; A. H. Boldero, and J. G. Heugh, to the President ; Frank M. Royds, to the Carysfort ; K. H. Foote, to the Excellent.

Navigating-Lieutenants—James F. Foot, to the President ; J. A. G. Buckner, to the Tourmaline ; C. W. May, to the Serapis ; Harry G. Hatch, to the President, for the Royal Naval College, Greenwich ; and T. Hawkins Smith, to the Jumna.

Sub-Lieutenants—P. C. K. W. Murray, to the Forward ; E. R. le Marchant, to the Bacchante ; R. P. Adams, to the Royal Adelaide.

Navigating Sub-Lieutenant — W. Humphreys, to the Tourmaline.

Midshipmen—F. R. A. Denman, W. J. van Ingen, C. A. Christian, G. A. Ballard, W. H. W. Helby, H. E. F. Worthington, and J. H. Robertson, to the Tourmaline ; M. E. Browning, to the Carysfort.

Fleet Surgeon—Michael W. Cowan, to the Royal Marine Division at Portsmouth.

Staff Surgeons—Charles L. Ridout, to the Tourmaline ; and Septimus Sexton, to the Duncan, for temporary service.

Chief Engineer—James Hook, to the Tourmaline.

Surgeon—W. J. Lightfoot, to the Serapis.

Engineers—H. R. Marsden, to the Defence ; C. L. Beaden, to the Alexandra, for temporary service ; John Johnson, to the Albatross ; John P. Williams, to the Valiant ; William Brand, to the Indus, for Hecate ; Isaac E. Hurst, to the Tourmaline ; and Richard H. Tregenna, to the Indus, for Industry.

Assistant-Engineers—R. W. Coomber, to the Pembroke ; Frederick W. Wills, to the Tourmaline.

Clerk—N. H. Greenwood, to the Royal Adelaide.

Gunners—H. Canning, to the Tourmaline ; G. Palmer, to the Implacable ; W. M. Phillips, to the Asia ; T. Avery, to the Indus ; Nicholas J. Potter, to Pembroke, for the Tweed ; L. Evans, to the Brilliant.

Acting Gunners—F. Bryant, F. S. Browning, and D. Sweeney, to the Asia ; W. C. Batten, to the Indus.

Boatswains — S. Goodfellow, to the Tourmaline ; C. Stewart, W. Seymour, and J. Robbins, to the Pembroke ; Thomas Johnson, to the Duke of Wellington, for Victory.

ACHILLES, Capt. E. Kelly, will be taken into No. 3 dock, Devonport, on Tuesday.

ALBATROSS, Com. Errington, left Amoy on July 23, and proceeds to Japan.

ALERT, Capt. J. P. Maclear. The British Museum is about to be enriched by a collection of natural history specimens made by the officers of H.M.'s surveying ship Alert, which has been for some months engaged in making a complete survey of the Straits of Magellan.—*Standard.*

ASSISTANCE, Capt. Buckle, arrived at Portsmouth on Monday morning. She brought 63 recruits from the brigade depôt at Omagh, to join the 108th Regt. at Portsmouth ; 30 from the depôt at Birr, to join the 109th Regt. at Aldershot ; 38 from the depôt at Galway, to join the 87th Regt. at Guernsey ; 107 from the depôt at Clonmel, to join the 2nd Batn. of the 18th Regt. at Aldershot ; and the following officers in charge :—Capt. Coffey, 27th Foot ; Lieut. Cole, 109th Foot ; Lieut. Tyrwhitt Walker, 87th Foot ; and Capt. Burr and Lieut. Garven, 18th Foot. The absence on particular service of the Orontes and Tamar has led the Admiralty to order the Assistance to the Mediterranean. Having been specially built for trooping service between the home stations, she has only on very rare occasions gone further than to Ireland or Scotland. She is to leave Portsmouth on Oct. 8, taking out to Gibraltar a draft of the 1-4th Foot, 140 strong, with a few women and children, and about 120 naval supernumeraries for the North-American station.

BACCHANTE, Capt. Lord Charles Scott. The sailing of the Bacchante, which was to have taken place on Saturday from Portland, was delayed, owing to the loss of a torpedo from the steam pinnace during practice with the Whitehead torpedoes. She left on Monday afternoon for Vigo.

BITTERN, Com. E. Pusey, does not remain with the flag at Port Gravosa, but returns to the Ionian Islands, the Condor having taken her place with the Fleet.

BRUISER, Com. T. E. Maxwell, has been placed in dry dock at Keyham Yard for examination.

CARYSFORT, Capt. H. Stephenson, C.B., has been taken out of dock at Sheerness and replaced by the Tourmaline, Capt. H. S. Dennistoun.

CLEOPATRA, Capt. F. Durrant, was inspected in Plymouth Sound on Wednesday, by Admiral the Hon. C. G. J. B. Elliot, C.B., Commander-in-Chief, and will be ready to proceed in a few days for an experimental cruise in the Channel.

COMUS, Capt. F. W. East, arrived at Yokohama from Hong Kong on July 30. A court-martial, under the presidency of the Commodore, assembled at Hong Kong, on July 19, for the trial of Mr. J. Langford, assistant-engineer of the Comus, on four separate charges. The prisoner pleaded not guilty to the first, second, and third charges, and guilty to the fourth charge. After a lengthy trial, the Court found the prisoner guilty of the second part of the second charge, viz., conduct unbecoming the character of an officer in incurring a mess and wine bill when he knew that he was unable to pay it within the time prescribed by the Admiralty Regulations. With regard to the first and third charges, and the first part of the second charge, the Court recorded a finding of "not guilty." For the second part of the second charge, of which the Court found the prisoner guilty, and the fourth charge, to which he had pleaded guilty, the prisoner was ordered to forfeit twelve months' seniority. Mr. Langford's seniority stood at July 1, 1878.

COQUETTE, Lieut.-Com. J. L. Burr, left Malta on the 7th inst., with mails for Brindisi.

DEFENCE, Capt. A. Thrupp, has been run into at her moorings by a merchant vessel, and there can this time be no excuse for putting the blame upon the man-of-war. The trader seems to have been carried down upon the Defence almost stern first, and got a trifle crumpled, while the Defence came off with a few scratches and a little excitement.—*Hampshire Telegraph.*

DRUID, Capt. W. R. Kennedy. With reference to the American fishery dispute reported from New York, and the alleged violence shown by Newfoundland fishermen towards an American vessel, we may state that her Majesty's ship Druid, which was on a cruise with the Admiral to Quebec, has been ordered to the fisheries, together with her Majesty's ships Contest and Flamingo.—*Standard.*

DRYAD, Com. John Hext, was to sail for Bassein and Akyab on Sept. 1, and would return before Sept. 20 to Rangoon.

ECLIPSE, Capt. Charles Rising, was at Rangoon up to Aug. 27.

ELK, Com. H. Clanchy. A rowing match for £24 a side took place at Monte Video on August 11 between the ten-oared cutter of the Swallow, and the ten-oared cutter of the Elk. The course was five miles. After an exciting contest the Elk's boat won by 39 seconds, the time occupied in covering the course being 36 min. 39 sec.

ENCOUNTER, Capt. Hon. A. S. Denison, will proceed to Chefoo at the end of August, where Admiral Coote will assemble as many of the ships of the China Squadron as practicable, on account of the great Naval demonstration to be made there by other Powers. The Russians are getting together a formidable fleet in these waters, and in case of any European embroglio we should, unless rapidly reinforced, be awkwardly situated, for powerful as our fleet undoubtedly is out here, our Colonial dependencies at Singapore and Hong Kong would have to be efficiently protected, as would our great trading fleet and varied interests throughout China and Japan, and a heavy blow might be struck by an active enemy before we could take steps for our protection. The teetotallers of the Encounter have been showing the people of Shanghai that they can enjoy themselves without the aid of beer. With the members of the Shanghai Lodge of Good Templars, they joined in a torchlight procession, headed by the Encounter's drums and fifes, and proceeded to the Templars' Hall, where a concert on behalf of the Seamen and Marines' Orphan Home at Portsmouth was given by the officers and men of the ship, under the directions of Lieut. Charles Bayly.—*Hampshire Telegraph.*

EXCELLENT, Capt. J. O. Hopkins. On Friday last week, two teams, consisting of eight each, from the Excellent and the Royal Marine Light Infantry, went to Browndown for a friendly rifle competition, which was decided in favour of the former. The following are the scores :—Excellent—1st P.O. W. Morgan, 91 ; Lieut. Nicolls, 86 ; Chief P.O. F. Gosling, 82 ; A.B. E. Budgen, 82 ; Lieut. Lloyd, 81 ; 2nd P.O. E. Hampton, 76 ; 2nd P.O. S. Leadbeater, 76 ; Gunner R. N. McSweeney, 74—total, 648. Royal Marine Light Infantry—Serjt. Blicto, 81 ; Serjt. Cox, 80 ; Gunnery-Instructor Foot, 77 ; Capt. Heathcote, 57 ; Serjt. Walden, 74 ; Serjt. Turner, 73 ; Corpl. Allen, 73 ; Serjt. Lake, 66—total, 599. Excellent wins by 49. Excellent, average, 81 ; Royal Marine Light Infantry, 74·87.

FIRM, Lieut.-Com. R. Foster, after lying in Kirkwall Bay for nearly a fortnight, left for the South Isles of Orkney, it being stated that a notorious smuggler, well-known on the coast, had made his appearance at one of these islands. The Firm has, however, returned to Scapa Bay, without having made any capture.

FLY, Com. A. F. St. Clair, left Kobe for Nagasaki on July 10.

FORWARD, Lieut.-Com. E. Brickdale. In recognition of the services of the master and crew of the Portuguese schooner Christine, which some time since saved the lives of three officers of her Majesty's ship Forward, whose boat capsized with them, the Admiralty has forwarded a binocular to the master and a money award to each of the crew.—*Standard.*

FOXHOUND, Lieut.-Com. Nowell, arrived at Yokohama from Nagasaki on July 30, and sailed for Hakodate the day following.

HECLA, Capt. Singer, returned to Malta on the 6th inst. from Suda Bay, with the Hellespont in tow, which will shortly be paid out of commission, and be employed as a dockyard tug.

HELICON, Lieut.-Com. W. Morrison, anchored in the roads of Antivari on the 16th inst., but was at once boarded by one of the port officials, who requested the commander to take his departure. This request was complied with.

INCONSTANT, Capt. C. P. Fitzgerald, was to have been ready for sea by the 23rd inst., but the repairs on board have not yet been finished at Portsmouth, and it is understood that the ship will not sail for Vigo until towards the end of October. The work of fitting her with the electric light and a Nordenfelt equipment is satisfactorily proceeding, and the necessary alterations are being advanced to fit her for service as an admiral's ship. Rear-Admiral the Earl of Clanwilliam will not join her till October.

INVINCIBLE, Capt. the Hon. E. Fremantle, C.B., left Malta on the 11th inst. for a cruise to Sicily.

IRIS, Capt. E. H. Seymour, has been ordered from Palermo to Ragusa to act as additional despatch vessel, and her speed will thus prove of advantage. Her duty will be to conduct the mail service between Brindisi and the International Fleet, being assisted in this work by the Condor and Falcon.—*Hampshire Telegraph.*

KINGFISHER, Com. R. Thornton, has left Sheerness for her station in the Pacific.

LONDON, Capt. G. Brownrigg. The late crew of the London is now fairly homeward-bound, having sailed from Zanzibar on the 2nd inst. The Tyne, which is bringing them home, has orders to call at Mauritius for a few time-expired men.

MARLBOROUGH, which, says the *Hampshire Telegraph*, seems so perfect a ship as regards ventilation and sanitary appliances, is now getting ready to pass a comfortable winter, for directions have been given to a firm by the name of Jones to fit the ship with a heating apparatus. This addition to the comforts of the engineer students will cost something over £600, including the dockyard labour and material this fitting will necessitate.

MARTIN, Lieut.-Com. A. C. B. Bromley, was towed into Portsmouth Harbour on Saturday to take up her moorings. As usual in such cases one of her boats was lowered for the purpose of carrying the hawser on to the mooring buoy, when the Martin's bow struck the smaller craft, completely swamping it, and throwing the occupants into the water. Prompt assistance, however, was rendered, and the men were saved.

MINOTAUR, Captain Harry H. Rawson, flagship of Vice-Admiral Hood, C.B. A children's party was given on board on Monday afternoon. Invitations, to the number of about 300, were issued to young people ranging in age from four years to fifteen. The upper-deck had been covered in with canvas, which was completely hidden by flags of all nations, fantastically draped in various designs, while the main-deck had also been elaborately decorated. Sundry games, such as racing, jumping, &c., were freely indulged in, but the most important of the sports was a tug-of-war between 50 boys and 50 girls, the latter, singular to say, winning easily. A bran pie, in which dipping for prizes took place, and a tub containing water heavily charged with the electric current, with bright new pennies at the bottom, furnished no end of amusement ; but, above all, the dancing was the greatest attraction, and created much merriment among the matrons who accompanied the children, and who thoroughly enjoyed the sight of the officers dancing Sir Roger de Coverley with partners whose stature scarcely exceeded that represented by their sword-belts. The Commander-in-Chief (Admiral A. P. Ryder), the Hereditary Grand Duke and Duchess of Mecklenburg-Schwerin, and other personages of position honoured the party with their presence. The Minotaur is to be out of the dockyard hands by October 29. The Admiralty have intimated that she is to be prepared for sea without unnecessary delay, and this order has led to the temporary abandonment of sanitary improvements which were to have been made, and the four additional Nordenfelt guns which were to have been mounted in her have been returned into store. The experimental illumination of her wardroom and the flats with the electric light has been deferred until a more convenient occasion.

MOORHEN, Lieut.-Com. W. Annesley, was at Foochow Foo when the mail left, having returned to Pagoda anchorage from a cruise on July 8. She will very shortly be relieved by another vessel of the squadron. Lieut. James Henry Corfe, who has been appointed to the command (vice Carey, whose period of service has expired), became sub-lieut. Sept. 20, 1865, and served in the Terrible from June 13, 1866, until appointed, Jan. 14, 1867, to the Royal Alfred, flagship on the North-America and West Indies station of Vice-Admiral Sir G. Rodney Mundy ; and on April 3, 1868, was promoted to lieut. On June 9, 1869, he was appointed for temporary service to the Black Prince, Capt. A. C. Gordon, Coast-guard-ship at Greenock ; and on Nov. 13 following was appointed additional for disposal to the Zealous, Capt. Richard Dawkins, flagship in the Pacific of Rear-Admiral Arthur Farquhar. On Jan. 20, 1870, he was borne for passage in the Himalaya, for appointment to the Cameleon when recommissioned at Panama, and subsequently served in the Cameleon under Coms. K. H. A. Mainwaring and Andrew J. Kennedy ; also in the Pacific from May 17, 1871, until April, 1874. He next served in the Britannia, training-ship at Dartmouth, from March 2, 1875, until March, 1878, and was afterwards, from Oct. 1, 1879, borne on the books of the President, for study at the Royal Naval College.

MOSQUITO, Lieut. the Hon. Francis R. Sandilands, who has been appointed to the command of this gunboat, vice G. A. Grey, whose period of service has expired, served as acting sub-lieutenant in the Narcissus, Capt. J. E. Wilson, under the flag, on the south-east coast of America, of Rear-Admiral George Ramsay, C.B., from April 17, 1868, until Dec. 18 following, when he was transferred, as navigating sub-lieutenant, to the Scorpion, turret-ship, Capt. G. A. C. Brooker, at Portsmouth, and on June 9, 1869, was appointed to the Barrosa, Capt. Robert Gibson, on particular service, and subsequently served in the same ship, under Capt. Lewis Moore, in China ; and on April 23, 1872, was promoted to the rank of lieut. in the Avon, gun-vessel, and remained until Jan. 1873. He subsequently studied for some time at the Royal Naval College at Greenwich, and on Sept. 1, 1874, was appointed to the Audacious, Capt. Philip H. Colomb, fitting for the flag in China of Vice-

Admiral A. P. Ryder; and on March 14, 1875, the Albert Medal of the Second Class was conferred upon him, for an act of bravery in saving life at sea. He continued in the Audacious until paid off in Feb. 1879.

Nautilus, Lieut.-Com. A. Blennerhasset, arrived in Plymouth Sound on Saturday.

Northumberland, Capt. H. R. Wratislaw, in Keyham Yard, will be removed out of dry dock to-day.

Pegasus, Com. the Hon. Horatio N. S. Hood, arrived at Shanghai on July 23, and was to proceed to Hong Kong, *viâ* Amoy, as soon as possible after the arrival of the Albatross.

Philomel, Com. H. Berners, was at Seychelles by last accounts, and would return to Aden about Oct. 26.

Rambler, Com. the Hon. Algernon C. Littleton, will shortly leave Sheerness for the North America and West Indies station.

Rupert, Capt. E. J. Pollard, at Chatham, is being dismantled, and it is expected she will be ready to be paid off in about a week.

Seagull, Com. M. Byles, was at Aden on the 9th inst., and would proceed to sea the same day for a week or ten days in suppression of slave-trade.

Swiftsure was inspected yesterday by the Admiral-Superintendent and officers of Devonport Dockyard on being passed out of the Steam Reserve as ready for commission.

Tamar, Capt. T. H. Royse. A Reuter's telegram from Gibraltar, dated Sept. 23, reports:—"Tamar has arrived here, and will leave for Malta to-morrow."

Tyne, Com. J. E. Stokes. As soon as the Tyne returns to England, which it is expected will be about the end of October, she will be at once taken in hand to have defects made good and bilge keels fitted with all despatch, as she will be required for a voyage to Hong Kong.

Valorous, Capt. G. D. Morant, has passed out of Keyham Basin into the stream, after making good defects.

Victoria and Albert, Capt. Frank Thomson. Lieut. Robert H. Archer, who was on Monday last appointed to this ship, vice Com. John P. Pipon, served as midshipman of the Galatea, Capt. H.R.H. the Duke of Edinburgh, from April, 1867, until paid of in 1871, and of the Hercules with the Channel Squadron from June, 1871, until Oct. 15 following, when he was promoted to acting sub-lieutenant. He was lieutenant in the Agincourt with the Channel Squadron from August, 1872, until appointed to the Duke of Wellington for Arctic service, Feb. 8, 1875. He subsequently served in the Discovery, Capt. Henry F. Stephenson, with the Arctic expedition from April 15, 1875, until December, 1876, and afterwards in the Alexandra, Capt. R. O'B. Fitzroy, under the flag, in the Mediterranean, of Admiral Sir Geoffrey T. P. Hornby, from Jan. 2, 1877, until March, 1880. Com. Noel has, says the *Morning Post*, for some months been perfecting a model of his invention, which, it is believed, will be singularly effective in defending war-ships from torpedo attacks. The model is to be submitted to the committee appointed to consider the best means of stultifying the offensive use of torpedoes, and, subject to their approval, the dockyard officers will prepare an estimate of the approximate cost of fitting it to a man-of-war. The plan is at present kept secret.

Vulture, Com. J. E. Pringle. A Reuter's telegram from Malta, dated Sept. 20, reports that the Vulture has arrived there from China, *en route* for Devonport.

The *Standard* hears that in addition to the telegraphic orders received at Cyprus that no further public works shall be undertaken, and that those in hand are to be suspended, instructions have been given for her Majesty's ship Hellespont, which was specially detailed for service at the island, to be now permanently withdrawn. She is not to be replaced, it having been notified that it is not deemed necessary to station a man-of-war at Cyprus.

The Queen has been graciously pleased, on the recommendation of Sir William Muir, K.C.B., and Lady Superintendent Mrs. Deebles, to confer the Order of St. Katherine on Sister Elizabeth Wheldon, one of the nurses of the Royal Victoria Hospital, Netley. The order carries with it a pension of £50 per annum for a limited period, with an embroidered badge worn on the left arm. Sister Wheldon, in addition to long and good service at Netley, was one of the nurses chosen to accompany Mrs. Deebles to South Africa, for work in the military hospitals during the Zulu war.

James Butterworth Crossland, aged 35, master-at-arms at the Royal Naval Barracks, Sheerness, has been found drowned. He had been in the town, apparently sober. He was formerly much addicted to drinking, but afterwards he joined the Good Templars. During the last few days, however, he had broken his pledge.

The Imperial German war-vessel Prinz Adalbert, Capt. MacLean, last from Ferrol, which put into Plymouth Sound on Friday night to coal, has proceeded for Kiel. The son of the Crown Prince of Germany, who is on board, Prince Henry, ranks as a lieutenant. His Royal Highness has been with the Prinz Adalbert on her two years' cruise round the world. He has just turned 18 years of age, when, according to German law, he became of age, and at Ferrol he was for the first time entitled to land on leave without his governor. Admiral the Hon. Chas. Elliot, C.B., Commander-in-Chief, visited the Prinz Adalbert, and on leaving was saluted with 17 guns.—*Western Morning News.*

The Mediterranean Squadron was distributed as follows on September 12:—Alexandra, at Ragusa; Antelope, Constantinople; Bittern, Corfu; Cockatrice, Danube; Condor, Ragusa; Coquette, Brindisi; Cruiser, cruising; Cygnet, Salonica; Express, Gibraltar; Falcon, Brindisi; Fawn, Sea of Marmora; Hecla, Malta; Helicon, Ragusa; Hibernia, Malta; Iris, Ragusa; Invincible, Sicily; Monarch, Naples; Rapid, coast of Syria; Temeraire, Ragusa; Thunderer, Naples; Torch, Constantinople; Escort and Hellespont, Malta.

Prince Roland Bonaparte, who is to be married to Mdlle. Blanc early next month, was a pupil of the Royal Naval School, at New Cross, in 1873.

THE INTERNATIONAL DEMONSTRATIVE FLEET.

The following particulars of the proceedings of the Fleet are gathered from the telegrams of the correspondent of the *Standard*:—The postponement of the Demonstration is not owing to any orders received from home, but to the fear that it might provoke a massacre of the Christians in the neighbourhood of Dulcigno. Mr. Kirby Green wrote from Scutari begging for a few days' delay, in order that he might have time to remove his family, and Sir B. Seymour laid this letter before his colleagues on Monday, who declared that their information led them to believe that the appearance of the Fleets before Dulcigno might cause very dangerous excitement. Capt. Lord Walter Kerr accordingly despatched the Helicon with despatches for Mr. Green. The Admirals at length see the spot which they are ordered to make famous in history by this grand display. Astonishment must have seized their minds to a degree rarely experienced by man. On a narrow but lofty crag, protected on either side by precipices, stand a dozen houses, red-roofed, gaping with holes where once were windows. In one corner rises a minaret. Stretched from either abyss, above and below, are the old Venetian walls, a world too wide for the shrunken town. It stands amid a wilderness of hills, grey and bleak, picturesque truly, but bearing no trace of human inhabitant for miles and miles. Every man felt the humour of the jest as the ships steamed below this wretched, lonely settlement which the united Fleets of Europe are about to threaten. The Montenegrin army, six thousand strong, has left Cettinje, and encamped within a few hundred yards of the Turkish frontier, by Antivari. Capt. Lord Walter Kerr visited the camp on his way down to Scutari. With regard to the Naval Demonstration, the time is very rapidly drawing on when it will be impossible to remain on the dangerous coast of Dulcigno. In a fortnight the autumn storms will begin. What the instructions of the various Governments to their Admirals are is unknown, but the general opinion is that if Admiral Sir B. Seymour uses force, the Russian vessels alone will support him. Lord Walter Kerr can scarcely bring back before Thursday an answer to the vigorous despatch he carried to the Pasha at Scutari. It is more likely that he will not come until Saturday or Sunday.

The Iris arrived at Ragusa on Monday from Brindisi with the mails, and left on Tuesday for Malta, where she will be docked. The Falcon has sailed for Brindisi with the mails—indeed the service is now carried regularly and efficiently, letters being received from London in seventy-two hours. The fine weather is breaking rapidly. The force of the Bora is amazing, and every one sincerely hopes to be away before that terrible wind begins in earnest. On Monday, Sir Beauchamp Seymour entertained the Italian Admiral Fincatti and staff, together with all the captains and commanders of the various ships of the Fleet. Mr. W. H. Smith was also his guest upon the occasion. The Russian Admiral entertained the French Admiral at dinner, and his flagship, the Svetland, was brilliantly illuminated with the electric light. The ward-room officers of the Alexandra gave a dinner to the officers of the Victoria (German) and the Prinz Eugen and Zriney (Austrian).

On Tuesday the Commander-in-Chief and his staff were entertained at dinner by the French Admiral Lafaut, on board the Suffren. The officers of the Italian ship Palestro gave a dinner to the officers of the English squadron, at which the usual complimentary toasts were exchanged; and on Wednesday afternoon an entertainment was given on board the German corvette Victoria, at which all nationalities were represented.

On Tuesday the Russian Admiral inspected the torpedo boat Batoum, previous to her departure for the Bosphorus and Nicholaief. She is manned by three officers and ten men. She carries six Whitehead torpedoes, and can steam at the rate of twenty knots an hour.

Among the officers of all nationalities, the hope is strong that in some way a bombardment of Dulcigno may be avoided, for there is a general feeling, after seeing the little village, that it would be a most unworthy and unchivalrous task for a great ironclad fleet to open fire upon the inhabitants, whose only crime is that they refuse to hand themselves over to an alien and hated race. On Wednesday afternoon there was some surprise throughout the Fleet at the Admirals being all suddenly summoned to a Council of War. The captain of the German Victoria attended, as representing his nation. The deliberations lasted for an hour and a half. Nothing whatever is known as to the discussion.

At two o'clock on Thursday morning the Commander-in-Chief, accompanied by his Flag-Lieutenant and Captain Sale, Special Commissioner, left in the Helicon for Cattaro, where they would arrive about 7 a.m. After his interview with the Pasha of Scutari, the Admiral will proceed to Cettinje, where he will hold a consultation with the Prince of Montenegro, who sends horses to Cattaro to convey the party to his capital. On the Admiral's return to the Fleet, which cannot take place before to-day, it is anticipated that action of some kind or other on the part of the Fleet will at once be undertaken. In the absence of the Admiral, Capt. the Hon. Walter Carpenter has hoisted the senior officers' pennant in the Téméraire, and has assumed command of the British portion of the Fleet.

Mr. W. H. Smith left on Thursday morning in his yacht Pandora for Cattaro.

The Condor arrived from Brindisi on Wednesday afternoon, and the Coquette left on Thursday afternoon. The officers of the British squadron were invited on Wednesday night to dinner by the officers of the Italian ironclad Roma, and also by the officers of the Russian corvette Temstchouk. They divided their attendance between these two vessels. The greatest cordiality prevailed on all sides; indeed, it may be said that a most excellent feeling exists between the officers and men of all nationalities here.

The *Times'* correspondent says:—"As regards the landing force the vessels represent, should it be deemed necessary to disembark, it may be roughly estimated at about 4,500 men, with a very large proportion of field pieces and mitrailleuses, probably not less than 15 or 16. This force, however, representing more than two-thirds of all the men present, would considerably weaken the Fleet itself. The numbers of the men present are approximately as follows:—English, 1,536 men; French, 1,200; Italian, 1,180: Russian, 600; Austrian, 1,210; German, 300; making a total of 6,026 men and 16 land service guns. Of course, the idea of disembarking a combined force can never have seriously presented itself to the Powers, for it is needless to say that such an arrangement could not possibly be made to work well, quite apart from the serious danger of bringing Germans and French, Italians and Austrians, French and Italians, Austrians and Russians, and last, English and Russians together."

DISCOVERY OF RELICS OF THE EREBUS AND TERROR.

A Reuter's telegram from New York states that the *New York Herald* of Thursday evening publishes the following telegram from New Bedford, Massachusetts:—"The Franklin Search Expedition, under the command of Lieutenant Schwatka, have returned here. They have discovered and brought southward relics of the two British ships, Terror and Erebus, which sailed from London under Sir John Franklin in May, 1845. The expedition successfully withstood the greater amount of cold ever encountered by white men. During sixteen days of a sledge journey extending over a period of eleven months, the average temperature was one hundred degrees below freezing-point. In the summer and autumn of 1879 the expedition made a complete search of King William's Land and the adjoining mainland, travelling by the route pursued by the crews of the Erebus and Terror in retreating towards Back's River. They burned the bones of all remaining above ground, and erected monuments in memory of the dead. Their researches have established the fact that the records of the Franklin Expedition are beyond recovery. They have also learned that one of Sir John Franklin's ships drifted down the Victoria Straits and was unwittingly scuttled by the Esquimaux, who found it off Grant Point in 1849. The Expedition have brought away the remains of Irving, the third officer of the Terror. From each spot where graves were found a few tokens were selected, which may serve to identify those who perished there. They also secured a board which may be of use in identifying the ship which completed the North-west Passage."

NAVAL AND MARINE COURTS-MARTIAL.

By a return just issued, it appears that the number of Naval courts-martial held on petty officers, seamen, Marines afloat, and boys in 1878 was 237—viz., 102 at home and 135 abroad. These 237 courts-martial tried 235 prisoners, as two seamen were tried each twice in the year, and 232 sentences were awarded and inflicted. The offences for which the prisoners were tried were:—Offences against discipline—mutiny, 4; desertion, 49; striking and attempting to strike superior officers, 75; threatening language to superior officers, 19; wilful disobedience, 68; behaving with contempt to superior officers, 38; quarrelling and fighting, 1; improperly leaving place of duty, 33; absence without leave, 4; drunkenness, 21; using profane language, 1; acts to the prejudice of good order and naval discipline, 56; offences punishable by ordinary law—theft and embezzlement, 45; disgraceful conduct, 12—making a total of 426 offences. The sentences inflicted were:—Penal servitude, 15; imprisonment with and without hard labour, 152; imprisonment and dismissal, 55; confinement in cells on board ship, 2; corporal punishment with imprisonment, 2; dismissal, 3; disrating, forfeiture of pay, prize-money, &c., 2. Including the awards of courts-martial, 23,523 summary punishments were inflicted during the year on petty officers, seamen, Marines, and boys at home, and 40,045 abroad, making a total of 63,568 for the year. This total includes 479 cases of disrating for various offences, 312 cases of birching or caning boys, and minor punishments of every description. The same return also shows the courts-martial held on Marines serving at head-quarters on shore, together with the punishments inflicted, during the same period. Number of courts-martial:—Royal Marine Artillery, 170; Royal Marine Light Infantry, Chatham Division, 85; Portsmouth Division, 102; Plymouth Division, 68; Depôt, Deal, 199; total, 624. The offences for which the prisoners were arraigned were:—Desertion, 155; violence to superiors and insubordination, 67; disobedience, 4; quitting or sleeping on post, 6; drunk on duty under arms, 22; drunkenness, 82; disgraceful conduct, 31; absence without leave, 182; making away with necessaries, 380; miscellaneous. 190; total offences, 1,119, which were distributed as follows:—Royal Marine Artillery, 304; Royal Marine Light Infantry, Chatham Division, 139; Portsmouth Division, 246; Plymouth Division, 122; Depôt, Deal, 308. These 624 courts-martial awarded sentences in 618 cases, which sentences were inflicted, and included 1 of penal servitude, 2 of reductions to the ranks, 2 reductions with imprisonment, 1 of stoppage without other punishment, 31 of solitary confinement and imprisonment with or without hard labour, and 581 of imprisonment with or without hard labour. During the same period 448 Marines were fined for drunkenness at head-quarters, and the total number of fines so inflicted amounted to 720. The total number of minor punishments awarded by commanding officers at head-quarters (including the fines already mentioned) were:—Royal Marine Artillery, 920; Royal Marine Light Infantry, Chatham Division, 528; Portsmouth Division, 1,121; Plymouth Division, 975; Depôt, Deal, 1,420; total, 4,964.

Intelligence received at Lloyd's states that the Mayune, Annamite war steamer, which left Haiphong July 18 for Tousin, with Government rice, had been captured just outside by Chinese pirates. The French gunboat Surprise has gone to search for her.

SEAMANSHIP IN THE ROYAL NAVY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—It is not long since letters appeared in the public journals announcing that seamanship was scarcely necessary in the Royal Navy,—our men-of-war were to be worked and fought by engineers and artillerymen. If such letters indicate it correctly, public opinion has again changed, judging from the writings of to-day. During the last two years two small frigates have been lost. When one considers that there are some 200 vessels on the move every year in the Royal Navy, in all parts of the world, not including the harbour or stationary ships in commission, such loss is surely small, even supposing one ship a year was the average, which is not the case, many years passing without any casualty at all. However, two years running, a man-of-war has been lost; both were sailing ships, and both were employed in training young ordinary seamen. We are informed there must be some serious reason to account for this, and the real cause is soon ascertained to be "the decline of seamanship" in the Royal Navy, together with the incapability of naval officers to handle ships under sail. Every ship commissioned as a sailing training-ship is lost; so there can be no doubt about it, and so on. Now, how were these two ships lost, which sad event has caused such grave censure on the Royal Navy? Case one, the Eurydice, homeward-bound from the West Indies, sailing along the south shore of the Isle of Wight, making for Spithead, under conditions (as regards the ship) which the most experienced officers—even those of the "old school"—admit would have been the same had they been in command, is suddenly struck by an unprecedentedly heavy squall, in the nature of a storm in fury (the approach of which could not have been seen in time, by reason of the high land), is forced over on her beam-ends, and founders. The court ordered to inquire into the matter acquitted the gallant captain—then in his watery grave, he having gone down with his ship—of all blame, the mishap being clearly a dispensation of Providence. Case two, the Atalanta leaves Bermuda on a certain day, also homeward-bound—indeed, on the same voyage so nearly accomplished by her unfortunate predecessor—and is never heard of again. She may have been burnt, sunk after collision with an iceberg, another vessel, or water-logged derelict; sprung such a leak from excessive straining in a heavy gale as to cause her to founder, &c.; endless are the causes of loss at sea. However, nothing has been, and probably never will be, proved, because nothing is known. Statistics prove that the per-centage of loss in the Royal Navy during the last ten or twenty years is far less than at any time during the present century. It may be said that the introduction of steam, scientific discoveries, more accurate surveys, better knowledge of winds and currents, &c., all tend to cause the voyages, cruises, and ordinary duties of our men-of-war to be easier than in old times, and that seamanship in the Royal Navy is nearly identical with navigation. Where seamanship ends and navigation commences, is rather a difficult point to settle; but if seamanship means simply the method of managing a sailing-vessel (*i.e.*, a ship fitted to sail only), then, indeed, its decline in the Royal Navy commenced some eighteen years ago, when the last sailing-ship was paid off. If, on the contrary, it means the method of conducting a vessel at sea under any conditions and under all circumstances (which I hold to be the true meaning of the word "seamanship"), then, I venture to assert, our naval officers can at least hold their own with our Mercantile Marine, or navies of foreign Powers. Surely it is sound to train officers and men, so that they shall be able to carry out the duties for which they are intended; would it be wise, therefore, to instruct them to become accustomed to handle a sailing-ship only, when they are called upon to serve in—and some, in time, to command—ships of a constantly varying type, but not one of which can be compared to, or treated like, a sailing-ship proper,—the mastless turret-ship, the ocean cruising ironclad, the steam frigate, corvette, sloop, and gun-vessel, all varying in form, tonnage, length, and internal arrangement, many of them jury-rigged only and out of trim, by reason of great weights, for sailing proper,—and that trim constantly altering, as coal, shot, and shell may be expended,—yet all (except unrigged turret-ships) having at times to keep the sea under sail alone? Most lieutenants, commanders, ay! and some captains, too, have never served two commissions in the same type of vessel,—they are called upon to do duty on board of, or command, any ship in the Navy, at an hour's notice. For instance, an officer may be paid off from a gun-vessel, which has passed three years in the East Indies, and be appointed after a few weeks to the Thunderer, turret-ship. In a few months he may receive orders to join the Crocodile, Indian troopship, and at the expiration of six months be sent to the Alexandra, masted ironclad. This is quite a possible case, so that in the space of a year he serves in four different types or classes of vessel, and is expected to be competent to conduct them to any part of the world, know the drills for the various armaments, and be conversant in their structure and internal arrangements, &c. The Naval officer of to-day must pass severe examinations in the theory and practice of navigation and nautical astronomy, mathematics, scientific knowledge, steam, gunnery, and electricity; tactics in squadrons and fleets, so as to know how best to develope their power of attack or defence, with gun, ram, and torpedo. To be prepared to land and fight on shore with a company, battalion, or field battery, and to have some knowledge of field fortification; time for the pursuit of which knowledge must be found amid the various duties and necessary routine of a man-of-war, in addition to the constant attention to the working of his ship, &c., which is absolutely necessary to become a good officer. The danger of navigation, too, is surely not lessened by the introduction of steam. Before that date the number of ships was very much out of proportion to the present day; the clause of collision (the cause of such terrible loss of life and property) was, therefore, proportionately smaller. Under sail in old days, ships which did approach dangerously near to each other could be stopped by being thrown up into the wind, tacking, &c., far easier than the heavy jury-rigged war-vessel or screw steamer can arrest her way. Crowds of large steamships, in addition to sailing vessels, now dart about at great speed, requiring most constant vigilance, nerve, and quickness in deciding the proper course to take, on the part of the officer on duty, on each occasion of meeting vessels at sea. I believe there are many who will agree with me in thinking that seamanship is not on the decline in the Royal Navy; on the contrary, that as scientific discoveries and wonderful inventions have made it possible to launch vessels of entirely different types to those of the old school, so have our Naval officers and Bluejackets kept pace with the times, enabling them to manage and command the sea-going monsters, each one a more complicated machine (though, perhaps, more complete) than the last, placed in their charge. In conclusion, I would suggest that instead of sending young ordinary seamen away in sailing training-ships, thereby showing them a quite different view of sea-life to what they are ever likely to experience again, it would be better to increase the complements of so many of our weakly-manned ships—whose heavy boats may be seen struggling along, "manned and armed," with boys at the oars, on account of the scarcity of men—where they will at once begin to perform the duties for which they are enrolled, and learn to become not only "seamen," but "men-of-war's-men."—I am, &c.,

M.

VOLUNTEER OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The one-and-twenty years which have elapsed since the establishment of the Volunteer body have wrought many changes in its constitution and its position among the armed forces of England. The enthusiasm of the early days has passed away, and been replaced by a calm and steady determination to comply with the demands of duty, which is a characteristic of Englishmen the world through. The Volunteer of '59 was worthy of much praise, because he gave time, money, and energy to an officially ungrateful country, for whose sake he sacrificed his ease, curtailed his leisure hours, and emptied his pockets to purchase arms, accoutrements, and uniform. On the other hand, like most enthusiasts, he was often ridiculous through his ill-regulated zeal, his lax ideas of discipline, his ignorance of the rudiments of soldiering, and his "bizarre" and showy uniform,—apparently, in many instances, chosen rather to satisfy the æsthetic tastes of his lady friends than the exigencies of service. His successor of to-day is a widely different person. He recognises the fact that the "Regular" soldier must be his example, and that only in proportion as he approaches this ideal can he expect to be esteemed an important item in the defensive power of his country. To be compared in steadiness, discipline, and appearance to the "Line," is the highest compliment that can be paid him. To be called unsoldierly is the most stinging reproach that he can suffer. That his efforts have been successful in proportion to his opportunities, is freely admitted by the highest military authorities, together with the fact that the *rapprochement* of the elder and younger Services, has done as much to popularise the Army, and to raise the standard and social status of its rank and file, as to make a soldier of the Volunteer. Now, the military value of any armed body is in proportion to that of its officers, and the progress of the Volunteers towards a high standard of excellence has been mainly the result of the intelligence and patient industry of the commissioned ranks. Few officers of the Regular Service, and still fewer of the British public as a body, realise to what an extent this is true, and how utterly, not only the efficiency, but the very existence of a Volunteer battalion depends on those who hold commissions in it. I have seen in the same corps companies spring from almost nothingness into strong and vigorous life in two or three years, and other companies lose strength, and dwindle almost to shadows in as short a time. Two companies under the same staff are often as different in *morale* and efficiency as though they belonged to different Services. The average attendance of some companies on parade is sometimes double and treble that of others in the same regiment. The difference proceeds entirely from the company commanders. A captain has a good or bad company in proportion to his persistent hard work and his own soldierly qualities. His men will support him by constant attendance at drill, if his influence draws them, and his example encourages them. If men find that their officer does not meet them habitually on parade, or does not show such proficiency as they can respect, they lose their interest in their work, satisfy themselves with the bare fulfilment of the Government requirements (wholly inadequate for efficiency), and fall away, as their three or four years' term of service expires. Any one with a knowledge of Volunteering will bear me out in these remarks, the truth of which daily and yearly experience proves. If, then, so much of the efficiency of the force depends upon its officers, the question naturally arises, "What are the inducements placed before intelligent and well-educated young Englishmen to ally themselves with the Volunteer Service, and accept commissions in its ranks?" I answer,—None, except patriotism and the abstract love of soldiering, which, luckily for our country, is engrained in nearly every English heart. Social rank, hope of distinction, and the certainty of, at any rate, a modest competence, may, I think, be stated as the chief prudential reasons for a youth's choosing the Army as a profession. But none of these considerations can actuate a Volunteer. In the first place, in spite of the ambiguous recognition accorded to him in the Warrant of July 25, 1879; in spite of the Queen's signature to his commission and the military salute which his uniform commands, no Volunteer officer can claim his rank without a suspicion of bad-taste. It is a strange anomaly that in his case the precedence seems to be given to the uniform, apart from the man. A colonel of Volunteers is entitled to field officer's compliments and rank, as long as he has on his regimentals. Out of them, he is plain "Mr." So-and-so. He may be "Colonel" as often as he chooses to order a parade, or to go to a military ball. Yet *per se* he is not a colonel, and if he calls himself one, or even allows himself to be so styled without protest that he is "only a Volunteer," he is considered to be guilty of presumption and bad-breeding. The Volunteer officer has, then, only a sort of spurious, half-recognised position, though greeted as "Our right trusty and well beloved," and accorded a certain rank in an integral portion of "Our Forces." Everybody else in the enjoyment of any honour may assert it. The "J.P." may let all the world know that her Majesty has trusted *him* with her commission, the elected Fellow of a scientific society may notify his distinction by "F.L.S.," &c., after his name, but the card of "Capt. So-and-So, 100th M.R.V.," is looked upon as a self-asserting and bumptious emanation of snobbishness. Secondly, the Volunteer officer's hope of distinction is bounded by the prospect of being permitted to wear his uniform and to retain his "rank," on retirement after sixteen years' service. Taken in conjunction with the foregoing remarks, this privilege is too shadowy to be very highly valued by the few whose patience and endurance enable them to claim it. Thirdly, comes the question of emolument. Now, the essence of Volunteering consists in the agreement, on the part of the members of the force, to give a certain amount of time and energy to the country's service, in return for the opportunity of making themselves useful and efficient. The idea, therefore, of pecuniary reward is far from the thoughts or wishes of Volunteers. It is, however, the lot of the Volunteer officer to pay heavily for the privilege of performing his thankless service. There is an average outlay of £30 for uniform on joining. Then there are in nearly all regiments yearly subscriptions, varying from four, five, and six guineas on the part of subalterns, to as much as £15 or £20 in the higher ranks. Besides this, there are calls for prizes—never less than £3 for a subaltern, £5 for a captain, and £10 and £15 for field-officers—band funds, &c. Moreover, the efficiency of a company can only be effected and kept up by constantly sending circulars or whips to its dilatory and negligent members. The expense of printing and postage comes out of the officer's pocket; this item may be put down at £10 per annum, at the lowest estimate. Then, to promote good-feeling and comradeship amongst the officers, many of the best organised regiments have a periodical mess. In fact, from year's end to year's end there is nothing but a succession of calls upon the officer's resources. This state of things constitutes the greatest grievance of the Volunteer officer. By it hundreds of the men most fitted for commissions are debarred from entering the Service, and of those who do join, very many refuse promotion and leave after a short time, because the only prospect is, year after year, increased expenditure. The standard of efficiency fixed by Government is now high, and the preparation for the compulsory examinations entails several months of constant application to the minutiæ of drill. A young officer engaged in business or a profession must make up his mind to forswear the cricket-field and the river for at least a season or two, in order to fit himself for the duties which he has undertaken. He does not grudge this, but he does kick at the idea that his Volunteering means, not only little honour and much hard work, but ever-growing drains upon his pocket. Hence the fact that though the increase of numbers from 1879 to 1880 was 12,000, only 30 were officers. In London alone there are some 60 vacant commissions, and there is an ever-increasing difficulty on the part of commanding officers in suitably filling them up. This state of things cannot continue, and the force will some day collapse, unless a change for the better is made in the position of the Volunteer officer. He has waited long and patiently the bare justice which is his due, and the representations which I ask you to make public through the medium of your columns have been often made before. If the country cares to preserve the system, it must be prepared to accord more generous treatment to those by whose work it has been so far perfected, and but for whose constant and unremitting efforts it would not now endure a single year. Plans and suggestions I leave to wiser heads than mine. I simply seek to place before your readers the condition of Volunteer officers under the present system, feeling sure that the facts alone are sufficient, if understood, to ensure a speedy remedy.—I am, &c.,

R. V.

Two Coastguard men were recently crossing Cork Harbour on duty, when their boat shipped some seas in a squall and sank. Both were good swimmers, and struck out for the shore, 300 yards distant. Cransten, who was behind, noticed that Osborne lost his strength, and was sinking. He dived for him, and brought him to the surface, then, turning on his back, tried to help him ashore, but soon finding the other to be dead, and blood oozing from his nose, mouth, and ears, he left him and struck for the shore, where half-an-hour later he was washed up unconscious. Osborne's body was found some hours later. The doctor attributes his death to over-exertion, which caused a blood-vessel to break. He was with the Duke of Edinburgh in the Galatea, and organised many a Good Templars' Lodge in his different ships. His character was excellent in every way. His wife and child and crippled brother depending on him are left penniless, and far from home. Any subscriptions in their aid will be thankfully received by Com. Mallet, R.N., East Ferry Station, Ballinacurra, Ireland. George Osborne was a native of Bath. His young widow wishes to reach her home in Wiltshire.

A trial was made on Wednesday at Stokes Bay of a first class torpedo-boat, which differs in many respects from any yet introduced into the Service. In the new boat seaworthiness combined with speed has been sought to be obtained. The engines and hull are stronger, and the dimensions are, length 93ft., beam 12ft. 6in., while in free-board it exceeds by about 1ft. the first-class torpedo-boats adopted in the Service. The draught is 3ft. 6in. forward and 5ft. 6in. aft. The wind was from 4 to 5, and the condition of the sea was of a character to test the qualities of the boat. Six runs were made, the mean giving a speed of 16½ knots, the engines making only a moderate number of revolutions.

COMPULSORY RETIREMENT OF CAPTAINS.

"Superannuated" addresses to us the following:—

"1. All officers in her Majesty's Service are agreed that the public weal is the first consideration, and therefore admit, since the country has thought fit to abolish Purchase, some scheme of compulsory joined to voluntary retirement is necessary to cause a proper flow of promotion through all ranks.

2. Whether, however, this has been done with due consideration for the interests of those affected is, in my opinion, questionable.

3. If I call the two classes of captains now serving 'Purchase captains' and 'non-Purchase captains,' I mean by the first those men who obtained their companies before the abolition of Purchase in 1871; and by the second, those who have obtained them since.

4. The main effect of the present Regulations are these,—'Purchase captains' are ineligible for promotion after 25 years' service, counting from the twentieth year of their age, but they cannot be compulsorily retired. 'Non-Purchase captains' are ineligible for promotion after 20 years' service, counting also from their twentieth year, and they will be compulsorily retired then, or as soon as they shall have completed seven years in the rank of captain. Though 'non-Purchase captains' are allowed to remain on after 20 years' service, in order to complete seven years in the rank of captain, they will not be eligible for promotion regimentally after the age of 40. The chance of extra-regimental promotion is very small, as the Commander-in-Chief has only at his disposal, under present Regulations, two unattached majorities per annum, and even these are dependent on the absorption of the half-pay majorities granted the preceding year.

5. Practically, therefore, 'Purchase captains' are ineligible for promotion after the age of 45, and 'non-Purchase captains' after the age of 40.

6. But among the 'non-Purchase captains' are many men who have purchased their ensigncies and lieutenancies at a cost of £700 or £800.

7. No account whatever has been taken of these sums expended by them, and they are compulsorily retired as before described, without compensation for this expenditure, and with the same pensions as those men will receive who have joined the Service since the abolition of Purchase.

8. It has been said that the men who purchased their 'ensigncies' and 'lieutenancies' have enjoyed the advantages for which they paid, namely, entry into the Service and a more speedy promotion. But the real fact is that the only party who benefitted by the purchase of the ensigncy was the State; and it was quite an exception for a man not to purchase his lieutenancy, although he might not be able to purchase his company.

9. There is no doubt that most captains, after 25 years' service, and a certain proportion after 20 years' service, are unfit for the subordinate duties of the rank, and should, therefore, be retired. On the other hand, there are many men capable of good work, and in the prime of life, who must be turned adrift under the present Regulation.

10. Men are to be retired in good health, but at an age when their habits are formed and when they are too old to take up any other profession, and are to be given pensions on which they cannot live; just at the age when the civil appointments, for which they usually seek, such as chief constableships and governorships of gaols, are closed to them by an age-limit.

11. It will be observed, too, that there is no exception to the rule. The men who have been through the Staff College, and whose military education has cost the country a considerable sum of money, will have to go. I do not mean to assert that the Staff College man is so very valuable an article that he cannot be done without, but it does seem an absurdity for the country to go to a great expense in training him and then to turn him adrift. If ever the country is engaged in a large European war, it will want many more trained staff officers than we can supply now. The superiority of a good trained man over a good untrained man is undeniable. The opponents of the Staff College talk as if all the men who went to the Staff College were bad, and all who remained with their regiments were good!

12. Observe the comparative effect of compulsory retirement on a Line captain of 20 years' service and on a Guards captain and lieutenant-colonel of the same service. Supposing they do not accept the pension, but go on half-pay, with a view to obtaining staff employment, the Linesman gets a captain's staff appointment, and, except by brevet on active service, has no chance of promotion. The captain and lieutenant-colonel gets a field-officer's staff appointment, and after holding it for five years gets his colonelcy as a matter of course.

13. Supposing a regiment, in which there are 'Purchase captains' of over 25 years' service or 'non-Purchase captains' of over 20 years' service remaining on, but ineligible for promotion,—supposing, I say, that this regiment is sent on active service, and that a lieutenant-colonel or major, or all of them, are killed, the service captains actually on service will be passed over, and the promotions will be given to the juniors! On the other hand, supposing the lieutenant-colonel and majors are only wounded or sick, the senior captain would be in temporary command; but if they died, a junior officer would be promoted over his head after he had held temporary command!

14. The compulsory-retirement rules act most unfairly on the steadiest and best regiments. The steadier and better a regiment is, the slower the promotion in it, consequently the officers in such regiments will be absolutely punished for their virtues.

15. It will said that liberal voluntary retirements have been provided to aid the flow of promotion. But how many men will exchange the pay, small though it be, with all its contingent advantages of quarters, allowances, &c., for pensions under £200 a year or small gratuities? Formerly men retired from the Service to save the money they had invested, and so caused a flow of promotion; but now men will hang on as long as they can, to increase their pensions on retirement.

16. The effect of the present rules can only be judged by examples, and I will examine the 5th Fusiliers and see how the retirement acts on it. Major-Gen. Roberts, late lieut.-col. of the 1st Batn. 5th Fusiliers, held the command of his battalion from March, 1866, when he exchanged into the regiment with Lieut.-Col. Master, who obtained the command in 1858, until May, 1880; so that for 22 years there had been no promotion in the lieutenant-colonelcy of the 1st Batn.! Col. Roberts was not subject to the five years' rule of retirement; consequently, since 1871, when Purchase was abolished, he has blocked the way of the senior major. Major and Brevet Lieut.-Col. N. Macdonald was compulsorily retired on the completion of his seven years' tenure. Major and Brevet Lieut.-Col. Rowlands has succeeded to the command of the 1st Batn. Lieut.-Col. Bigge succeeded to the command of the 2nd Batn. 5th in 1877, and will have to vacate it in 1882. Thus there will be vacancies for lieutenant-colonels in 1882 and 1885, and every five years after that. Major and Brevet Lieut.-Col. Harkness will become regimental lieut.-col. in 1882. Major and Brevet Lieut.-Col. Pocklington will have to retire in 1884, after seven years' tenure. Major and Brevet Lieut.-Col. Fitzroy may expect to succeed to regimental lieutenant-colonel in 1885. The chances of death apart, the vacancies in the higher ranks will be as follows:—Lieutenant-colonel in 1882, 1885, 1887; major in 1882, vice major, promoted; do. 1884, vice major, retired; do. 1885, vice major, promoted; do. 1887, vice major, promoted; do. 1887, vice major, retired. Having the new "Birthday Book" before us, we can ascertain the dates after which the captains are ineligible for promotion. They are as follows:—

PURCHASE CAPTAINS.

Capt. Creagh	Nov. 20, 1881	Capt. Thistlethwayte	Mar. 16, 1883
,, Newbolt	June 10, 1881	,, Robinson	Mar. 22, 1882
,, Taylor	Dec. 28, 1879	,, Bradshaw	Mar. 30, 1884

NON-PURCHASE CAPTAINS.

Not only ineligible for promotion, but will be compulsorily retired after seven years' tenure.

*Capt. Forsyth	April 2, 1880	Capt. Broad	Aug. 1, 1883
* ,, Williams	May 12, 1880	,, Hackett	Jan. 4, 1886
* ,, Ormond	Sep. 24, 1880	,, Way	Nov. 24, 1885
,, Beamish	Mar. 23, 1882	,, Hobbs	Mar. 22, 1883
† ,, Græme	Dec. 22, 1882	,, Hargreave	Feb. 13, 1885
,, Wilmot	May 16, 1881	,, Cherry	Feb. 15, 1885
,, Vincent	Aug. 15, 1882	,, Dyke	Jan. 21, 1887
,, Darley	Sept. 3, 1881	,, Trafford	Oct. 14, 1885
,, Carleton	Sept. 20, 1885	,, Kilgour	Jan. 27, 1887

As Capt. Bradshaw will be 45 on March 30, 1884, and the vacancy in the majority does not occur until October of that year, he will probably miss it, and the step will fall to Capt. Carleton. The step in Oct. 1885 will probably fall to Capt. Hackett, as Capt. Broad will be over age in March.

17. Thus it will be seen, from the calculation in the preceding paragraph, that of 20 and odd captains now serving, only three can look forward with anything like a fair chance to promotion. What sort of service can the public expect from the remainder, who see compulsory retirement, nearly as certain as death, staring them in the face?

18. Now, I would suggest (*a*), a larger number of half-pay majorities to be placed at the disposal of the Commander-in-Chief, on the understanding that unless he is employed, a man does not qualify for a higher pension than he would have obtained as a captain. With this proviso, a half-pay majority at 9s. 6d. a day would be a cheaper thing to the country than a pension of £200 a year. (*b.*) The extension of the time of 25 years to all officers who entered the Service before the abolition of Purchase, but the higher pension given to 25 years' men now should only be given to those officers who obtained their companies before that date. (*c.*) Any man allowed to stay on to complete seven years in the rank of captain, to be eligible for promotion regimentally during the time he is allowed to remain on. (*d.*) The terms of the Warrant as to limit of age to be no bar to regimental promotion in the field. (*e.*) Men who have passed the Staff College, and have been favourably reported on whilst holding Staff appointments; men who have held creditably appointments on the General Staff, even if they have not got Staff College certificates; those who have been favourably reported on, and specially recommended,—such men, as long as reported physically fit to be exempt from compulsory retirement, and eligible either for regimental promotion or unattached promotion, under *a*.

19. Suggestions *b* and *c* would effect the officers of this regiment as follows. It would extend their eligibility for promotion under *b*:—

Capt. Forsyth	1880—1885	Capt. Broad	1885—1890
,, Williams	1880—1885	,, Hackett	1886—1891
,, Ormond	1881—1886	,, Way	1886—1891
,, Beamish	1881—1886	,, Hobbs	1886—1891
,, Græme	1882—1887	,, Hargreave	1886—1891
,, Wilmot	1881—1886	,, Cherry	1887—1892
,, Vincent	1883—1888	,, Dyke	1887—1892
,, Darley	1884—1889	,, Trafford	1887—1892
,, Carleton	1885—1890		

Under *c*:—

Capt. Græme	1882—1883	Capt. Vincent	Jan. 1883-June 1883
,, Wilmot	1881—1883	,, Darley	1883—1884

20. In conclusion, I cannot forbear to remark on what appears a hardship. I am told that officers who have served their country for over twenty years, and have been compulsorily retired on a small pension (for anything between £200 and £400 a year is *not* a magnificent income), will, if they obtain employment under the Crown, lose part of their pensions while so employed. I can understand a pensioned Lord Chancellor losing his pension, if he becomes Lord Chancellor again, and I can understand a man pensioned on the abolition of his office, or a man pensioned on the ground of ill-health on the supposition that he will never be fit for work again, losing their pensions on again obtaining employment from the Crown; but I entirely fail to see the justice of depriving of part of their pensions men who have earned them by the best years of their life, spent, perhaps, in all sorts of bad climates, and who have then been compulsorily retired. I can hardly believe that it is true!"

---

* Capts. Forsyth, Williams, and Ormond will be retired on Jan. 1, 1881, when the limit of 20 years comes into force.

† Capts. Græme, Wilmot, Vincent, Darley, and Trafford will not be liable to compulsory retirement until the following dates, when they will have completed seven years in the rank:—Capts. Græme, April 29, 1883; Wilmot, June 14, 1883; Vincent, June 24, 1883; Darley, Oct. 31, 1883; and Trafford, Feb. 20, 1887.

MILITARY HISTORY AND COMPETITIVE EXAMINATIONS.

"Historicus" writes:—"Among the July examination papers set by the Civil Service Commissioners for entrance into Woolwich and Sandhurst, there is one paper to which I trust you will not consider it impertinent to call attention. I refer to that set in Napier's *Military History*. Now it seems to me open to grave doubt whether a technical work of the kind is suited to students who have as yet no technical military knowledge. The object of the entrance competitive examination, I presume, is to select from boys educated in the recognised school curriculum those who have made the best use of their time, and who show promise of future ability. Is it, then, wise to introduce a severely technical work, and for which in the vast majority of cases, the students can have had no previous training, into an examination list with which it has no connection, and whose completeness and symmetry it therefore mars? Would it not be better to reserve the study of it to a time when the students should have mastered the rudiments of military science? However, as it has been introduced, by all means let the examination be a reality, and not a farce. Now the period selected for the late examination comprised, roughly speaking, Sir J. Norris's campaign, Napoleon's reconquest of Spain (Book iv.), the siege of Zaragossa, &c., and the operations in the east of Spain, (Book v.). Any one who has taken the trouble to read these two books with attention knows well the intricate details and pregnant criticisms with which they are filled. But it seems to me that such minutiæ form the very pith of a history which candidly professes that it is written for the professional student. In the late examination (July, 1880), these questions were set in the subject. The first may be summarised thus:—'Reproduce the table of contents prefixed to Napier's *History* (Books iv.-v.).' The second requested the student to give the character of Sir J. Moore 'in Napier's exact words.' But the third was the gem of the series; it was as follows:—'Give the context in which the following passages occur:—α. "When Scylla, after all his victories," &c.; β. "A commanding height, from whence a beneficial stream," &c.; γ. "A lively error pervades all his notions of war;" δ. "Hannibal, speaking of the elder Scipio, derided him," &c.' Is *Napier's History* to be learned by rote and treated like a play of Shakespeare's? or, presumptuous suggestion, did the examiner open the work at haphazard, and pick out the 'typical' (!) sentences?"

HONORARY COLONELCIES OF REGIMENTS.

"Lieutenant-General" writes:—"I am glad to see that you have thought the remarks of 'Aspirant' regarding the custom of conferring the vacant colonelcies of Cavalry regiments solely on General officers of that branch deserving a place in your columns (of July 31), and I am thereby encouraged to use my endeavours, however small, in assisting to direct attention to this 'unfairness,' as it also seems to me, to the Infantry officer, after his promotion to the rank of General. Why, in these non-Purchase days, should the General officers of the Cavalry and Infantry be placed on separate lists, and why, for no ostensible reason, as urged by 'Aspirant,' should those of the former enjoy the 'very substantial advantage' of arriving at the great 'honorarium' of the Service over the heads of many of the latter, not only their seniors on the list of General officers, but in most instances considerably so in length of service? Why should not General officers of Cavalry and Infantry be now appointed indifferently in their regular turn to vacant colonelcies in either branch? I am sure that some notice from yourself, Sir, either in approval of 'Aspirant's' views, or else showing what reasons may be urged for the retention of the rule complained of, would be appreciated by many who consider themselves aggrieved."

ARMY COFFEE TAVERNS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Will you kindly allow us, through your columns, to call attention to the scheme which has been devised for providing, as a national gift, coffee-taverns for the soldier and his friends in our various camps and garrisons? Much is now done for the soldiers' comfort in his barrack, but when he quits its precincts, he has no place of resort except the public-houses with which his quarters are generally surrounded. It is intended to provide places where he will not be tempted to spend his pay on that which is the source of almost all military offences; and we appeal to the nation—always ready to offer sympathy to the soldier in time of war—to help him in the temptations to which he is exposed in time of peace. Already many have come forward with generous subscriptions, including Lady Burdett-Coutts, the Archbishop of Canterbury, the Duke of Westminster, Cardinal Manning, Lords Shaftesbury, Morley, and Aberdeen, Sir Richard Wallace, and many others. H.R.H. the Commander-in-Chief, the Secretary of State for War, and already a hundred and fifty officers have subscribed; and further subscriptions will be gladly received by the honorary treasurer, Colonel Geary, R.A., Horse Guards; or by yours, &c.,

F. DUNCAN, Major, R.A.,
E. WOOLLCOMBE, Captain, R.A., } Hon. Secs.

Royal Military Repository, Woolwich, Sept. 21.

ROWLAND'S ODONTO is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that ROWLAND'S ODONTO will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

THE DEFENCE OF THE COLONIES.

Major-Gen. Sir W. F. D. Jervois, G.C.M.G., Governor of South Australia, an acknowledged authority upon the art of defences, when solicited lately to inaugurate a series of lectures in connection with the Young Men's Christian Association of Adelaide, promptly acceded to the request, and announced as his subject, "An Historical Sketch of the Defences of England." His Excellency's remarks upon Australian defences have the most practical interest to us. He said:—"I will now pass on to consider some points relating to the defences of the Australian Colonies. Acting upon the reports which I made about three years ago, steps are being taken—it must be admitted without any undue haste—for carrying out some of the recommendations therein contained for the defence of the principal ports, including Newcastle, which it is of great importance to render thoroughly secure, on account of its being the main source of supply for coal in Australia. New Zealand also, I understand, is acting upon a report which I prepared in London in 1871, at the request of Mr. (now Sir Julius) Vogel, and is now taking steps for the defence of her most important harbours. As regards defences for this colony, and the suggestions which I made in reference thereto, I find that it is occasionally stated by some that riflemen only are required; by others, that land batteries and artillerymen will afford effective protection without riflemen; by others, again, that you only want war-vessels. I cannot, of course, in a sketch such as this, discuss the principles on which my proposals were made. I must remark, however, that the conditions here are such that without all these—*i.e.*, naval means, land batteries, artillerymen, and riflemen—you can have no satisfactory system of defence. You cannot certainly be charged with neglect of the question—indeed, my good-fortune in occupying the position which I now hold is originally due to the circumstance that I came to Australia to advise respecting the defence of this and the other Colonies, in accordance with the common desire expressed by all. I must, however, point out that, although you have organised a Volunteer force and rifle associations—and most creditable they are—you ought also to be provided with a small, permanent body of troops; that although you have built one work of defence, you ought to build two; and that you ought also to have some local naval defence. But I know that it is difficult for the colony to do at once all that is required, and I feel no doubt of the desire and intention of South Australia, as opportunity offers, to adopt the measures necessary for her protection. A point that I wish to impress upon you, and upon all the Australian Colonies with reference to their defence, is that the protection of the maritime routes of commerce to which I have referred must be incomplete if it does not include the defence of those routes when adjacent to the Australian seaboard. I have before pointed out that there is one line of approach to the chief ports of these Colonies by King George's Sound, at the south-west cape of Australia, and another *viâ* Torres Straits, to the north and east of the continent. Singapore is admirably situated as a depôt for the defence of that part of the passage to the northward, between the Straits of Malacca and Torres Straits; and Sydney harbour and the Fijis are in good positions for depôts for the defence of the maritime traffic on the eastern side of the Australian continent. The fine harbour of King George's Sound—the first port in Australia at which the outward, and the last at which the homeward mail steamers call—occupies a most important position with reference to the defence of Australian commerce. It is just one of the places to which the principles I have enunciated respecting the defence of coaling stations apply. Undefended, it may in time of war be occupied by hostile vessels, which, issuing therefrom, might cut off our steamers and merchant ships. On the other hand, if defended, it would become a most valuable Naval post for vessels of war acting for the defence. The same may be said, though in not so great a degree, of Fiji. Now, as regards the defence of the stations to which I am referring, the fortification and garrisoning of Singapore is undertaken by the British Government, whilst that of Sydney is in the hands of the Government of New South Wales; but who is to undertake the defence of King George's Sound and of a harbour in Fiji? Neither Western Australia nor the colony of Fiji could bear the expense. My own view, seeing how immediately these Naval outposts are connected with the defence of Australian commerce, is, that all the Australian Colonies, including New Zealand, should share the cost, which I may observe would not be great. The consideration of this matter leads me to observe that the federation of these Colonies—on which subject you recently heard a most able lecture—would, amongst many other benefits, be of immense advantage in dealing with the subject of defence. You are interested in the fact that Great Britain holds Gibraltar, Malta, Aden, Ceylon, Singapore, Hong Kong, the Cape, St. Helena, Mauritius, Bermuda, Jamaica, and other maritime strategical points. You are interested in the defence of those places, but you have never been asked to pay a shilling towards the maintenance of their fortifications or their garrisons. Aided by contributions from some of these possessions, and by the Indian Government, which undertakes the whole of the cost for Aden, England has borne and bears the burden and the expense, and also maintains the Navy which primarily protects your commerce and your soil. I know that—remembering all you owe to Old England—you cherish with feelings of pride and enthusiasm the position which you occupy as an important part of the greatest maritime nation in the world; I know that you hold fast to the faith that the glorious British Empire should be defended and maintained, and I look forward to the day when, as your population multiplies and your revenues largely increase, you will have Australian troops ready to act in concert with British regiments, and Australian ships prepared to join with British squadrons, if need be, in doing battle with a common foe."

The French gunboat Lionne has arrived off Ramsgate harbour, for the purpose of assisting in maintaining order between the crews of the English and French fishing boats.

Reviews.

The Life, Times, and Correspondence of the Right Rev. Dr. Doyle. By W. J. Fiztpatrick, LL.D. (J. Duffy and Sons.)

Mr. Fitzpatrick has taken upon himself a task of great magnitude, and has accomplished it most successfully by the exercise of rare zeal and literary discernment. The *Life of Dr. Doyle*, which was long since published, no doubt gained great popularity, but in course of time passed completely out of print. Notwithstanding this fact, abundant evidence was forthcoming to show that the public interest in the original work only slumbered, and that judicious energy would prove sufficient to revive it. The author saw this clearly, and was fortunate enough to impress others who were in a position to forward his object with some portion of the zeal which actuated himself. Nothing can be more interesting than the matter contained in these portly volumes. It would be idle in a brief notice of this description to try even to enumerate them, much less to do them justice. Those who were privileged with the friendship of Dr. Doyle will truly appreciate them, as the record of the actions and the writings of a most gifted and single-minded man, even though Dr. Cahill once said that "he had a strong dash of Vinegar Hill in his composition." There is one remarkable letter in the collection (Vol. II., p. 127), which is too interesting to pass by unnoticed. On March 16, 1829, Lord Winchelsea, president of the Brunswick Club, accused the Duke of Wellington of having been actuated by disgraceful and criminal motives in his policy on the Catholic question. His Grace and Lord Winchelsea were united by bonds of close friendship, and such conduct greatly pained the Duke. He called for an explanation; it was refused, and a hostile meeting, without fatal results, took place. Father Maher mentioned the circumstance to Dr. Doyle, expressing wonder at the emotions which the Great Duke must have felt, who had passed unscathed through a hundred fights, and now took his stand to receive the fire of his dearest friend:—

> "'Emotions!' exclaimed the Bishop; 'no more than if you were about to sit down to breakfast.'—'Am I to understand,' inquired the priest, archly, 'that your lordship would have accepted the challenge, and received his aim without fear?'—'Most assuredly I should, had not Providence taken me out of this wicked world, and delivered me from the pride of my young heart. From my earliest youth, fear has been a feeling utterly unknown to me. I know not what it is, and unless from the knowledge one gathers from common report, I know not what it is like. Urged by an ambition which filled me in early life, I might have applied myself to the task of mastering a laborious profession, and fired by an indomitable spirit within, I'd have worked my way to distinction and perhaps glory. If forsaken by God, and delivered over to the pride and ambition of an untamed heart, I might have carried all before me in this life, unconscious of even experiencing fear in any ordeal. I should have made myself feared by challenging to mortal combat every man who crossed my path. I should have killed somebody or somebody would have killed me; but God, in his great mercy, preserved me from the rock upon which I might have been wrecked.' And then, quoting St. Augustine, he added, 'Too late have I known thee, oh Infinite Beauty, too late have I loved Thee!' 'Even of God,' continued the Bishop, 'I am not in sufficient fear. I have probably too much confidence in his mercies; but as he did not give me the faculty of fear, I suppose I am not accountable.'"

The chapters on "Repeal Agitation" will be read with no little interest.

Egypt. (Cassell and Co.)—Messrs. Cassell and Co. have issued the first part of a most attractive work on Egypt. It has been prepared by Professor G. Ebers, translated by Clara Bell, who has acquired such a high reputation as a translator of German works, and edited by S. Birch, LL.D. It is also copiously embellished with illustrations of a high order of merit. To those who have resided in Egypt — a country becoming daily more attractive—it will serve as a pleasing memento of the past, while it cannot fail to arouse in strangers an ardent desire to visit a land so profoundly interesting.

The Guide. By Lieutenant-Colonel Otter. (Willing and Williamson.)—This little manual is intended to serve as a guide to the Canadian Militia. It contains a great deal of useful information.

The International Portrait Gallery. (Cassell and Co.)—The twenty-third number of this interesting publication is exceptionally attractive. It contains a highly executed likeness of Sir Bartle Frere, taken from a photograph by Messrs. Elliott and Fry. It is accompanied by a carefully prepared biographical notice of the right honourable baronet.

St. James's Magazine.—The *St. James's* for Ocotber is early in the field. Among other articles, it contains one on the "Maori Race," and also one on "Illustrious Engineers," quite worthy of perusal. "Guilty, or Not Guilty?" is still further continued.

IT IS A PLEASURE TO MEET WITH SO EXCELLENT A PREPARATION as this "Perfected" Cod Liver Oil. Limpid, delicate, free from disagreeable flavour, and admirably refined by a new and improved process, the "Perfected" Cod Liver Oil of Allen and Hanburys' will henceforth take its place as a pharmaceutical product, which is in its way unrivalled,—*London Medical Record.* See also the *Lancet, British Medical Journal, Medical Times, Medical Press, Practitioner,* &c. All who have diffiulty in taking Cod Liver Oil should insist on having Allen and Hanburys' Perfected Oil. Sold only in imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade-mark, a Plough. Of all Chemists.

Obituary.

We regret much to have to announce the death of Col. W. F. N. Wallace, which occurred on the 5th inst., at his residence in the Isle of Wight. His fearfully sudden death has caused great grief, not only to his own immediate relatives, but to a large circle of friends and acquaintance, who had fully appreciated the kind heart of the soldier who had so often befriended many, and who was ever ready to afford assistance whenever he could do so. Col. Wallace served for many years in the 74th Bengal Infantry. With it he marched to Cabul after the first Afghan war, and served with it through the Punjab campaign of 1848. He was present at the outbreak of the Indian Mutiny in 1857, being actually on duty with a detachment of the 74th at the Main Guard of the city of Delhi, when the first party of the 3rd Bengal Light Cavalry rode into the city from Meerut. Col. (then Capt.) Wallace made his way back to cantonments, to find his own regiment had joined the mutineers. He served out the time of the Mutiny, and retired in 1864, having received two medals, one for the Punjab campaign, the other for the Indian Mutiny. His father, Brigdr.-Gen. Newton Wallace, was a most gallant old soldier. He served in the first Afghan war, and escorted Lady Sale with a convoy from Cabul. He joined the Army of the Sutlej with his regiment in 1845, and was appointed to a brigade. On the death of John McCaskill at Moodkee, he succeeded to his command, and fell himself, three days afterwards, at the battle of Ferozeshah, on the evening of Dec. 21, 1845. Col. Wallace's was a family of soldiers. His only brother, Capt. Newton Wallace, was with the old 1st Bengal Fusiliers at the siege and capture of Delhi, also the relief of Lucknow. His only son is now an officer in the Army.

Commander Henry Studdy, whose death is reported, at the early age of 38, was formerly flag-lieutenant to Sir G. Wellesley, when that officer was Superintendent of the Portsmouth Yard. From August, 1868, until his retirement, on account of ill-health, at the close of 1870, he served in the Britannia. He was lieutenant in the Bellerophon during her commission, under Capt. Tatham, in 1866-67.

Lieutenant Lord Francis Nathaniel Conyngham, R.N., died last week at Muirshiel, Lochwinnoch, Renfrewshire. He was the younger son of Francis, late Marquis Conyngham, K.P., by his marriage with Lady Jane Paget, second daughter of Henry William, first Marquis of Anglesey, K.G., and was born in September, 1832. He was a magistrate and deputy lieutenant for county Donegal. He entered the Royal Navy in 1846, and served in the Eastern of 1854-56, taking part in the operations against Bomarsund, in the capture of the fort of Kinburn in the Black Sea, and in the siege of Sebastopol. He retired, however, from the Service in 1860 with the rank of lieutenant. He was also for a short time a lieutenant in the Royal London Irish Rifle Volunteers. His Lordship married, in 1857, the Hon. Georgiana Charlotte Morgan, fifth daughter of the late and sister of the present Lord Tredegar.

Lieut. Francis Ross Bromilow, R.N., who has been employed as inspecting officer in the Coastguard service at Frazerburg, N.B., since Jan. 1879, died at Frazerburg, on the 17th inst., in his 40th year. The deceased officer, who was grandson of the late Admiral Sir Ross Donnelly, K.C.B., entered the Navy in 1855, and served as acting sub-lieut. in the Forte, Capt. T. Saumarez, under the flag, on the south-east coast of America, of Rear-Admiral R. L. Warren, from Sept. 11, 1861, until March 3, 1862, when he was promoted to acting lieut. in the Ardent, Com. John E. Parish, on the same station. He afterwards served in the Meeanee, Capt. George Wodehouse, in the Mediterranean from Nov. 22, 1862, until promoted to lieut., April 8, 1863; as lieut. he served in the Icarus, Com. Nowell Salmon, V.C., in the Mediterranean from June 22, 1863, until Feb. 1864; and in the Achilles, Capt. E. W. Vansittart, with the Channel Squadron from Oct. 4, 1864, until June, 1867, when he was appointed to the Nymphe, Com. Thos. Barnardiston, fitting for the East Indies, and remained until 1868. He subsequently served in the Duke of Wellington at Portsmouth from March 1, 1869, until June, 1871, when he joined the Research, Capt. Hon. W. J. Ward, fitting for the Mediterranean; and in July, 1872, was appointed to the Tenedos, Capt. E. H. L. Ray, and served in the Pacific until May, 1875, when he removed into the Repulse, and returned in her to England, and was paid off in June, 1877.

Dr. John Stirling, Deputy-Inspector-Gen. of Hospitals and Fleets, whose death at Southsea is reported, entered the Navy in 1840, and went out with the Niger expedition, his services in that quarter of the globe leading to his being again sent out in 1845 to the African coast on exploring service. He afterwards served on the Mediterranean station, and was present at the blockade of the Piræus. In 1850 he was sent to the south-east coast of America, and in 1852 was appointed surgeon to the Fury, with which he served in the Black Sea squadron during the Russian war, witnessing the naval operations against Sebastopol. He was subsequently staff surgeon to the naval hospital at the Cape of Good Hope, his last appointment being to the Plymouth hospital. In 1870 he was raised to the rank of deputy-inspector-gen. Dr. Stirling has received the Crimean medal with Sebastopol clasp and the Turkish medal.

EPPS'S CHOCOLATE ESSENCE.—Product of a special refining process. It is chocolate devoided of its over-richness and substantiality. Sugarless and, when made, of the consistency of coffee. An after-noon chocolate. Sold only in packets, 6d and 1s, labelled, "James Epps and Co., Homœopathic Chemists, 48 Threadneedle Street, and 170 Piccadilly, London."

F. MOEDER, 248, 249, 250 Tottenham Court Road; and 19, 20, and 21 Morwell Street, W.C.

Established 1862.

THE NOSE MACHINE, applied to the Nose for an hour daily, so directs the soft cartilage of which the member consists, that an ill-formed nose is quickly shaped to perfection. 10s 6d, sent free for stamps, secretly packed.—ALEX. ROSS, 21 Lamb's Conduit Street, High Holborn, London, near the Foundling. (Established 1850.)

SPANISH FLY is the acting ingredient in ALEX. ROSS'S CANTHARIDES OIL. It speedily produces hair and whiskers. It is an astringent that tightens the pores, and thus prevents falling; a stimulant, and thus gives growth. 3s 6d; sent for 54 stamps.—21 Lamb's Conduit Street, High Holborn, London, near the Foundling.

A FACT.—HAIR-COLOUR WASH.—By damping the head or whiskers with this beautiful Wash, in two hours grey hair becomes its original colour. 10s 6d, sent for stamps, secretly packed.—ALEX. ROSS, 21 Lamb's Conduit Street, High Holborn, London. Pamphlet, two stamps.

SNEYD, Hartley Wintney Vicarage, Hants; or with Lieutenant SULIVAN, Fleet, Hants, as it is proposed to raise a Memorial to him.

SALISBURY SCHOOL.

Head Master—Rev. W. H. EMRA, M.A., late Open Scholar of Exeter College, Oxford, Classical Honourman in Moderations and Final Schools; Assistant Classical Master of the King's School, Bruton, 1867; Rector of Gt. Blakenham, 1871.

Second Master—CHAS. MORGAN, Esq., B.A., Senior Optime, late Scholar and Mathematical Prizeman of Jesus College, Cambridge.

With an efficient staff of Assistants.

This Proprietary School was founded in 1876 expressly to enable gentlemen of moderate means to obtain for their sons—

A high-class education in accordance with modern requirements.

A liberal and well-appointed dietary and domestic ménage.

The best associations of a Public School and companions exclusively of their own class.

The work is tested yearly by Public Examiners, whose reports are published, and one of the first pupils at the School has already passed with credit into Cooper's Hill College.

The sanitary and domestic arrangements will also be inspected and reported on periodically.

The New Buildings, on a fine site of ten acres, and fitted with every modern appliance, were opened in September last.

Terms, £54 a year.

A full prospectus will be sent on application to the Head Master, Salisbury School, Salisbury; or to the Warden, Batcombe Rectory, Evercreech.

The Gold Medal Dublin Exhibition, 1865.

20 GREAT TITCHFIELD STREET, LONDON, W.

PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.—By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet*, *British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser*.

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' 'Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—Punctual Attendance every Thursday at 4 High Street, Aldershot, from 11 till 5.

Now ready, in one large volume, 8vo, price 30s.

London: Baillière and Co., King William Street, Strand.

WATCHES.—JEWELLERY.—WATCHES.

The Rev. Robt. Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Ladies' Gold Lever Watch received from you for 70s in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

The Rev. James Arthur Kemp, Lew Down, North Devon, also writes, March 8, 1880:—"The watch I ordered of you at 25s, for my servant arrived quite safely, and I am exceedingly well pleased with it in every way. It is an excellent timekeeper, very neat and handsome in appearance, and in my opinion worth far more than those that cost treble the money. I do not think anybody should be without a watch, when they can obtain from you such an excellent article at so reasonable a price."

THE MIDLAND COUNTIES WATCH COMPANY supply their celebrated Watches direct to wearers, at very lowest wholesale cash prices. They guarantee watches supplied by them to be most perfect timekeepers, and honestly assert their price to be under one-half those charged by watchmakers; and as a guarantee of good-faith they undertake to return the full amount paid for any Watch if not to the satisfaction of the purchaser.

The Company's chief manufacture are their celebrated Crystal Glasses, which dispense with all risk of breakage. Their LADIES' and GENTLEMEN'S SILVER WATCHES, at 25s, and their LADIES' GOLD LEVERS, at 70s, are acknowledged to be the cheapest Watches in the world.

Catalogues, containing list of testimonials, and beautifully illustrated descriptions of more expensive watches, gold and silver jewellery, electroplate, &c., are sent gratis on application. We may safely assert that the prices in same will be a surprise to all who see them.

GENTLEMEN'S FINE SILVER, flat crystal glass, heavy cased, superior movement, 25s.

LADIES' FINE SILVER, handsomely engraved, flat crystal glass, highly-finished movements, 25s.

YOUTHS' FINE SILVER, flat crystal glass, highly-finished movements, 25s.

LADIES' very heavy cased GOLD LEVERS, in exquisitely chased cases, with highly-finished extra-jewelled movements, 70s.

These watches are frequently sold for treble the money.

Cheques or Post-Office Orders must be made payable to the Company's Manager,

Mr. S. HISSEY, Vyse Street, Birmingham.

On receipt of which any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

HOLLOWAY'S PILLS.—Wrongs made Right.—Every day that any bodily suffering is permitted to continue renders it more certain to become chronic or dangerous. Holloway's purifying, cooling, and strengthening Pills are well adapted for any irregularity of the human body, and should be taken when the stomach is disordered, the liver deranged, the kidneys inactive, the bowels torpid, or the brain muddled. With this medicine every invalid can cure himself, and those who are weak and infirm through imperfect digestion, may make themselves strong and stout by Holloway's excellent Pills. A few doses of them usually mitigate the most painful symptoms caused by undigested food, from which they thoroughly free the alimentary canal, and completely restore its natural power and action.

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded.

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

ZOEDONE.—OHNE PHOSPHOR,

KEIN GEDANKE.—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases.

A small extra charge in smaller cases. See Pamphlet.

ZOEDONE AND SPORTSMAN.

THE BEST DRINK FOR THE MOORS.
STEADIES THE NERVES.
QUENCHES THE THIRST.
SUPPORTS THE STRENGTH.
NO LASSITUDE.
NO LIVER.
NO MISSING.

London Agents:—Messrs. Allen and Hanburys; Barclay and Son; W. Best and Sons; Corbyn, Stacey, and Co.; Edwards and Son; Hearon, Squire, and Francis; Ingram and Royle; Lynch and Co.; F. Newbery and Son; Probyn and Co.; Savory and Moore.

Agents in the principal towns of the United Kingdom.

Patentee—DAVID JOHNSON, F.C.S. Manufacturers: The **ZOEDONE CO.,** Limited, Wrexham.

THE official despatches of Generals Primrose, Burrows, and Nuttall, giving an account of the disaster at Khushk-i-Nakhood, have been severely condemned by the Government of India. The Viceroy characterises them as meagre and unsatisfactory, leaving the Government in ignorance of the real reasons of the defeat. The Commander-in-Chief says that the despatches are eminently unsatisfactory, as giving no facts regarding the precautions taken to ascertain the strength and position of the enemy, and as failing to explain the reasons of the disaster. Sir Frederick Haines says that victory was possible, had the infantry stood firm, and that the disaster was intensified by the demoralisation of the cavalry and the precipitate retreat. He adds that the cantonments at Candahar ought not to have been abandoned on the false report of the annihilation of General Burrows's force. As we have as yet only seen a telegraphic summary of the despatches above alluded to, we shrink from expressing a strong opinion on their contents. We, however, fear that the censure of the Government of India will be found to be completely justified. Without, however, going into the question, rather literary than military, as to whether the despatches, as a whole, are or are not sufficiently clear and explanatory, we may be allowed to criticise some of the leading features of them. It would appear that, as usual in Afghanistan, a political agent is at the bottom of the disaster. A celebrated Frenchman or Italian, we forget who, was in the habit of saying, when any misfortune happened, or crime was committed, "Who is she?" With regard to the history of any disaster during our campaigns in Afghanistan, we may, with at least equal reason, ask, "Who was the political?" With regard to the defeat at Maiwand, it appears that Colonel St. John urged on General Primrose that a brigade of infantry, a regiment of cavalry, and a battery of Horse Artillery should be sent to the support of the Wali. Submitting this scheme to Government, and presumably endorsing it, General Primrose obtained permission to despatch a force to the Helmund, but added to the brigade above named a second regiment of cavalry. At the same time, orders were given by the Supreme Government for troops from the Reserve Division to be pushed up to Candahar by forced marches. These reinforcements consisted of three regiments of infantry, a regiment of cavalry, and a battery of artillery. Apparently, however, only one complete regiment of infantry, and part of another, arrived at Candahar before the battle. Till then, General Primrose's force was not, properly speaking, a support to General Burrows, but only the garrison of a place where General Burrows could, if defeated, flee for refuge. Indeed, even when one complete regiment and part of another had arrived, General Primrose did not feel himself justified in making arrangements to reinforce General Burrows with more than 230 rank and file. Before these arrangements could be completed, the disaster had occurred. It strikes us that as on the departure of General Burrows's brigade, a force nearly equal in strength was ordered up to Candahar by forced marches, the transport at General Phayre's disposal must have been extremely deficient. It also would seem that, knowing that reinforcements were on their way, General Primrose, as soon as he heard of their approach, might, without imprudence, have organised from the garrison of Candahar a column of at least 1,000 men, to proceed at once to General Burrows's assistance. General Primrose seems to think that it was some sort of compensation for want of energy, that he forwarded to General Burrows the full instructions which he had received from Simla. These instructions were to the effect that either General Primrose or General Burrows—it is not clear which—must act according to his judgment; but—singular qualification—must prevent, above all things, Ayoub Khan's slipping past Candahar towards Ghuznee without being attacked. General Burrows says that, in order to accomplish this object, it was necessary to intercept Ayoub at Khushk-i-Nakhood or Maiwand. Owing to the mutiny of the Wali's troops, our political influence in the neighbourhood was at an end; every man's hand was against us, and no information could be obtained. We cannot accept the excuse. During the Indian Mutiny, and especially at the siege of Delhi, every man's hand was against us, yet we never failed to obtain good information. Could not Colonel St. John find trustworthy spies? Intelligence is always to be bought, if a sufficient price be paid for it. Besides, there were two regiments of cavalry, who, if judiciously handled, ought to have obtained information. As to our political influence in the district, General Burrows's passive attitude was scarcely calculated to re-establish it. Regarding the battle itself, General Burrows says that, hearing that the enemy were approaching Maiwand, he marched to meet him, accompanied by all his baggage and stores, for he was not strong enough to leave a baggage-guard at Khushk-i-Nakhood. He thus admits having deliberately abandoned a position deliberately selected, though his own force was weak, and he knew nothing of the strength of the enemy. Having begun by an offensive movement, he did not persevere in it, but halted, when Ayoub was perceived, about five miles off. Between 2 and 3 o'clock, the infantry, who, with the exception of two companies of Jacob's Rifles, had behaved steadily, gave way. No exception is in the telegraphic summary of the despatch made in favour of the 66th, whose conduct is, however, highly praised by the Viceroy. General Burrows, finding that his efforts to rally the infantry were vain, ordered General Nuttall to charge with the cavalry. General Nuttall, however, says that, though gallantly seconded by the officers, he could only induce a portion of the cavalry to form up, and those who did charge failed to charge home. General Nuttall says that Lieutenant Maclaine's two guns and a troop of the Scinde Horse, employed to cover the deployment of the brigade, began the action, without being authorised. We would ask why was so small a force employed on such a duty, and why was not an officer of higher rank and greater experience than Lieutenant Maclaine sent in command? We should also like to know what Lieutenant Maclaine's orders were. General Burrows says that the enemy numbered 25,000 men. We doubt whether he had more than half that force in the field. In short, we cannot but agree with the Indian Government in thinking that the despatches are meagre and unsatisfactory, and have a strong impression that they were written under a feeling of excitement, and without correcting personal impressions by the reports of other officers.

The Constructors of the Italian Navy are wise in their generation, and, unlike our own Naval designers, are not above asking those who have to fight their ships what is their opinion of the machines recently sent afloat. Italy has indeed taken monstrous strides in Naval construction during the past few years, and has quickly added to her Navy ironclads of the largest types, such as the *Dandolo*, *Duilio*, and *Italia*. But, not blinded with the success of their ships and their guns, the Italian Ministry of Marine has paused to consider whether this race among nations for sending afloat the most powerful ship may not be carried too far. The wisdom of putting so many eggs in one basket, as we have recently been doing with our *Dreadnoughts* and *Inflexibles*, contrary to the opinion of the majority of Naval officers, is now being questioned. In order to obtain certain information on the point, and to gauge the feeling of the Service, the Minister of Marine has decided to ask the candid opinion of a large number of Naval officers of high professional repute. Their views will then be considered by the Council of the Admiralty, and the *pros* and *cons* which exist in the professional mind will be well weighed, and the result will guide the Constructor's Department in the next designs. With an Admiralty so free from little jealousies such as we have found to exist between the civil architect and the professional seaman, there is every reason to look for progress, and we anticipate that in the report now called for by the Italian Navy, our own designers and departmental officers will find a very useful lesson, should the Italian Government be good enough to forward a copy for perusal at Whitehall. Our officers have, as a rule, been very little consulted in matters affecting the construction and equipment of her Majesty's ships. Civil officials prepare the designs, and feel their professional skill greatly under-rated, if suggestions for improvements are too freely offered by the men who have to command and fight those huge floating machines which now constitute first-class men-of-war. We have seen so much feeling imported into these questions of design, that the resignation of officials high in office have resulted, and a Chief Constructor has, in times past, openly sneered at Naval officers' opinions on ships Such a state of affairs is most injurious to the public service, and many a defect which has been apparent to a seaman when the designs of a ship have been made public have been allowed to pass uncorrected, rather than cause friction with the responsible department. When, however, the time arrives for placing the ship in commission, then we witness a long and costly series of alterations and improvements which should never have been requisite. With one of our latest model ships, of a class which was looked upon as something of which the constructors would have reason to be proud, months and months were passed in making alterations, for nothing was quite right, from her rig to her screw. How injurious it is also to the Service that any feeling of professional jealousy should exist between the Administrative Department and the Service afloat, is too often seen in the official snub with which an officer is visited when he ventures to make suggestions for alterations before taking his ship on a foreign commission. He may make a long report, stating his reasons for thinking the alterations he suggests advisable and likely to increase the efficiency and seaworthiness of his ship, but too often such suggestions have been met by a curt notification that his ideas are "not approved." We have seen in the case of the *Atalanta* how the Departmental Officer over-ruled the Naval officer, and how Captain Stirling took his ship to sea without those alterations which he suggested, and which would undoubtedly, as shown in evidence, have added to the seaworthiness of the ship, although we do not intend to imply that, had they been carried out, they would have saved her. On that point, nothing can well be said, for, unfortunately, we are totally in the dark as to the manner in which the ship met her fate. But whether it be the question of bilge-keels or waterways, the first tendency at head-quarters is acknowledged to be to set the suggestion aside, one motive being a desire to avoid the expense; and another, a feeling that when the Department reports a ship fit for sea, she ought to be accepted as such. Any recommendations for her improvement after she has been reported ready is too often taken as implying that the Department has been forgetful of its duties, or has performed them imperfectly. It would be an excellent thing for the Navy, if the Admiralty would follow the example of Italy, and look more often to the Service afloat for advice and assistance in questions of Naval construction. It may be said that there are Naval officers already on the Board of Admiralty, but any one acquainted with the routine of the Office is only too well aware that their time is so occupied with the ordinary work of the branches over which they have authority, that they are more "signing officers" than anything else. The vast amount of clerical work which has to be looked to daily, and the voluminous correspondence which has to be gone through in these days, when a commanding officer reports on everybody and everything in his ship, keep their Lordships too fully employed with pen and ink, to be of great service in looking closely into questions of design. What we would suggest would be the establishment of a Consultative Board of Naval Officers. There are many, too many, Naval officers of standing on half-pay at all times who could easily be called on to take a seat at a Committee on Designs, and who would gladly attend the meetings, and give valuable assistance, for a small committee allowance and their expenses in attending. No necessity exists for their being constantly at the Admiralty, for, except in pressing cases, occasional meetings to discuss matters referred to them would be quite sufficient. If the active service and the Department could be brought more together in deciding on the types of ships and their fittings, there would be an immense saving to the country in the cost of alterations now required by new ships, more especially by those built by contract according to Admiralty design, and which are not looked upon by the eye of a practical seaman until they arrive at one of the ports to be completed. Those at the yards can testify how much of the work done has often to be undone, so as to make the ship fit for sea, simply from the circumstance that those who prepared the designs had overlooked little defects in construction and fittings which were at once apparent to those who have passed their lives on board ships, and than whom no better critics could be found. For the sake of the Service, we trust the day may not be far distant when our Naval Architects may work more hand-in-hand with our Naval Officers, and accept their criticism as a service, instead of as a rebuke.

H.R.H. the Duke of Edinburgh will visit Scarborough on an official inspection of the Coastguard on October 12; efforts are being made to induce his Royal Highness to attend a civic banquet on the occasion. The Duke left Coburg on Sunday night for shooting in the Tyrol, and was expected to reach Paris yesterday, and will join the Duchess at Calais to-day, and cross to Dover, and thence proceed direct to Eastwell Park.

The Channel Squadron will, if the *Minotaur* is ready, assemble at Portland on November 6, and will then proceed on a cruise, the details of which have not yet been made known. It is to be hoped that their Lordships will allow the ships to return to England for Christmas leave, instead of keeping them at Lisbon or Vigo.

Captain Tryon, C.B., A.D.C., has left the British Embassy at Constantinople, and rejoined the *Monarch*.

The decision of the court-martial on Serjeant Marshman, of the Royal Marines, on charges of fraudulent marking at Wimbledon, has by no means satisfied the public mind. Nearly a month was spent in trying to sift the matter by the old-fashioned and voluminous proceedings of a military court, and some £4,000 is said to have been expended in conducting the defence alone, and such is the result. Of course, the decision is final, and must be accepted, so far as the Service is concerned; but it is an unfortunate thing for the gallant corps to which Serjeant Marshman belongs, for the National Rifle Association, and for the Volunteers who brought the case forward, that opinion should be divided as to the finding of the Court. Let us hope that this troublesome case will lead to reform in the proceedure of courts-martial.

Vice-Admiral du Petit-Thouars, commander-in-chief of the French Pacific Squadron, has been inflicting chastisement on some natives of La Dominique. Taking with him the *Victorieuse*, *Dragon*, and *Chasseur*, he landed some men, with two mountain guns, and proceeded to the native village. The natives at first showed fight, but when they heard the report of the guns, fell with their faces to the ground and surrendered. They were subsequently transported to the island of Karaka.

The latest addition to the Mediterranean Fleet, which was so very long in the hands of Portsmouth Yard, has only been able to do a few weeks' duty before being obliged to go into dock again. This is the costly *Iris*.

We have long known that the Russian man-of-war *Peter the Great*, which frightened Sir Edward Reed so some years ago, was a failure, but were scarcely prepared for the news that before she can be deemed fit for service it will be necessary to provide her with new engines, costing 900,000 roubles.

Some doubt is felt by our own Arctic officers at the statement that the Franklin Search Expedition experienced eleven months of such extreme cold, that for sixteen days the mean temperature was more than 100 below freezing-point. When the *Alert* returned, her officers and crew believed that they had done what the Americans now claim,—namely, to have experienced the greatest cold ever borne by white men. It is undoubtedly true that at one time the *Alert's* thermometers fell to 106 below freezing-point; but even then, the mean for a week was only 60 degrees below freezing-point. The greatest care was taken by Sir George Nares's expedition to register the temperature, the mean of ten thermometers which had been tested at Kew being taken. Captain Markham, in his account of the expedition, says that this was believed to be the lowest really authentic and corrected observations ever registered in any part of the globe.

The concluding evidence taken before the *Atalanta* Committee of Inquiry was so unsatisfactory, that we are glad to hear that further evidence is likely to be taken at Portsmouth.

Directions have been sent to the Mediterranean that, on the reassembling of the squadron under the command of Sir Beauchamp Seymour, the *Hecla* is to go through a course of torpedo and mining experiments, similar to those carried out at Bantry Bay, in order to give officers an opportunity of gaining practical knowledge of the interesting results then obtained.

The Naval Demonstration has not been altogether without its uses, for this visit to the Adriatic has exposed the faulty nature of the Admiralty charts of the coast in the vicinity of Dulcigno. A serious disparity has been found to exist between Admiralty Charts Nos. 1,588 and 2,701; the former being from an English survey made in 1822, by Captain W. H. Smyth, R.N., the latter being from the Austrian survey of 1870. We have little doubt but that the Austrian survey is the correct one, and we hope to hear that Chart No. 1,588 has been cancelled, for if it be as faulty as it seems, it is decidedly a dangerous document, as the mariner using it in proceeding from Dulcigno to the northward might, in thick weather, find himself on shore on Meder's Point, which point, on No. 2,701, lies over one mile to the westward of the position assigned to it on No. 1,588. We trust this discovery will tend to wean the Hydrographer from his predilection for antique hydrography, and lead him to advise the prosecution of fresh surveys, instead of persuading their Lordships into the issue of charts compiled "from antique and inadequate data."

When the Admiralty announced that the reappeared to be no reason to apprehend that the wreckage washed up at the Azores belonged to the *Atalanta*, we ventured to suggest a hope that they would at least cause some inquiries to be made. But it seems that we are indebted to a private person for having done that which it would have been supposed the public department responsible for the equipment of the *Atalanta* would have undertaken. Mr. T. E. Thorpe, F.R.S., professor of chemistry at Leeds College, writing from Lisbon, says that just before leaving Fayal he learnt that Lloyd's agent at Flores had reported that a considerable quantity of wreckage had come ashore on that island, which he had some reason to suppose might turn out to be a portion of the ill-fated *Atalanta*. From this gentleman (Lloyd's agent) Mr. Thorpe obtained the following information:—The wreck, apparently the hinder part of a large vessel, was found in a narrow creek among the precipitous cliffs at Lagedo, on the southern coast of Flores. The spot is situated between Ilheos Point and Pico Joao Martin. The wrecked vessel is said to have had gun-ports closed inside with a screw, and Lloyd's agent has in his possession a long, composite metal bolt, taken from some part of the wreck, marked with the Admiralty arrow. As no name was found upon it, the Custom House people promptly sold the wreck for $7, which they hold in trust for the legal owners for a year and a day, and by this time it is scattered about as firewood among the various parishes in the south of the island. Lloyd's agent is positive in his conviction that the wreck is part of a man-of-war, and can produce the metal bolt, if necessary. Perhaps, on the strength of this intelligence, their Lordships will ask Lloyd's agent for further particulars, or send a vessel to Flores to examine the wreckage.

While we seem to be resting, our neighbour, France, is pushing her commerce and founding fresh colonies in all corners. With the news of the annexation of Tahiti comes an announcement that the Niger district is to be opened up, and for this purpose an expeditionary force, such as we never dreamed of organising in our troublesome little Niger expedition, is about to be sent out. And, again, news is received that France has been given by the Government of Corea that privilege for which we have long been asking, admission to her ports. This information comes, too, at a moment when the British flag, in H.M.S. *Pegasus*, has received a decided slight at the hands of the Coreans. It was only three months ago that the ship went on a peaceful errand to Corea, and ventured into the port of Fusan. Commander the Hon. H. N. Hood landed, to pay the customary civilities, but was not received by the Governor, but was given a message, delivered through the representative of a foreign Power, that he would not be allowed to remain in the port, but was to sail again at once, as Corea refused to allow a British ship to anchor at Fusan. Of course, nothing remained to Commander Hood but to return to his ship, and leave the port; but it would be interesting to know why the "tricolour" and the "stars and stripes" should be welcome, while the "jack" is positively hateful, to Corea.

Captain Ernest Rice, Naval Attaché for Europe has returned from the Continent, and will remain in town for a short time.

A public meeting will be held on Monday evening, under distinguished auspices, at the Riding School, Knightsbridge (by permission of the Duke of Wellington), to protest against the policy now being pursued by the Government on the coast of Albania, and "against the ignoble use to which the British Fleet is being put." A second meeting will be held at the Cannon-street Hotel, on Tuesday afternoon, with the same objects. The feeling on board the ships now with Sir Beauchamp Seymour is finding an echo at home, and while we sympathise with the Admiral who has been placed in so unenviable a position, we cannot but rejoice that England's pride in her Navy is beginning to make her feel thoroughly ashamed at the suggested attack upon a defenceless little town.

We regret to hear that Commander Dacres and others, of the *Wild Swan*, have been down with fever, but, happily, no serious cases have been reported.

The Danish Navy has, by the launch of the *Tordenskyold*, at Copenhagen, on Thursday, added to her fleet a torpedo-ship, with a displacement of 2,700 tons, indicated horse-power 2,500, speed about 15 knots, draft about 4 ft. 9 in. She is covered with 4-in. steel armour, and is divided into 23 watertight compartments, carries two swift torpedo launches, besides Whitehead torpedoes, and is armed with one 15-in. Krupp gun.

We are glad to hear that trial is being made, by Admiralty order, with a berth suitable for the "sick-bay," it being hung on a universal joint and counter-poised, so as to remain always level, whatever may be the motion of the ship. Strong bands of indiarubber are used to prevent any sudden jerk, and the value of such a bed for sick or wounded is obvious.

We are glad to hear that Lieutenant W. L. Morrison, who was appointed to the command of the *Helicon*, and who was for some time detained in hospital at Constantinople, has now left that place for Brindisi, to join his ship.

The new composite vessel to be built at Sheerness Dockyard, the keel of which was laid down on the slip a month ago, is to be named the *Satellite*.

The Admiralty has forwarded a communication to the Portsmouth Dockyard authorities expressing satisfaction at the exertions made to prepare the Indian troopships for sea by the required dates, which were so much earlier than there was at first reason to suppose necessary.

Rear-Admiral W. G. Jones, C.B., will leave Trincomalee on the 12th inst. in the *Euraylus* for Rangoon, returning to Trincomalee on November 8, and then proceeding to Bombay, where he expects to arrive on November 18.

Vice-Admiral Cloué, who has been appointed to the French Ministry of Marine, evidently thinks more of the Service to which he belongs than of political jealousies. At his reception of the *personnel* of his department, he spoke most kindly of his predecessor, Admiral Jauréguiberry, and announced his intention of following in his footsteps, saying, "I am not one of those who find fault with everything that their predecessors have done. I shall, therefore, continue the work begun by Admiral Jauréguiberry, and shall endeavour not to make him forgotten, but to replace him to the best of my power."

Any one with half an eye to colour should have known, even in these days of dead shades and weak tints, that white paint and coal-dust could not be expected to produce a good effect. Yet it has been tried at Portsmouth, where the painters were busily employed in giving the finishing-touches while the ship was being coaled. The result was not "a harmony in black and white."

The man of the *Wild Swan* whose gallantry in jumping overboard among the sharks to save a slave-boy belonging to a captured dhow we referred to last week, was not one of our Blue-jackets, but a Seedie serving in the ship. Nevertheless, the circumstance does credit to the Service to which the man is temporarily attached, and we trust he may be duly rewarded.

It is with regret that we learn that the long illness of Admiral Sir Walter Tarleton, K.C.B., terminated fatally on Saturday last.

Referring to a paragraph which appeared last week concerning the reappointment of Lieutenant Von Donop to the command of the *Decoy*, a correspondent states that, "Lieutenant G. P. Henderson, who was sent out to join the *Dwarf*, was, on his arrival on the coast, put in command of the *Decoy*, vice Lieutenant Von Donop, invalided, and he would have been allowed to continue in command, had not the nice arrangement for Lieutenant Von Donop been made of ordering the *Decoy* to the Mediterranean, and reappointing Von Donop to her. No doubt he is a very deserving officer, but it was rather hard lines for Lieutenant Henderson, who had lately gone through the Zulu campaign with much credit."

The Lords of the Admiralty have been pleased to grant to Captain John G. Harrison the Naval pension of £65 a year, vacant by the death of Captain Joseph S. Rundle.

Captain H. Lyall, Royal Artillery, has been appointed Inspector of Warlike Stores at Hong Kong.

There is no truth in the report that Colonel Tupper, commanding the Royal Horse Artillery at Woolwich, is about to accept one of the three pensions now vacant. *Au contraire*, we believe Colonel Tupper, one of the best officers in the Royal Regiment, may ultimately obtain a mixed command under the *régime* about to be instituted by Mr. Childers for the employment of a fair proportion of Artillery officers in this service at home as well as in India.

A correspondent writes:—"The preference shown in pushing the 15th Hussars to the front in Afghanistan, instead of the 13th Hussars, is considered nothing at all extraordinary in India, where 'Simla interest' perpetrates the most flagrant jobs, singular military movements and strange selection of officers for commands."

The "Spring Captains" were regarded as a useful metropolitan institution, but the "Autumn Captains," if we are to judge from the lists of guests at northern meetings and other Scottish festivities, are a far more numerous and influential body. Possibly they enjoy life far more than their London brethren.

In reference to a letter signed "W. Hope, Army and Navy Club, September 24," which appeared last week in a weekly paper, we have merely to say that no "attacks" were made upon the character of the gentleman of that name and address in the *Army and Navy Gazette*, and that there is not the smallest ground for the statement in that letter that "charges of conspiracy and base motives" were made by us against him.

We hear great complaints about the way in which contractors are permitted to dawdle over repairs, &c., to barracks. At an artillery station in the "shires," the officers of the garrison have been turned out of their mess, and are now living at considerable inconvenience and expense to themselves in a neighbouring hotel, while the contractor engaged on the septennial painting and papering is permitted no less than six weeks to paper and paint four officers' quarters, the mess-room, ante-room, and kitchens, and appears inclined to spread the work over the whole time.

The Austrian War Minister will submit shortly to the Delegations a proposal for the formation of ten Feldjäger (rifle) battalions. The purpose of this change is to transform the forty reserve battalions of the existing thirty-three Feldjäger and seven Kaiserjäger battalions into field companies, and to combine each four of them into a new Feldjäger battalion, as soon as the sanction asked for is obtained. According to the existing rules of the Army organisation, ten field battalions were to be formed in case of war, while for the performance of the duties in the recruiting districts, new reserve companies were to be organised, which could be again combined into ten new battalions in case of need. At the outbreak of war, therefore, which would necessitate the mobilisation of the whole Army, twenty new field battalions had to be formed.

There is going on now a discussion on the relative inferiority of our guns as compared with those of other Artilleries, started by a letter from the *Times'* correspondent with the German Manœuvres. Various causes are assigned for this inferiority, assuming it to be established. Without, however, entering into this matter, the occasion seems to be a fitting one for bringing before the public the question of the best method of educating officers for the Artillery. A few years ago—in 1875—a pamphlet on this subject was published, written by a General officer, apparently, of the Artillery. It advocates the substitution of an "Artillery College" for the present Royal Military Academy. The pamphlet was little noticed in the Press, but many of the best-known Artillery officers thoroughly agreed in its propositions, convinced that without such an establishment our Artillery would always be handicapped.

The new cavalry barracks at Liverpool are to cost £40,000.

It is notified in last night's *Gazette* that "the Queen has signified her intention to confer the Victoria Cross upon Serjeant (now Lieutenant) R. G. Scott, Cape Mounted Riflemen, for conspicuous gallantry and devotion during an attack on Moirosi's Mountain, on April 8, 1879, in volunteering to throw time-fuze shells, as hand grenades, over a line of stone barricades, from behind which the enemy were bringing a heavy fire to bear on the Colonial troops, and which it was impossible effectually to return. After causing all the men of his party to retire under cover, lest the shell should burst prematurely,—by which precaution many lives were in all probability saved,—Serjeant Scott advanced in a most deliberate manner under a heavy fire, and having got under the wall, made two attempts to throw shells over it. At the second attempt, owing to some defect in the fuze, which he had just lighted, the shell exploded almost in Serjeant Scott's hands, blowing his right hand to pieces, and wounding him severely in his left leg."

Although there have been rumours of war once more current in France, we believe them to have been got up for purely political purposes, and to cover no real design to begin a campaign of revenge. We believe that the French nation has not the least desire to recommence hostilities, and to plunge into a fresh struggle with Germany. The anti-German feeling is, no doubt, very strong amongst our neighbours; but they have not forgotten the tremendous deception of 1870, and the evils which their overweening confidence engendered. They know that Germany is more powerful and better prepared than ever, and they have not lost sight of the fearful cost entailed by defeat,—the sacrifice of blood, of treasure, of territory, and military prestige. There are few Frenchmen who do not agree at present with Prince Bismarck, when he said that war was a game where both players are sure to lose.

Two important changes are reported from Berlin in the editorship of some of our German contemporaries. Colonel Löbel, for a long time the conductor of the *Jahresberichte der Armee und Marine*, is to take the place of the late lamented editor of the *Militär-Wochenblatt*, General Witzleben. A great number of candidates had applied for that post, amongst them several eminent officers in active service. Major Marées relinquishes his duties of editorship of the *Militär-Zeitung für Reserve und Landwehr-Offiziere*, his place being filled by Colonel Corvisart-Montmarin.

Twice as many officers have applied this year as last for permission to sit for the examination for entering the Staff College at St. Petersburg. On this occasion the duration of the examination has been shortened to six days, although the subjects are more difficult than they were last year.

Deputy-Commissary-General J. O. Hamley, C.B., has been placed on the Retired List of the Ordnance Store Department, having reached the age prescribed by the regulations of the Service. This officer entered the Service in February, 1838, and was first appointed to Sydney, New South Wales, where he served until the end of 1846. On the outbreak of hostilities with the natives in the southern province of New Zealand, he was selected, although the junior officer at Sydney, to proceed to Wellington, in charge of the Ordnance and Barrack Departments in that province, and was present during the active operations at the Hutt, Horokiwi Valley, and Wanganui. On the deaths of the ordnance officer and the barrack-master in the northern province, Mr. Hamley was removed from Wellington to Auckland, to assume the charge of the Department in the colony, and to perform the duties extending over the whole of New Zealand, which up to that time had been under the superintendence of three separate officers. He was present in the three native wars in the country, at Wanganui, Taranaki, and the Waikato, and on the removal of the troops was left to dispose of the lands, buildings, stores, and all the Imperial property in the colony; and eventually returned to England in 1870, after an absence of 33 years. Mr. Hamley was promoted to deputy-storekeeper, May, 1852; deputy-superintendent of stores, March, 1866; assistant-controller, February, 1871; deputy-commissary-general, July, 1878; and was appointed a Companion of the Bath, May, 1871. On his return to England, he was appointed to the charge of the Gun Wharf at Chatham; in 1875 he was removed to Head-quarters at the War Office, in 1878 to Dover, and has lately been in charge at Aldershot. Mr. Hamley retires with the honorary rank of commissary-general and the relative rank of major-general in the Army. When at the War Office, his uniform courtesy to all ranks was proverbial, and thus his departure from head-quarters was a source of the greatest regret to all his brother-officers. It rarely falls to the lot of one man to be held in such universal respect. On his retirement from his Department, after an honourable service, Mr. Hamley leaves behind him a reputation of which any British officer might be justly proud.

A French military writer has just furnished some interesting statistics concerning the expense of the Franco-German war. He tells his countrymen that it is not sufficient merely to add up the millions which were paid to Germany [the war indemnity amounted to £200,000,000, without counting the sums levied in Paris and other cities], the sacrifices which have been made in the shape of replenishing arsenals and reconstituting *matériel*, must be taken into account. This work, he says, is not finished, but it furnishes sufficient subject-matter for an interesting study. The exceptional charges which it has not been thought fit to include in the regular annual budget voted by the Chambers really constitute an extra, or, as the French call it, an extraordinary budget. This budget, which is exceedingly complicated, shows that since 1872 close upon £40,000,000 has already been expended; and when the money which the War Minister proposes to ask for next Session for 1881 has been voted, that amount will be exceeded by about £5,000,000. In addition to the above formidable amount, we are reminded that various garrison towns have contributed nearly £5,000,000 for the construction of barracks, &c., on the condition of enjoying the advantage of having a military force quartered with them. We, therefore, arrive at a total of £50,000,000; and the writer does not know where this extraordinary expenditure will cease, and when the ordinary budget will cover everything. It must be borne in mind that this ordinary budget, which far exceeds the budgets of the Empire, is gradually increasing year by year, and that for 1880 it amounted to the respectable figure of £27,000,000, and this in a country where military service is obligatory, and where, consequently, no bounties have to be paid, and where the troops receive little but their rations. We may add that extra money will shortly be required for contemplated changes,—for mounting captains, and for giving the battalions an extra officer, of which they stand greatly in need. Up to the present, the Chambers have voted all the sums demanded for the Army with an alacrity and an unanimity which show that in spite of party feeling, which runs high, Legitimists, Orleanists, Bonapartists, Republicans, and Radicals can sink their differences, when it becomes a question of national security.

In continuation of our remarks on the French flags we may observe that the 21st Regiment, after successively bearing the name of a dozen colonels, was, in 1762, called "Guyenne." Many astonishing feats are placed to the credit of this corps, but we shall confine ourselves to the following incidents in its history, as related by M. Laurent:—"In 1649, Turenne, dissatisfied with Mazarin, declared against the Court, and was followed by a portion of the army. Lieutenant-Colonel de Vaubécourt and M. de Longpré wished to persuade Guyenne to join, but an old serjeant interfered, and by his rough eloquence triumphed over the hesitations of his comrades. 'The regiment,' he said, 'does not belong to M. de Turenne. We have sworn to fight against the enemies of the King of France. Let us not do the contrary! Comrades follow me.'" History has not preserved the name of this gallant fellow. History, on the contrary, has preserved the name of M. de Turenne, who is regarded in France as the type of a great soldier, in spite of having fought against his own country, and his ashes repose beneath the dome of the Invalides. In 1664, Guyenne distinguished itself against the Turks, and at the battle of St. Gothard "broke by its impetuosity the redoubtable Ottoman cavalry," for which gallant feat the Emperor of Austria presented the regiment with four pieces of artillery, which followed it everywhere. Guyenne, therefore, appears to have rivalled that memorable charge at Minden, when six regiments of British infantry, mistaking an order, charged M. de Contade's cavalry, 10,000 strong, and broke it. The deeds of the 24th Regiment, or, as it was formerly called, Royal, call for special notice. It distinguished itself under Turenne in 1657, and when Franche Comté was conquered in 1674, and then under Marshal Créqui at Limbourg. In 1674, at Derbach, a company of this regiment defeated 300 German Hussars. In 1703, besieged at Bonn, it made a desperate sortie at noon, reached the besieging batteries, spiked ten guns and six mortars, made sixty prisoners, and was allowed to leave the place by the breach with flags flying and drums beating. Moreover, the siege had been so severe that the soldiers were all naked, and each man therefore received a linen frock wherewith to defile decently; and, thus clothed, the regiment laid siege to Bresach. In the same year, at the battle of Speyerbach, Royal once more covered itself with glory, the French Army taking more flags and prisoners than it lost men. This was in the days of Marshal Luxemburg, who captured so many standards that he was nicknamed "the upholsterer of Notre Dame." Lieutenant Bonnac, of Royal, we are told, seized a German flag and held it in his hand, when, mistaken by the soldiers of the regiment of La Marche for an enemy, he received no less than twenty-two bayonet wounds before he could undeceive them. All this prodding did not do the lieutenant much harm, for he was at Hochstadt the year afterwards, where he was unfortunately killed. At Hochstadt (which is better known to us as Blenheim) M. Laurent says that Royal suffered severely, and that, "the English, after having massacred it, deceived its *débris*, and lied in order to force them to surrender. This, however, did not hinder the gallant Serjeant La Bussiere, who saw the old flag in their hands, snatching it away and destroying it. For this act the gallant serjeant was made an officer, and the regiment gave him a pension of 100 francs." In 1734. when Royal was in Italy, Lieutenant Froment and 10 men, while out foraging, were attacked by 50 hussars, but they fired with such precision the cavalry could not approach. However, on reaching a bridge, which it was necessary to cross, they found their enemies had dismounted, and were waiting for them. "This was not the moment for firing," writes M. Laurent. The eleven men charged with the bayonet, killed the officer and a few hussars, and crossed the bridge with the loss of one soldier. The year following, a lieutenant and 30 men, when the French evacuated Deckendorf, were forgotten in the ditch. Attacked by 1,000 hussars and pandours, these gallant fellows killed 200, and allowed their comrades time to come to their rescue. Not satisfied with such acts of intrepidity as the above, our author cites the following fine trait of French generosity on the part of Royal:—"The Marquis de St. Vallien, was killed by a pandour in ambush, and a few days afterwards a captain and twelve men at the same place while lying in ambush, saw the Archduke Charles passing within pistol-shot of them, nearly alone, making a reconnaissance; they came out of their hiding-place, and rendered him military honours," which was very handsome indeed, but not war. At Fontenoy, where Royal lost 800 officers and men, the corps appears to have earned from the English the appellation of a "regiment of lions." After a few other brilliant achievements, we come to the Revolution, where we find Royal, not losing its discipline, but imbued with liberal ideas. At that period the regiment wrote the following letter, which was signed, among others, by Serjeant Soult:—"The soldier shall no longer be regarded as a slave. He will obey, and always show the same submission, without murmuring, to the *wise* orders of his chiefs," &c. The 24th, as it was afterwards called, distinguished itself at Valmy and at many of the great battles of the First Empire, and its flag has now inscribed upon it the names of such glorious fields as those of Jena and Friedland.

THE MADRAS ARMY.

"Arab" writes:—"In your paper of May 15 there is an article about the Simla Committee on Army Organisation, in which the writer, evidently a jaundiced Bengalee who has not been able to get over the bitter pill he had to swallow when the Madras troops were called upon and employed to help in thrashing to order the mutinous Bengalees, makes some disparaging remarks about certain Madras regiments. I feel sure that he could not possibly have seen them when he penned the article in question, or he would not have committed himself to such gross misstatements. I have seen the regiments he writes about, and I know that what he states about them is untrue. The Madras Sepoy may not be so tall as the flat-chested, lanky, soft Bengalee; but as far as make, endurance, and strength are concerned, he is not one bit behind his Bengal brother, but the contrary; and certainly in drill and discipline, very much superior. The writer was evidently not aware when he wrote the article that it had been officially reported from the front to the Government of India and (please doubly underline this), that the Madras Sepoys were better able to endure the strain of the campaign, and the climate of Afghanistan, than any description of Bengal troops that were serving with them in that country. This report will refute, and show in its true light, the misstatements contained in the article referred to. The writer also takes exception to the families of the Madras Sepoys. He seems to forget that the Bengal Sepoy has the same incubus on him, but with this difference,—the Bengalee starves himself to remit the pay he receives to his family in his village, and that the effect of this system is that he cannot be relied on for loyalty. For example, I believe in one regiment in Afghanistan some 300 men went bodily over to the enemy, taking their arms and accoutrements with them; and scarcely a day passes that batches of men in other regiments do not do the same. Had the families of these men been living in the lines, they would have thought twice before they did so disgraceful an act. Such desertion is unheard of among the Madras troops. As to the last part of the article, I beg to state that I am personally acquainted with the commandant of the regiment alluded to, and am certain that no such telegram was despatched or reply received. Nor was the corps in hospital. It was sent to garrison the station during the height of the fever and commencement of the cold season, and without any preparation as regards warm clothing, &c., and consequently suffered from fever conjointly with the other corps stationed there, but not to the extent that they did, nor did it lose nearly so many men from fever and pneumonia. It is a curious fact that in the choice of stations for the Madras regiments in Bengal, it appears as if the most unhealthy stations were carefully picked out for the purpose, —viz., Vitakri, Dhera Ghaz Khan, Mooltan, Meean Meer, and Morur. The first had to be given up and the regiment withdrawn, on account of its unhealthiness; and the last but one bears the unenviable notoriety of being known as the 'sepulchre of the Punjab and the white man's grave.'"

"Bombay" writes:—"In a leading article in your issue of May 15 appear some remarks depreciating the Madras Army. I think it would be fair for the people at home to know the difficulties against which this army has to contend. It seems invidious to pick out one regiment, and judge the whole army by that standard. The regiments of Madras which joined the reserve division of the Afghan field force have had a much lower per-centage of sick than any of the regiments of the northern Presidency, and from the accounts at present received, they seem to have behaved well at the defence of Fort Battye. The Madrasees have to wear a dress wholly unsuited to them, making the men look more like dressed-up monkeys than Sepoys. In addition to being very unsightly, it is most irksome for natives to wear, so that in marching it is not surprising if they are unable to compete with the lusty Punjaubees, who are attired in loose-fitting dress, and generally wear a native shoe for long marches. The authorities do not assist commanding officers in obtaining men of good physique, since they have ordered a standard which is well known to be below requirements (no man of 32-in. chest being fit to carry the regulation weight), and insist on regiments being filled up with weeds of this build, who only become a burden to the pension establishment, by deprecating the excellent system of commanding officers allowing only men of a certain standard to be enlisted. In Bengal, an excellent rule exists by which a commanding officer can get rid of any recruit he considers unlikely to make an efficient soldier. Madras commanding officers, however, are not considered competent to do this, and an elaborate system of red-tape, involving medical boards *ad lib.*, has to be gone through. These boards are often composed of young medical officers, who are supposed to know more about the physique required for a soldier than an officer of nearly thirty years' service, and in many cases the recruit is returned to the regiment as 'fit,' having no disease to disqualify him. This is palpably wrong. Again, the interior economy and instruction of regiments are supposed to be carried out by uneducated native officers, supervised by old European officers long past such service. There are few young officers with native regiments, and these, from inefficient supervision, soon lapse into the same slack and careless ways, which are only too eagerly taken advantage of by the native officers. Regiments have been denuded of their best officers for staff and civil employ, and those remaining, anxious of obtaining similar appointments, lose all interest in their work; and this apathy is easily imparted to the natives. Patronage has been to a great extent exercised in the distribution of Staff appointments. The present heads of the Adjutant and Quartermaster-General's offices have been in them since they were subalterns, instead of returning to their regiments at the end of five years. Deserving officers have in this way been passed over, and become disgusted with the Service which has treated them so badly. The recommendations of the Army Commission will do away with many of these defects, if adopted; and as they are so universally approved of by the whole Indian Army, we cannot help wishing that they may be commenced at once. Commanding officers must be selected, and if they were invested with greater powers the efficiency of regiments would be marked. As it is, they are so bound by red-tape that the discipline is greatly impaired. It is impossible that three colonels can pull well in one regiment; a proper proportion of grades must be kept, and if educated natives were given independent commands there would be no difficulty in obtaining a good class of recruits. Until some of these innovations come about, we must with regret still sign ourselves,—BENIGHTED."

The *Panama Star* contains letters from Lima anticipating the bombardment of the city by the Chilians, but remarking that the elevation of the city above the level of the ships (500 ft.) would prevent any effective bombardment. It adds:—"Lima has little to fear from the Chilians, so long as they remain on the water. When they come within sight of the city by land, it will become a question not of long-range guns, but of close quarters, and fighting hand to hand. There is no doubt that the enemy intends to land in this neighbourhood, and to capture Lima, if possible, and we are making preparations, by providing places of refuge for the women and children, where they will be safe from the excesses which might follow a battle. The Chilians have begun to erect batteries on the island of San Lorenzo, but with what object is not yet known. It is just possible that they may be able to shell the battery at La Punta from the island, without the necessity of placing their ships in danger for that end."

A considerable number of men have already been dismissed from Portsmouth Yard, and 69 have received notices. At the same time, there is an abundance of work to be done in the shape of arrears. The contractors will proceed from the Crocodile to the Active to overhaul the machinery, but the necessary repairs to the hull will have to be undertaken by men withdrawn from the new work. The Volage, which would have formed part of the Flying Squadron had there been any chance of getting her ready, is wanted to relieve the Wolverene on the Australian station; and the Sultan and the Repulse are deteriorating for want of attention.—*Times.*

ARMY EXAMINATIONS.

"A Sufferer" writes:—"Before the next examination for the Line takes place, may I be allowed to ventilate through your valuable journal the following suggestions: That the gentlemen appointed to read out dictation should be selected with sufficient care, so as to enable their hearers to understand distinctly every word they utter, which was not the case on Aug. 12 in the dictation in particular, the echo being so great in one room as to prevent those farthest from the gentleman reading out hearing anything distinctly. Examiners being, as a rule, so over-particular on the subject of dictation, by the numbers they choose to 'plough' at every examination, should leave no fault to be found on their side. It would also be more fair to those who have failed in any subject to be shown in what form they did so, and not, as at present, be dependent on the caprice of an examiner, who, knowing he is sheltered by authority, may pluck anyone he chooses, no questions being asked and any information afforded beyond, for instance, spelling or geography, a few faults in one subject alone preventing a young fellow, no matter how well in all other subjects he has done, from qualifying."

The Heavy-Gun Committee and other officials have been engaged this week in experiments at Cliff End Fort, near Yarmouth, Isle of Wight. Guns mounted *en barbette*, as many are in the coast defences, have been regarded of late as unduly exposing their working detachments to the fire of the enemy, who have to stand above the parapet to load, and are in danger from the long-range small arms of the present day. A plan has, therefore, been devised of revolving the gun and loading in the rear, the gunners being in that position under cover from the front. The muzzle of the gun tried in the Cliff End Fort—one of 38 tons—had to be slightly depressed in order that the men might reach it without being visible above the parapet, and it was thought that some protection would be desirable on the land side, as well as on the sea-front, lest one or two riflemen should be able to pick them off from the rear; but the plan on the whole worked well, and the revolution of the gun was found to occupy only a few seconds, which might be well spared in promoting the safety of the gun detachment.

The first of the heavy breech-loaders, that known as the 25-ton gun, has been completed, and passed through some preliminary trials at Woolwich. Although firing as yet but moderate charges, and recording very light pressures, it has already attained the satisfactory velocity of over 2,000 feet per second, with the service projectile, but additional experience will have to be gained before deciding upon the weight of the shot, the powder charge, and other details. The breech arrangement is precisely similar to that of the 13-pounder field-guns, the block being released on the screw-relief principle, received on a brass carrier, and swung clear to admit the sponge. It has been found to act remarkably well, one man being able to work it with the greatest ease.

The *Portsmouth Times* says:—"We regret to have to record the death of Major A. P. Miller, Governor of Gosport Military Prison, which took place on the 18th ult. at the Governor's House, Gosport, after an illness of about two months. Major Miller was the second son of the late T. Miller, Yr., of Glenlee and Barskimming (eldest son of Sir W. Miller, Bart., Lord Glenlee), and brother of the late Sir W. Miller, third Bart. He joined the 92nd Highlanders as ensign, Jan. 1836; became lieut., Sept. 1839; and capt., March, 1846; after which he was connected with the military prison service in Canada, Aldershot, and Dublin, from which latter place he was transferred to Gosport in 1876. His remains were interred in the Ann's Hill Cemetery, Gosport, on the 23rd ult., and were followed by Vice-Admiral Miller (brother), Sir W. Miller, Bart., Vice-Admiral Sir W. H. Stewart, K.C.B., Sir T. MacMahon, W. Miller, Esq., Col. Miller, Capt. Miller, R.N., S. Shiel, Esq., Major Vaughlin, Capt. Allen, Governor of the Military Prison, Dublin, Major Davidson, R.E., the Rev. J. Y. Barton, Chaplain to the Forces, and Dr. Hunter. The service was performed by the Rev. W. Le Grave, Chaplain to the Forces.

The *Morning Post* says:—"The Empress Eugénie has just bought the Farnborough Hill estate, in Hampshire, close to the borders of the county of Surrey, for £50,000. The estate was the property of the late Mr. Longman, the well-known publisher, and consists of about 257 acres, with a charming picturesque mansion, erected by the late owner about 18 years ago. The Empress will not go into possession of it until January, as Mrs. Longman, the widow, is very anxious to spend another Christmas there. Her Majesty intends to build on the property a memorial chapel to receive the bodies of the Emperor and the Prince Imperial. The Empress's lease of Camden Place expires in March next."

Col. A. Y. Shortt, Bombay S.C., is about to retire from the Service, on a pension of £456 5s., and a special annuity of £595 17s.

We *(Times)* understand that Sir Frederick Roberts, G.C.B., is expected in England in November next. Gen. Roberts has not yet accepted the command of the troops at Madras.

A paragraph has been going the round of the papers that "a new and very simple electrical contrivance has been perfected by the Constructive Department at Portsmouth for discharging the Whitehead torpedo." The *Hampshire Telegraph* hears that this "perfected" contrivance is the invention of an outsider, who wants to know if his claim is to be recognised on its being adopted on board the Inflexible. Clever mechanicians often find it easy to perfect a thing when once the notion has been put before them, and thus it is that inventors so often see their ideas adopted, with just some trifling alteration or modification, which prevents them from establishing their claim as the inventor. Taking one consideration with another, the inventor's lot is not a happy one.

The Army.

1st King's Dragoon Guards. We learn from Cape Town that the regiment was to have left Pretoria on the 11th ult. to embark for India. Col. Alexander, the senior officer in command, was sworn in as Administrator at Natal on Aug. 20 during the absence of Sir G. Pomeroy-Colley.

3rd Dragoon Guards. Lieut.-Col. G. R. Rawlinson, lately in command of the regiment, died at Great Malvern on the 21st ult. He joined the Army, Aug. 29, 1856; became lieut., July 31, 1857; capt., May 17, 1861; major, May 23, 1874; lieut.-col., May 31, 1876; and retired the following year, when Col. Browne, the present commanding officer, was selected from the Scots Greys to succeed him. Capt. and Brevet Lieut.-Col. Stewart has completed the special duty on which he has been engaged, viz., that of representing the Cavalry Service at the French manœuvres. We are pleased to hear that it is intended to shortly provide for Col. Stewart on the Staff of the Army, in recognition of his very meritorious services lately at the Cape. Capt. Wardrop reverted to regimental duty from the 1st inst., vacating his appointment as A.D.C. to the General officer commanding in Ireland.

6th Dragoon Guards (Carabiniers). Capt. Middleton embarks to-day at Portsmouth in H.M.S. Serapis for India, to join an appointment from the Half-pay List.

2nd Dragoons (Royal Scots Greys). It is stated that Capt. Philips contemplates retirement.

8th Hussars. Capt. Crofton has passed the lower-standard examination in Hindostanee.

9th Lancers. At a full-dress parade of the depôt troop, at the Cavalry depôt, Canterbury, Serjt.-Major Finn was presented with a medal awarded for distinguished conduct in the field. Serjt.-Major Finn, during the engagement at Cabul on Dec. 11 last, heroically went to the assistance of Lieut.-Col. Cleland, who was seriously wounded and unhorsed. He kept off several of the enemy and remounted Col. Cleland, who was thus enabled to get to the rear out of further danger.

13th Hussars. Major and Brevet Col. Sir B. C. Russell, K.C.M.G., C.B., succeeds to the command, vice Col. Butler, retired upon half-pay; Capt. Peters becoming major, and Lieut. Lane capt. Lieut. Bladen-Powell embarks at Portsmouth to-day in H.M.S. Serapis for conveyance to India, to rejoin from leave.

ROYAL ARTILLERY.

The experiments which have during the past fortnight been made by the F Baty. B Brig. R.H.A. with the newly-invented 13-pounder breech-loader, with a view to their approval of the weapon for general service, were brought to a close last week. The only conspicuous defect in the new arm is the tendency the shock of the discharge gives the lever handle of the breech to spring up and thus become insecure, as in lifting the handle the breech, which is secured by a peculiar screw on the French system, becomes unfixed. This defect caused what was nearly a catastrophe last Tuesday, the breech-piece of No. 3 gun being blown 34 yards to the rear, only just missing a civilian who was standing behind the detachment in charge of the gun. The gun thus disabled was at once sent to Woolwich Arsenal, it being pronounced by one of the instructors from the Arsenal unfit for further service. No. 6 gun was also condemned by the instructor. It is considered probable that a board of officers of the Ordnance Department will meet to determine on an improved method of securing the breech. The six gun-carriages were severely shaken by the rough usage they met with over the huge boulders on the side of the tors, and several fresh bolts had to be put in the elevating apparatus and the trunnion-plates. Still it is the opinion of the officers that should the mode of securing the breech be rendered safer, the new weapon—which only weighs 8½ cwt.—will become the recognised arm of the R.H.A., as it greatly surpasses in fineness of sight, accuracy, and speed of firing the guns now used by them. The very severe weather to which the men and horses have been exposed has at length attracted the attention of the authorities, and during the coming winter, stables are to be erected to accommodate the horses of three batteries. This has long been wanted, as the loss of valuable horses, through colds contracted by standing up to their hocks in mud and constant exposure to the severe weather, has before now been very great. It is generally believed that the erection of stables on Okehampton Park is only the first step towards building barracks there.

Extracts from Indian General Orders:—"Lieut. H. O. Piers, 19-8th, is attached for duty to 5-11th R.A.; Lieut. F. M. Bainster, D-2 is attached for duty to A-2 R.A., and will join it forthwith; Major W. H. King-Harman has been transferred from 5-8th to 19-8th R.A.; Capt. J. P. Freeth, from the Seconded List, has been posted to N-1 R.A., vice Yorke, seconded; Capt. G. R. Gambier, Depôt Baty. A Brig., has been posted to D-B, R.H.A., vice Beadnell; Lieut. R. G. Q. McLeod, 8-9th, has been posted to N-1 R.A.; Capt. S. G. Smyth, R.A., is directed to proceed from Rawul Pindee to Mooltan, for duty with H Baty. 1st Brig. R.A.; Lieut. J. W. H. Potts, R.H.A., is directed to proceed from Safed Sang to Mean Meer, for duty with E Baty. B Brig. R.H.A., to accompany Royal Artillery drafts proceeding to Candahar."

A Reuter's telegram, dated Aden, Sept. 25, says:—"Col. Gordon left here to-day on his way to Europe from China. He has postponed his intended visit to Zanzibar."

Lieut. M. C. Barton has passed the lower-standard examination in Hindostanee.

"One of the Battery" writes:—"I did not deem the statement of the *Wiltshire Times*, referring to the F Baty. 5th Brig. R.A., worthy of notice; but as I see it copied in last week's *Army and Navy Gazette*, I write to contradict it. The battery has been in tents since the middle of July, and not since May; the tents are not unserviceable, and the men's kits have not been flooded. The tents have had wooden bottoms since a few days after they were pitched, instead of 'being lately supplied with them.' There are at the present moment not more than 60 men under 11 tents, and each man has four blankets. Were proof needed that the men have not been treated 'cruelly,' there is ample in the fact that there are at present fewer men in hospital than there has been since the battery returned from India."

The following is the official list of the casualties at Maiwand, on July 27, not before reported:—E Baty. B Brig. R.H.A. Killed—Serjt. Michael Joseph Wood; Shoeingsmith George Walter; Gunners Alexander Macdonald, Patrick Macallister, Alfred Swinnerton, Wilfred Mashewman, John Dewly, Richard Jones, and James Loughlin; Drivers David Grey, Patrick Jones, and Samuel Webster. Missing—Bombardier John Lowe; Collarmaker Henry Cummings; Wheeler William James: six gunners; Arthur Roberts, George Smith, and William Nicholl.

Lieut. J. K. Trotter, C Baty. A. Brig. R.H.A., stationed at Newbridge, has been promoted capt. into No. 12 Baty. 8th Brig., and been ordered to hold himself in readiness to embark for India to join his new battery.

Major G. C. Undy, Bengal S.C., deputy-assist.-comy.-gen., Commissariat Department, has died at Sealkote, suddenly, aged 42 years. The deceased was son of the late Mr. C. G. Undy, Bengal C.S., formerly Judge of Bauleah. The deceased entered the Army June 14, 1856, became lieut. June 27, 1857; capt. June 14, 1868; and major June 14, 1876.

Lieut. T. J. Roch, B Brig., R.H.A., who has been representing the British Artillery at the French manœuvres, has completed that special duty, and has reverted to duty with his battery.

ROYAL ENGINEERS.

Lieuts. C. C. Ellis, P. B. Baldwin, and J. H. Mason embark for India to-day in H.M.S. Serapis, *en route* to India.

With regard to the statement in our issue of the 25th ult., that Capt. O'Brien, R.E., is going out to Jamaica as surveyor-general, we would point out that this should have been deputy-surveyor-general. The surveyor-general of Jamaica is Major-Gen. Mann, R.E., who has just returned thither from leave of absence.

The name of Brevet Col. F. S. Taylor (late Bengal) has to be added to the list of those who lost their lives in the landslip at Naini Tal. Col. Taylor joined the Honourable East India Company's Engineers, June 11, 1847; became 1st lieut., Aug. 1, 1854; capt., Aug. 27, 1858; lieut.-col., Jan. 2, 1871; and brevet col., Jan. 2, 1876.

The death is announced from India of Col. J. P. Cox, Chairman of the Bombay Port Trust, which occurred at Poona on the 23rd ult., at the age of 50 years. Col. Cox entered the Army, Dec. 18, 1847; became 1st lieut., May 14, 1853; capt., Sept. 2, 1857; major, July 5, 1872; lieut.-col., Oct. 19, 1873; and brevet col., Oct. 19, 1878.

A telegram received this week from the Viceroy indicates Serjt. E. D. Heaphy and Corpl. J. Ashman among those who lost their lives in the action under Gen. Burrows at Maiwand on July 27.

Coldstream Guards. Lieut.-Col. the Hon. E. E. T. Boscawen and Capt. Graves-Swale reverted to regimental duty from the 1st inst., on vacating their appointments on the Staff of the General officer commanding in Ireland.

1st, or Royal Scots. The 2nd Batn. is under orders to embark at Bombay on Nov. 5 in H.M.S. Malabar, for conveyance to England. Lieut. Login, 2nd Batn., is a candidate for the Indian S.C., and has been appointed to the 31st Bengal N.I., on probation.

2nd Queen's. 2nd Lieuts. Addington and Hamilton, 2nd Batn., will embark for India to-day in H.M.S. Serapis, *en route* to join head-quarters on appointment.

5th Fusiliers. The 1st Batn. is under orders to embark at Bombay on Nov. 8 in H.M.S. Jumna, for conveyance to England. Capt. F. R. Carleton, 2nd Batn., died at Agra on Aug. 28. The deceased, who was a son of Mr. E. C. Carleton, of Kildare Street, Dublin, and Old Bawn, Bray, entered the Army, Oct. 9, 1863; became lieut. July 13, 1867; and capt., Jan. 23, 1878. "A Friend of the Regiment" writes:—"A glance at the *Army List* will show you how very unfortunate this regiment has been in the way of promotion, especially among the Purchase captains. The five seniors are all over 25 years' service, with 21, 20, 17, and 16 years in their present rank, and with little or no prospect of promotion in their own regiment. Surely it would only be fair to offer some of them a majority in some other regiment, where promotion has been unusually rapid, as is now done in the case of senior subalterns."

6th Regiment. The 1st Batn. is to embark at Aden about Dec. 13, in H.M.S. Serapis, for conveyance to England. 2nd Lieuts. Woodriff and Couper, 2nd Batn., embark for India to-day at Portsmouth in H.M.S. Serapis, *en route* to join head-quarters on appointment.

7th Fusiliers. A telegram from the Viceroy gives the following list of casualties which occurred during the siege of Candahar, including the sortie of Aug. 16:—Wounded—Lieut. G. de Trafford. Killed—Colour-Serjt. Frederick Strong; Serjts. W. Shorter and J. Quin; Lance-Serjt. J. Fennell; Corpls. W. Cranston and P. Bishop; Ptes. G. Nash, J. Fitzhugh, W. Steer, A. Howe, W. County, W. Gilmour, O. Halpin, O. McKevor, G. Trawer, F. Huntley, G. Kent, J. Hennefer, J. Job, J. Pringle, J. Rushen, G. Kirby, and F. New. Dieds of wounds—Ptes. E. Orton, S. Strickland, P. Devine, S. Adams, T. Savan, and W. Goddard. Major Keyser remains with the 2nd Batn., on promotion. 2nd Lieuts. Burrows and Wilkinson, 2nd Batn., embark at Portsmouth to-day in H.M.S. Serapis, *en route* to India to join head-quarters, on appointment.

8th King's. 2nd Lieuts. Eliott and Tripp embark to-day at Portsmouth in H.M.S. Serapis with a draft of 2 serjeants and 123 men, to join the 2nd Batn. in India.

9th Regiment. Capt. Shepherd is transferred from the 2nd to the 1st Batn., on promotion. Lieut. Govan is transferred from the 2nd to the 1st Batn., Lieut. Becher remaining with the 2nd Batn.

12th Regiment. Capt. Hutton-Riddell, 2nd Lieuts. Lloyd, Grey, and M'Andrew, with 3 serjeants and 205 men, 1st Batn., embark to-day at Portsmouth in H.M.S. Serapis for India. Lieut. Hutchinson, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 11th Bengal Lancers as officiating squadron-officer, on probation.

13th Light Infantry. Major Cary and Capts. Fownes and Clark, 2nd Batn., embark at Portsmouth to-day in H.M.S. Serapis, *en route* to India, to join on promotion.

14th Regiment. 2nd Lieut. Watts, 1 serjeant, and 102 men, 2nd Batn., embark to-day in H.M.S. Serapis at Portsmouth, for conveyance to India. Lieut. Carter, 1st Batn., also proceeds out in the Serapis.

15th Regiment. Brevet Major Parker, 2nd Batn., embarks at Portsmouth to-day in H.M.S. Serapis, for conveyance to India, to rejoin from the depôt. Capt. Brooke, 1st Batn., has completed the special duty on which he has been engaged, that of representing the English Infantry at the French manœuvres, at which he accompanied Major-Gen. Higginson, C.B.

16th Regiment. Capt. Martin and Lieut. Schreiber, 2nd Batn., embark to-day at Portsmouth in H.M.S. Serapis, *en route* to India, to join head-quarters.

18th Royal Irish. Lieut. Downes, 2nd Lieuts. Moore, Loch, and Richardson, 1 serjeant, and 77 men, 1st Batn., embark to-day at Portsmouth in H.M.S. Serapis, for India.

19th Regiment. Col. Cook takes up command of the 2nd Batn. immediately, on exchange from the 100th Regt., he having arrived home some time ago from India. He finds the battalion in splendid order, Col. Barrett having devoted his whole energies to his profession, and having a deep interest in the welfare of the regiment, from the fact of his long connection with it, his father having served in it before him. Capt. Briggs is transferred from the 2nd to the 1st Batn., and Lieut. Macartney from the 1st to the 2nd Batn. Lieut. Macartney is a candidate for the Indian S.C., and embarks to-day at Portsmouth in H.M.S. Serapis, *en route* for India.

20th Regiment. Capt. Randolph, 2nd Batn., having been selected for the adjutancy of the 7th Royal Lancashire Militia, has proceeded from Ireland to Bury, and assumed duty in succession to Capt. Hussey. The head-quarters of the 1st Batn. are about to be relieved at Cyprus by the head-quarters of the 35th Regt.

22nd Regiment. Capt. Gleig is posted to the 2nd Batn. on being brought on to the establishment from the Staff in India.

24th Regiment. Lieut.-Col. Black, C.B., is transferred from the 2nd to the 1st Batn., on promotion, Major Farquhar remaining with the 2nd Batn. Lieuts. Mainwaring and Phipps, 2nd Batn., embark at Portsmouth to-day in H.M.S. Serapis, *en route* to join head-quarters.

25th Regiment. Lieut. Gordon, 2nd Lieuts. Borradaile and Wadeson, 3 serjeants, and 253 men, 1st Batn., embark at Devonport on Monday in H.M.S. Serapis for conveyance to India. 2nd Lieut. Hamilton embarks on board the Serapis to-day at Portsmouth, *en route* to India.

28th Regiment. Lieut. Sherrard obtains the company vacant by the retirement of Capt. Lowe.

29th Regiment. Capt. Clarke has been appointed staff officer of the Colaba Depôt.

32nd Light Infantry. 2nd Lieut. Legh is a candidate for the Indian S.C., and embarks at Portsmouth to-day in H.M.S. Serapis, for conveyance to India.

33rd Regiment. Lieut. R. S. P. Robinson was killed in the second landslip at Naini Tal on the 13th ult., whilst gallantly endeavouring to save life. The deceased, who was the son of Mr. C. R. Robinson, of Bretaneby Manor, Yorkshire, entered the Army Jan. 30, 1878.

34th Regiment. Capt. Newbury and 202 men embark at Portsmouth to-day in H.M.S. Serapis, for conveyance to India. Lieut. Marriott, a candidate for the Indian S.C., has been appointed officiating squadron-officer, Poona Horse, on probation.

35th Regiment. The head-quarters are under orders of readiness to proceed from Malta to Cyprus, in relief of the head-quarters 1st Batn. 20th.

44th Regiment. Lieut. Morrell obtains his company, consequent upon the appointment of Capt. Churchill to the Army Pay Department.

47th Regiment. Lieut. Burne is a candidate for the Indian S.C., and embarks for India to-day in H.M.S. Serapis.

48th Regiment. The head-quarters and service companies are to embark at Bombay on the 26th inst. in H.M.S. Euphrates, *en route* to England.

49th Regiment. Lieut. Sievwright is a candidate for the Indian S.C., and embarks at Portsmouth to-day in H.M.S. Serapis, *en route* to India.

ROYAL MARINES.

We readily give place to the following explanation respecting a statement which appeared in this column last week. Our correspondent says:—"I regret to see in your impression of the 25th inst. a copy of a paragraph from the *Hampshire Telegraph*, reflecting seriously on the discipline of the Battalion, Royal Marines, now stationed in Ireland. I beg to state that in the paper in which it first appeared it was considered of such slight importance that its refutation therein was considered unnecessary; but that now, appearing, as it does, in a journal which has a place in every Service mess, it becomes incumbent that some one acquainted with the case should explain away the statements contained in the paragraph referred to, being, as they are, a garbled misrepresentation of facts. I therefore hope you will afford space in your journal for a true statement of the case in point, which is as follows:—On the occasion of the officer commanding inspecting the detachments stationed about Cork Harbour, the men at Spike Island, after being dismissed, subsequently fell in in the usual Service manner, with a view to obtaining information concerning the probability of their receiving free rations whilst quartered in Ireland. They were informed that application had been made to the proper authorities on the subject, but that as yet no reply had been received. The men were then dismissed in the usual way, and went to their barrack-rooms to all appearances perfectly satisfied. The person who wrote the original paragraph, I must therefore point out, displays either crass ignorance in terming a request preferred in the proper manner an 'incipient mutiny,' or maliciously casts a very serious reflection upon the discipline of a corps which has never yet torn the hand that fed it. I would state, in conclusion, that I was present on the occasion referred to in an official capacity, and was, therefore, a witness to the *Hampshire Telegraph's* 'incipient mutiny.' I enclose my card, not for publication, but most certainly at the service of the ignoramus who furnished the statement referred to."

Lieuts. A. Hatton, D. Mackenzie, and G. B. Stevens, R.M.L.I., embark at Portsmouth to-day in H.M.S. Serapis, for conveyance to India, whence they are proceeding to join Native regiments as probationers for the Indian S.C.

A detachment, consisting of 1 corporal and 9 privates, has been ordered to embark in H.M.'s gunboat Zephyr, to be commissioned at Sheerness on the 6th prox., for service on the China station.

Capt. V. D. Mathias, Lieuts. Trotter and Talbot, 3 serjeants, 3 corporals or bombardiers, 1 bugler, and 82 gunners, R.M.A., are under orders to proceed to Chatham, for embarkation in the Superb, on the 4th inst.

52nd Light Infantry. The death is announced of Capt. H. M. Archdale, late of the regiment, who died at Drumadravy House, Irvinestown, county Fermanagh, aged 56 years.

54th Regiment. Sub-Lieut. Gray embarks for India to-day in H.M.S. Serapis, to rejoin his native regiment as a probationer for the Staff Corps. Lieut.-Col. C. A. Thomson, Major on the Half-pay List, died at 8 Addison Road North, Notting Hill, on the 25th ult. Col. Thomson served with the regiment during the Indian Mutiny, including Lord Clyde's campaign, in Oude, in 1858-59 (medal). He joined the Army, Oct. 19, 1849; became lieut., Nov. 11, 1851; capt., Sept. 26, 1856; major, July 5, 1872; retired upon half-pay, Dec. 10, 1873; and became lieut.-col., Dec. 31, 1878.

57th Regiment. Major Bicknell is about to retire on half-pay, on account of the state of his health.

59th Regiment. The head-quarters and service companies are to embark at Bombay on the 31st inst. in H.M.S. Orontes, for conveyance to England. Lieut. Hodgkinson is a candidate for the Indian S.C. Corpl. F. McGherry is included among those killed in the defeat of Gen. Burrows's army at Maiwand on July 27. Casualties during sortie from Candahar on August 16:—Killed—Privates J. Carten and P. Kidney; died of wounds—Private P. Ward. We take the following from the *Kilkenny Moderator* of September 29:—"In Memoriam.—A Hint to British Officers.—On January 30, 1816, the British transport Seahorse, with a number of officers and men of the 59th (Second Nottinghamshire) Regiment, with several ladies and soldiers' wives on board, was wrecked in a terrific storm in Tramore Bay, and nearly all on board perished in the raging waves. Shortly afterwards, when the storm had subsided, the bodies of over 350 brave men and fair women were recovered. Of these, the bones of some now rest in the picturesquely-situated and peaceful churchyard of Drumcannon, overlooking the scene of the sad catastrophe, and a handsome monument, erected by the surviving officers of the regiment, tells the history of the sad tragedy which, on that black day in January, 1816, was enacted on the beach below. But close to the spot where the stately Seahorse was wrecked—just above high-water mark, and where the sea chants the everlasting requiem of the dead—the bones of others of the departed heroes lie buried, and it is to the present condition of the monument erected by loving, brotherly hands at this particular spot that we wish to direct the attention of the officers of the gallant 59th, and of British officers everywhere within the range of our circulation. The monument is in a sadly neglected state, and the inscription which was engraved on it more than 60 years ago to tell the dreadful story of the shipwreck is almost obliterated, and in a few years will have become wholly effaced by time and the action of the spray which sweeps over it. We are quite certain that it is only necessary to mention this fact in order that the monument may be put in a state befitting the memory of the brave dead, who, as some of our readers may remember, were on their return—some to the merry homes of England, others to the green shores of Erin—from the ever memorable Peninsular campaign, in which theyhad often marched to victory, led on by the proud flag of their regiment, on which are inscribed to this day the historic names of 'Corunna,' 'Java,' 'Vittoria,' 'St. Sebastian,' 'Nive,' 'Peninsula,' and others, each one of which will remain a household word in British court and camp so long as the name and fame of the British Empire lasts."

60th Rifles. Lieut.-Col. Henderson, Capt. Fetherstonhaugh, and 2nd Lieuts. Stuart and Hicks-Beach, 4th Batn., embark at Portsmouth to-day in H.M.S. Serapis, *en route* to India, to join head-quarters.

61st Regiment. The women and families are to be conveyed from Malta to India in H.M.S. Serapis, which sails from Portsmouth to-night with drafts.

66th Regiment. The following official list of the casualties at Maiwand on July 27, not yet reported, has reached England this week:—Killed—Lieut. Walter Olivey, Serjt.-Major Alexander Cuppage, Armourer-Serjt. Robert Colley, Colour-Serjts. Samuel Scadding, John Apthorpe, James Bayne, and Frederick Gover; Serjts. Richard Fitzgerald, Jesse Rollings, George Rice, William Symonds, John W. Cruise, William Guntrip, James Walker, and John Cosgrave; Master-Tailor Thomas H. Davis, Pioneer-Serjt. Isaac J. Spencer, Lance-Serjts. Enoch Morecraft and Robert Ireland, Corpls. 68th Light Infantry. Lieut. Way and 2nd Lieut. Vane have passed the lower-standard examination in Hindostanee.

72nd Highlanders. Capt. Brooke-Hunt embarks at Devonport on Monday in H.M.S. Serapis, for conveyance to India, to rejoin from leave.

74th Highlanders. Lieut. Skene obtains the company vacant by the retirement of Brevet Major Squirl.

78th Highlanders. Later advices from India show that 2nd Lieut. Christopher, who, it was stated, had been detained in Bombay on the staff of the Governor, was, after all, permitted to join his regiment, which he overtook at Kurrachee, just in time to go to the front with the last 200 men.

79th Highlanders. Lieut. Smith obtains Capt. Murray's company.

80th Regiment. A correspondent writes from the Cape:—"A deserter from the 80th Regt., William Trate by name, has just been arrested at Maritzburg by one of the borough police, and has been handed over to the military authorities. Trate was master-tailor of the regiment, and had ten months' French furlough."

81st Regiment. Capt. Brereton will embark at Devonport on Monday in H.M.S. Serapis, *en route* to India, to rejoin head-quarters from the depôt.

84th Regiment. Capt. Ford has obtained leave of absence to March 20, on the recommendation of a medical board.

86th Regiment. Lieut. Armstrong is a candidate for the Indian S.C., and embarks at Portsmouth for India to-day in H.M.S. Serapis.

87th Fusiliers. Capt. F. G. Vardon, late of the regiment, died on the 24th ult., aged 35 years. He joined the Army Jan. 19, 1864; became lieut., July 11, 1865; and capt. Jan. 22, 1868; and lately retired by sale of his commission.

88th Regiment. Qrmr. Morrison embarks at Portsmouth to-day in H.M.S. Serapis, *en route* to India, to take up his appointment, on promotion.

89th Regiment. Lieut. Brown embarks at Portsmouth to-day in H.M.S. Serapis, for conveyance to India, to rejoin head-quarters from leave.

90th Light Infantry. Lieuts. Strong and Lysons have passed the lower-standard examination in Hindostanee

92nd Highlanders. Qrmr. Bignell embarks at Portsmouth to-day in H.M.S. Serapis, for conveyance to India, to rejoin head-quarters from leave.

94th Regiment. There are now three companies to be given away in the regiment, and it is reported that all three will be filled by selection from outside, as the senior subaltern has not yet completed five years' service.

98th Regiment. Capt. Sparks has vacated his staff appointment as aide-de-camp to Major-Gen. Peyton at Aldershot from the 1st inst., and will be brought on to the establishment, to fill the first vacancy occurring amongst the captains. H.M.S. Serapis, which sails to-night from Portsmouth for India, is ordered to stop at Malta, and embark the women and families for conveyance to Bombay.

100th Regiment. Lieut. Denison, 2nd Lieut. Cowper, 1 serjeant, and 91 men embark at Portsmouth to-day in H.M.S. Serapis, *en route* to India.

104th Fusiliers. Major Taylor retires on a pension of £475 a year under the terms of the Royal Warrant of Sept. 6, 1878, and a step of honorary rank. Capt. Alcock, who has been a probationer for the Army Pay Department for some time, reverts to regimental duty, at his own request.

106th Light Infantry. Major C. Heathcote, who was recently promoted while serving as adjutant of the North Durham Militia, is about to retire on a pension, with a step of honorary rank.

107th Regiment. Lieut. Duberly is a candidate for the Indian S.C., and embarks at Portsmouth to-day in H.M.S. Serapis, *en route* to India.

108th Regiment, which left Clarence Barracks, Portsmouth, on the 13th ult., and has since been under canvas at Browndown, has now returned to barracks. The latter were vacated to allow the cisterns to be cleansed and some necessary repairs to be effected. There was a good deal of sickness among the nearly 500 men who were in camp, and they returned to Portsmouth four days earlier than was originally intended, owing to the wretchedly bad weather which they experienced.

109th Regiment. Lieut. Kaye embarks in H.M.S. Serapis to-day at Portsmouth, for conveyance to India.

Rifle Brigade. Major Dugdale, Capt. Sir Maurice FitzGerald, Bart., and Lieut. Lord Ribblesdale, 1st Batn., embark at Portsmouth to-day in H.M.S. Serapis, *en route* to join head-quarters in India. Capt. the Hon. E. Noel has been transferred from the 2nd to the 1st Batn., on probation.

Ordnance Store Department. Assist.-Comy.-Gen. H. F. Travers has been ordered to Malta to assume charge of the department in Gibraltar, having left Assist.-Comy.-Gen. Gatt, at Gibraltar, in charge at the latter station.

Medical Department. Surg.-Major T. Rudd, M.D., and Surg. P. G. Ievers have passed the lower-standard examination in Hindostanee. Surgs.-Major Wills, C.B., Hector, Cummings, O'Sullivan, O'Brien, Haines, and Fraser, and Surgs. Leckie, Emerson, and Garde embark at Portsmouth to-day in H.M.S. Serapis, *en route* to India. A correspondent writes:—"I cannot quite coincide with the comparisons made between the Veterinary Department and what is called its 'sister department,' and although ready to advocate the general outline of the grievances of the veterinary officers, yet it must be admitted that the Army Medical Department has passed through a very trying period, and is now satisfied that, as a scientific corps, they can rest in peace. There are times when the responsibility of Army surgeons are very great indeed, and of a far more serious description."

Veterinary Department. The *Irish Times* contains the following, in reference to a paragraph which appeared in our issue of the 18th ult.:—"A late number of a military contemporary refers to the unfair manner in which the Army Veterinary Department is treated as compared with the Army Medical Department. The sum of £6,400 is expended annually in providing good-service pensions for the officers of the latter department, while the former enjoys something like £50 per annum. It is a curious phenomenon that the officers of so deserving a branch of the Service should be treated in this manner, and the paper referred to gives a striking example in naming Mr. Gloag (nearly fifty years a V.S.) as one of the undistinguished. Mr. Gloag was principal Vet.-Surg. in the Crimea, and at the time of his retirement he was senior of his rank. A reference to the *Army List* shows that he received the following decorations:—Fifth Class of the Order of the Medjidie; fifth class of the Legion of Honour; Crimean War medal, with clasps for Alma, Balaclava, Inkerman, and Sebastopol, with the Turkish War medal. Since his retirement, Mr. Gloag has held the appointment of Vet.-Surg. to the Royal Irish Constabulary. In spite of his services and the length of time he has served under the Crown, Mr. Gloag, in the words of our contemporary, has not been made a C.B., nor has he received a reward for distinguished services. The case of Mr. Gloag is typical of the way in which the department is treated."

The Auxiliary Forces.

MILITIA.

2nd Somerset. Capt. R. J. Bisdee, formerly of the regiment, died at 3 Chepstow Villas, Bayswater, on the 24th ult., aged 69 years.

YEOMANRY CAVALRY.

North Somerset. The troops comprising the regiment, of which the Earl of Cork is the lieutenant-colonel commandant, completed their annual eight days' training at Bath on Saturday. On the previous day they were inspected by Col. Blundell, Inspector of Yeomanry, who at the close of the evolutions highly complimented the men on their general equipment, good mounts, and steadiness. Lord Cork also addressed a few words to the officers and men, in which he expressed his gratification at the manner in which they had behaved, and alluding to past bad seasons, expressed the hope that, having a good harvest this year, things would be more largely improved when next they met.

The *Standard* says:—"For the present the War Office has abandoned all intention of applying for the funds necessary for the purchase of Stensall Common, Yorkshire, which had been selected for the new tactical camp for the North of England."

WAR OFFICE, PALL MALL, Sept. 21, 1880.

The Queen has been graciously pleased to give orders for the appointment of Lieut.-Gen. D. M. Stewart, K.C.B., and Major-Gen. F. S. Roberts, K.C.B., to be Ordinary Members of the Military Division of the First Class, or Knights Grand Cross of the Most Honourable Order of the Bath.

ARMY GAZETTE.

[Where not otherwise specified, the following commissions and announcements bear date Sept. 29, and the current year must be understood.]

WAR OFFICE, PALL MALL, Sept. 28, 1880.

Royal Horse Guards—Surg. W. M. Collins, M.D., from the Scots Guards, to be Surg., vice Melladew, M.D., promoted.

95th Foot—Lieut. F. E. Trower to be Capt., vice Bevan, retired (Aug. 25); Supernumerary Lieut. H. L. Smith-Dorrien to be Lieut, vice Taylor, appointed a probationer for the Indian S.C. (Aug. 16).

98th Foot—Capt. and Brevet Major H. R. Stracey retires on a pension, with the hon. rank of Lieut.-Col.

100th Foot—Lieut.-Col. R. D. Barrett, from the 19th Foot, to be Lieut.-Col., vice Brevet Col. Cook, who exchanges; Lieut. G. H. Weller, from 109th Foot, to be Lieut., vice Browne, retired (Aug. 25).

102nd Foot—Major J. E. V. Rogers retires on half-pay; Lieut. A. H. Lindop, from the 80th Foot, to be Lieut., vice Way, who exchanges; 2nd Lieut. P. Parkinson to be Lieut., vice Lysaght, promoted (July 21).

103rd Foot—Supernumerary Capt. E. L. Pelly-Clarke to be Capt., vice Davidson, retired on half-pay (Aug. 25).

104th Foot—2nd Lieut. H. F. Williams to be Lieut., vice Butler-Kearney,p romoted (July 7).

105th Foot—Lieut. V. E. Hunt, from half-pay, late 2nd West India Regt., to be Lieut., vice Wiggins, promoted.

107th Foot—2nd Lieuts. F. H. Yate, from the 35th Foot, to be Lieut., in succession to Lieut. Gem, 35th Foot, promoted (Feb. 10); C. L. A. Ramus, from the 35th Foot, to be Lieut., vice Yate, appointed a probationer for the Indian S.C. (March 24).

108th Foot—Lieut. A. C. Hill to be Capt., vice Apthorp, seconded from Aug. 21, 1880, for service as an Adjt. of Auxiliary Forces.

109th Foot—2nd Lieuts. G. H. Weller, from the 100th Foot, to be Lieut., vice Lay, appointed a probationer for the Indian S.C. (May 5); W. W. Battiscombe to be Lieut., vice Hoyes, promoted (July 7).

Rifle Brigade—Lieuts. the Hon. E. Noel to be Capt., vice Boyle, seconded for service on the Staff (Aug. 20); G. Montagu, Lord Bennett, resigns his commission; 2nd Lieuts. L. G. Russell to be Lieut., vice Fergusson, seconded for service on the Staff (Aug. 18); M. U. Wesland to be Lieut., vice the Hon. E. Noel (Aug. 20); S. Kerr, from the 25th Foot, to be 2nd Lieut. on augmentation; Lieuts. R. J. Maude to be Adjt., vice Lieut. the Hon. O. Cuffe, promoted; G. Cockburn to be Instructor of Musketry, vice Lieut. Maude, appointed Adjt. (both dated Aug. 7).

1st West India Regiment—Lieut. A. B. Murray has been appointed a probationer for the Indian S.C. (Aug. 14).

2nd West India Regiment—Lieut. W. C. Dutton retires on temporary half-pay.

Ordnance Store Department—Deputy-Comy.-Gen. J. O. Hamley, C.B., having attained the prescribed age, has been placed on retired pay from Sept. 25, with the hon. rank of Comy.-Gen. of Ordnance; Deputy-Assist.-Comy.-Gens. G. T. Pett and W. R. Mayo to be Assist.-Comy.-Gens. of Ordnance (the former dated Aug. 29, the latter Sept. 11); Assist.-Comys. G. R. Atkinson and C. H. Ozanne to be Deputy-Assist.-Comy.-Gens. of Ordnance (the former dated Aug. 29, and the latter Sept. 11).

Army Pay Department—The under-mentioned officers having resigned their combatant commissions to be Paymasters, with the hon. rank of Capt. in the Army :—Capts. S. Churchill, from the 44th Foot (Oct. 31, 1879); R. R. B. Ternan, from the 3rd Foot (dated March 3, 1880, such antedate not to carry pay prior to Sept. 29, 1880).

Medical Department—Brigade-Surg. J. C. H. Wright, M.D., has been granted retired pay, with the hon. rank of Deputy-Surg.-Gen. (Aug. 25); Surg.-Major C. G. Irwin, M.B., from half-pay, to be Surg.-Major (Aug. 24).

Army Hospital Corps—Capt. of Orderlies J. Andrews retires on temporary half-pay.

Veterinary Department—Vet.-Surg. on probation G. Aitken to be Vet.-Surg. (March 6).

Army Schools—Sub-Inspector J. Belling is granted retired pay.

Half-pay—Lieut. H. F. Jackson, from the 67th Foot, to be Capt.

BREVET.

Majors G. Johnston (March 4), W. H. Wroot (Aug. 25), L. G. Rodney (Aug. 26), C. E. Macdonald (Aug. 28), and A. Macintosh (Sept. 1), all retired from Royal Marine Light Infantry, to have the hon. rank of Lieut.-Col.; Deputy-Assist.-Comy. J. Comber, Bengal Establishment, to have the hon. rank of Lieut. (April 16).

The under-mentioned officers to be Colonels :—Lieut.-Cols. J. H. P. Malcolmson, C.B., Bombay S.C.; W. B. Thomson, Bengal S.C.; R. T. Snow, Madras S.C. (all three dated June 8); M. W. Willoughby, Bombay S.C.; H. H. Foord, Madras S.C.; H. E. Whish, Bengal S.C.; C. J. R. Bell, Madras S.C. (all four dated June 9); J. W. Hoggan, Bengal S.C.; J. T. Harris, Bengal S.C. (both dated June 27); Capt. and Brevet Lieut.-Col. J. T. Ussher, half-pay, Unattached, Staff Officer of Pensioners (Sept. 15); Lieut.-Col. T. Rowland, 5th Foot (Sept. 22).

The following promotion to take place in succession to Gen. Sir A. Little, K.C.B., Col. of the 9th Lancers, placed upon the Retired List on Sept. 7, 1880 :—Lieut.-Gen. W. N. Custance, C.B., Col. of the 11th Hussars, to be Gen. (Sept. 7).

MEMORANDA.

Capt. and Brevet Col. J. T. Ussher, half-pay, Unattached, Staff Officer of Pensioners, retires on a pension, with the honorary rank of Major-Gen. (Oct. 1); Hon. Lieut.-Col. C. B. Brown, late Capt. 8th Foot, has been permitted to commute his pension (Sept. 1); Major J. E. V. Rogers, half-pay, late 102nd Foot, retires on a pension, with the honorary rank of Lieut.-Col.; Major G. W. Wood, half-pay, late 56th Foot, retires from the Service by the surrender of his half-pay; Hon. Major G. M. Douglas, late Capt. 33rd Foot, has been permitted to commute his pension (Sept. 1).

RESERVE OF OFFICERS.

In the list of appointments to the rank of Capt. notified in the *Gazette* of July 6, 1880, for "Captain" Haighton Wilkins, 2nd Regt. Royal Guernsey Militia, read "Major" Haighton Wilkins, &c.

To be Majors :—Major and Hon. Lieut.-Col. F. Creighton, late Royal Marine Light Infantry; Major and Brevet Lieut.-Col. J. T. N. O'Brien, C.M.G., late half-pay.

To be Captains :—Capts. L. S. Benson, Royal South Gloucester Militia; G. John, Viscount Melgund, 1st Roxburgh Mounted Rifle Volunteer Corps.

To be Lieutenants :—Capt. R. Harrison, Royal Glamorgan Light Infantry Militia; Lieut. J. B. Miller, Forfarshire Light Horse Volunteer Corps, late Lieut. 8th Hussars.

To be 2nd Lieutenants :—Lieut. the Hon. G. N. Dawnay, Yorkshire Hussars Yeomanry Cavalry; Lieut. E. G. F. Tytler, the Highland Light Infantry Militia.

INDIA OFFICE, Sept. 30, 1880.

The Queen has approved the following promotions among the officers of the Staff Corps and Indian Military Services made by the Governments in India :—

BENGAL STAFF CORPS.

To be Majors :—Capts. T. R. Cowie (July 4, 1880), and E. A. Money (July 16, 1880).

To be Captains :—Lieuts. C. G. Mansel, C. T. Bingham, C. A. R. Sage, F. F. R. Burgess, C. J. Jamieson (all five dated July 8, 1880); C. Dempster (July 9, 1880); E. Bruce (July 10, 1880); J. F. Rivett Carnac (July 22, 1880).

BENGAL ARMY.—INFANTRY.

To be Majors :—Capts. H. J. Peet (June 26, 1880); S. E. Becher (July 7, 1880).

MADRAS STAFF CORPS.

To be Lieutenant-Colonel :—Major R. C. Budd (July 20, 1880).

BOMBAY STAFF CORPS.

To be Lieutenant-Colonel: Major S. Rimington (July 20, 1880).

To be Major :—Capt. C. Hay (June 27, 1880).

BREVET.

To be Lieutenant-Colonel :—Major F. S. Cherry, Madras Cavalry, in succession to Lieut.-Gen. B. R. Powell, Bombay Infantry, retired (May 3, 1880).

To be Majors :—Capts. (now Majors) C. W. Babington, Bengal Infantry, in succession to Lieut.-Gen. Powell (May 3, 1880); Joseph George Thomson Carruthers, Bengal Infantry, in succession to Lieut.-Gen. G. M. Hill, Bengal S.C., retired (May 25, 1880).

THE LUCKNOW DINNER.

The second annual dinner in commemoration of the entry into Lucknow of the force under Gens. Havelock and Outram on Sept. 25, 1857, was held at the Albion Hotel, Aldersgate Street, on Saturday last. The chair was taken by Lieut.-Gen. Crommelin, C.B., R.E., and the other officers present were :—Major-Gens. Willis, C.B., late 84th Foot; Sir H. Havelock-Allan, V.C., C.B., M.P.; Dodgson, C.B., late Bengal Infantry; and Gordon, C.B., late A.D.C. to Brigdr.-Gen. Neill; Cols. G. D. Barker, 64th Foot; W. W. Lynch, 1st Batn. 10th Foot; Hastings, 62nd Foot; Chamier, Bombay S.C., late A.D.C. to Gen. Sir J. Outram; Delafosse, C.B., 101st Fusiliers; and Blake, Suffolk Yeomanry Cavalry, late Military Train; Majors G. Birch, late 1st Bengal European L.C.; H. B. Savory, late 78th Highlanders; and Sir H. Goodrich, late 90th L.I.; Capts. P. L. Phipps, late 90th L.I.; and Robertson, late 78th Highlanders; Deputy-Inspectors-Gen. J. Gee, V.C., C.B., late 78th Highlanders; and Dominichetti, M.D. The chairman gave "Her Majesty the Queen and Empress of India," which was enthusiastically received. This was followed by that of "The Prince and Princess of Wales, and the rest of the Royal Family." The chairman then rose, and amidst the most profound stillness, said—Gentlemen, my next toast, though it will doubtless give rise to strong emotions in the hearts of each of you, needs no other words of commendation or recommendation. It is "The tribute of a solemn thought on the memory of our departed comrades, coupled with the names of our beloved commanders, Havelock, Outram, and Neill." The toast was drunk in solemn silence. Sir Henry Havelock-Allan proposed, "The health of our living though absent comrades, whom we wish with us." He said this was an occasion on which it was difficult for them, assembled there after a lapse of nearly a quarter of a century, not to feel emotions too deep for expression. The toast he had the honour of proposing was the health of their living comrades now serving the Queen in different parts of the world, and to rejoice with them as representatives of the day they celebrated, that they were still in a position to do so. He had before him a list of a few names to revert to, any one of which would touch a chord of sympathy and feeling in all their hearts. In doing so he would commence with the honoured and distinguished name of Gen. Lord Napier of Magdala, the chief representative of the honourable corps of Royal Engineers. It would, he felt, be almost an impertinence to recall to their minds services that were engraved deeply in the history of the world. At the time of the event they were celebrating, Lord Napier of Magdala occupied the anomalous position of being lieut.-col. in chief of the Staff to Sir James Outram. They would all recollect that Gen. Outram, with a generosity and nobleness of heart that has been always a theme of admiration in military circles, had put himself in the peculiar position of resigning the command to his (Sir Henry's) father, and Col. Napier, with the simplicity and kindness that always distinguished him, bent himself at once to the necessities of the moment, and condescended to share the duties with him that he was fulfilling upon his father's staff. Lord Napier was now, and deservedly so, in the fore-front of British commanders, and would in all probability have had the command had European affairs here called upon English troops to take the field two years since. Had he been so called on he was sure they would have found him in 1878 as full of life, vigour, and energy as in the past. Sir Henry then, at considerable length, detailed the services of Sir Vincent Eyre, Col. Hudson, Col. Palliser, Major-Gen. Macpherson, Sir A. Home, Lieut.-Gen. Olpherts, and others, all of whom they would like to see with them were they not kept elsewhere by the exigencies of the Service. After referring to the fact that they had more present than last year, he expressed a hope that as their anniversary dinner was better known, they might hear from some of their old comrades of whom in the course of years they had lost sight. The chairman then proposed "Success to future anniversaries." Unfortunately he found himself, simply in virtue of his seniority of rank called upon a second time to preside at what, he trusted, might be a perpetual celebration of the anniversary of Sept. 25, 1857. When he was asked by Major Savory, the hon. secretary, to take the chair a few days ago, he was nearly doing the unsoldierlike action of running away, but love for his comrades, whom he hoped he might call his friends, prevailed over his disinclination to make a speech. There had been some question as to whether there was a relief, or a defence, or a reinforcement. His own conscience had always told him they were engaged in the noblest duty soldiers could be occupied in, and he had always thanked Providence that his education as a soldier had had so glorious an object. There could be no denying that on that day the God of battles was with them, and what force could ever despair of success when it was led by such a God-fearing, God-trusting, and God-invoking man as the late Sir H. Havelock? The toast of "The Health of the Chairman" brought the proceedings to a close.

"A Survivor" writes :—"In your issue of Sept. 25, you gave a list from the *Citizen* of the surviving officers of the force under Havelock and Outram, which relieved Lucknow on Sept. 25, 1857. The names of three officers should be added to the list, viz. :—Major J. W. D. Adair (retired), then adjutant 5th Fusiliers; Deputy-Inspector-Gen. W. K. Swettenham, half-pay, then staff surgeon 2nd class, in medical charge, 5th Fusiliers; Deputy Surg.-Gen. J. Irvine, then staff assist.-surg., in charge of Maude's Battery, R.A. Another error is the insertion of the name of Deputy-Inspector-Gen. R. Domenichetti, as that officer remained at the Alumbagh until the relief of Lucknow by Sir Colin Campbell in November. A reference to Hart's *Army List* will show the correctness of above."

We are informed by the India Office that, owing to the return of troops from Afghanistan, the Government of India have been able to reopen the grant of furlough, on private affairs, to British officers.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army, of not less than 50 years of age.

There are 57 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £617, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £2,300 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

"ATALANTA" RELIEF FUND.

The sum required for the relief of the numerous dependent relatives is £20,000.

Subscriptions are earnestly requested to be paid to "ATALANTA" RELIEF FUND, at Bank of England; Messrs. DRUMMOND and Co, London; at any local bank at Portsmouth; or by

Commander JOHN W. F. HARVEY, R.N., Hon. Secretary.

Portsmouth Branch, H.M.'s Dockyard, Portsmouth.

THE AMERICAN WALTHAM WATCHES are the best timekeepers in the world.—HENRY W. BEDFORD, No. 67 Regent Street (next to St. James's Hall). has the largest retail stock in England to select from. Silver cases from £2 10s; gold cases from £8 8s. Sent securely packed by mail to all parts of the world.

AMERICAN WALTHAM WATCHES.—The wonderful and unprecedented success of these Watches over all others submitted for competition at the Philadelphia, Paris, and Sydney Exhibitions, together with the official recognition of their merits received from Governments and important Corporations, and numerous testimonials from all classes, stamp them as unequalled.—HENRY W. BEDFORD, Agent for the Company, 67 Regent Street, next to St. James's Hall. Price lists sent post free with all particulars.

BEDFORD'S CATALOGUE of WALTHAM WATCHES, describing all the varieties manufactured by the Company, including the finest movements, in gold and silver cases, made expressly for his house, sent free by HENRY W. BEDFORD, Agent for the Company, 67 Regent Street (next to St. James's Hall).

Army and Navy Gazette.

LONDON, SATURDAY, OCTOBER 2, 1880.

WE have been looking over the new Military Prison Regulations, lately published by the War Office, which are to supersede and cancel the excellent and explicit Regulations of 1863; and we have taken the trouble to compare them more minutely, as we have on more than one occasion given our opinions at some length on the evils of imprisoning soldiers convicted of purely military offences in ordinary gaols. If these new Regulations are the result of the deliberations of the Committee which Colonel Stanley stated in the House on March 2 last had been "appointed partly in consequence of a promise he made in the House, and partly in consequence of what passed on the Army Discipline Bill," we must express our disappointment at what has emanated from their "practical researches on the best mode of dealing with military prisoners," for it would appear that those who have been instructed with the compilation of the new rules—and they assuredly could have been no military men—had studied to deprive them of every military element. The term "soldier" seems to have been carefully avoided throughout, and now soldiers, directly they have been tried by a court-martial of officers, and sentenced to imprisonment, are to be in every sense treated as civilians, and all military associations and aspects are to be obliterated. We will take, for instance, Rule 30. A military prisoner, by the old Regulations, was on admission "to sleep, for the first week, *in the same manner as a soldier on guard*, and subsequently the third-class prisoners are to sleep *as on guard* every other night," the wooden pillow and bed-board used for this purpose corresponding with the wooden raised platform in every guard-room, the soldier on guard lying down with his clothes on, and his knapsack for his pillow. But now "a prisoner shall, during the whole of his sentence, when it does not exceed one month, and during one month of his sentence when it exceeds one month, be required to sleep *on a plank bed*"—that bug-bear of philanthropists, which has been made the subject of so much sensational agitation—in the same manner as Bill Jones who gets six months in Clerkenwell for having, in a drunken fit, playfully dragged his innocent child out of bed and dashed it on the floor, because its mother had not prepared his supper to his liking. By the same Regulation, it would appear that this ordeal of plank bed is imperative for the first month of a soldier's imprisonment; but the rule adds that "the prisoner shall be allowed the opportunity of earning, by industry, (?) the gradual remission of this requirement *after the expiration of one month.*" The admirable system of classification of military prisoners provided for in the old rules, by which a judicious distinction was made between old offenders and those sentenced for the first time, is abolished. Now, a recruit who gets 56 days for a breach of discipline and the man who has made desertion and fraudulent enlistment a paying business, and, after conviction for the third or fourth time, is sentenced to twelve months' imprisonment, are both on the same footing as regards prison treatment; both have to sleep a month on a plank bed, both to perform for the first month "hard labour of the first-class, which shall consist of work at the tread-wheel, shot drill, crank, capstan, stone-breaking, or such other like description of hard, bodily labour," and no difference to be made in the discipline. Rule 26 directs that, "Every prisoner shall sleep in a cell by himself; epileptic prisoners, or prisoners labouring under diseases requiring assistance or supervision in the night, may at any time be placed by order of the medical officer with not fewer than two other *male* prisoners." Are we to gather from this last restriction as to sex that *female* prisoners are to be admitted to Military prisons? We were under the impression that any soldier epileptic, or seen in a fit by an Army medical officer, was immediately to be brought before a medical board, and discharged as unfit to remain. We had every reason to hope that the careful researches and deliberations of the Committee would have resulted in soldiers who were sentenced by their officers to punishment for military crimes being placed under military discipline and control, and that more military prisons would have been established for this purpose; but it would appear that the few military prisons which are allowed to exist—we believe there are but five, and we do not congratulate the old Army officers who are governors of them on the change—are only so in name, for their standard and organisation has now been brought down to that of civil jails, to which soldiers will still be sent promiscuously with thieves and pickpockets. We trust that this matter will be taken up by some of our military Members, and that Mr. Childers will, during the recess, find time to give the subject his careful consideration, for we feel sure he will find no department of the Service more worthy of it, or that claims it more earnestly, than military prisons.

The Military Secretary will hold a Levée on Tuesday next, at 12 o'clock.

The Duke of Cambridge, attended by Colonel Stephens, arrived at Gloucester House, Park Lane, on Thursday morning from Paris, *en route* from Germany. His Royal Highness has resumed his duties at the War Office, and will proceed next week on his autumn tour of inspection.

Major-General H.R.H. the Duke of Connaught, K.G., has entered upon his command of the 3rd Infantry Brigade at Aldershot, vice Major-General F. Peyton, whose period of Staff service has expired.

Captain the Hon. O. F. S. Cuffe, Rifle Brigade, has been appointed aide-de-camp to H.R.H. the Duke of Connaught at Aldershot.

Consequent upon the departure of Major-General F. Peyton from Aldershot, Major-General W. G. Cameron, C.B., commanding the 2nd Brigade, succeeds to the pay and allowances of a major-general on the Staff.

Arrangements have been made by which a military secretary is again to be allowed on the staff of the General officer commanding the troops at the Cape, and Lieutenant-General the Hon. Leicester Smyth, C.B., who leaves England on the 21st inst., by the mail steamer *Nubian*, takes out Lieutenant-Colonel W. E. Montgomery, Scots Guards, to fill the position. Colonel Montgomery served at the Cape during the later phases of the Zulu campaign, and rendered valuable service to Major-General Newdigate's column, his name being more than once brought to notice. Captain H. E. Colvile, Grenadier Guards, has been appointed aide-de-camp to General Smyth.

Colonel A. L. Annesley, half-pay, late 11th Hussars, who has been employed for the last two years as Assistant-Adjutant-General at the Horse Guards, a position in which he has displayed a great amount of energy, combined with much practical knowledge of the wants of the Service, has been offered and has accepted the appointment of Adjutant-General of the Bombay Army, vacant by the lamented death of Brigadier-General H. F. Brooke in Afghanistan. The Bombay Army is to be congratulated upon having thus secured the services of one of the ablest and most popular cavalry officers on the British Establishment, and one, be it remembered, who has had considerable experience of India, in which country he served for many years in command of his regiment.

General Sir Thomas M. Steele, K.C.B., has taken up the command of the troops in Ireland from the 1st inst., vice General Sir John Michel, G.C.B., whose period of service in the appointment has expired. General Steele's staff consists of Lieutenant-Colonel P. D. Boyle, Grenadier Guards, assistant military secretary; and Brevet Major H. R. Y. Browne, Royal Horse Artillery, and Captain H. R. L. Howard, 16th Lancers, aides-de-camp.

General Sir John Michel, G.C.B., is to be placed on the Retired List from the 1st inst., on vacating the command of the troops in Ireland. General Michel is 76 years of age, but was allowed to retain his appointment on the promulgation of the new Promotion Warrant as a privilege, for which provision is specially made in the Warrant.

Lieutenant-Colonel W. C. Justice, half-pay, late of a Depôt Battalion, has been appointed Assistant-Adjutant and Quartermaster-General in the West Indies from the 1st inst., vice Lieutenant-Colonel C. Steel, unattached, who has been obliged to resign in consequence of ill-health, after having held the position since July, 1879.

Aldershot has lost this week one of its best known and most popular Staff officers in the person of Major Wilkinson Shaw, 102nd Fusiliers, who, as we lately announced, is retiring from the Army in order to devote himself to the preparation of candidates for the Army. Major Shaw vacated his appointment as garrison instructor on the Staff of the Division from the 1st inst., after having held it since January, 1873, being succeeded by Brevet Lieutenant-Colonel G. U. Prior, 100th Regiment.

Lieutenant-Colonel F. J. Hutchinson, half-pay, late 64th Regiment, who joins Major Shaw in the work upon which he is about to enter, also retired from the 1st inst., handing over his appointment as garrison instructor at Devonport to Captain F. Stringer, 23rd Fusiliers.

Colonel G. H. Waller, half-pay, late 7th Fusiliers, has relieved Colonel H. A. Welman, A.D.C., from the 1st inst., as Assistant-Adjutant and Quartermaster-General of the Eastern (Colchester) District.

The list of successful candidates at the recent examination for entrance to the Staff College has been forwarded from the office of the Director of Military Education to the Adjutant-General's Department, and will appear among the General Orders promulgated on the 1st inst. Up to last night, however, no copies of the General Orders had left the printer's hands, so that no information can be given. Competitors, however, may expect to know the result of the examination early next week.

We understand that the Committee which lately assembled to report upon the organisation of the Veterinary Department have recommended that the regimental system be abolished, and that the establishment and pay of the junior ranks in India be increased, suggesting, as an alternative measure, that the Indian Government establish a separate Veterinary Department for that country. Attention has also been directed to the state of the Department as regards honours and rewards; so that we hope soon to see it obtain its fair share of these latter. We very much regret, however, that hitherto not one name has been submitted from India for reward, although the number of veterinary-surgeons employed in the Afghan war must have been from first to last nearly, if not quite, double as many as of those who served in South Africa, and who were nearly all mentioned favourably. Treatment such as this is not likely to induce junior officers to rush to India, in the hope of distinguishing themselves. The subject of relative rank has not, we believe, been touched upon by the Committee; so that there still remains a very important item in the category of wrongs to be redressed. In these days, improved relative rank means something more than mere sentiment. It means improved social status, increased allowances, and prior choice of quarters in England; and in India, the very substantial addition of the batta of the higher rank, amounting to a difference of nearly 200 rs. per mensem in a captain's, as compared with a lieutenant's, pay. It is difficult to induce those in high places to recognise the value of relative rank; but were the opinions of the whole of the Army veterinary-surgeons obtained as to what they considered their greatest grievance, promotion and relative rank would be carried by a very large majority; and until this is satisfactorily set at rest, no amount of other concessions will thoroughly satisfy Army veterinary-surgeons.

A Committee is now sitting at the Staff College, to report upon the best form of plane table and other instruments used in military sketching, for adoption in our Military educational establishments.

The republication in a morning paper of certain proposals of a defunct Committee regarding the classification and nomenclature of the Regiments of the Line, has given rise to strange misapprehensions, not altogether unjustified by the manner in which the paragraph was referred to by our contemporary. It seems to have been taken as an accomplished fact that the recommendations and suggestions, some crude and ludicrous, of the Committee had been adopted by the Government, and that the War Office was about to give effect to them; and from heavy leaders in the daily papers, down or up to scarcely less ponderous jokes in the funny journals, there have been all sorts of writing, and much display of learning and wit, anent the new territorially named army, as well as criticisms, emendations, and protests, put in print respecting it. We believe that Mr. Childers has not by any means advanced so far in the consideration of the vast subject which lies before him, in the shape of Army reform, as to have got to the nomenclature, very far from it. The influence of our Indian Empire on our military organisation becomes more weighty, just as the necessity for great changes in the Indian Army presses with increasing force on the attention of the Indian and Imperial authorities. There is no prospect of any decrease in the strength of the European garrison in India being feasible, and there are difficulties, which recent events have not tended to diminish, in keeping up the Native Army with eligible recruits that must be met and removed.

The 48th Regiment has been added to the list, published recently by the Quartermaster-General's Department in India, of the Infantry battalions which will return to England during the present relief season. Although the 73rd and 83rd Regiments have been placed under orders for embarkation, there seems to exist some doubt as to whether they will proceed home, and the friends of the two corps would therefore do well not to calculate upon their appearance in England, until further information reaches them.

The programme of reliefs to be carried out by the several transports to be engaged this season in conveying troops from India has not yet been completed. All that is known at present is that the *Euphrates* will embark the 48th Regiment (at Bombay) on October 26, the 59th embarking in the *Orontes* on October 31, the 2nd Battalion 1st Regiment in the *Malabar* on November 5, the 1st Battalion 5th Fusiliers in the *Jumna* on November 8, and the 1st Battalion 6th Regiment in the *Serapis* (at Aden) on December 13.

We learn from Constantinople that Second Lieutenant Edgar Vincent, Coldstream Guards, who has been acting for some time past as private secretary to Lord Edmund FitzMaurice, has been retained at Constantinople as Assistant Military Secretary, and has gone to Vienna for a short time on an important mission connected with his post. The most flattering accounts are furnished of Mr. Vincent's services, and his selection for duty with the Embassy is said to have been a well-deserved acknowledgment of his zeal and ability.

We regret to hear that Major-General R. Carey, C.B., Deputy Judge-Advocate, has been seriously ill, on the Continent.

We understand that the horses of the King's Dragoon Guards, when sold last month by auction at Pretoria, realised the average price of £23.

The Report of the Committee on the Scientific Corps, now sitting at the War Office, will, it is expected, be issued next month.

We earnestly hope the new Deputy-Adjutant-General of Artillery will thoroughly inquire into the present system of appointments to the depôts of the Royal Regiment of Artillery, which for some years past has been the cause of the gravest scandals. We are again led to make these remarks by instances which have occurred, in which officers, invalided from foreign stations, have been unable to obtain that employment at the depôt at home, which, had they belonged to the Infantry or Cavalry, would not have been denied them.

We are informed that Lieutenant-Colonel De Winton, Royal Artillery, will not be seconded. Though acting as Military Secretary to the Governor-General of Canada, he will be borne on the strength of his regiment,—a curious anomaly this, peculiar, we suppose, to the Scientific Corps.

It is announced from Berlin that the Emperor William has conferred upon his Royal Highness the Duke of Cambridge the Grand Cross of the Royal Order of the House of Hohenzollern.

The Navy.

ADMIRALTY, Sept. 24, 1880.

Staff Surgeon Henry Hadlow has been promoted to the rank of Fleet Surgeon in her Majesty's Fleet, with seniority of 20th inst.

Royal Naval Artillery Volunteers (London Brigade)—Walter Gibb Klein, Esq., to be Sub-Lieutenant (Sept. 24).

ADMIRALTY, Sept. 25, 1880.

The following promotion has been made:—Sub-Lieutenant Henry How Douglas to be Lieutenant in her Majesty's Fleet, with seniority of 20th inst.

ADMIRALTY, Sept. 27, 1880.

ROYAL MARINE FORCES.

The following promotions, dated Sept. 20, 1880, have taken place in the Royal Marine Light Infantry:—Captain and Gunnery Instructor Thomas Martin Whale to be Major, vice Fonblanque, retired; Lieutenant and Adjutant John Frederick Luxmoore to be Captain, vice Whale; Mr. William Arthur Churchill Grant has been appointed a Lieutenant in the Royal Marine Light Infantry (Sept. 1).

APPOINTMENTS.

Captains—G. L. Sulivan, to the Royal Naval College, Greenwich, for study; Thomas Le H. Ward, to the Superb.

Commanders—R. R. Custance, to the Flamingo; H. F. Hughes-Hallett, to the Superb.

Staff Commander—A. J. Burniston, to the Superb, when commissioned.

Lieutenants—Benjamin D. Acland, Alfred Pigott, Edward W. Hodgkinson, Edward A. Richmond, Frederick Roope, John L. Eagles, William L. Down, and Thomas H. Fisher, to the Cambridge, for a short course of gunnery duties, commencing on October 2; H. S. Lake, to the Vernon; E. G. Festing, to the Warrior; R. F. H. Henderson, H. J. May, F. H. Rogers, C. J. Graves-Sawle, and T. G. Fraser, to the Superb, when commissioned; A. W. Rogers, to the Cambridge; W. F. G. Freeland, to the Lord Warden; H. F. J. Wyatt, to the Asia; H. C. Burrows, to the President; Thomas Hadley, to the Royal Adelaide; Arthur Loring, Thomas P. Walker, Henry J. Keans (for navigating duties), to the Flamingo, when commissioned; T. J. Oswell, to the Tenedos; G. W. A. Pollard, to the Zephyr.

Navigating-Lieutenants—C. B. Clark, to the President, to study at the Royal Naval College, Greenwich; C. G. J. Cator, to the President.

Sub-Lieutenants—T. F. C. Dundas, to the Zephyr; H. W. Meredith, to the Tourmaline.

Navigating Sub-Lieutenant—G. H. Thunder, to the Jackal.

Midshipmen—A. G. W. Moore and the Hon. P. B. Tyrwhitt, to the Superb; G. M. Courage, to the Curaçoa.

Naval Cadets—W. B. S. Wrey and B. W. R. Hall, to the Superb.

Chaplain—Rev. Horatio W. Millett, to the Serapis.

Chaplains and Naval Instructors—Rev. James Payton, to the Tourmaline; Rev. W. L. Tucker, to the Boscawen; Rev. John Brabazon, to the Curaçoa.

Fleet Surgeons—J. Caldwell, to the Nankin; John Frederick Mitchell, to the Téméraire.

Staff Surgeon—A. B. Trousdell, to the Duke of Wellington, for Portsmouth Dockyard.

Surgeons—A. T. Corrie, to the Flora; W. Thompson, to the Rambler; S. Sweetnam, to the Brilliant; D. B. Bookey, to the Cambridge; John Hunter, to the Flamingo.

Paymasters—F. R. G. Wright, to the Flamingo; W. F. Woods, to the Warrior; Francis St. J. S. O'Neill, to the Superb.

Assistant-Paymasters—J. A. Wood, to the Crocodile; H. Marsh, to the Indus; R. H. Clark, to the Zephyr.

Engineers—R. S. W. Earl, to the Triumph; W. E. Prescott, to the Asia; G. G. Smith, to the Flamingo; William T. Cope and Henry T. Liversidge (for temporary service), to the Superb; Richard S. Willcocks, to the Mallard; James J. Warren, to the Whiting; George Brewer, to the Zephyr.

Assistant-Engineers—Q. W. King, J. C. Edmonds, H. J. Oram, and J. H. W. H. Ellis, to the President, additional, for study at the Royal Naval College, Greenwich; J. Bayley, to the Alexandra; Henry Gallery, to the Superb; Henry Attwool, to the Asia, additional, for service in the Mercury.

Acting Assistant-Engineers—J. H. Slade, D. J. Bennett, C. W. Gregory, F. T. W. Curtis, C. J. Garfett, J. J. Carey, A. E. L. Westaway, S. Rawling, J. E. Jenkins, A. W. Gibbs, A. W. Turner, S. Hockey, T. C. E. Hughes, A. H. Slade, C. F. H. Tilbrook, A. V. Blake, W. C. Tazewell, and H. Wallis, to the President (additional), for study at the Royal Naval College, Greenwich.

Clerks—C. M. Mobberley, to the Crocodile; Sidney P. C. Dillon, to the Superb.

Assistant-Clerks—J. A. Keys, to the Inconstant; William F. Horniman and Edward A. Janes, to the Superb.

Gunners—E. J. Birch, to the Asia; J. Avent, to the Impregnable; George T. Manning, to the Flamingo.

COASTGUARD.

Commissioned Boatmen—George Williams, Buncrana, to be chief boatman, Guidore, vice Allan, promoted; W. Mitchell, Ballinskelligs, to be chief boatman, Dingle, vice Murphy, promoted; Patrick Ryan, Ventry, to be chief boatman, Tarbert, vice Castle, pensioned; Henry Bishop, Roundstone, to be chief boatman, Claggan, vice Stanley, promoted; Thomas Pope, Gourock, to be chief boatman, Peterhead, vice Condon, pensioned; Jas. H. Wakeham, Littlehampton, to be chief boatman, Pevensey, vice McFaul, promoted.

AMETHYST, repairing at Devonport, is set down to be completed in February next. The estimate for the repair submitted for approval is £32,235. Her boilers have been thoroughly repaired, the internal parts being all new. She is to have a new propeller, new condenser, and the hull thoroughly repaired.—*Western Morning News.*

ANTELOPE, Lieut.-Com. Hon. W. H. Jolliffe. There was a large and brilliant gathering on Sept. 16 at the dance on board the Antelope at Therapia, for which some 200 invitations were issued. In the decoration of the vessel no trouble was spared. Ferns and flowers were scattered on all sides in profusion, and the multiplicity of the decorations and devices, and the various colours of the flags and foreign ensigns, contributed to make the surroundings a scene of perfect taste and harmony, while numberless lamps and festoons of coloured lanterns were placed everywhere, so as to produce the most charming effect. Dancing commenced at 9 o'clock, and was kept up till 4 a.m. The following were amongst those who honoured the officers of the vessel with their company:—His Excellency the Right Honourable G. J. Goschen, Mrs. and Miss Goschen; their Excellencies M. Tissot, French Ambassador; Count Corti, Italian Ambassador; the Marquis de Ville Mantilla, Minister Extraordinary from Spain, and the Marquise; M. d'Erenhoff, Minister of Sweden and Norway; the Minister of Belgium, and Mdme. Bartholyns and the Misses Bartholyns; Minister of Greece and the Misses Condouriotta, &c., &c.; the Attachés and Secretaries of the English, French, Italian, Austrian, and German Embassies; captains and officers of H.M.S. Fawn and of the French, German, Austrian, Russian, and Italian war-vessels stationed in the Bosphorus. The Russian Ambassador was prevented from attending from their Court being in mourning, and the Persian and Austrian from indisposition. The remainder of the guests (about 150 in number) comprised the whole of the society of the shores of the Bosphorus and Prince's Islands.

AJAX will shortly be brought round to Chatham from Pembroke Yard, for completion for sea.

BACCHANTE, Capt. Lord Charles Scott, will not confine her calls to Vigo, but will pay a visit to Corunna and Ferrol, before the Detached Squadron reaches Vigo. The Bacchante arrived at Ferrol on Monday last, and sails for Vigo to-day.

BOADICEA, Comdre. Richards, C.B., was at Simon's Bay up to Aug. 30; the Pioneer in company, making good defects.

CHARYBDIS, Capt. Charles Hotham, was at Ascension on the 1st inst.

CROCODILE, Capt. Doughty, which has been supplied with new engines by Messrs. Humphrys, Tennant, and Co., at a cost of £30,000, and has also been fitted with new decks, has undergone a trial of her machinery at Portsmouth. Satisfactory results were obtained.

DECOY, Lieut.-Com. Von Donop, was, by last accounts, to take the place of the Dido at Accra, to which place she had been ordered from Fernando Po. Lieut. Von Donop, who, we recorded last week, had been reappointed to the command of this gunboat, was originally appointed to her command when she was commissioned in Sept., 1878, and suffered much in health from service on the West Coast of Africa. He is now to take her to the Mediterranean. Lieut.-Com. Von Donop served as acting sub-lieut. in the Black Prince with the Channel Squadron from June 13, 1864, until Dec. 8 following, when he was appointed to the Duncan, and served on the North American and West Indies station until promoted, Sept. 11, 1866, into the Sphinx, Capt. R. V. Hamilton, and subsequently served in the same ship, under Capt. John E. Parish, until paid off in Nov., 1868. On Aug. 14, 1869, he was appointed to the Gladiator, Capt. N. B. Bedingfeld, fitting for the Cape of Good Hope and West Coast of Africa, and subsequently served in the same ship on the South-east coast of America until March 16, 1871, when he was transferred to the Egmont, receiving-ship, Capt. W. A. R. Pearse, at Rio de Janeiro, and subsequently served in the same ship under Capt. G. A. C. Brooker until Sept., 1872. He afterwards served in the Serapis troopship, Capt. J. E. Bickford, from Aug. 1, 1873, until appointed, May 13, 1874, to the command of the Bullfrog gunboat, tender to the Castor, at North Shields, and remained until the spring of 1875. On Oct. 16, 1875, he was appointed to the command of the Cromer, gunboat, tender to the Achilles at Birkenhead, and remained until the close of 1877. He commissioned the Decoy at Devonport Sept. 10, 1878.

DIDO, Capt. C. Domvile, was to leave Accra for the Brass River with the Flirt on Aug. 25.

ESK, having completed her service as tender to the Duncan for service with the Royal Naval Artillery Volunteers, has been received into the first division of the Steam Reserve at Chatham.

EURYALUS, Capt. R. D. King, flagship of Rear-Admiral W. G. Jones, C.B., will leave Trincomalee on Oct. 12, arriving at Rangoon on Oct. 18, Trincomalee on Nov. 8, and Bombay on Nov. 18.

FAWN, Capt. Wharton, left Therapia on the 20th inst. for Prinkipo (one of the Prince's Islands), after a month's stay at Constantinople. She will finish the survey of the islands, and then return to Constantinople, which will be in about a fortnight. What her future movements then are is not known.

FLAMINGO, Com. Reginald Neville Custance, who has been appointed to recommission this gun-vessel, served as sub-lieutenant in the Achilles, Capt. Edward W. Vansittart, attached to the Channel Squadron, from Sept. 20, 1866, until promoted to lieutenant, February 6, 1868. On June 2 following he was appointed to the Eclipse, Capt. L. J. Moore, on particular service, and subsequently served in the same ship on the North-American and West Indies station, under Capts. Henry Harvey and Anthony H. Hoskins, until paid off at the close of 1872. He was additional of the Excellent, Capt. Henry Boys, from Feb. 1873, until Sept. 1874, when he was appointed junior staff officer of the same ship under Capt. T. Brandreth, and in March, 1875, was appointed one of her senior staff officers, and continued in the same ship, under Capt. F. A. Herbert, until promoted to commander, March 31, 1878. He subsequently studied for some time at the Royal Naval College at Greenwich.

GORGON, tender to the Cambridge, has come out of Keyham Yard, after making good defects.

HECLA, Capt. Singer, left Malta on Sept. 28 for Corfu.

HELLESPONT had so little to do at Cyprus, that it was thought she would prove more useful as a tug at Malta.

IRIS, Capt. E. H. Seymour, arrived at Malta on Sept. 24 from Gravosa. The *Hampshire Telegraph* says:—"Something has gone wrong with the Iris, for no sooner had she got into full swing with the despatch work required for the ships at Gravosa, than she had to hurry off to Malta to be docked. There was no anticipation when she left Spithead that she would so soon need docking, and from the fact of her having been suddenly withdrawn from a duty for which her speed especially qualified her, it is to be conjectured that the necessity for repairs or examination was urgent."

IRON DUKE, Capt. Cleveland, flagship of Vice-Admiral R. Coote, which has been repairing at Hong Kong, was undocked on Sept. 20, and is now again ready for sea.

KINGFISHER, Com. R. H. Thornton, arrived at Portsmouth on Friday last week from Sheerness, and sailed on Saturday for the Pacific, calling at Devonport.

MINOTAUR, Capt. H. Rawson, flagship of Rear-Admiral A. Hood, C.B. Besides the necessity which exists for reducing the already reduced pressure in the Minotaur's boilers to the extent of 3 lb., it has been found that her stern-tube has sunk 5-16ths of an inch. This will require the tube to be bushed and relined with lignum vitæ, but though the work will make additional demands upon the factory engineers, it is expected that the flagship will be ready for a cruise on Oct. 20. The officers gave an afternoon dance, on Saturday at Portsmouth, and nearly two hundred accepted invitations, but the occasion not being a formal one, the Naval and Military heads of departments were not present. The after part of the upper deck was protected by an awning, and for decorative purposes flags of different nationalities were used, while extemporised seats were ranged round the masts and in other convenient places. The Admiral's band was in attendance and played an appropriate selection of dance music, and refreshments were provided on the main deck. Dancing commenced at half-past 2 o'clock, and continued till 6.

NORTHUMBERLAND, Capt. H. R. Waterlow, completed defects on Sept. 30.

OSPREY, Com. Hon. H. A'Court, which is to be relieved by the Kingfisher, left Valparaiso for Coquimbo on July 12, and it is not unlikely that she will remain on that portion of the station until her relief arrives in the Pacific.

PHILOMEL, Com. H. B. Berners, which left Aden on Aug. 25 for a run to the Seychelles for a change of air, was to be back again to take on duty as senior officer at the end of October.

RAMBLER, Com. the Hon. Algernon Littleton, will start shortly for the usual ten days' cruise in the Channel. We are informed that the Rambler is destined for no such pleasant station as that of North America and West Indies, as stated, but is at present under orders and has charts for the Cape and West Coast of Africa.

REVENGE, Capt. C. Buckle, flagship of Rear-Admiral Hamilton. The following is given as an account of the recent accident which happened to the Admiral, by the Queenstown correspondent of the *Hampshire Telegraph*,—"Admiral Hamilton was riding a spirited steed, when the animal suddenly shied, and getting the bit between his teeth, dashed madly up the steepest hill in the Great Island. So rapid was the motion that the gallant Admiral was scarce able to keep his seat, and would have fallen off, had he not grasped the animal's neck, and held on for dear life. After a John-Gilpin ride of two miles the horse suddenly stopped short at a sharp angle in the road, throwing its rider heavily to the ground. Fortunately new pipes had just been laid down in the road, and the earth above them was still soft and broke the violence of the fall. On this being pointed out to him subsequently, the Admiral remarked that where he fell was quite hard enough. His right temple was cut, and his knuckles 'peeled;' these, together with a very violent shaking, were his only injuries. On inquiry at Admiralty House, I learn that the Admiral still feels the effects of the shock, but is otherwise progressing favourably."

RUPERT, Capt. E. J. Pollard, will be paid off at Chatham to-day, as originally stated.

SALAMIS, Com. A. A. Fitzgeorge, has undergone extensive repairs at Sheerness Dockyard.

SEAGULL, Com. M. Byles, was still at Aden when the last mail left.

SERAPIS, Capt. Guy O. Twiss. On Saturday a useful experiment was made on board the Serapis at Portsmouth. The watertight doors separating the engine-room from the other parts of the ship were closed, and the water admitted until it rose to the height of the main bearings of the crank. The centrifugal pumps, which work at the rate of 120 revolutions a minute, were then set to pump out the water through the condensers, instead of drawing the circulating water from the outside. The experiment satisfactorily proved that, should a leak take place in the ship, the centrifugal pumps might readily be converted into auxiliary pumps to relieve the ship from water.

SUPERB, Capt. Le H. Ward. No date has yet been fixed for the commission of the Superb. Several alterations are being taken in hand. Capt. Le Hunte Ward and Com. H. Hallett are at Chatham, making themselves acquainted with her construction.

SWIFTSURE has been inspected at Devonport by the Admiral Superintendent and officers of the Steam Reserve, and passed as ready for commission.

SYLVIA, Com. P. Aldrich, recommissioned at Hong Kong, May 9, 1877, arrived at Simon's Bay, Aug. 10, homeward bound. Having refitted, she left on Aug. 22 for Walwich Bay, *en route* for Plymouth. The remains of a leading stoker named Dolphin, belonging to the Sylvia, who died at the Royal Naval Hospital, were interred by a body of seamen from the Boadicea at the cemetery in Simon's Town two days after the Sylvia left the bay.

TAMAR, Capt. H. Royse, arrived at Malta on Sept. 28 from Queenstown.

TORCH, Com. Selby, has been at Ismid distributing relief, under the direction of Mr. St. John, First Secretary of the English Embassy, to the starving population, the greater number of whom are Turkish subjects, lately taken there from Batoum, and who for weeks have been living on sour apples and mulberry leaves. Out of 1,400 brought from Batoum some six weeks ago, over 200 have already died from dysentery, &c.

TOURMALINE, Capt. H. Dennistoun, has been ordered to be repaired at Sheerness generally only to such an extent as will last 18 months. The Tourmaline was recommissioned on Saturday. The seamen have been granted the usual leave of absence, during which the vessel will undergo a thorough refit. She has been partially dismantled, and is now in No. 3 dock.

Tyne, Com. J. C. Stokes, was expected at Simon's Bay early in September, on her return from Zanzibar and the Mauritius, to embark troops for St. Helena and England.

Valorous, Capt. Morant, is to be ready on Oct. 20 to take stores and navigating parties for the Hotspur and Seahorse to Birkenhead, and convoy those vessels to Devonport.

Vulture, Capt. J. E. Pringle, left Malta for Devonport on Sept. 25.

The following men have been awarded the medal for long service and good-conduct:—John Rundle, sick-berth steward, and Henry G. Reding, ship's steward, 3rd class, Royal Adelaide; Andrew Berry, engine-room artificer, Indus; John Pearse and Richard Driscoll, carpenter's mates, Impregnable; Joshua Black, armourer, Cambridge; Thomas B. Williams, engine-room artificer, Northumberland; John Conling and Thomas Meryan, privates R.M., and John Chapple, 2nd captain of the quarter-deck, Britannia; George Figgins, ward-room steward, Benjamin Cashe, captain of the maintop, George Pitman, A.B., rigger, William T. S. Midlane, A.B., rigger, Thomas Marshall, A.B., and William Redmore, caulker, Victoria and Albert; John Bartall, gunner R.M.A., Minotaur; Henry Fowler, carpenter's crew, Dasher; and Thomas Richardson, armourer, Excellent; Serjt. Francis Short, Corpls. James Andrews and Walter Franklin, and Pte. Petersfield Roberts, R.M.L.I.

A correspondent says:—"I noticed in one of the Service papers the other day a statement, that although we had for twenty years been trying to obtain a handy and readily worked range-finder, committees had sat and sat in vain. Perhaps that made the latest committee anxious to choose something before giving up their seats, and induced them to recommend the invention of the secretary, Capt. Watkin, of the Royal Artillery. But there is another in the field, and unless the War Office is in a great hurry in spending the £25,000 which it is said will be laid out in Capt. Watkin's invention, we may hope to get something more worth the money. This new range-finder is the invention of a foreigner, and although I would rather have seen one of our own officers come to the front with such an instrument, it is no use taking a laborious machine when there is offered one by which ranges can be ascertained in the incredibly short space of 15 seconds by officers and men who have never before handled the instrument. I was told by an officer from the Excellent the other day that they knew of this new instrument, and thought most highly of it, so I hope it will be given a fair trial and not be burked to make way for what looks very like favouritism and a War-Office job."

A sample plate intended for the Conqueror was tested on board the Nettle at Portsmouth, on Tuesday. The plate measured 6 ft. 3 in. by 7 ft., and had a total thickness of 11 in., of which the outer face was formed of 3 in. of hard steel. The depth of steel surface is half an inch less than that of the compound armour of the Inflexible, while the thickness of iron is 2½ in. more, a difference which is considered a material improvement, as the steel face is sufficient to break up the projectiles fired against it, while the additional thickness of iron backing affords a greater defence against racking, and prevents the plate from falling to pieces under repeated blows. The test on Tuesday was very successful. Three Palliser chilled projectiles, weighing, with gas check, 270 lb. and having a velocity of 1,406 ft. per second, were discharged at the plate from the 9-inch gun, with battering charges of 50 lb. of pebble-powder, at a range of 30 ft., the points of impact, which were arranged in a triangle, being 2 ft. apart. None of the shots penetrated. The head of one buried itself to the depth of 6 in., the remainder being broken into small fragments. Experiments are about to be carried out at Portsmouth with the object of determining the effect of angular fire upon armour with various kinds of projectiles, and, as the results will have a very practical bearing upon the great conflict between armour and artillery, the experiments will possess unusual interest.

A "Gazette Extraordinary" has been issued at Lagos, by command of his Excellency the Lieut.-Governor, announcing officially the blockade of Brass River, Delta of the Niger, West Coast of Africa. All measures authorised by the law of nations will be enforced on behalf of her Majesty's Government against all vessels attempting to violate the blockade, by entry either from the sea or any of the inland creeks communicating with the river. The declaration is signed by Fred. W. Richards, commodore, commanding her Majesty's ships employed on the Cape of Good Hope and West Coast of Africa station.

The German Crown Prince, accompanied by the Crown Princess and Prince William of Prussia, arrived on Wednesday at Kiel, and, having embarked on board the Hohenzollern, went out to Prince Heinrich, on his return from a two years' voyage round the world. Long after the Hohenzollern had passed the saluting forts of Friedrichsort, the Adalbert, with Prince Heinrich, hove in sight. The Crown Prince and Princess left for Potsdam in the evening, Prince Heinrich remaining at Kiel to pass his examination. Prince Heinrich is the first Prussian Prince of the Blood who has received a regular naval education. The Berlin semi-official Press describes his voyage as marking a period in the revival of German naval power. The Chief of the German Admiralty, General von Stosch, was among those who accompanied the Crown Prince to Kiel, to greet Prince Heinrich on his return from his two years' voyage.

Rowland's Odonto is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that Rowland's Odonto will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

THE INTERNATIONAL DEMONSTRATIVE FLEET.

On Saturday, Vice-Admiral Sir Beauchamp Seymour returned to Porto Gravosa in the Helicon, from his visit to Prince Nikita, of Montenegro. Shortly afterwards, Capt. Lord Walter Kerr, R.N., accompanied by Lieut. Caillard, R.E., arrived on his return journey from Scutari, bringing with him a distinct and categoric refusal from Riza Pasha either to evacuate or to surrender Dulcigno. Lord Walter Kerr, according to a *Times* telegram, had been instructed to remain in Scutari three days, to enable Riza Pasha to communicate with his Government, it being the determination of the British Admiral that there should be no subsequent representation on the part of the Sultan that action had been taken without due notice. Riza Pasha's manner was most emphatic, and he declined entirely to enter into the matter, stating distinctly to Lord Walter Kerr that not only had he no orders of any kind nor authority to surrender either Dulcigno, or any other portion of the Ottoman territory, but that he would protect its integrity by force of arms, and that to do so he would fire on any force of Montenegrin or any other nationality. In the evening Sir Beauchamp Seymour communicated the nature of Riza Pasha's reply officially to the Prince of Montenegro, informing him that he had further received a telegram from her Majesty's Ambassador at Constantinople, Mr. Goschen, to the effect that all was at an end at the Sublime Porte so far as he was concerned, and that the affair was now exclusively in the Admiral's hands, to act as he and his colleagues of the Fleet, together with his Highness of Montenegro, should decide. The Admiral and all his Staff, with Capt. Slade and Lieut. Caillard, all in uniform, dined with the Prince, together with the foreign representatives present, the Admiral being placed on the right of the Princess and the Turkish representative on the left.

The *Standard's* correspondent telegraphs that the council of Admirals lasted upwards of an hour. After it broke up orders were issued for the combined fleet to be in readiness to proceed to sea at 2.30 on Monday afternoon; steaming easily, it will arrive off Dulcigno soon after daybreak on Tuesday morning. The Montenegrin army will move up to the frontier, so as to commence their attack early on Tuesday morning, and the fleet will actively co-operate with their advance. The fleet will shell the Albanian positions, and the launches and other boats of the fleet carrying guns will act close in shore. In fact, every possible assistance will be given to the Montenegrins, short only of landing men.

The Helicon and Falcon, having on board Vice-Admiral Seymour, Rear-Admirals Cremer and Fincati, commanding the Russian and Italian squadrons; Com. Nouta, of the Austrian ironclad Custozza; Capt. Valois, of the German ironclad Victoria; and Capt. Manfredi, of the Italian ironclad Palestro, besides a number of British officers, went on Sunday to make a reconnaissance in Albanian waters. The officers in command of the French squadron remained at Gravosa.

On Monday, the intended Naval Demonstration before Dulcigno was postponed, as the Montenegrins felt themselves to be too weak to attack the Albanian position. They have now to reckon also with the Turkish regular troops. Another council of admirals was held on Monday morning on board the Alexandra, at which the Montenegrin Minister for Foreign Affairs was present.

The mail service has been rearranged, and letters will henceforth be despatched daily, and carried by one French, two Italian despatch boats, and three English gunboats, the Helicon being kept in reserve for contingencies.

An exciting incident occurred on Tuesday morning. Admiral Fincati, when sailing in his galley, was capsized by a sudden gust of wind, when passing near the Russian flagship. Instantly there was a rush of boats of all nations to the scene of the accident, and the gallant Admiral and all his crew were safely rescued.

The Fleet will probably leave its anchorage early next week, and sail for the Gulf of Cattaro, where the anchorage is far safer and more sheltered than it is at Ragusa.

On Thursday there was no news whatever as to the probable course of future events.

A correspondent, writing from the Fleet, says:—"While those in authority have been sending and receiving ultimatums, protests, despatches, and cipher telegrams, the officers of the squadron have passed the time in improving their acquaintance with one another. Not a day has passed on which our officers have not either been entertaining or entertained. The officers of the British Squadron are on the best of terms with every one, and if the relations between some of the other nations are not as cordial as they might possibly be—if France and Germany bow coldly and distantly when they meet, if Austria and Italy display a ceremonious politeness to one another which speaks volumes, if France and Russia do not call on one another on account of some quibble of etiquette as to who shall make the first advance, at any rate they each and all have sworn eternal friendship to England, not even Russia excepted."

THE PHAETON AND ATALANTA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—If you will insert a few lines from me, I will not again trespass on your space. Such of your readers as have felt any interest in the matter, and who have read your articles about the Phaeton, and my letter in your paper of the 18th inst., will, no doubt, judge for themselves between my opinion of my ship, and that of your informant. The Phaeton, after being lengthened 30 ft. amidships for the reception of her machinery, &c., was much weaker than in her original compact form as a sailing frigate, in which capacity I should have preferred her, her good qualities under trial in her first commission being well known,—I am, &c.,

G. L. Bowyear, R.N.,
Vice-Admiral.

St. Helier's, Jersey, Sept. 18.

Use Margerison's registered White Windsor Soap, Preston.—The best and cheapest Soap in England for washing clothes, or any household purpose. Ask for Margerison's Soap, and see that the word Margerison is on every bar, as there are so many worthless imitations. Sold at Stores.

THE LAUNCH OF THE ITALIA.

The launch of the Italia at Castellamare on Wednesday is described as the most splendid success imaginable. When the dogshores were knocked away, there was for a few moments a breathless pause, and when the big ship was seen to move the cheers and *vivas* of the thousands assembled were deafening. The King came expressly from Monza for the occasion, and was accompanied by the Ministers. The King's progress through the town was a continued ovation, and his entrance into the dockyard was the signal for a loud burst of enthusiastic cheering. His Majesty having taken his place, the clergy issued forth, and, making the circuit of the ship in procession, sprinkled her with holy water. The young daughter of Admiral Acton broke a bottle of champagne against the bows and gave the ship her name, and the shores having been knocked away, she took the water. The launch completed, King Humbert returned to Naples across the bay on board the Staffetta, the ships of escort being the Italian ironclads Maria Pia and Terribile, and the English ironclads Monarch and Thunderer. At starting, the Italian ships followed the King's vessels, each with one of the English ships in her rear, but half-way across the bay the Maria Pia and Terribile opened out, and, allowing the English ships to pass through, took up their places astern in the same formation. As the King's ship entered the port of Naples the Monarch and Thunderer formed in line ahead, and, reversing their course, passed in succession under the stern of the Staffetta and gave the King three good British cheers, and then, going round, passing the Italian vessels on opposite courses, cheering them, and receiving cheers in return as they came abreast. They then put about again, went in, and took up their anchorage before the Royal Palace. In the evening, Capt. George Tryon, C.B., of the Monarch, and Capt. Colomb, of the Thunderer, dined with the King.

"In the construction of the Dandolo and Duilio," says the *Standard*, "Italy followed closely upon the heels of the British Navy, and in introducing an armament of 100-ton guns, gained superiority in that respect, at least, over the Inflexible. But now the Inflexible has been left behind by the mighty Italia, which will soon be followed by her sister-ship, the Lepanto. To draw a rough comparison between the Italia and Inflexible, the former exceeds our own 'latest type' by 80 ft. in length, 1,980 tons displacement, and as much as 7,000 indicated horse-power, for it is anticipated that her engines will develope the power of 15,000 horses, and drive the ship at a speed of 16 knots. In breadth of beam and draught of water the ships are much alike, but in armament the Italia far exceeds the Inflexible, having 4 100-ton guns and 18 6-in. guns to the Inflexible's 4 80-ton guns. In building this monster engine-of-war, Italian naval constructors have not confined themselves to a beaten track, but have introduced some novel designs. No attempt to cover with armour the whole of the sides of this vessel, having a length of 400 feet between the perpendiculars, has been made, this protection having been retained only for the fighting and motive power of the ship. Armour has only been used to keep projectiles from entering the most vital parts of the vessel, the engines, boilers, magazines, and shell-rooms, and the channels leading from these portions of the construction to the upper deck, and to shield the guns and their crews in the casemate on the upper deck. The four 100-ton guns, by Armstrong, will be mounted, *en barbette*, in pairs, in this casemate battery, and they will be worked by the hydraulic system, perfected by the Elswick firm, and introduced on board her Majesty's ships, while the principle of mounting is the same as applied to the barbette guns on board the Téméraire, but when run up for firing the guns of the Italia will be fully 32 ft. above the water-line, and will be able to fire in line with the keel, and in fact in any direction. On the upper-deck, which is 25 ft. above water-line, there will be six 6-in. guns, including a bow-chaser and stern-chaser, while on the battery-deck, 14 ft. above water-line, there will be 12 of these guns. Among her other means of offence are four ports, from which she will be able to discharge Whitehead torpedoes, and she is also fitted with a ram, which projects 6 ft. 4 in. beyond the perpendicular, and is placed 8 ft. 6 in. below the water-line. The hull of the vessel is constructed of steel sheathed with wood, and her double bottom is divided into numerous cellular spaces. There are also two longitudinal bulkheads extending for more than half the length of the ship, and a number of transverse bulkheads, dividing the ship into nearly sixty large water-tight compartments, which are again subdivided by her four water-tight decks. The lowest deck is armoured with 3-in. plates, but the others are of steel, covered with planking. Great as was the controversy raised as to the danger resulting from the liability of the Inflexible to be pierced with shot at her unarmoured ends, the Italian constructors have carried the idea of partial armour to a far greater extent than in the Inflexible; for although the Italia is so much larger a vessel, she is designed to carry some three hundred tons less of armour. But while thus discarding in a measure the warning voice of Sir Edward Reed against the abandonment of side-armour, the 'cork belt,' as introduced in the Inflexible, has been adopted in the Italia, and by the sub-division of the ship into numerous water-tight compartments every effort has been made to secure sufficient buoyancy, even if her unarmoured ends should be considerably damaged under the fire of an enemy. The engines are by Messrs. Penn, of Greenwich, and are by far the most powerful yet placed on board any armoured vessel, it being estimated that the development will be in excess of one indicated horse-power to each ton of displacement, or 15,000 horse-power to the vessel's 13,840 tons. There are two sets of engines to each of the two screw shafts, giving 12 cylinders altogether, and steam will be generated in 26 boilers having 78 furnaces. 12 of the boilers are placed aft, and the remainder forward of the engines, and as a rule in ordinary cruising the after engines and boilers will be those used, full power being required only under exceptional circumstances. The engines are of the same type as those of the Agamemnon, being so arranged that they can be worked either on the compound or non-compound system."

ARCTIC EXPLORATION.

Some further details are published at New York of Lieut. Schwatka's search for relics of the Franklin Expedition. The sledge journey made was over 2,819 geographical miles, mostly across entirely unexplored territory. This constitutes the longest sledge journey ever made, both as to time and distance, the men adapting themselves to live as natives.

The Arctic exploring steamer Gulnare, which arrived at St. John's, Newfoundland, on the night of Sept. 25, has been ordered to return to Washington, the expedition to Lady Franklin's Bay having been abandoned for this season.

The following telegram has been received in London from Mr. Leigh Smith, dated Hammerfest, Sept. 25:—"Reached Franz Josef Land on Aug. 14. Explored land to the west as far as 45 deg. east and 80 deg. 20 min. north and sighted land from that point about forty miles north-west."

The place where the records of Sir John Franklin's Expedition were destroyed was situated to the westward of Point Richardson. The skeletons which were discovered were always incomplete, sometimes nothing but a skull being found in the vicinity of a grave, and again often a skull would be missing. At one place could be distinguished four right femora, showing that that number of persons had perished there. The number of persons buried is estimated at from twenty to forty, but no doubt is entertained by those who covered the ground that all the members of Sir John Franklin's expedition were buried.

Com. Cheyne, writing from the Central Arctic Committee, 107 Fleet Street, says:—"The gallant and energetic Americans are taking the wind out of our sails in Arctic exploration. First, they rescue one of our abandoned ships, the Resolute, refit her, and in a most courteous manner return her to the Queen. Secondly, they push a semi-private expedition up Smith's Sound, and with one small steamer, at a cost of £10,413, reach very nearly as high a latitude as that accomplished by the late British Government expedition, with two well found steamers, at a cost of £112,000. Thirdly, they are now pushing two private expeditions, *viâ* Behring's Strait and Smith's Sound, direct for the North Pole. And, fourthly, another independent expedition, fitted out to search for further relics of Franklin's party, has just returned to New York with an account of its work carried through to a truly brilliant issue. All honour be to those gallant fellows: they have followed on the track of Franklin's retreating party; they buried the British dead as they marched along the desolate shores of King William's Land; they burned the bones of some, erected monuments here and there to the memory of the fallen; gathered relics in sundry places; and returned to New York with the remains of one of Franklin's officers, in addition to ascertaining the ultimate fate of one of the missing ships. Thank God, our dead have been buried, albeit by American hands. That dreary line of death has been traversed by men of daring energy, influenced by honourable motives; and they have thereby earned the praise and gratitude of all Englishmen. Sir, when the last Government searching expedition, under the command of Sir Edward Belcher, returned to this country in 1854, with no further tidings of Franklin than had been gained by Austin in 1850, the English Ministry resolved to bring the search to an end, as being hopeless. In vain did volunteers press for another trial; we who thus came to the front were sent to different parts of the world to get rid of our importunity and agitation. What resulted? A private expedition under M'Clintock resolved the mystery at a cost of £10,417; and America has, by means of another private expedition, brought the whole work to an honourable and final issue. What a lesson to us in the path of energy and perseverance! May we be the wiser for such. After the Swedish Government and the leading public men of Sweden had given up any further prosecution of the North-East Passage as hopeless, Professor Nördenskjold and his gallant companions at once set out in the Vega, and accomplished the task in one season, gaining everlasting renown for their country. In the face of all this, I earnestly ask noblemen, scientific men, and Englishmen generally to come forward without delay, and assist the London Central Arctic Committee in the volunteer organisation of the proposed new British-Canadian Arctic expedition for the discovery of the North Pole, the circumnavigation of Greenland, the advance of science, and the upholding of our maritime prestige in the North."

Epps's Cocoa.—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us, ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Sold only in packets, labelled—"James Epps and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence, for afternoon use.

A NIGER EXPEDITION.

The Paris correspondent of the *Standard* reports that on Oct. 5 a steamer of the Messageries Maritimes will go out with the exploring expedition to Upper Senegal and the Niger. This will consist of 700 men specially and efficiently trained and organised for their work. It was the last Ministerial act of Admiral Jauréguiberry to sign the necessary instructions. M. Borgnis Desbordes is at the head of the expedition, which consists of 250 troops, an auxiliary company of sappers and miners, with labourers to construct three military stations. The topographical section is confided to the charge of four staff officers, seconded by six Army officers, and a Naval lieutenant. The medical department is directed by an eminent surgeon, who is provided with three assistants for the military stations to be established. The expedition will reach St. Louis at the commencement of the fine season, when refreshing easterly breezes permit of Europeans engaging in laborious operations. Two steamboats will convey the entire party as far as Medina. From that point the direction towards Bafoulabe will be taken, the staff officers making observations for the guidance of the labourers in making a road. The object of the expedition is, of course, to make a peaceful conquest of districts in the interior of Africa; "not," say the French papers, "to take violent possession of those vast territories, but, by establishing French influence, to obtain a fresh outlet for industry and commerce." It is urged that by opening caravan routes and establishing military stations for the protection of traders from the pillage of nomad tribes a great service will be rendered to the populations of the banks of the Niger, who will then have an opportunity of exchanging their products for those of France. For the execution of his task, M. Desbordes, of course, requires a numerous force, not merely to protect the workmen, but to awe those native tribes who might be hostile to French intrusion. It is, however, hoped that no shot will be fired, but that the mere sight of a well-armed French force will be sufficient to secure the goodwill of the inhabitants. Great confidence is felt in the success of the enterprise, the leaders being men of tried judgment and ability.

PLOT TO DESTROY THE LIVADIA.

A diabolical scheme to blow up the Livadia has just been discovered. The vessel was to leave Fairfield Dock, Govan, to-morrow, and proceed to the Tail of the Bank, for the purpose of undergoing the usual trials. The first hint that a plot had been formed for the purpose of destroying the yacht appears to have emanated from the Russian authorities at St. Petersburg, and afterwards from the police officials of Switzerland. According to the information received, Russian Nihilists had proceeded from London a few days ago, *en route* for Glasgow, having in their possession two nitro-glycerine clocks, which they intended attempting to conceal on board the Czar's yacht. The aim of the Nihilists was, it is alleged, to put these machines amongst the coals of the yacht. Measures were promptly taken for the purpose of frustrating such a scheme. Constables in plain-clothes are stationed on board the yacht, and every precaution is being taken to ensure safety. Detectives are stationed at the various entrances of Messrs. Elder's yard, and nobody is allowed to pass the gates without signing his name and entering in a book the nature of his business. On board the yacht itself, the workmen and Russian sailors are not exempt from surveillance. A large quantity of coal had been stowed on board, but has been removed, with the view of ascertaining whether any explosive had been concealed amongst it, and divers have been down making a careful examination of the ship's bottom.

From inquiries made at Scotland Yard, the report from Glasgow as to a scheme to blow up the Livadia is confirmed. For several days past rumours have been prevalent that something of the kind was in contemplation, and the authorities in London, Glasgow, St. Petersburg, and Geneva have been in communication with each other.

The *Glasgow News* says:—"Admiral Popoff on Tuesday received the following travesty of Nihilism, and the Admiral expresses his regret that in consequence of the writer not having given his address, he is unable to reply to it himself:—'Nihilist Secret Society, Glasgow, September 28, 1880. Sir,—We take the liberty of informing you that you shall never leave Glasgow alive.—We are, yours, &c., H. Lolyf, Chief Secretary.'"

Mr. Thomas Brassey, one of the Lords of the Admiralty, accompanied by the officers of the Hercules and Jackal, visited Messrs. Elder's shipbuilding yard on Tuesday, and inspected the Czar's yacht Livadia.

There are Few, if any, Medicines more Troublesome to Administer than Cod Liver Oil, and it is often grievous to find that patients whom it would most certainly benefit will not take it. It is, therefore, a great boon to get such an Oil as the present. We have tried it, and find it is exceedingly bland to the taste, and causes no eructations or nausea afterwards. It well deserves the name of "Perfected."—*The Practitioner*. See also the *Lancet*, *British Medical Journal*, &c., &c. All who have difficulty in taking Cod Liver Oil should insist on having Allen and Hanburys' "Perfected" Oil. Sold only in imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade-mark, a Plough. Of all Chemists.

THE "NAVY LIST."

The following officers' deaths have been reported since June 20, 1880:—Flag Officers — Vice-Admiral Rowley Lambert, C.B.; on Retired List—Admiral the Right Hon. George, Earl of Dalhousie, C.B., and Vice-Admiral Frederick L. Barnard. Captains—Alfred Markham; on Retired List—Arthur Morrell, Joseph S. Rundle, Henry M. Bingham, and Richard Browne. Commanders (on Retired List)—Henry Lewis (*a*), Timothy Parsons, William Gwyn, John Tully, William S. Robins, Henry H. Johnstone, Alexander D. Norie, Walter F. Robinson, William Boles, Henry Study, and Francis Hale. Lieutenants—Francis R. Bromilow, Charles G. Michaelson, Alexander K. Woodrow, John B. Benett, St. John R. H. Parlby; on Retired List—Augustus Tabuteau and John E. F. King. Sub-Lieutenant—Egerton B. Cleeve. Staff Commanders (on Reserved List)—William Farley and Henry P. Ward. Navigating-Lieutenant (on Retired List)—John E. Petley. Engineers—William T. Galdie and Thomas McIntosh. Deputy-Inspector-General of Hospitals and Fleets—John Elliott; on Retired List—John Stirling, M.D. Fleet Surgeons (on Retired List)—Henry M. Speer and Francis H. Moore. Staff Surgeons (on Retired List)—William T. Rogers and John F. Pritchard. Paymasters—John K. Cowley; on Retired List—Charles Barrs. Assistant-Paymaster — Edgar Radford. Carpenters—Samuel Nicholls and John L. Mason. Officers of Royal Marines—Major-General John H. Stewart, Major James W. V. Arbuckle; on Retired List—Major-General John Fraser and Lieutenant Benjamin Yarnold.

The names of the following officers have been removed from the Active List since June 20, 1880:—Acting Sub-Lieutenant—Roderick L. Mayne (unable to pass). Midshipmen—Alexander F. Crookshank and Hon. Patrick B. Lyon (withdrawn). Surgeons—John Allen and William J. Volatti (resigned). Engineer—Henry Brown (*b*) (resigned to avoid court-martial). Engineer for temporary service—William Robb (resigned). Boatswain—Daniel Driscoll (acting), (deprived of acting warrant). Carpenter—George O. Smail (dismissed service by sentence of court-martial). Officers of Royal Marines—Captain Jasper N. Harrison and Lieutenant George R. C. Booth (resigned); Lieutenants Walter Quentin, Francis G. Atkinson, and William J. Lanford (allowed to volunteer for India S.C.). Warrant Officers Pensioned—Chief Gunners Edward B. Reeves and Henry Wallis; Gunners—Josiah Hunt William Simmonds, Robert Coates, James Furze; Boatswains—Henry Cooper, James McLeod, Michael Ryan, and Edward Batt; Chief Carpenter—William Armstrong; and Carpenters—David Tiddy, and William Grace, and John J. Tredger.

Obituary.

Admiral Sir John Walter Tarleton, K.C.B., died on Saturday after a long illness, at his residence in Warwick Square, at the age of 69. The son of the late Mr. Thomas Tarleton, of Bolesworth Castle, Cheshire, by his marriage with Frances, daughter of Mr. Philip Egerton, of Pulton Park, in that county, and grand-nephew of the late Gen. Sir Banastre Tarleton, G.C.B., he was born at Cloverly Hall, Shropshire, in the year 1811, and entered the Royal Navy in 1824. He obtained a lieutenancy in 1835, was promoted to the rank of commander in 1846, and was nominated a Companion of the Order of the Bath for his services in the Burmese war. He was promoted to flag-rank in 1868, and to the rank of vice-admiral in 1873, in which year he was also nominated a Knight Commander of the Bath. Sir John Tarleton, who was successively Controller of the Coastguard, a Lord of the Admiralty, and Admiral-Superintendent of Naval Reserves, was granted an Admiral's "good-service" pension in 1870, and went on the Retired List in 1873. He had also received from the Royal Humane Society and from the Congress of the United States medals for saving life. Sir John Tarleton married in 1861 a daughter of Baron Dimsdale, of Camfield Place, Herts.

Com. Thomas Eyton, R.N., died at Lee, Kent, on Sept. 23, at an advanced age. The deceased officer entered the Navy in August, 1812, and obtained his commission as lieutenant in Dec. 1824. In Oct. 1829 he was appointed first lieutenant of the Rapid, Capt. C. H. Swinburne, on the Mediterranean station; and in June, 1831, was transferred to the Britannia, Capts. W. J. Hope Johnstone and Peter Rainier, on particular service, where he remained until 1833. He was subsequently employed for some years as superintendent of the Marine Society's ship, and became retired commander July 1, 1864.

Hot Weather.—How to Invigorate the Nervous System by Natural Means. Mental Prostration.—"Having suffered much from headache and mental prostration, I was induced to try Eno's Fruit Salt, the effects of which have been most satisfactory, resulting in invigorating my entire nervous system, and removing the frequent headache to which I was subject. You are at liberty to make any use you think proper of this testimonial, as I consider Eno's Fruit Salt an indispensable adjunct to the Household."—Truth, Sigdon Road, Dalston, E. Caution.—Examine each bottle, and see the Capsule is marked, "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d.

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

BOW CHURCH FURNISHING GALLERIES, CHEAPSIDE, LONDON,
Opposite Bow Church.

BIRTH.

MOORE.—On Sept. 19, at 129 Macquarrie Street, Sydney, New South Wales, the wife of Lieutenant-and Commander W. Usborne Moore, R.N., H.M.'s schooner Alacrity, of a daughter.

MARRIAGES.

GALLOWAY—GALLETLY.—On Sept. 28, at St. Mark's, North Audley Street, Frederic William Galloway, Esq. (late 85th Regiment, King's Light Infantry), son of the late Arthur Galloway, Esq., Bengal Civil Service, and grandson of the late Major-General Sir Archibald Galloway, K.C.B., to Blanche Elizabeth, daughter of the late John Galletly, Esq., of Elcho, Victoria, Australia.

THOMPSON—ARDEN.—On Sept. 28, at the parish church, Burnham, Bucks, by the Rev. R. F. Rumsey, M.A., Vicar, and the Rev. Pownoll W. Phipps, M.A., Capt. Lawrence C. F. Thompson, 8th, "The King's," Regiment, elder son of Springall Thompson, Esq., J.P., of Bramcote, Upton-cum-Chalvey, to Evelyn Helen, youngest daughter of Richard Edward Arden, Esq., J.P., of East Burnham House, Bucks.

DEATHS.

MILLER—On the 18th Sept., at Gosport, aged 63, Major Alexander Penrose Miller, Governor of the Military Prison, and late of 92nd Gordon Highlanders, second son of the late Thomas Miller, Esq., of Glenlee and Barskimming (eldest son of Sir William Miller, Bart., Lord Glenlee), and brother of the late Sir William Miller, 3rd Baronet.

TANDY.—At Oldtown, Naas, on September 28, 1880, Hugo Shapland Dashwood, son of Commander Tandy, R.N., aged 4½ years.

VARDON.—On the 24th ult., Captain Frederick George Vardon, late Royal Irish Fusiliers, only son of Captain F. C. Vardon, of Sandgates, Chertsey, aged 35.

NOTICE.

INFORMATION WANTED of T. P. STAFFORD, who left Sydney on November 17, 1869, as Engine-driver, in the Western Empire, (42,750), and was discharged in London on March 22, 1870. If he is still alive, and sends his proper address to H. and G. STAFFORD, 9 and 10 Bridge Street, Cavan, Ireland, he will receive most valuable information relative to his father's property.

(English and Irish papers please copy.)

WANTED, resident in London, a RETIRED ARTILLERY OFFICER, to Assist an Officer in the preparation of Pupils for Military Competitive Examinations. — Address, Major "F. C.," 30 Craven Terrace, W.

WANTED, a MAN COOK, for the Officers' Mess, 1st Battalion 14th Regiment. —Applications, accompanied by terms and testimonials, to be made to the MESSMAN, Parkhurst, I. of W.

MESSMAN.—WANTED, for the Officers' Mess, Army Medical Department, South Camp, Aldershot, a MESSMAN, from October 15 next.—Apply by letter, enclosing copies of testimonials and terms, to HON. SEC., Officers' Mess, Army Medical Department, V lines, South Camp, Aldershot.

AN EXPERIENCED MAN COOK (single) wishes for a RE-ENGAGEMENT in an Officers' Mess. Good references.—Address, "R. O.," 4 East Parade, Horsham, Sussex.

SECRETARY.—A GENTLEMAN of POSITION and ABILITY, with £1,000 at command, for a Company now being formed, under special Act of Parliament. Those with above qualifications and references can have full information by applying to Messrs WALMSLEY and SAMUELS, Solicitors to the Company, St. Ann's Street, Manchester.

£2,000.—A GENTLEMAN wants the immediate Co-operation of ONE or MORE GENTLEMEN, willing to advance the above sum, to secure on most advantageous terms, and commence working on a small scale, some very rich and extensive Gravel and Vein Gold Mines, in a peaceable foreign country. Climate healthy. No agents.—Address, "G.O.L.D.," care of W. LAWSON and SONS, Advertising Agents, Cannon Street, London.

JUNIOR ARMY and NAVY CLUB,
Grafton Street, W.
Established in 1870.

Enrolled Members, 1,200. For the next 300 members, the Entrance Fee will be £10 10s; Annual Home Subscription, £7 7s; Annual Foreign Subscription, £1 1s. Open to all officers of her Majesty's Regular Forces, and those who have retired from the same.

RICHARD TRIMEN, Secretary.

CANTEEN TRADE.—A Brewery is desirous of being connected with an Officer retired from the Army (resident in London), who could obtain the supply of Canteens.—Address, "V. R.," 2 Trinity Cottages, Stoke Road, Gosport.

SCHOOL SHIP CONWAY, LIVERPOOL.—Established for training Young Gentlemen for Officers in the Mercantile Marine. Terms, 50 guineas per annum, including uniform and all other extras. The sons of members of the Mercantile Marine Service Association and of officers of the Navy are received at the reduced rate of 40 guineas. Age for admission, 12 to 16. Quarter-days, February 1, April 10, August 1, and October 10.—Apply to Captain E. B. H. FRANKLIN, R.N., Rock Ferry, Birkenhead.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

BULL TERRIER for SALE (would be invaluable to an Officer ordered on foreign service). A massive, handsome, brindle-and-white dog. 18 months old. A rare specimen of the old comely English fighting dog, unequalled for indomitable pluck and dogged obstinacy.—For pedigree, &c., apply to "J. H.," 11 Wellington Circus, Nottingham.

ESTABLISHMENT for GENTLEWOMEN during TEMPORARY ILLNESS, 90 Harley Street, W. The house is now ready for the reception of Invalids requiring Medical or Surgical Treatment. This is given gratuitously by eminent practitioners, whilst the weekly charges for board and lodging, with nursing and attendance, vary from 17s 6d to £1 11s 6d. All applications for papers for admission to be addressed to LADY SUPERINTENDENT, 90 Harley Street, W.

EAST HARTING, near PETERSFIELD. —To be SOLD, with immediate possession (the owner having to reside in London), a charming little FREEHOLD PROPERTY, known as "Down Lodge." The house, which is of Gothic elevation and very pretty, is approached by a carriage-drive, and contains drawing-room, dining-room, library, and four good bedrooms, store-closet, kitchen, larder, &c., w.c., and conservatory, room outside for man-servant, wood and coal-house, servants' w.c., two-stall stable and coach-house, kitchen and flower-gardens, small orchard, good lawn. Two posts daily. Two packs of hounds in neighbourhood. Two hours from London. Price, £750; or would let. Principals only.—Apply to "Major F.," on the premises.

BROADSTAIRS, KENT.—HOUSE to LET, FURNISHED, for winter months, containing four reception rooms, eight good bedrooms, and four servant's ditto; two w.c's. One minute from sands. Good sea-view.—Address, Cleveland House, Broadstairs.

TO BE LET, in the neighbourhood of East Grinstead, a commodious WELL-FURNISHED HOUSE, containing three sitting-rooms, nine bed-rooms, bath-room; two w.c's, kitchen, pantry, &c. A pony and carriage will be left for the use of the tenant. Rent, 3½ guineas per week for six months, inclusive of the keep of the pony. A man will also be left in charge of the garden and stable.—For further particulars, apply to Messrs. TURNER, RUDGE, and TURNER, Estate Agents and Auctioneers, East Grinstead.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses, having been built expressly for the safe keeping of goods, are peculiarly convenient and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.

EIGHT PRIZE MEDALS.

PROTECTION TO HEALTH.

HOLLOWAY'S PILLS.—In general debility, mental depression, and nervous irritability, there is no medicine which operates so like a charm as these famous Pills. They purify the blood, soothe and strengthen the nerves and system, give tone to the stomach, elevate the spirits, and, in fact, make the patient sensible of a total and delightful revolution in the whole system. They may be commended most unreservedly as the very best family medicine in existence. Though so powerfully efficacious, they are singularly mild in operation, and might be given with perfect confidence to delicate women and young children. They contain not a grain of mercury, or any other noxious substance, and cannot do harm. Delicate females and all persons of sedentary habits will find these Pills a blessing.

ARMY and NAVY HOTEL, Limited.
The Share List is still open.

Applications to be addressed to the Secretary, C. Hinton Moore, 7 Pall Mall, S.W.

ARMY and NAVY CO-OPERATIVE SOCIETY (Limited),
117 VICTORIA STREET, WESTMINSTER, S.W.

P.S.—Illustrated Catalogues and Price Lists Post Free.

WATCHES.—JEWELLERY.—WATCHES.

The Rev. Robt. Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Ladies' Gold Lever Watch received from you for 70s in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

The Rev. James Arthur Kemp, Lew Down, North Devon, also writes, March 8, 1880:—"The watch I ordered of you at 25s, for my servant arrived quite safely, and I am exceedingly well pleased with it in every way. It is an excellent timekeeper, very neat and handsome in appearance, and in my opinion worth far more than those that cost treble the money. I do not think anybody should be without a watch, when they can obtain from you such an excellent article at so reasonable a price."

THE MIDLAND COUNTIES WATCH COMPANY supply their celebrated Watches direct to wearers, at very lowest wholesale cash prices. They guarantee watches supplied by them to be most perfect timekeepers, and honestly assert their price to be under one-half those charged by watchmakers; and as a guarantee of good-faith they undertake to return the full amount paid for any Watch if not to the satisfaction of the purchaser.

The Company's chief manufacture are their celebrated Crystal Glasses, which dispense with all risk of breakage. Their LADIES' and GENTLEMEN'S SILVER WATCHES, at 25s, and their LADIES' GOLD LEVERS, at 70s, are acknowledged to be the cheapest Watches in the world.

Catalogues, containing list of testimonials, and beautifully illustrated descriptions of more expensive watches, gold and silver jewellery, electro-plate, &c., are sent gratis on application. We may safely assert that the prices in same will be a surprise to all who see them.

GENTLEMEN'S FINE SILVER, flat crystal glass, heavy cased, superior movement, 25s.

LADIES' FINE SILVER, handsomely engraved, flat crystal glass, highly-finished movements, 25s.

YOUTHS' FINE SILVER, flat crystal glass, highly-finished movements, 25s.

LADIES' very heavy cased GOLD LEVERS, in exquisitely chased cases, with highly-finished extra-jewelled movements, 70s.

These watches are frequently sold for treble the money.

Cheques or Post-Office Orders must be made payable to the Company's Manager,

Mr. S. HISSEY, Vyse Street, Birmingham.

On receipt of which any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

From Mr. J. J. HARRIS, Schoolmaster, 2nd-18th the Royal Irish Regiment, Aldershot, Sept. 22, 1880.

"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by regimental clubs for *treble* the money. I am positive your Company will prove itself a boon to Army men at home and abroad, particularly the latter, who are often compelled to pay enormous prices for very inferior articles indeed. Your Company is deserving of every success, and I deem it a duty, to you and the Army, to become an amateur agent, *unpaid*."

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded.

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

LIEUTENANTS of MILITIA desirous of competing, this year or next, for Line Commissions can be RECEIVED by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major R. V. DICKENS (late 11th Foot), who, besides having passed the Staff College, and held several Staff appointments, has for some time past been successfully engaged in coaching Lieutenants of Militia, and also Sandhurst Cadets for their final examination in the same subjects. Other competent Tutors assist in preparing for the qualifying Examinations.

BEAUMARIS SCHOOL, N. WALES.

Governing Body—The LORD BISHOP OF BANGOR, Colonel HAMPTON LEWIS, Captain VERNEY, R.N., and others.

Head Master—STEPHEN D. ORME, M.A.

20 GREAT TITCHFIELD STREET, LONDON, W.

PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.—By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet, British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser.*

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' 'Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—PUNCTUAL ATTENDANCE EVERY THURSDAY AT 4 HIGH STREET, ALDERSHOT, FROM 11 TILL 5.

Will be published, on October 14.
BY AUTHORITY.

THE

ARUNDEL & CALEDONIAN HOTELS.

The ARUNDEL is near the New Law Courts, in the Strand, being next door to the Temple Station.

The CALEDONIAN is on the Adelphi Terrace, and close to Charing Cross.

These two old-established Family Hotels, from their especially advantageous position, both overlooking the Thames Embankment, combine light, air, and perfect quiet, although in the centre of London. They are now under one management, AND AT EITHER ESTABLISHMENT VISITORS CAN ARRANGE FOR FULL BOARD AT A FIXED CHARGE OF SEVEN SHILLINGS AND SIXPENCE PER DAY, which includes a good Bedroom, Breakfast of hot and cold meats, Luncheon, Dinner of six courses, and Tea and Coffee in the evening; also the use of large, well-appointed Sitting-rooms, including an ELEGANTLY-APPOINTED DRAWING-ROOM.

These Hotels, containing upwards of 200 Rooms, have been for many years largely patronised by Members of Parliament, the Clergy, and by Military and Naval Officers and their Families, by reason of their central, but retired localities, affording all the comforts and luxuries of high-class Hotels.

J. R. WILLIAMS, Proprietor.

PORTSMOUTH.

ALFRED BROAD.

ZOEDONE. — OHNE PHOSPHOR,

KEIN GEDANKE.—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases. A small extra charge in smaller cases. See Pamphlet.

ZOEDONE FOR SPORTSMEN.

THE BEST DRINK FOR THE MOORS.
STEADIES THE NERVES.
QUENCHES THE THIRST.
SUPPORTS THE STRENGTH.
NO LASSITUDE.
NO LIVER.
NO MISSING.

London Agents:—Messrs. Allen and Hanburys; Barclay and Son; W. Best and Sons; Corbyn, Stacey, and Co.; Edwards and Son; Hearon, Squire, and Francis; Ingram and Royle; Lynch and Co.; F. Newbery and Son; Probyn and Co.; Savory and Moore.

Agents in the principal towns of the United Kingdom.

Patentee—DAVID JOHNSON, F.C.S. Manufacturers: The **ZOEDONE CO.,** Limited, Wrexham.
London Office—25 Abchurch Lane, E.C.

DINNEFORD'S MAGNESIA.

For over Forty Years the Medical Profession have approved of this pure Solution as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the safest aperient for delicate Constitutions, Ladies, Children, and Infants.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179, of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactory."

Sole Address—**3 THE HARD, PORTSEA.**

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 10s. 4d. per annum; viâ Brindisi, £1 14s. 8d.

IT is much to be regretted that during the last few years attempts have been made, by individuals of reputed influence and scientific attainments, to lead the general public to believe that seamanship is, now-a-days, scarcely necessary in the Royal Navy, and that men-of-war, as now constructed, can be just as well worked by engineers and artillerymen as by seamen. But those who hold such views really know nothing of the many difficulties involved in handling a ship properly, that is to say, in a seamanlike manner, although they may themselves be quite competent to design a vessel and superintend her construction. It is too often assumed that no difference exists between the navigator and the seaman. Indeed, a recent correspondent has suggested that "where seamanship ends and navigation commences, is rather a difficult point to settle." Such, however, is not the case. The navigator, or pilot, need not, of necessity, be a good seaman. But the average seaman must be, even taken at the worst, a passably good navigator or pilot. A landsman may become an accurate observer, and be able at any time to fix the ship's position to within a second or two of latitude and longitude. He would be a good navigator, but no seaman. He may also learn to read charts and study channels and their marks, so as to become a good pilot; but he is no seaman. He could never handle a ship so as not to endanger her safety, under the varying circumstances of wind and weather constantly encountered upon the high seas. He could not even bring his ship to in an open anchorage, or enter a port, without endangering the safety of other vessels and of his own ship. What, then, is seamanship? In the olden days, it meant a thorough knowledge of a ship and all that appertains to her, from the time her keel was laid to the day she was fully rigged, and how to manage and manœuvre her under every conceivable circumstance. But those were the days of sailing-vessels, say our friends who would supplant seamen by engineers and gunners. These critics, however, forget that in taking away the sails they have only taken away the propelling power, to replace it by another,—steam. The seaman is still necessary, nay, indispensable, even with the new propelling power, for a man requires to be bred to the sea to thoroughly understand how to handle a ship, be her propelling power what it may. Complaints are made in ports around our coasts that a man-of-war often does more damage on going alongside a jetty or wharf, than all the merchantmen who range alongside during the year. The accusation is certainly not flattering to the seamanship of the Royal Navy; but then, as a correspondent recently pointed out, "an officer may be paid off from a gun-vessel, which has passed three years in the East Indies, and be appointed, after a few weeks, to the *Thunderer*, turret-ship. In a few months he may receive orders to join the *Crocodile*, Indian troopship, and at the expiration of six months be sent to the *Alexandra*, masted ironclad." This is quite a possible case. Thus, in a short space of time, the officer in question serves in four different types or classes of vessel, and is expected to be competent to navigate them; to know the various drills applicable to each class, and its varying armament, and to be conversant with the structural and internal arrangement of each type, whether mastless turret-ship, ocean-cruising ironclad, steam frigate, corvette, sloop, or gun-vessel. All vary in form, tonnage, length, and internal arrangement, some of them are only jury-rigged and out of trim; yet most of them have at some time to keep the sea under sail alone, and they have each to be served in at any moment by officers of the Royal Navy, who may never have seen two commissions in the same type of vessel. At an hour's notice Naval officers are called upon to do duty on board, or to command, any ship in the Navy. Whether they have served in or are acquainted with the type or class is never inquired. They are ordered to go, and they go. But how can they be expected to handle the ship in a seamanlike manner "right away," as our kin beyond sea would say, unless they know something of her behaviour at sea from past experience? Our types are constantly altering. As yet, we have but one *Polyphemus*, one *Inflexible*, and so on with the list of ships being brought forward. These will soon be commissioned, and their crews will know nothing about their behaviour at sea, or how they should be handled. All will have to be learnt. But in the first place, every effort should be made to thoroughly educate our officers in the art of managing a ship under all conceivable circumstances, before they are appointed to a modern sea-going ship. The first duty is to make thorough seamen of the youngsters who join the Navy, and this cannot possibly be done by appointing them to the modern ironclad.

There can be no doubt that the actual position of affairs in Europe and Asia engenders so many questions of uncertain solution, and so many misgivings, that to thinking men it cannot be reassuring. Nor can there be any doubt of the principal question being a question of power, and to some extent, *of purely brutal power*, the solution of which must be found in the triumphant sword of some victorious General. And this being the case, is there one of the leading men of Great Britain who would venture to stand forward and deny the importance of the general situation? In certain quarters they proclaim, "No danger whatsoever menaces the greatness, the power, and the well-being of the British Empire." This assertion would not, however, be accepted by any thinking man, for, in fact, the true position of affairs is too serious to be made generally public. "Quidquid agis, prudenter agas, et respice finem," was the clever maxim acted upon in Rome. What, then, is the truth? Does any one know it? Are not thinking men of all classes pretty well at their wits' end to know what may come next in Asia and in Turkey? Let us consider, above all, the position of affairs in Asia. Is any one informed of what is happening just now within the Russian lines in Turkestan, between Samarkand, Karchi, and Kerki, up the luxuriant valley of the Oxus, to Kileff? And is there anybody in England who has a clear knowledge of General Skobeleff's movements along the northern slopes of the Kopet Dagh and the Atagh, and of his *tête de colonne* being beyond Askabad, evidently directed upon Sarrakhs? And Sarrakhs, what would it be in the hands of Russia? Russia is not accustomed to officially publish the truth about her military movements in the south of the Empire. Is it not to be feared that proper attention has hardly been paid to all that is happening north of Herat and south of the Oxus, and that the military means and ways of Russia are perplexing those *who ought to understand them well?* In order to show the foresight exercised at St. Petersburg, we may mention that since April last no less than 144 young officers have been sent to Generals Kaufmann and Skobeleff, all of them coming from the Military Academy, where they had been instructed in the *special department for Staff service in Turkestan* for the last three years; and, as it is well known how military instruction is carried on in Russia, there can be no doubt that these clever young men, trained for a special service, know their duty well. Russian operations in Turkestan are undoubtedly directed southwards and not eastwards; *against Afghanistan, and not China;* and it ought to be known here, because there lies the root of all that has since happened, how much the Emperor's mission to Cabul has probably facilitated the coming strategical movements of General Kaufmann, for it is a positive fact that, whilst the Emperor's commissioners were at Cabul, three parties of special officers of the Russian Topographical Department were busy in exploring the country north and north-west of Cabul. Thus old maps were being corrected, the military value of positions marked down, distances accurately measured, and correct plans got up. Military men have pointed out how long England might continue to quietly look on before she yields to the necessity of acting; but at no moment has the necessity been so evident as at present. The subjugation, or even the crushing and extermination, of the perfidious and ruffianly foe in Afghanistan not to be considered as only preparatory to meeting with another and much more powerful foe?—for the Afghans are to Russia exactly what the Servians, Montenegrins, and Bulgarians were to her in 1876. It would certainly be trifling with the destinies of the nation, if things were perfunctorily looked upon otherwise. In military matters, sentimentality borders close upon crime, and woe to him who acts upon sentimental instead of logical conclusions; for as reason, in the end, rules the world, logic in the end is fate. To the silent but attentive observer of military matters, the rather contradictory question often occurs,—"Is Great Britain a Military Power?" In comparison with the huge military forces of the Continent, she certainly cannot be considered a Military power *in Europe*. There is no need to demonstrate this. Indeed, it would be much easier to write a book on the subject than to write an ephemeral article. The actual question turns upon this pivot,—Are the forces of England equivalent to the forces of a real and ponderous Military Power, such as Russia, of whom, sooner or later, the *Alea jacta est* is inevitably to be expected south of the Oxus? Undoubtedly, if the conscription were introduced into England, instead of the present system of recruiting, and the Army were modelled upon the Continental system, there could be no difficulty in making England a formidable Military power. These ideas, however, are repugnant as a general rule to the English mind, and there is no law through which the healthy and generous youths of Britain can be *compelled* to serve under the glorious colours of their Sovereign. *The system* prevents them changing *for two years only* the comforts of home for the stern duties of the drill-ground. But are there no means to augment the forces of Great Britain? Could we not imitate France, Holland, Russia, and other States, and keep a legion of foreign volunteers? Why should England, from feelings of delicacy or other reasons, refuse to do what is considered perfectly legitimate and in harmony with the institutions of the realm in other countries? It is only a few weeks since (on July 26) that the Ministre de la Guerre, at Paris, issued the order that henceforth all nationalities are again admitted to serve in the Algerian foreign legion,—since 1871 Germans have been excluded. And is not Holland enlisting thousands of foreigners for her colonial service? Not to speak of Russia, where all foreigners desiring to serve *in Turkestan* are accepted. And, perhaps, it is not a generally known fact that General Kaufmann has with him a legion composed of foreigners of all nationalities, most of them from Sweden, Denmark, and Oldenburg. Can it be doubted that a force of 8,000 or 10,000 good foreign soldiers would be of great utility to England for Colonial service? There can be no difficulty as to getting well-drilled soldiers from the Continent to form a force of 4,000 to 5,000 within three or four months, all ready for transport. Neither could there be any political difficulties as to the men leaving their homes, for no one would be bound to tell where or why he went. Having a permanent legion of foreigners in the Colonies, as the French have in Algiers, and the Dutch in India, would give to England an extra equal number of soldiers for home services. This would certainly, under certain circumstances, be of great value, and as a matter of practical Military fact, ought to be considered.

The two nations which are most likely some day or another to come into collision are the French and the Germans, and both assiduously prepare for the contingency. Every year they have rehearsals of war, in the shape of autumn manœuvres, and those which have just terminated possess much interest, from the fact of their having been held almost simultaneously, and having been fully described in the *Times*. Thus a comparison between the efficiency of the French and German Armies can easily be made, even by the unprofessional reader. In neither country has every *corps d'armée* been manœuvred as a whole, but in the case of those which have not been so manœuvred, the different tactical units have undergone, on a small scale, a very practical training. What must most strike the readers of the *Times* is that the Germans are more realistic, pay attention as much to the training of General and Staff Officers as to that of regiments, and that a good deal of initiative is left to the commanders. At the French manœuvres, on the contrary, the programme has generally been cut-and-dried, and Generals have had little scope for the display of strategical or tactical skill. The Germans also have used railways as they would be used in the field, embarkation and disembarkation platforms having been constructed on the spur of the moment, and reinforcements having been brought up by train. The German Cavalry were also freely used, both for reconnoitring and other purposes. One especial feature in the use made of this arm was that the enemy's front and flanks were constantly infested by small parties of cavalry, who from time to time sent word to the General of any movements which they observed. There is, indeed, every reason to believe that the German Army is by no means contented to rest on its laurels, but is incessantly occupied in trying for increased efficiency. Turning to the French Army, we notice one fact of some significance,—namely, that one independent cavalry division and the Sixth Corps d'Armée performed manœuvres in the country between the Argonne and the Moselle, on the ground which would be the first theatre of war, in the event of an invasion by Germany. This district has, indeed, been manœuvred over in every part annually during the last six years. Thus the geography, in its minutest details, of this important region is thoroughly well known by all ranks. The manœuvres of the Sixth Corps seem to have been of a rather cut-and-dried nature, and the cavalry appear not to have been properly utilised, either in large bodies or for reconnoitring purposes. The artillery took up a position at the beginning of a fight at some 2,500 yards from the enemy, and rarely moved afterwards. The engineers were only employed once, and then were very slow in constructing field bridges over a stream so narrow that a man could have jumped it. The telegraph section, only mobilised for war or manœuvres, and composed entirely of civilians, did good work. The infantry marched well, and were thoroughly in hand, both as regards fire and movements. A point to be noticed is that the sub-units, even down to sections, were always kept together and separate. Another point was that volley-firing by sections and squads was much employed. Frequently, however, firing went on at batteries and thin lines of skirmishers, at a distance of from 1,500 to 1,800 yards. It is also asserted that the supports and reserves were too far in rear of the weak fighting-line, and frequently not only failed to take advantage of cover, but even moved in column when exposed to an effective artillery fire. As regards discipline, the French Army is admirable, if by discipline be meant the absence of crime. If, however, there be included in it attention to details, the same praise cannot be awarded. The horses were badly groomed, their feet not looked after, the artillery waggons and harness were dirty, and the men of all arms presented anything but a smart appearance. As to physique, the French Army is in a very satisfactory condition, the men looking healthy and well fed, and performing long marches without stragglers. The Frenchman is of a different race from the German, but though the former is the slightest built of the two, we do not fancy that, on the whole, there is much to choose between them, in the way of wiriness and muscular strength. To sum up, we are inclined to think that though the German Army maintains its superiority over the French Army, that superiority is infinitely less than it was ten years ago, and is daily growing smaller.

It has been arranged that Mr. J. K. Laughton, M.A., R.N., shall give a course of nine lectures on Naval history, at the Royal Naval College, Greenwich. The lectures will be given from 12 to 1 on Wednesdays, beginning on Wednesday, October 13. Officers of all ranks in any department of the public service will be permitted to attend. Those officers who are not students of the College are requested to sign their names, with rank appended, at the entrance of the lecture-room. Officers who intend to be present should leave town by the 11 o'clock train from Charing Cross

---

Major Tupman, R.M.A., who, since the date of the transit of Venus, has been engaged in working out the observations under the authority of the Astronomer-Royal, has been permitted to go upon the Retired List, and has been recommended for a step in honorary rank. Major Tupman was nearly at the head of the Major's List.

The annual coast-defence exercises, as ordered by the German Admiralty, have recently been carried out at all the principal forts on the coast, upon which it was supposed a hostile fleet was attempting to make a descent. The operations lasted for two days, which was considered sufficient to ensure every man being in his right place, should the necessity arise for defending the coast against attack.

Orders will shortly be given for the *Swinger* to return to England from the China station to pay off, the *Zephyr* having been commissioned to relieve her.

By the courtesy of Lady Bridport, who has forwarded some extracts from a letter from Commander the Hon. H. N. Hood, in command of the *Pegasus*, we are put in possession of the real circumstances attending the visit of that ship to Corea, alluded to by us last week. It appears that a stay of four days was made at Fusan, and the ship then went to Port Lazare, another Corean port, and a magnificent harbour. "Here," says Commander Hood, "some fifty Coreans visited the ship, and were friendly enough on shore. On Monday, June 7, I shifted berth eleven miles, anchoring off the new Japanese settlement, which was established there on May 25 last." In a postscript to this letter, however, Commander Hood adds:—"Japanese papers grossly misreported my visit to Cliusan (or Fusan), Corea, which will probably be copied into English papers." The statement upon which we based our remarks of last week reached us from China, and it is evident that the truth has been diligently suppressed.

It has been found that in some cases of examination of boilers of paid-off ships, they have been much more decayed than the reports received from the ships or the length of service justified. This their Lordships attribute to ignorance and want of care on the part of the engineer officers, who are held "greatly to blame." In a circular calling attention to this matter, the cases of the *Arab*, paid-off August, 1879, *Diamond*, paid-off December, 1878, and *Mallard*, paid-off last February, are specially cited. The necessity for the greatest care being exercised with respect to ships' boilers is only too evident, and the Admiralty promise to note favourably all engineer officers whose attention to this part of the duties is proved by the condition of the boilers under their charge on paying-off.

In future, the signal for closing the water-tight doors and valves in H.M.'s ships is to be given by continuous blasts on the fog-horn, instead of as directed in Gunnery Drill Book.

The Russian Navy Estimates for 1881 are as follows:—Administration, 1,537,742 roubles; training establishments, 539,191; medical service and hospitals, 784,292; wages ashore, 3,498,188; victualling, 933,109; ships on home service, 3,407,298; ships on foreign service, 2,626,100; hire and maintenance of buildings, 689,254; commands, 431,800; rewards and grants for children, 522,712; hydrographical service, 390,831; workmen's wages, 2,628,354; marine artillery (including mines, 490,000), 1,416,160; building works and repairs, 1,917,418; clothing, 940,907; naval construction, 4,120,053; preparing materials and reserves for ditto, 3,453,513; lighthouses, 278,000; sundries, 409,486; total, 30,659,029 roubles. The present exchange value of the rouble is 2s., or ten to £1 sterling. The increase of the Estimates this year is 1,273,869, chiefly owing to the presence of Admiral Lesovsky's fleet in the Pacific. The increase of 240,000 roubles in the victualling department is ascribed to the rise in the price of provisions, owing to the fall in value of the rouble, &c. The increase in the maintenance of ships on foreign service is 751,518 roubles. In naval construction, there is a decrease of 879,947 roubles; but in the preparation of materials for ditto, there is an increase of 502,594 roubles. The pension fund now amounts to 16,875,569 roubles, and will reach 17,205,798 by the end of 1881. The endowment fund of the Sebastopol Naval Library will reach 36,950 roubles by the beginning of next year.

The Rev. E. L. Penny, R.N., Chaplain to her Majesty's Dockyard and Hospital, Bermuda, has been appointed Chaplain to her Majesty's Land Forces on Boaz and Ireland Islands.

The late First Lord of the Admiralty has made an intimate acquaintance with the difficulties of navigation, his steam yacht, the *Pandora*, 400 tons, having run aground at Cephalonia. Mr. Smith was on board, with his family. A Lloyd's telegram reports that the vessel is intact, and attempts, which we hope may be successful, are to be made to float her.

Mr. F. W. Rowsell, C.B., late Director of Navy Contracts, and now British Commissioner of the Egyptian State Domains, has left London to resume his official duties at Cairo. Mr. Collett, the present Director, is now busily engaged in visiting officially the manufacturing districts.

A telegram from Shanghai reports the Chinese actively engaged in defensive preparations. There is a brisk demand for arms and ammunition, and it is stated that a torpedo factory is to be established at Kianguan.

On Wednesday three additions were made to the Navy, by the launch, from the Barrow Shipbuilding Yard, of the composite gunboats *Grappler*, *Wrangler*, and *Wasp*. These vessels are 125 ft. long, 33 ft. 6 in. in breadth, and 12 ft. depth of hold, the engines being of 306 horse-power. Two sister gun-boats, the *Banterer* and *Espoir*, are being built at the same yard.

As a result of the recommendations of the recent Committee on Transport, a circular has been sent by Rear-Admiral Sir William Mends, K.C.B., Director of Transports, to leading steamship-owners, stating that Captain Brownlow, C.B., will, during the next few months, visit their ports, for the purpose of ascertaining what merchant-steamers are best adapted for transport-service.

Captain H. F. Stephenson, C.B., had the honour of being received by her Majesty at Balmoral on Sunday, previous to his departure with the Detached Squadron, in command of the *Carysfort*.

The two new vessels which have just been laid down in Devonport Yard—the *Heroine* and *Hyacinth*—are 20 ft. longer than the former *Mutine* class, and carry eight guns, in lieu of six. The increased length and breadth give them an addition at 296 tons displacement, the tonnage being 1,420. For building and completing hull, an estimate of £45,000—£20,000 for material and £25,000 for labour—has been approved.

The United States vessel *Alert*, engaged on surveying service, reports the discovery of a submarine volcano near San Alessandro, an island in the Pacific.

The French expedition, to which we alluded last week, commissioned to take possession of the districts which have placed themselves under the protectorate of France, between Senegal and the Upper Niger, left Bordeaux this week.

A flag-officer's good-service pension of £300 a year is placed at the disposal of the First Lord of the Admiralty, by the death of Admiral Sir J. W. Tarleton, K.C.B.

Commodore Richards, C.B., was to leave Simon's Bay on September 11 for a cruise to Delagoa Bay, returning to Simon's Bay about the 15th inst. The Commodore will then remain there about a month, and then leave for the West Coast of Africa. Mails for the *Boadicea* and *Pioneer* should be sent to St. Helena after the 22nd inst., and to Sierra Leone after December 3.

It is hoped that the flagship of the Detached Squadron, *Inconstant*, will be ready for sea at the end of next week, when the *Carysfort*, Captain H. Stephenson, C.B., *Cleopatra*, Captain F. Durrant, and *Tourmaline*, Captain Dennistoun, will join the flag of Rear-Admiral the Earl of Clanwilliam. The departure of the squadron for Vigo, there to be augmented by the addition of the *Bacchante*, will take place at the earliest possible date. The programme of the cruise of the squadron is not yet finally arranged, but it is probable that, on leaving Gibraltar, the ships will visit

Madeira, St. Vincent, Cape de Verde, Rio de Janeiro, Monte Video, Falkland Islands, Straits of Magellan, Valparaiso, San Francisco, Vancouver's Island, Honolulu, China (two ports), Japan, and Singapore. The *Bacchante* will leave the squadron at Singapore, and proceed to England *viâ* the Suez Canal, in order to reach home by Christmas, 1881. The remainder of the squadron will return by way of the Cape, and reach England a few weeks later.

Vice-Admiral Coote, C.B., was in the *Vigilant* at Yokohama on August 12, having arrived there two days previously from Okosiri Island, the *Iron Duke* having gone to Hong Kong for docking.

Rear-Admiral Gore Jones, C.B., arrived at Trincomalee from Zanzibar on September 4, and was to leave for Bombay, returning again to Trincomalee.

The repairs required by the *Iron Duke*, after her recent grounding, necessitated her being kept in Aberdeen Dock, Hong Kong. According to latest particulars with respect to the mishap, it appears that the *Iron Duke* ran on the island of Akushire, about 90 miles from Yokohama. Attempts to get her off without assistance failing, a steam-launch was despatched to Hakodate for aid. The *Modeste*, the French men-of-war *Themis* and *Champlain*, the Russian flagship *Kerguelen*, and a Japanese gunboat, proceeded to the scene of the accident. In the endeavour to get the *Iron Duke* off the island, the *Champlain* took ground, and had to be towed off by the *Modeste*. The *Iron Duke* stranded on July 30, and at 10 a.m. on August 2 she was dragged off into deep water, amid cheering from the crews of all the war-vessels, the bands playing "God Save the Queen." Next day the *Iron Duke* and the *Modeste* returned to their anchorage, the various vessels in harbour displaying all the bunting they possessed, in token of welcome. The *Champlain* sustained considerable damage in assisting the *Iron Duke*, and she was at once docked.

Disquieting rumours as to the state of affairs at Lima have necessitated the despatch of the flagship in the Pacific to Callao, for which place Rear-Admiral Stirling left Esquimault on October 2, instead of proceeding to Tahiti, as previously intended.

All leave granted to an acting sub-lieutenant on return from foreign service, until he has completed his examination for the rank of lieutenant, will in future be reckoned as part of the full-pay leave, sanctioned by Art. 1,279 of the Regulations, except the ten days allowed by Art. 292.

Where are the Marines? The force is supposed to be 13,000 strong, and has been ordered to be recruited up to within one thousand of that number, and we have understood that the gallant corps is not very far below its authorised strength. Yet when a detachment was recently required for a ship being commissioned at Devonport, it was alleged that the despatch of the battalion to Ireland had so denuded the Plymouth Division that it was requisite to send to Chatham for this one ship's detachment. And now Chatham itself has been drawn dry, and has been unable to send the relief for the detachment on board the flagship at Sheerness. Surely the despatch of a battalion of a thousand strong to Ireland, taken as it was from the three Divisions, ought not to have reduced the strength of the Plymouth and Chatham Divisions to such a low ebb that the detachment for a harbour-ship cannot be provided. A return has been called for of the numbers borne at each head-quarters and the manner in which they have been employed, both afloat and ashore; and it will be interesting to know how the twelve thousand officers and men of the corps are employed.

Some stir having at length been made as to the abuses of the Patriotic Fund, a correspondent suggests that inquiry should be made as to the officers holding appointments as *honorary* secretaries. It is believed that an Admiral who held this office was in the receipt of £600 per annum for some years while acting as so-called "honorary" secretary, and since then has been receiving £300 as a retiring pension. Unless the word "honorary" has received a new meaning of late years, this appears to be, in the words of our correspondent, "an abuse and a discredit to the Naval Service."

The recent discovery of remains of the Franklin expedition confirms the impression that Franklin's companions were starved to death by those who supplied the "preserved meats" to the *Erebus* and *Terror*, and who supplied the first searching expedition under Sir James Ross. We have it on the authority of Commander Cheyne, who served in the Franklin search expeditions, that those with Sir James Ross found that in very many instances 8 lb. tins labelled "roast beef" and "roast mutton," were found to contain nothing but bones. Meat tins contained rotten vegetables, but never the reverse. The whole of the animals were put in the tins, excepting the horns, hoofs, and hides, the very entrails and contents "preserved" for the explorers' subsistence during an Arctic voyage, when no other provisions could be procured. Often when the daily rations served out were taken on the quarter-deck of the *Enterprise* for survey and condemnation, Sir James Ross's answer would be, "If I condemn those, I might condemn half the provisions in the ship, and then we should simply starve." On board the *Plover*, another ship sent in search of Franklin, 10,570 lb. weight of the contractor's preserved meats were found to be in a pulpy, putrid state, and were condemned and thrown overboard as unfit for food. The fact of this contractor's name being on the tins lying about the beach at Beechy Island, the first winter quarters of Franklin, points to the fact that starvation must have done its work, and that Franklin's party fell victims, not to the severity of an Arctic climate, but to this man's cupidity. The following is an extract from a second cablegram received by Commander Cheyne from Lieutenant Schwatka:—"Again I have got to thank you for your kind compliments. If Franklin's men can be taken as a judge, they did all that mortal men could do; and even more, if I can be taken as a judge, as these bravest of all brave men, dropping down in their very tracks, halted to place little sand over their comrades."

The new officers and crew for the *Flamingo*, which have left England on board the *Assistance*, will be transferred to the *Tamar* at Gibraltar on the 17th inst., and proceed in her to Bermuda, where they will be turned over to their ship. The paid-off crew of the *Flamingo* will probably be delayed in their return to England, as the *Tamar* will not leave Bermuda on the homeward passage until the *Crocodile* arrives there with time-expired men from Halifax,—probably about November 30.

The method in which prizes are awarded at the Royal Naval College has lately been under consideration, and we understand that it is intended to alter the existing system.

The sum that has thus far been collected towards erecting some suitable memorial to those who so gallantly died at the wreck of the *Orpheus*, has, as will be seen by reference to our advertising columns, now reached the respectable figure of nearly £100, and we hope that a further list of contributions may soon be forthcoming, as we regret to notice that the Navy has been somewhat slow in lending a hand in the commemoration of an event which, sad as it was, did much to add to the name of the Service for gallantry. In last month's *Life and Work*, published in Edinburgh, and which has a special supplement for soldiers and sailors, there are some stirring lines on the loss of the *Orpheus*.

We are glad to hear that Commander Day, late in command of the *Condor*, has received from the Admiralty an expression of their Lordships' satisfaction at the favourable report of her inspection on paying off. The efficiency of the ship on her paying off greatly facilitated the work of recommissioning her, and materially shortened the term of her detention at Malta before being reported ready for further service.

Accepting Admiral Bowyear's comments on the leader which appeared in these columns on September 11, in which we drew a comparison between the *Atalanta* and the *Phaeton*, assuming the former frigate to be overtaken by a gale of no greater violence than the one the *Phaeton* steamed through in December, 1863, we, last week, published a second letter from that officer. In that he asserted that "the *Phaeton*, after being lengthened 30 ft. amidships for the reception of her machinery, &c., was much weaker than in her original compact form as a sailing frigate." But how is Admiral Bowyear going to prove that this assertion is correct? It was for a very long time believed by seamen that "cutting in two and lengthening" weakened a ship. But it has been ascertained by actual practice that when this work is well done, the lengthening process can be made to strengthen a ship. Not only can a ship be strengthened by being lengthened, but she can be made both a better seaboat and a faster vessel. With steamers it has been found that after lengthening them, the same engines and boilers previously used, that is to say, the same power, has driven them from one to two knots faster than when they were shorter vessels. The reason of this apparent anomaly is plain. The ship displaces as many times her weight of water as her length is contained in, say, a nautical mile. Hence, a long ship will displace a lesser weight of water than a short ship in traversing equal distances, their beams being approximately the same, and the long ship will require the lesser horse-power to attain any given speed. But this is entirely beside the mark. The *Atalanta* in 1880 was many years older than the *Phaeton* in 1863, and her frame must have correspondingly deteriorated. Her weights were not the same as when she was known as the *Juno*. Her crew were not able to handle her in the same smart manner. And her Captain's suggestions as to the alterations necessary to add to her efficiency as a sea-going ship were rejected by the Department responsible for her equipment for service as a training-ship.

Latest accounts, we are glad to say, give a more favourable report of the condition of Colonel Napier Sturt.

We should have thought that the statement that General Sir Charles Staveley is to proceed next month to India, to succeed Lieutenant-General Warre as Commander-in-Chief of the Bombay Army, which appeared on Monday in the columns of a daily contemporary, would have been too absurd to require contradiction. Some have apparently been misled by it; perhaps, therefore, it is as well that we should point out that it was Sir Charles Staveley who preceded General Warre at Bombay.

Lieutenant-General G. C. Clarke, C.B., late of the Greys, will, it is believed, be recommended to her Majesty for the vacant colonelcy of the Carabiniers, vice General H. R. Jones, deceased.

Advices from Metz state that the works for the completion of the fort at St. Eloy are pushed forward with all possible speed. It is believed that by the end of the year they will be so far advanced as to put the new fort in a perfect state of defence. Acting upon the favourable experiences made with the revolving turrets in Fort Kameke, the new work is to be furnished with similar defences, the latter to be armed with the heaviest artillery. The turrets are supplied by Ganson, of Magdeburg.

A committee of officers, consisting of Colonel Redvers Buller, V.C., C.B., C.M.G., Assistant-Quartermaster-General (president), Lieutenant-Colonel Thornhill, R.H.A., and Captain Stephens, R.E., has been appointed at Aldershot to conduct experiments in connection with the railway embarkation and disembarkation of artillery.

To improve the condition of the officers of the Russian Army, the Minister of War has just granted two votes, one of 375,812 roubles towards the formation of regimental libraries in provincial towns and frontier stations, and another of 350,000 roubles towards increasing the pay of junior officers of line regiments stationed alongside the better-paid regiments of the Guards.

The Honorary Secretary, Army Inter-Regimental Rifle Match, writes:—"Returns of battalions on foreign service not all received, owing to the infrequent despatch of mails in some parts. One battalion reports that their returns cannot possibly arrive before the end of October, although they would be ready for despatch by September 18, the last day allowed for shooting. The following are some of the best scores received up to date. The figures in brackets are the numbers of officers and men respectively who competed. The distances were 200, 500, and 600 yards, seven shots at each; targets as at Wimbledon. The averages of the battalion, or team prizes, are those of the eight best scores:—For the Battalion prizes, probable value, £78 and £39: 56th Regiment (2-6), 89·37; 1st Battalion 22nd Regiment (2-9), 89·00; 45th Regiment (3-10), 88·12; 1st Battalion Scots Guards (4-12), 87·75; 42nd Regiment (3-7), 87·25; 2nd Battalion 12th Regiment (1-10), 86·00. The averages of the other battalions are below 86. For the Individual prizes, officers' list, probable value, £66: Lieutenant Lamb, 22nd Regiment, 95 points; Captain Partridge, 97th, 94; Captain Hall, 22nd, 92; three 90's, and seven 89's to 87's. Men's list, probable value, £132: Colour-Serjeant Randall, 45th Regiment, 100 points; Serjeant-Major Tuck, 56th, 97; Colour-Serjeant Walton, 42nd, 96; Serjeant-Instructor of Musketry Bonner, 55th, 96; one 94, one 93, seven 92's, eight 91's, seven 90's, and twenty-four 89 to 87. Scores in both lists below 87 already counted out.

It is reported in Candahar that General Primrose has been ordered to proceed to Bombay, to explain his conduct of recent military operations. General Phayre has succeeded General Roberts in the command at Candahar, as we learn from the correspondent of the *Standard*. The attitude of the population is described as expectant, but not friendly; and uneasy rumours were circulating in the bazaars that Ayoub Khan had entered into an alliance with Mohammed Jan, and intended returning to the attack on Candahar with more guns, and supported by a contingent from Ghuznee. It is also said that on arriving in Herat, Ayoub ascribed his defeat to the fear that the Cabulee troops had been tampered with by the Ameer and the British. The Heratees are said to be willing to advance once more, and that preparations are being made accordingly. These reports may have very little foundation in fact, but their circulation in Candahar has a disquieting effect on the citizens.

Messrs. Blackwood announce that the sixth volume of Kinglake's *Invasion of the Crimea* will be published on Wednesday next. The volume is entitled, in the advertisement, "The Winter Troubles." The winter was that of 1854-5, just a quarter of a century ago, and all that time it has taken Mr. Kinglake to write the five volumes which only lead up to that in which the author approaches the treatment of the great theme which was the *raison d'être* of the history. What "the winter troubles" of 1880 may be we do not know, but the record of the part England has been made to play of late days to the ancient ally for whom she fought in 1854, is well calculated to make us wonder at the change which has come over the spirit of our policy. What millions of money spent, what thousands of lives sacrificed, what waste of health and strength, what misery, mutilation, sickness, anxiety, and sorrow, what homes made desolate for ever! And clearly, if we be right now, we were wrong then, and all the stress and agony of the nation in that great war were well deserved, as they were unnecessary. Admiral Seymour, in the Bocca di Cattaro, may amuse his leisure with Mr. Kinglake's new volume, and contrast his "winter troubles" with those which harassed the English General on the plateau of Sebastopol, with the comfortable assurance that he is the organ of a European concert, the overture of which, at all events, is "Delenda est Constantinopolis."

The state of affairs in Basutoland seems going from bad to worse. It is true, we are told in a Cape Town telegram, that the relieving force had arrived at Mohales Hock, and had, with the help of the garrison, dispersed the Basutos, with trifling loss; but, from other accounts, we learn that the hostile rising is spreading. At first, as we are told by the *Standard's* correspondent, the revolt was confined to Western Basutoland, but the Basutos east of the Drakensburg have now broken out. Commissioner Brownlee, with two magistrates and about a hundred men, went up from Kokstad to pacify them, but without success. They have been unable to return, but are said to be safe in Basutoland. Indeed, the whole of the natives in that part of the colony seem to sympathise with the Basutos; and if the rising goes on extending, as it has been recently doing, the Cape forces will probably be found utterly inadequate to cope with it. Already there is talk of calling out the burghers, though there is said to be a strong feeling against employing mercenaries, for whose discipline no one can answer. But the situation is already very grave, is daily becoming more so; and we may soon hear of an appeal for Imperial assistance.

The examination of officers for entrance to the Staff College, as at present conducted, is open to many objections, the principal of which must be considered the almost entire absence of physical, qualifying tests of their fitness for the work required. What the College is supposed to do is to find the right men for all Staff purposes, but the system now in vogue will never secure them, though it may hit upon them by accident. The physical tests above referred to are left almost entirely for the officer commanding the regiment to which the candidate belongs to report upon, who may or may not have had sufficient opportunities of forming an opinion, though he probably gives them to the best of his ability. But he may have lately joined the regiment, and have to seek advice from others, the upshot of it all being that applicants are seldom or never disqualified from physical defects; their eyesight may be bad, they may be indifferent riders, they may be incapable of much exertion, they may be deficient in "physique," and many other points might be mentioned, any one of which, no matter how clever theoretically a man might be, should disqualify him from competing at the theoretical test. Even the medical certificate of the candidate's fitness is nothing like strongly enough worded to prevent delicate people from entering the College and "passing for the Staff." Commanding officers should always be called upon to state how many years they have known the candidate, and in what exercises he more particularly excels, so that his report should show positive merit in the individual, and not be the mere negative statement that it so often turns out to be. Officers who are selected for special education on the Staff should undoubtedly have special physical as well as mental qualifications for it. We admit the latter, while ignoring the former; yet if it came to real warfare, and these officers only were to be employed, what would be the use on a campaign of the cleverest man in the world, if he had not a good, strong constitution, and could on occasions put up with considerable hardships? Commanding officers have hitherto been allowed pretty much their own ideas about certificates for candidates, and these have not always been equally just to the Service, as well as the individual, which may arise from a variety of ideas as to the requirements necessary for the Staff College. Once make the form of certificate from commanding officers bear a thoroughly practical aspect in a physical point of view, and all these irregularities in their scale of ideas will cease to exist.

Unsatisfactory reports reach us from Aldershot of the way in which the annual practice of the batteries of Horse and Field Artillery has, for several years past, and more particularly during the present year, been carried out at that station. If we are correctly informed, local orders were issued a short time ago at Aldershot that the practice was to be completed with all possible speed, in order that the batteries might be free for divisional field-days. In consequence of these orders, each battery was allowed this year rather less than nine hours in which to complete the whole of its annual practice, including the competition shooting for prizes given by Government. This is about one-quarter of the time usually allowed at Okehampton, Hay, and the other ranges in England, and it was found to be so short as to preclude the possibility of the gunners being properly instructed in shooting, or of any useful results whatever being gained by the practice. In the case of some of the batteries, it was actually a question whether the number of rounds allowed to be expended could be fired in the allotted number of hours. Commanding officers of batteries were compelled to hurry through the firing with all practicable speed. The ordinary regulations for target-shooting had to be set aside, practice reports were "fudged," and the whole operation of practice has in the case of nearly every battery of the Aldershot Division been conducted with slovenly haste. To one battery some experimental fuzes had been issued, with a view to their being put to a thorough and exhaustive trial; but the battery commander, through no fault of his own, found it impossible to test these fuzes in a satisfactory manner, owing to sheer want of time. The evil effects of this slack method of proceeding are obvious. It is not merely that public money is wasted and valuable time thrown away, but the men are taught to regard what is by far the most important duty of a gunner, viz., skilful shooting, as one which can be slurred over and got done with as quickly as possible. Artillery practice, if it is to serve any useful end, should be carried on with care and deliberation, which cannot be the case when the main object in view is to get rid of ammunition with the utmost haste. It is better, far better—and Artillery officers themselves admit it—to dispense with the annual practice altogether than to allow it to degenerate into the farce which it has gradually become at Aldershot. The importance of the tactical training of our Field Artillery is not to be under-valued, and in this respect much good work is done at Aldershot, where General officers have opportunities, such as they seldom get elsewhere, of handling Artillery in conjunction with Infantry and Cavalry. At the same time, we do very earnestly protest against the technical instruction of Artillerymen being neglected or subordinated to mere field manœuvres. Technical and tactical training should be carried on together, and there is no reason why at Aldershot, as elsewhere, batteries of artillery should not be put through a thorough and comprehensive course of gun-practice, and at the same time be trained to manœuvre in the field in combination with the other arms. The present is a critical period for Field Artillery. Its claim to hold its own in the "hierarchy of arms" has been challenged in more than one quarter, and no effort should now be spared by Artillery officers to develop by every means at their disposal the technical as well as the tactical power of their arm in battle. The Duke of Cambridge, as is well known, attaches great importance to this question of Artillery practice, and he only lately obtained the consent of the War Office to increase the allowance of ammunition to be yearly expended, with a view to rendering the annual practice of batteries more thorough. Stringent regulations to be observed during the conduct of practice were at the same time issued by command from the office of the Deputy-Adjutant-General of the Royal Artillery, so that we feel sure that if the manner were brought to the notice of his Royal Highness, it would occasion him severe displeasure.

We drew attention some time ago to the incidental expense to which officers individually and collectively are subjected whenever a regiment moves, and the importance of the subject compels us again to refer to it. The scanty allowance of furniture with which an officer is supplied, viz., a table and two chairs, a fender and fire-irons, puts him to the expense on moving of carrying with him every article of furniture which is likely to be serviceable in his new station; while the variety in size and shape of the quarters at different stations necessitates a fresh supply of such articles as carpets, curtains, door-mats, &c., the old ones being disposed of,—it is needless to add, at a considerable loss. The furniture of the mess and the ante-room has to be treated in the same way, causing much expense, both to the public and the officers of the regiment. A more liberal supply of furniture in the officers quarters, and of furniture, delf, cutlery, and linen in the mess would be a great boon to the officers, and in the long-run would cost the public little more than the present cost of transportation of so much heavy baggage. We are at a loss to understand why it should be prohibited to employ any portion of the canteen profits in providing prizes for shooting; we cannot imagine a better application of such funds, provided that the system is not made an excuse for unduly raising the rate of profit levied on the canteen goods—a contingency which we do not consider very likely, and which could be checked immediately, as canteen accounts are carefully examined by higher and extra-regimental authorities—and we respectfully hope that this regulation may be reconsidered. It would surely add very much to the comfort of serjeants' messes if a chair was issued for each dining member, instead of, as at present, one chair being allowed for every two serjeants.

A return of the state of the French Army in 1880, which has just been issued, shows that the General Staff is composed of 100 generals of division and 200 brigadiers on full pay, and 3 marshals and 10 generals of division unattached. The reserve consists of 23 generals of division and 27 brigadiers, while on the retired list there are 76 generals of division and 185 brigadiers. Total, 624 general officers, the senior of whom is General Schramm, who was mortally wounded at Wagram, but who still lingers on. The Infantry, we see, possesses 175 colonels and the same number of lieutenant-colonels, and in all 11,839 officers for the permanent army. In addition, there are the officers of Algerian corps, 3,575 officers attached to the reserve of the active army, and 1,336 attached to the territorial army, making a grand total of 23,011 infantry officers. The Cavalry has 88 colonels, 90 lieutenant-colonels, and shows a grand total of 5,092 officers, 898 of whom belong to the territorial army. The Artillery, with 86 colonels and the same number of lieutenant-colonels, shows a total of 5,414 officers, 1,280 of whom are territorials. The Engineers possess 43 colonels and 42 lieutenant-colonels, and a total of 1,508 officers, of whom 443 belong to the territorial army. The list includes the Military Train with its 1,139 officers, the Gendarmery with 841, the Custom-House Corps with 505, and the Wood Rangers with 310. In all, the French *Army List* shows a total of 37,100 officers, of which 19,925 belong to the permanent army, 6,147 to the reserve of the active army, and 11,052 to the territorial army. These figures show that progress is being rapidly made with that territorial army which will shortly be one of the most solid bulwarks of France. That force is better officered than the reserve, as the men of the reserve would naturally pass at once into the active army in the event of a mobilisation. The above list only gives the fighting element, and does not include the medicos, the vets., the chaplains, and, in fact, 10,909 functionaries who are under the orders of the War Minister, and enjoy military rank.

A short time ago a French paper opened a subscription in favour of the last survivor of Trafalgar, and hinted that it would be a graceful act on the part of England to contribute to the fund. It would be like shaking hands after a "set-to." Now the *Figaro* announces the existence of a veteran drummer, who, no doubt, has similar claims on our generosity, seeing that he drummed through the Peninsular war. The name of this ancient hero is François Gleizand, and he was born on September 8, 1780. He was drawn in the conscription in 1800, the year Marengo was fought, and joined the 52nd at Brescia. François Gleizand served through a variety of campaigns in Spain, Italy, and Germany, and remained in the same corps until 1815. During the whole time he was in the Service, he only had one furlough of twenty-four hours. On his release, Gleizand returned to his native village of Bollène, in the Vaucluze, where, for the last sixty years, he has held the post of public drummer. He is said to have been greatly affected the other day when he learned that the present War Minister had suppresed the tambour, giving it as his opinion that the Service was going to the d——. Poor Thackeray, who wrote "The Chronicle of the Drum" and the history of Old Peter's family,

> "Whose ancestors drummed for King Harry,
> The Huguenot lad of Navarre,"

would have been glad to have come across this relic of bygone times, who may have rattled the sticks with Old Peter himself, whose last field was Waterloo.

STAFF COLLEGE.

The following list shows the result of the recent examination for admission to the Staff College. Those candidates who are recommended for admission will join the College on February 1 next:—

Order.	Rank and Names.	Corps.	Stations.	Marks.
1	Lieut. R. da C. Porter	R.E.	Cape C'l'ny	2,721[1]
2	Lieut. H. de H. Haig	R.E.	Mauritius	2,483[1]
3	Capt. J. B. Leefe	R.M.A.	Home	2,273[2]
4	Capt. F. N. Innes	R.A.	—	2,256[1]
5	Lieut. W. C. James	2nd Dragoons	—	2,182[1]
6	Lieut. S. C. N. Grant	R.E.	—	2,114[3]
7	Lieut. J. K. Trotter	R.H.A.	—	2,111[1]
8	Capt. J. C. Dalton	R.A.	Bengal	2,099[1]
9	Lieut. H. B. Mortimer	64th Foot	Home	2,037[1]
10	Capt. Hon. H. G. Gough	14th Hussars	—	2,020[1]
11	Capt. R. E. Allen	2nd Batn. 15th Ft.	—	1,923[1]
12	Capt. C. E. Beckett	3rd Hussars	—	1,824[1]
13	Lieut. C. H. H. Beley	Bengal Staff Corps	Bengal	1,759[2]
14	Capt. T. H. Phipps	7th Hussars	Home	1,690[1]
15	Lieut. C. M. Hutton	52nd Foot	—	1,662[1]
16	Lieut. T. E. Stephenson	56th Foot	—	1,642[1]
17	Lieut. F. W. Bromfield	2-22nd Foot	—	1,627[1]
18	Lieut. A. E. Codrington	Coldstream Grds	—	1,608[1]
19	Capt. E. C. Browne	2-21st Foot	—	1,590[1]
20	Capt. J. M. Gordon	2 21st* Foot	—	1,586[1]
21	Lieut. D. L. Baynes	75th Foot	—	1,578[1]
22	Capt. A. P. Wodehouse	27th Foot	Hong Kong	1,563[1]
23	Capt. R. G. Warton	2-10th Foot	Home	1,556[1]
24	Lieut. J. O. Quirk	41st Foot	—	1,552[4]
25	Capt. H. Hare	101st Foot	Halifax	1,548[4]
26	Capt. A. Wilkinson	40th Foot	Home	1,509[4]
	Lieut. A. H. G. Anton	89th Foot	—	1,509[4]
28	Lieut. E. Balfe	Bombay Staff Crps	Bombay	1,499[2]
29	Lieut. J. O. Duke	33rd Foot	Home	1,488[4]
30	Capt. H. F. Grant	4th Hussars	—	1,480[4]
31	Lieut. R. W. P. Lodwick	28th Foot	—	1,464[4]
32	Capt. E. E. Swaine	108th Foot	—	1,446[4]
33	Brevet Major R. B. Lane	Rifle Brigade	—	1,442[4]
34	Lieut. H. B. Bewicke	69th Foot	—	1,377[4]
35	Capt. E. A. Bruce	2-19th Foot	—	1,284[4]
36	Capt. F. H. Whitby	106th Foot	—	1,162[4]
37	Lieut. J. Reeves	98th Foot	—	1,096[4]
38	Capt. G. V. C. Napier	3rd Hussars	—	992[4]
...	... ...	...	...	1,627[5]
...	... ...	...	...	1,333[5]
...	... ...	...	...	1,297[5]

* About to be transferred to 1-21st Foot.

[1] Recommended for admission. [2] Recommended for admission as a supernumerary. [3] Qualified, but there is no vacancy for another Officer of the Royal Engineers. [4] Qualified, but there are no further vacancies. [5] Failed in languages. [6] Failed in mathematics.

REGIMENTAL COLOURS. — No. II.

UNRECORDED SIEGES.—LOUISBURG, 1758.

When Canada was restored to France in 1632, the island of Cape Breton was included in the cession, and remained till 1745 in the possession of the French, who fortified the town and capacious harbour of Louisburg, at great expense. An expedition for the capture of this important place was organised by the local authorities at Boston, and approved by the Home Government. A fleet, under Admiral Warren, convoyed the colonial forces to Cape Breton in April, 1745, and co-operated in the attack. About 6,000 New Englanders and 800 Marines were landed, and, under the able direction of the Naval and Marine officers, the siege operations by sea and land were so successfully conducted that Louisburg, and with it the whole island of Cape Breton, capitulated, on June 17. They were, however, restored to France in 1748. In 1757 a large naval and military force was sent against Louisburg, the fortifications of which had been, in the meantime, greatly improved and extended. The conduct of this expedition showed only the timidity, vacillation, and incompetence of the naval and military commanders, unredeemed by a single act of enterprise, or even ordinary resolution.

When Pitt determined to send an expedition to take Cape Breton, in 1758, he selected its commanders for their merits alone, without regard to seniority or interest. He made Colonel Amherst a Major-General, and gave him the chief command; and appointed three other zealous and promising young Colonels (Whitmore, Lawrence, and Wolfe) to be Brigadiers. There were fourteen infantry battalions, with a due proportion of artillery. The Fleet was commanded by Admiral Boscawen, an officer well chosen to act with these young Generals. The force arrived off Cape Breton on June 2, and anchored in Garbarus Bay, about seven miles from Louisburg; but in consequence of heavy gales, a landing could not be effected till the 8th. Even then, though the weather had moderated, the surf was so high that landing was extremely difficult and dangerous. Wolfe's brigade—the 17th, 35th, 47th, and 2nd Battalion 60th—was to land first, while the other two brigades pulled along the shore to distract the enemy's attention. On what slender chances do the most important events in war often depend! When the boats neared the shore, the prospect of getting through the surf seemed so desperate, that Wolfe, whose character for daring was already well established, waved his hat as a signal to return to the ships; but two young officers in one of the leading boats fortunately mistook his meaning, and urged the sailors on. When the boats got into shallow water, Wolfe's among the foremost, the men sprang out eagerly and got to land. The French opened fire from a long line of entrenchments near the beach, but, though many men were struck in the boats or while landing, not a shot was returned. The regiments formed up quickly, advanced, and stormed the entrenchments, driving the French, who had occupied them, to take cover within the fortifications of the town. The two other brigades meanwhile landed; but the surf had increased, and altogether nearly a hundred boats were swamped, and more than a hundred soldiers were drowned, killed, or wounded. The weather at last became calmer, and the surf went down; and, on the 11th, the artillery and stores were landed. The next day the French outposts were withdrawn, and the "grand battery," that commanded the entrance to the harbour, was destroyed. There were six line-of-battle ships in the harbour and a frigate, beside four ships sunk at the entrance. The garrison consisted of 3,000 regulars and burgher militia, and 350 Canadians and Indians. The ordinary operations of a siege went on with little interruption till the night of July 9, when the French made a vigorous sortie in force, by which the grenadier company of the 17th Regiment was overpowered, its captain, the Earl of Dundonald, was killed, the lieutenant wounded and taken, and the men all killed, wounded, or dispersed. The grenadiers of the 22nd and 28th soon came up, and changed the aspect of the fight. The French were at length driven back to the town, leaving behind 20 killed, and about 80 wounded or prisoners. The besiegers' works advanced steadily; a heavy fire was constantly kept up on the fortifications and the shipping; the barracks, the citadel, and some of the ships were burned. On the night of the 25th, two Naval captains, with the boats of the fleet, entered the harbour, and, under a heavy fire, boarded and captured the only two remaining French ships, burning one which had got aground, and towing the other out of the harbour. On July 26, M. de Drucour, the Governor, surrendered to the British the fortifications and town of Louisburg, and the island of Cape Breton. When his men were utterly exhausted; his walls breached in several places; most of his guns disabled, and most of his gunners struck down; all his sallies repulsed; all his ships taken or destroyed; when a final assault was imminent, and there was no hope of relief,—then, and then only, did the gallant Frenchman surrender. Including soldiers, sailors, and marines, 5,600 prisoners, 240 guns, 11 pairs of colours, and a large quantity of small-arms, ammunition, and stores were taken. All our operations appear to have been carefully arranged and admirably carried out, and the utmost cordiality prevailed between the Naval and Military Services; yet the loss in the land forces alone was 527 killed and wounded. But for the timely surrender of the French, this loss would, doubtless, have been much increased by the final assault. Though at the taking of Louisburg there was no such frightful carnage as at the breaches of Badajoz and St. Sebastian, our forces engaged gave ample proofs of their bravery and discipline during a siege which will compare favourably with most of those already commemorated on the colours of our regiments.

The regiments engaged in the siege and capture of Louisburg were,—the 2nd Battalion of the 1st Royals, the 15th, 17th, 22nd, 28th, 35th, 40th, 45th, 47th, 48th, and 58th Regiments, the 2nd and 3rd Battalions of the 60th (then called the "Royal Americans"), and the 78th Highlanders. All these regiments, except the last-named, have continued uninterruptedly on the strength of the British Army till now, and have fairly earned the honour of bearing "Louisburg, 1758," on their colours and appointments. The 78th Highlanders were disbanded on the reduction of the Army in 1763, but soon reappeared, to be again reduced and again re-formed. But though the existence of the regiment has been thus interrupted, its claim to inherit old glories might be favourably considered.

INDIA.

The death is announced from Poona, on the 2nd ult., of Major Patrick Murray, Bombay Infantry, aged 54 years. Major Murray served with the Bombay Column in the Punjab in 1848-49; at the siege and surrender of Mooltan, including the attack on the suburbs, storm of the city, breach, and capture of the town; battle of Goozerat, surrender of the Sikh Army at Rawul Pindee, and the final pursuit of the Afghans to the entrance of the Khyber Pass (medal and two clasps); served in the Land Transport Corps in Persia at the end of the war in 1857; as adjutant of the 3rd Belooch Regt. against the rebels at Nuggar Parkur in 1859, driving from and occupying their position in the hills after the night attack on the Kutcherry on June 20, and subsequent pursuit and destruction of the rebels.

The Commander-in-Chief, Sir F. Haines, has notified that, with the approval of the Secretary of State, the Government of India has decided that probationers for the S.C. who have been unable to pass by the higher-standard examination in Hindostanee, owing to prolonged active service with their corps, may, on return from service, have six months' extension of their probationary term to pass in. Application in each case is to be made to the Adjutant-General, Simla.

It is said that Brigdr.-Gen. C. J. S. Gough, V.C., lately commanding the 2nd Infantry Brigade, 2nd Division, Northern Afghanistan Field Force, is to get the command of the brigade which is to hold the Khyber line from Lundi Kotal to Jumrud.

The following changes have been ordered in the destinations of the regiments arriving from England and Malta, viz.:—2nd Batn. 24th Regt., to Secunderabad; 77th Regt., to Madras; and the 1st Batn. Rifle Brigade, to Poona.

Gen. Roberts issued the following Field Force order after the victory of his troops at Candahar:—"The Lieutenant-General desires to offer his hearty congratulation to the troops under his command upon the operations so successfully carried out on Sept. 1, which resulted in the total defeat of the Afghan army under Sirdar Mahomed Ayoub Khan, and the capture of their camp and twenty-seven pieces of ordnance, including two guns of our E Brig. R.H.A, lost on July 27. Any soldier might feel proud of such an achievement, and the glorious termination to the march from Cabul completed the previous day. He begs all ranks will accept his sincere thanks. No troops could have behaved better, and Sir Frederick Roberts only hopes that whenever he may be employed on service it may be his good fortune to command as fine a body of soldiers as the present Cabul-Candahar Force. It is with deep regret that the Lieutenant-General announces the death, in action, of the following officers:—Col. F. Brownlow, and Capts. St. J. F. Frome and E. Straton—all three most gallant and distinguished soldiers. To Sir Frederick Roberts, and many other officers of this force, their loss is a personal one; whilst, by their early deaths, the regiments to which they belonged and the Army generally have been deprived of the services of three most valuable officers."

Col. J. Ashburner, Bombay S.C., is about to retire on a pension of £456 5s. and capitalised value of special annuity, viz., £6,135, from Sept. 10.

Col. H. C. Anderson, Bengal S.C., has succeeded to colonel's allowances, from Sept. 2, 1880.

The Central News learns that "Major J. R. B. Atkinson, 1st Punjab Cavalry, Capt. T. L. Bishop, 2nd Punjab Cavalry, and Capt. S. D. Barrow, 10th Bengal Cavalry, have been brought strongly to notice by Brigdr. Palliser for the Victoria Cross, in recognition of their distinguished gallantry in action on July 1 in Afghanistan."

It is stated that orders have been received from the Home Government for the reduction of the salaries of several highly-placed functionaries. The full extent of the reduction to be made has not yet transpired, but a contemporary says it is in a position to say that the salary of the Commander-in-Chief of Madras is to be reduced from Rs. 70,000 to Rs. 66,000 per annum, or from Rs. 5,833-5-4 to Rs. 5,500 per mensem, thereby effecting a saving of Rs. 333-5-4 per mensem, or Rs. 4,000 per annum. This reduction will not, however, it is said, affect Sir Neville Chamberlain, as the order will commence to operate with his successor. The salary of the Commander-in-Chief of the Bombay Army, the present incumbent's successor we presume, is, it is said, likewise to be curtailed.

The *Madras Times* understands that the new pension rules for the Indian Staff Corps, sanctioned by the India Office, and referred to by "Field Officer" in the *Pioneer*, are those submitted by the Government of India to the Secretary of State. These make the maximum pension attainable after thirty-one years' service £600 per annum, and retirement compulsory after thirty-one years' service. Officers of over twenty years' service, but under twenty-eight years, will be offered the next highest pension, with an additional bonus or pension, after the manner of those offered to military officers under the P.W.D. retirement scheme. Both classes of officers are to receive in addition a bonus of six months' staff pay, together with the privilege of commuting or capitalising a part of their annuity. Officers of twenty-eight years' service or upwards will be permitted to retire upon the next highest grade of pension without any deduction of time spent upon furlough out of India, or in India, and in addition an annuity or bonus under similar provisions to those published in G.O.G.G. of 1879.

We *(Times of India)* take the liberty to disbelieve the charge contained in the following paragraph, which the *Pioneer* publishes in a prominent place in its issue of Tuesday last:—"Rumour says that, of both the British and native troops of the Bombay brigades at Candahar, some regiments were sent to the front in a bad state of health—contrary to the advice of the proper medical authorities—simply because they stood first on the roster for service. This fact (if it be a fact) would go far to explain any failing in the *morale* of our men, and a strict inquiry on the subject would not be amiss." As Sir James Fergusson bluntly but truly said the other day at Poona, rumour is very often a liar, and we shall not be surprised to hear when a "strict inquiry" is made, that in this instance, as in so many instances lately where the Bombay Army was concerned, rumour has been unveracious. At any rate, we know of one native regiment in the Bombay Army which stood high on the roster for service, that was passed over because it was in a bad state of health.

The *Times of India* says:—"Except by one up-country paper, the Bombay troops have been better treated by critics in India than by some military critics in England. The public and the Press generally have wisely made up their minds to suspend their judgment until all the facts are before them. In the speech of the Governor of Bombay, to which we have referred, his Excellency warmly replied to the home critics, and showed very plainly that he did not share the opinions of those who have spoken so disparagingly of the Bombay sepoys. 'Let me say that not in the least in consequence of what has occurred has my personal confidence in the Bombay Army diminished, nor in the native soldiers, whose patience and, in many instances in this war, whose gallantry are worthy of any who have gone before them.' His Excellency, amid approving cheers from the large audience, added:—'We are so accustomed to see small bodies of troops led by British officers attacking immensely superior numbers with success, that it strikes us with astonishment if under similar circumstances a reverse takes place.' And then he made the following reference to Gen. Burrows:—'If an honourable man placed in a position of trust declines to retire, and faces an enemy in a case in which success is almost impossible, that is not sufficient to destroy our confidence in the Army,' concluding with the expression of his belief that 'the Bombay Army will continue for many a year to be worthy of its Queen and country.' Some surprise has been expressed at a remark made by the Commander-in-Chief of the Bombay Army at the same meeting. Referring to the late Gen. Brooke, Gen. Warre said that that gallant and devoted soldier gained his brigade command by his repeated entreaties to be allowed to add experience in the field to his great departmental knowledge. A 'Field Officer' writes to us, hoping that the Commander-in-Chief has been misreported, 'for,' says our correspondent, 'it does not appear likely that an officer would be appointed in time of war to an important command to gain experience, but rather that one would be selected who had already given proof of his ability.' 'If,' he adds, 'the Commander-in-Chief really said what is attributed to him, the matter will certainly be taken up at home by Press, public, and Parliament.'"

The Viceroy announces in the Government *Gazette* that a separate war medal will be granted for Afghanistan, and states that the Queen has expressed her readiness to receive for consideration the names of British officers who have rendered distinguished service during the campaign. Twenty-five additional appointments to the second-class of the Order of British India are authorised for native commissioned officers, and a corresponding number of promotions to the first-class.

With the sanction of Government, the Commander-in-Chief is pleased to direct that men enlisted under Acts prior to that of 1870, and who have not re-engaged under that Act or under the Army Discipline Act, 1879, or extended their army service under the provisions of G. O. C. C. Sept. 9 and Oct. 27, 1879 (pages 453 and 592) of the regiments named—15th Hussars, 2-1st Foot, 1-5th Foot, 1-6th Foot, 59th Foot, 2-60th Foot, 66th Foot, 73rd Foot, 83rd Foot, 85th Foot, 92nd Foot—under orders to return to England, and who are desirous of extending their service in India, may be allowed to volunteer to any of the following regiments:—From the 15th Hussars to 6th Dragoon Guards, 8th Hussars, 9th Lancers, 12th Lancers, 14th Hussars, 17th Lancers. From Infantry regiments to the 2-2nd Foot, 2-4th Foot, 2-6th Foot, 2-7th Foot, 2-8th Foot, 2-11th Foot, 1-12th Foot, 2-13th Foot, 2-14th Foot, 2-15th Foot, 2-16th Foot, 2-17th Foot, 1-25th Foot, 29th Foot, 33rd Foot, 34th Foot, 78th Foot, 88th Foot, 90th Foot, 100th Foot, 4th Batn. Rifle Brigade.

It is officially notified that Lieut.-Gen. Sir F. S. Roberts, after arriving at Candahar, as senior officer, assumed command of the troops there and on the line of communication. With the sanction of Government, the command of Sir F. Roberts was styled the Southern Afghanistan Field Force, and was divided as follows:—1st Division, under the command of Lieut.-Gen. J. M. Primrose, C.S.I.; 2nd Division, under the command of Major-Gen. R. Phayre, C.B.; 3rd (Cabul-Candahar) Division, under the command of Major-Gen. J. Ross, C.B.

Great satisfaction was caused at Candahar by the receipt of telegrams from her Majesty the Queen, his Excellency the Viceroy, the Marquis of Hartington, H.R.H.

the Duke of Cambridge, and his Excellency Sir F. Haines, congratulating General Roberts's Force on the victory of Sept. 1.

In recognition of his gallant services, the Government of India have given Col. T. G. Kennedy the command of the Punjab Frontier Force.

A court of inquiry had been ordered to assemble at Candahar, under the presidency of Gen. Phayre, "to consider certain statements submitted by Gen. Primrose."

The *Globe* says:—"Her Majesty desires to personally invest Gen. Sir Frederick Roberts with the Collar and Insignia of the Grand Cross of the Bath, and Gen. Roberts will therefore be summoned to Balmoral immediately on his arrival in England. The investiture of Gen. Sir Donald Stewart is to be entrusted to the Marquis of Ripon, and orders have been given for the insignia to be got ready and sent to India."

COMPETITIVE EXAMINATION OF MILITIA CANDIDATES FOR LINE COMMISSIONS.

For the information of those candidates who were unsuccessful in the recent competition, the following table, showing their order of merit and the marks obtained by them, is published. The following were qualified, but there are no further vacancies:—

Order of Merit.	Index No.	Marks.	Order of Merit.	Index No.	Marks.
91	29	502	125	47	435
92	44	499	126	57	433

VOLUNTEER OFFICERS.

"A Proud Lieutenant-Colonel of Volunteers" writes:—"I have read with interest the able letter on 'Volunteer Officers' in your recent issue, and which is signed 'R. V.' The writer very truly remarks that Volunteer officers go through a vast amount of work gratis, and spend a great deal of their own money, in order to make themselves and their corps good soldiers, but that they get little else than sneers if they attempt to take advantage of their only reward,—namely, their military rank. I think, however, that Volunteer officers are partly to blame for this state of things. Why should they not assume their rank fearlessly, before all men? Nothing would be more repugnant to my own feelings than any pretence to be what I was not; but it appears to me that I should err greatly on the side of snobbishness to be ashamed of being what I am, namely, a lieutenant-colonel of Volunteers, ranking, according to a Royal Warrant, with officers of a similar grade in the Regular Army. I have served in the subaltern ranks of the Regular Army, and am in a social position to be able to get on as well without as with the title of lieutenant-colonel; but I think any military title is an honour that a man should be proud of, if he has a legitimate right to it, and that if he is ashamed to assume the rank which attaches to his Service, he casts a slur upon the force to which he belongs, and had, therefore, better leave it. I have therefore always assumed my legitimate rank; I place it on my cards, and use it on all occasions, and I think it would be well if all Volunteer officers took pride in doing the same. The cause of the "sneering at Volunteer rank" arose from the wholesale distribution of commissions on the first organisation of the force, and also from the ungenerous jealousy of some officers of the Regular Army. The Volunteers have now won a position for themselves which is exciting the admiration of all good soldiers, and I have found from my own experience, which has been large, that the officers of the Regular Army especially distinguished for their military ability, are those most ready to recognise Volunteer rank and to encourage that truly patriotic force. I remember witnessing a little incident in Charles Kingsley's life which has, I think, a peculiar application to the point in question. After an absence of two years, he met a boy-friend. The boy was shy and hung his head, upon which Kingsley, patting him on the back, said, 'Hold up your head, my boy, hold up your head, for if you do not hold it up, depend upon it no one else will hold it up for you.' Let Volunteer officers hold up their heads, and be proud of their rank in the splendid force to which they belong; and on the other hand, let the Government take care that commissions are only given to those Volunteers who are fit and worthy to assume the rank conferred upon them by her Majesty; but in the cause of all manliness, do not let us talk about snobbishness in a man who calls himself what he really is, and what he should be proud to be."

"A. V." writes:—"I trust you will allow me a corner in which to endorse most thoroughly the remarks of 'R. V.' in your issue of Sept. 25. Their position is one which deserves the prompt attention of the authorities, but I fear it is very unlikely to get it. I think 'R. V.,' though right in the main, overestimates the deterrent effects that the expense has upon the supply of recruits for the commissioned ranks, as in nine Militia regiments out of ten, the expense, taken all round, is quite as great, and in many cases much greater, than in the Volunteers, leaving out of consideration the great demand it makes upon the time. There are but few young men, in business or professions, who can calculate upon, say, a full month's holiday at one time every year. Yet there is not the same dearth of officers in the Militia. In the town where my brigade has its headquarters, and which is one of the largest Volunteer centres in the kingdom, the two most expensive regiments are overflowing with officers, while some of those in which the expense is but little more than that of the kit required on joining, and which are fully as efficient, and bear as good a name as the others, are at their wits' end to get them, as they are particular as to who they take. Where the shoe pinches is, I believe, in the quality, quite as much as the quantity, of the candidates. For it is an unfortunate fact that the great bulk of the officers in the Volunteer Sérvice, though very good fellows in their way and many of them very efficient, are, to put it mildly, not very refined, and are by no means on a social equality with their brethren of the Regular Army or Militia. For example, one gallant captain that I know of keeps a music shop in a second-rate street; another is an upholsterer; while a major in another town is a publican, in private life. Some colonels I could name are also of much the same social status. Unfortunately, the young men of the upper classes, who are the very ones who ought to join as officers, taking them as a body, will not do so, for there is really no inducement, putting on one side patriotism and the military instinct of which 'R. V.' speaks. Volunteer officers have no right, in virtue of their commissions, to be presented at Court; neither are they admitted to the military clubs, both of which privileges are enjoyed by their Militia brethren. At one, at least, of the Schools of Instruction, the Militia are made honorary members of the local mess when they join the class; while the Volunteers are left out in the cold. The reason for this is that the first class which attended the school on its formation had among its members two small local tradesmen. The rule excluding Volunteers as such is not, therefore, to be wondered at, but is felt very keenly by those who, perhaps, dine at the mess every guest-night in their civil capacity. These, and countless other slights, avoidable and unavoidable, greatly deter young men of position from taking Volunteer commissions, and make many of those who have joined, leave, or, staying, feel anything but a pride in the Service to which they belong. On the other hand, many of the present stamp of Volunteer officers are induced to join on the chance that by holding her Majesty's commission they may obtain an occasional admission into society that in their civil capacity would be closed to them. No one can attend one of the Wimbledon or Shoeburyness meetings without meeting many such, who, both there and with their regiments, bring much discredit and ridicule on the Service in the eyes of soldiers and the discerning public by the display they make, with the best intentions in the world, of the greatest social and military *gaucherie*. Like 'R. V.,' I leave the remedy to wiser heads than mine, but I grieve that unlike him I feel the reverse of sanguine as to the remedy, when found, being applied. But the subject is one that will be all the better for discussion, though my remarks will, I fear, bring a thunderstorm on my head. You, Sir, deserve the grateful thanks of all Volunteer officers for allowing us to ventilate our grievances in your columns, as it is only through the medium of the Press that attention can be drawn to them."

"Another R.V." writes:—"The letter of 'R. V.,' which appeared in your paper of Sept. 25, requires a few comments as to the grievance supposed to exist amongst those who hold commissions in the Volunteer force. In the corps in which I have the honour to serve there is no dearth of officers, and candidates for vacancies are always forthcoming. The calls upon our pockets are about the same as those described by 'R. V.,' but my brother-officers do not grumble, but on the contrary, feel a pleasure in being permitted to give their time and money for the good of their corps, knowing that their country benefits by their so doing. They look for no reward, pecuniary or otherwise, and in this feeling I cannot think they differ from the majority of the officers of the force. 'R. V.' disclaims any desire for a pecuniary reward, and such a thing he would, no doubt, refuse indignantly, were it offered him. What, then, does he want? He does not know himself, I fancy, and in 'leaving plans and suggestions to wiser heads,' he has certainly shown considerable discretion. His remarks concerning officers using their rank cannot be constituted into a grievance. It has been conferred upon them by the highest authority in the land, and therefore they have a perfect right to make use of it in their civil capacities, if they please; but the greater number, being professional men, do not care to do so. I do not think it can be looked upon as 'a self-asserting and bumptious emanation of snobbishness,' except by those who are prejudiced and ignorant of the fact that her Majesty has been pleased to style them by certain military titles. As to 'retaining rank and wearing uniform' 'on retirement,' it is a privilege which, if I am not mistaken, would be considered a great honour, if conferred upon officers of the Regular Services. I cannot agree that the strength of companies, as stated by 'R. V.,' always depends upon the 'soldierly qualifications' of the captain, for I know cases where the largest companies in regiments are commanded by utterly inefficient men, who keep them together by dint of their long pockets and lavish expenditure in organising knife-and-fork parades. This constitutes a real grievance, inasmuch as other captains who are efficient and possess soldierly qualifications, either have not the means, or object to spend their money in such a manner, and consequently become unpopular because they do not do so. I would suggest that commanding officers should be called upon to suppress as much as possible this custom of entertaining men (which is by no means conducive to discipline), and other unnecessary expenditure, which does more harm than good. If 'R. V.' had touched upon the late Regulations issued regarding the requirements from the force for efficiency, he might have used his time, and your valuable space, to more advantage. Every earnest Volunteer officer, I am quite sure, will approve of an increased number of drills for recruits, and feel sorry that the number has been decreased as regards members of two years' service and upwards. Surely, nine drills per annum were little enough to maintain the knowledge gained as a recruit. We all know that with this number only, many men who do no more than is actually required have appeared, at annual inspections and on other public occasions, to the detriment of their regiments; and I think it a pity that, considering the increased demand for efficiency of officers and non-commissioned officers, that the rank and file have not been called upon to attend more parades, instead of less; so that all might maintain and obtain a further increased efficiency, and, as time rolls on, make the force of greater value to the nation."

"X." writes:—"In your issue of the 25th ult., there is a letter from a Volunteer officer, signed 'R.V.,' bemoaning the condition of Volunteer officers, but it is not at all clear what your correspondent wants. I am not going to enter upon a discussion as to the military rank of officers of the Auxiliaries, but I must say, in passing, that if 'R.V.' wants them to be placed upon an equal social footing with officers of the Regular Army, I fear his wishes will never be gratified. Military men will never accord to them such a thing, nor will society; neither would it be right for such a thing to be done. 'R.V.' says that one of the inducements for a youth's choosing the Regular Army is 'social rank.' Now, if there is such a thing allied to a commission in the Regular Army, it is in a measure due to exclusiveness. Do away with this, and all social rank will disappear. 'R. V.,' I think, claims too much consideration for the commissioned ranks, and does not do full justice to the non-commissioned ranks, when he says that "the very existence of a Volunteer battalion depends upon those who hold commissions in it." I wish to give all due credit to the exertions of company officers, but such a statement is an exaggeration. My experience teaches me that the prosperity of a Volunteer corps depends upon its having a good and popular colonel, an efficient and zealous staff, good commissioned officers, and above all, good non-commissioned officers; without the latter an officer can do little or nothing. I have seen good and zealous officers come upon parade night after night to meet their men, and find there some half-dozen. For two years I instituted special company drills, but they utterly failed, for though the men were willing enough to come up to be drilled either by the adjutant or serjeant-major, they would not come up to be drilled by their own officers. It not unfrequently happens that the best Volunteer officers, as far as their companies are concerned, off parade, are the very worst on parade. That a Volunteer officer must spend money, nobody can deny; but 'R. V.' puts the amount at too high a figure, I think. I should say, very few ever spend £10 on postage and printing, a good portion of which expense is borne at head-quarters. Some expenses are quite necessary, for instance, mess uniform. Why should not Volunteers, when out for their week at Aldershot, do the same as some of our best Militia regiments do,—namely, wear their patrol-jackets; and for the few times they meet together at mess during the remainder of the year, they might wear evening dress, the same as they do in the corps to which I belong? As to subscriptions, in some corps they are unnecessarily high, but commanding officers should do their best to cut them down as much as possible."

PROMOTION IN THE INDIAN ARMY.

"A Lover of Fair-play" writes:—"Now that so much is being said about the retirement of 'senior officers of the Indian Army,' may I bring to your notice a case of the stoppage of promotion in the Bombay Cavalry. Major-Gen. W. Trevelyan, of the Bombay Cavalry, died on July 3, 1871. The step was not granted to the officers below him for three years and twenty-seven days, on July 30, 1874. Gen. Sir M. Stack, C.B., died in July, 1880. No promotion has as yet followed, and if the same ruling is enforced, which stopped Gen. Trevelyan's step, promotion will not be given until July 30, 1886, one officer having, owing to these stoppages, to serve nine years longer than he would have done in the days of the Honourable East India Company, notwithstanding the Parliamentary guarantee that 'all rights and privileges' should be accorded to the local Indian officer. If you will be good enough to insert this in your paper, it may lead to inquiries being made and justice done."

[Our correspondent writes under a misapprehension. Surely the senior officers have not yet the required service to qualify them for promotion.—ED. *A. & N. G.*]

The Army.

5th Dragoon Guards. Capt. T. H. Hartnell, on the Half-pay List, died on the 21st ult. Capt. Hartnell received his commission as cornet and adjt., from troop serjt.-major, May 1, 1867; became lieut., Oct. 27, 1871; capt., Oct. 31, 1874; and retired upon half-pay, Dec. 19, 1877. He served with the regiment in the Crimean campaign of 1854-55, including the battles of Balaclava, Inkerman, and Tchernaya, siege and fall of Sebastopol, and night attack on the Russian outposts on Feb. 19, 1855, (medal with three clasps, and Turkish medal).

6th Dragoon Guards (Carabiniers). Gen. H. R. Jones, C.B., colonel of the regiment, died rather suddenly on Sunday, at Brighton. The deceased commanded the regiment in the Crimea from Aug. 1853, including the battle of Tchernaya, the siege and fall of Sebastopol (medal with clasp, fifth class of Medjidie, and Turkish medal). He served in the Indian campaign, commanded at Kirkrowlie Gen. Penny's column, when Penny was killed by the enemy's first shot; he commanded the Cavalry Brigade at the capture of Bareilly, for which he received his C.B.; commanded the left column with Lord Clyde's forces in the Trans-Cogra campaign, and pursuit of rebels (Raptee medal). Gen. Jones, who was 74 years of age, entered the Army, June 9, 1825; became lieut., Nov. 14, 1826; capt., June 12, 1830; brevet major, Nov. 9, 1846; major, May 21, 1850; lieut.-col., Sept. 16, 1851; col., Nov. 28, 1854; major-gen., April 2, 1865; lieut.-gen., Dec. 6, 1873; and gen., Oct. 1, 1877. He was appointed colonel of the regiment May 15, 1873.

2nd Dragoons (Scots Greys). Capt. Philips has been granted leave of absence to Nov. 10, pending his retirement being gazetted.

3rd Hussars. 2nd Lieut. Paterson has proceeded from Colchester to Hythe, to undergo a course of musketry, in anticipation of his appointment as adjutant of his corps.

6th Dragoons. When we heard from India, Capt. M'Kean had been confirmed in his appointment as aide-de-camp to Lieut.-Gen. Sir F. F. Maude, V.C., K.C.B., commanding the Rawul Pindee Division.

7th Hussars. The *Bombay Gazette* of the 11th ult. says:—"Lieut. McCalmont and Lord St. Vincent, of the 7th Hussars, came out by the last mail and proceeded at once to the front, to witness the final operations of the war in Southern Afghanistan. The promptitude of Gen. Roberts's movements will, however, leave these officers but little opportunity of seeing much fighting."

10th Hussars. Lieut. Lord A. F. Compton has been appointed musketry-instructor, vice Capt. Napier.

11th Hussars. The friends of Col. Annesley will read with satisfaction the following, which appears in the letter of "Rambler," in the *Bombay Gazette*:—"The time has certainly arrived for a thorough reform in the administration of the Army in India. In the midst of loud murmurs at the way military matters are at present managed, it is refreshing to hear nothing but praise of the appointment of Col. Annesley to the important post of Adjutant-General of the Bombay Army. The gallant colonel comes out to India again solely from love of his profession, as he is a man of large private means. During his stay in India in command of the 11th Hussars, he won the regard and affection of men of both races. As a regimental officer, he has few rivals. He made his corps during his tenure of command one of the crack cavalry regiments. A man of his energy and ability ought to be able to do much good to the Bombay Army, if he be permitted by the Simla clique. Gen. Warre is to be congratulated on his last appointment."

12th Lancers. Brevet Lieut.-Col. Russell has left England for India, to join head-quarters.

14th Hussars. Lieut. Hamilton has been granted leave from India to England for twelve months, on medical certificate.

17th Lancers. Capt. Duke is acting as a D.A.Q.M.G. in the Bombay Presidency.

19th Hussars. The pension to be granted to Capt. Williams is £375 per annum.

ROYAL ARTILLERY.

The Madras correspondent of a Lahore paper writes, on Aug. 28:—"Madras is greatly pleased with the latest news, namely, that Col. Leslie, R.A., is appointed inspector-general of artillery in India, vice Gen. the Hon. D. Fraser. Col. Leslie is not only very well known, but exceedingly popular in our Presidency, where he has made himself generally liked by his liberal hospitality, his kindly interest in his brother-officers, and his friendly attitude towards society in general. The pleasure his appointment has afforded has been greatly heightened by the previously existing feeling that he had been rather badly treated in the matter of the Madras district command. Brigades, however, like many other things, go by favour, and not only was he not the favoured man, but during his temporary command as senior colonel in the Presidency, he received more than one gratuitous and unmerited snub, that excited the indignation of the officers of his own regiment, and also of all those who saw how thoroughly undeserved they were. As an officer, he has always held a high place in public estimation; and he has numerous qualities which commend him to general notice. He is in the prime of life, hale, strong, and hearty; his energy and activity are marked, and he never allows an error to escape him. But with all his shrewdness in detecting faults, his cordial, and straightforward directness and singleness of purpose have made him most popular with those who have served under him, and there is a general feeling that no man could be better suited to the position he now occupies, and certainly no one more welcome in the various stations in the Presidency, which it will be his duty to visit during his tours of inspection. He will be succeeded in his command at Secunderabad by Col. Kerrich, R.A., the present superintendent of the gun-carriage factory in Madras."

The veterinary officers on service with the batteries in Afghanistan, when last we heard from Cabul, were as follows, viz.:—Vet.-Surgs. J. B. W. Skoulding, J. Anderson, G. A. Oliphant, G. A. A. Oliver, F. Plomley, W. B. Spooner, A. C. Webb, A. Bostock, C. Clayton, and J. A. Nunn. Vet.-Surg. J. J. Philips is in England, invalided, having served through the earlier phases of the campaign.

The Inspector-General of Artillery, Major-Gen. Radcliffe, attended by Capt. Knox, R.A., aide-de-camp, visited Aldershot on Monday, and made an official inspection of the whole of the batteries at the station.

The *Daily News* states that the Government of India is about to confer a distinguished-service reward upon Major-Gen. J. Hills, V.C., C.B., late commandant of Cabul, in recognition of the valuable services rendered by him in Afghanistan.

Lieut. Sir G. W. Thomas has been transferred from the H Bat. 4th Brig. to the depôt battery B Brig. R.H.A., and ordered home from India to Dublin, to join his new battery.

It is said to be in contemplation by the Corporation of London to confer the freedom of the City upon, and present a sword to Gen. Sir F. Roberts, G.C.B., in recognition of his distinguished services in the Army. A like compliment has been paid in recent years to Sir Garnet Wolseley, Lord Napier of Magdala, Sir John Burgoyne, Lord Clyde, Sir James Outram, and others.

An inquiry was held at Aldershot on Tuesday, into the circumstances attending the death of a corporal named Kelly, who was killed by the discharging of a gun on Friday, and resulted in a verdict of "accidental death," the coroner saying that the officer in command of the whole of the batteries was to blame if any one was injured, as he gave the order. Gunners Silvester and Darling stated that on the day in question the order was given to fire one round. The guns were then loaded blank, and they allege that they subsequently heard the command "Fire," the former believing it was given by Serjeant Ryder, in charge of the gun, but this Ryder denies.

Brevet Col. S. H. E. Chamier (late Madras), acting deputy-inspector of ordnance and magazines, Madras, has been appointed superintendent of the Gun Factory, Madras, vice Col. Kerrich, who has taken up a military command; and Lieut.-Col. H. M'Leod (late Madras) has been appointed acting deputy inspector of ordnance and magazines.

"Speaking for All" writes from Trowbridge:—"Referring to a paragraph which recently appeared in the *Wiltshire Times*, and which afterwards appeared in your columns, concerning F-5 R.A., may I be allowed to offer a few remarks. 'One of the Battery' last week, in writing to you, contradicts the whole of the statement which appeared in that paper. He states that we went under canvas in the middle of July, but he seems to forget that we had already been some weeks under canvas at Okehampton, where we experienced heavy rain and hard work throughout. On arrival at Trowbridge, we were, I repeat, placed under tents which were both old and unserviceable, the rain coming through them as it would through a sieve, notwithstanding which we are expected to keep our kits in first-class order, and turn out on parade as clean as any good soldier would do under the most advantageous circumstances. For instance, on muster parade on Friday last, one or two great coats being slightly soiled, the wearers were ordered to send them to the tailors' shops to have them turned at their own expense,—a thing, I believe, the oldest soldier in the British Army never before heard of. We dine in a cold, draughty stable, and cannot enjoy a meal we get. I am writing now (Monday night) with the thermometer standing at 35 degrees Fahrenheit, the rain coming down in torrents, the water saturating the blankets in which I am supposed to sleep to-night. I am sure that if 'One of the Battery' (who is an officer, and who does not sleep as we do, but in a comfortable bed) was to try for himself, and occupy one of the tents for a night, he would be the first to complain." "The Writer of the Paragraph in the *Wiltshire Times*" says:—"Since an order has been received from Devonport for the immediate striking of the tents at Trowbridge Barracks, it is not necessary that I should say more with regard to the unserviceableness of the said tents, than that on Monday night the rain came through two of them as through a sieve, the men occupying them were drenched to the skin, and the wet could be wrung out of their blankets. Under these circumstances, they were ordered to sleep where they could, and they actually found quarters underneath the tailor's bench, in the guard-room, and in the cells!"

Capt. W. Boylin, rdgmr., on the Half-pay List, died at 7 Campbell Terrace, Woolwich, on the 2nd inst., aged 80 years. The deceased obtained his commission, June 2, 1854, and was placed upon half-pay, Aug. 22, 1865.

The death is announced from India of Capt. F. L. Archer, 1st Brig., which took place on the 14th ult., at the Officers' Sanitarium, Colaba. The deceased was suffering from fever. The funeral took place on the following morning at 7 o'clock; the Royal Artillery furnishing the firing and company parties. Capt. Archer entered the Army Jan. 15, 1867, and became capt., Nov. 16, 1878.

Those non-commissioned officers, artificers, and men of the batteries of Royal Artillery ordered to proceed to England this cold season, if desirous of extending their service in India, are to be allowed to volunteer without bounty for the Royal Artillery serving in any of the Presidencies. The non-commissioned officers, including paid acting bombardiers and artificers, volunteering to remain in India, will take rank in the battery to which they may be posted, the former according to the dates of their promotion, and the latter according to the dates of their appointment. Men remaining in the country may select their Presidency, but are not to be allowed to volunteer for any particular battery.

Capt. C. H. Hamilton, 4th Brig., has passed the lower-standard examination in Persian.

Lieut. C. T. J. Noble, 8th Brig., is a candidate for the Indian Staff Corps, and has been appointed to the 5th Madras N.I., on probation.

The Royal Artillery Institution, Woolwich, is about to undergo some alterations in its staff. The secretary, Col. M. Le Fer Taylor, R.A., having completed his five years' term of service in that appointment, is about to vacate the same, and there is some doubts as to his successor, a question having arisen as to whether he should be selected for his special attainments and qualifications for the post, or whether the office shall be conferred as a reward for distinguished service.

Vet.-Surg. A. E. Queripel, on special duty in the Punjab, has been appointed officiating assist.-superintendant of horse-breeding operations, Punjab, vice Vet.-Surg. J. J. Meyrick, as officiating inspector and vet.-surg., 2nd Circle, Bengal.

We (*Times of India*) learn that her Majesty's Agent and Consul-General in Egypt has addressed a despatch to Earl Granville, describing the unusual feeling of regret in that country at the departure of Major Evelyn Baring, whose services as Controller-General have been of an exceptionally valuable character. Both the Khedive and Riaz Pasha have received the announcement of Major Baring's recall with very great regret, and the Consul-General adds that there has never been an instance of so deep-seated and general a feeling of sorrow being felt at the departure of an European official as is the case on the present occasion. Lord Granville has replied that her Majesty's Government are glad to learn that the high sense which they themselves entertain of the services rendered to Egypt by Major Baring is shared by the Khedive and his Government, and that they regret that the requirement of her Majesty's Service should have entailed upon the country the loss of so able an administrator.

ROYAL ENGINEERS.

The following rules have received the approval of the Secretary of State, and have been published in the *Gazette of India*:—"I.—The following rule of the Civil Pension Code is made applicable to officers of Royal Engineers serving in the Public Works Department:—Section 65, Rule 6.—After the age of 55 years, no military or naval officer shall be appointed to a new office in civil employment, or shall be permitted to retain any such office which he has held for five years and upwards, except in special cases, which are to be referred for the decision of the Secretary of State. II.—Officers of Royal Engineers, who have attained, or hereafter may attain, the rank of General officer, must vacate their appointments in the Public Works Department; but they will be eligible for reappointment as Chief Engineers, Class I, or in posts carrying that rank. This rule will be brought into force two years from the present date. III.—No Chief Engineer of the Corps of Royal Engineers shall, without reappointment, hold the same post for more than five years. This rule, in the case of officers who, on their appointment to that rank, received notice of the probable issue of this order, will take effect from the date they joined their present posts. In other cases the rule will take effect from the date of these orders. IV.—The foregoing rules are applicable to officers of Royal Engineers who hold the post of Secretary or of Deputy Secretary to the Government of India in the Public Works Department."

Capt. F. R. de Wolski and Lieut. G. G. Leverson, who left England some months ago for Asia Minor, to represent Great Britain on the Boundary Commission under the Treaty of Berlin, have completed the duty upon which they have been engaged, and have returned to England.

Capt. G. S. Clarke, who has been employed for some years past as instructor in geometrical drawing at the Indian Engineering College, Cooper's Hill, has vacated that appointment on promotion. Capt. Clarke has joined at Chatham, and has been ordered to embark for Bermuda.

Major E. D. O. Tremlow (late Bombay) has been appointed executive engineer on special duty, on the Kandahar line of communication beyond Chaman. Lieuts. R. H. Jennings and J. Kellie will be assist.-engineers, Lieut. Jennings also carrying on his political duties.

We (*Pall Mall Gazette*) understand that Col. G. T. Chesney, president of the Royal Indian Engineering College, Cooper's Hill, has been offered, and has accepted, the appointment of secretary to the Government of India, Military Departments. Col. Chesney is expected to leave for India immediately.

Major F. Du Cane, retired, died at Eastbourne on the 4th inst.

Lieuts. the Hon. M. G. Talbot, H. J. W. Jerome, and C. Hoskyns have passed the lower-standard examination in Persian.

4th King's Own. We learn from India that the detachment of the 2nd Batn., which arrived at Kurrachee from Bombay on the 31st ult., had proceeded to Hyderabad in charge of Capt. Crofton, Lieut. Gawne, and 2nd Lieut. James. Brevet Lieut.-Col. Twentyman, 2nd Batn., has been appointed commandant of the Deolalee Convalescent Depôt, vice Lieut.-Col. Hogge, 66th Regt H.M.S. Assistance embarked at Portsmouth on Thursday a draft of the 1st Batn. from the Brigade Depôt at Lancaster, consisting of Capt. Ogilby, Lieut. Bromley, 2nd Lieuts. Hinds and Belli-Bivar, two serjeants, and 133 men, for transhipment to the Tamar at Gibraltar, for conveyance to the West Indies.

6th Regiment. Lieut. Forbes, 2nd Batn., who acted as orderly-officer to Gen. Palliser, C.B., in the cavalry action at Patkao Shana on July 1 last, is specially mentioned by the General as deserving of his thanks for his zeal and devotion.

8th King's. A correspondent writes from Shalosan, Afghanistan, on Sept. 7:—"Col. Grogan, 2nd Batn., has been gazetted to the command of the Lower Kurum Brigade (temporarily). Major Bannatyne has assumed command of the battalion. On Sept. 3 the head-quarters marched from Peiwar Kotal to Shalozan. Three companies, now remaining at Peiwar Kotal, under Capt. Cope, will shortly move down to join head-quarters. The station of the 2nd Batn., on its return to India, will be Meean Meer." Lieut. Dundas, having passed the higher-standard examination in Hindostanee, has been appointed interpreter to the 2nd Batn.

9th Regiment. Capt. Humfrey, 2nd Batn., is about to be appointed to the Pay Department, and is to be posted to the 90th Regt. as pymr.

12th Regiment. An exchange has been permitted between Capts. Townley, 2nd, and Hext, 1st Batn. Capt. E.

Chinn, late of the regiment, died at the Close, Lichfield, on the 30th ult., aged 43 years.

13th Light Infantry. Lieut.-Col. Gilbert, C.B., 1st Batn., to whose soldierly devotion in Zululand we have on several occasions referred, has been granted leave until Jan. 10, by which time it is hoped that his health may be sufficiently recovered to allow of his resuming his command. [Capt. Parr, 1st Batn., arrived home on Monday from the Cape with Sir Bartle Frere, on whose staff he has been filling the appointment of military secretary. 2nd Lieut. Kerrich, 2nd Batn., is a candidate for the Indian Staff Corps, and has been appointed to do duty with the 4th Madras Light Cavalry, on probation. "Olim, P.A.L.I.," writes:—"I have just read Capt. H. H. Parr's *Sketch of the Kaffir and Zulu Wars*, which is pleasantly written, and, from his position on the Staff, his information can be relied on. The terrible disaster to Col. Glyn's column at Isandhlwana is graphically told; glory and honour are faithfully awarded to the noble 24th, whose fair fame, for a time, had been so cruelly aspersed; and the closing hours of those devoted heroes, Coghill and Melville, in laying down their young lives for 'Queen and country,' are feelingly and touchingly described; but I cannot refrain from expressing my surprise that throughout his book, except once, and that casually, Capt. Parr makes no mention of the 13th Light Infantry, a regiment in which, previous to his appointment to the Staff, he had spent the whole of his service, and he ought to have known had taken a most prominent part in all these wars. Capt. Parr describes himself in his title-page, 'military secretary to H.E. Sir Bartle Frere.' Surely he need not be ashamed of belonging to a corps whose brilliant deeds of yore have been so favourably handed down to posterity in the military histories of our country!"

18th Royal Irish. Capt. Bolton, 1st Batn., has been granted leave from India to England for twelve months, on medical certificate.

19th Regiment. We learn from St. George's, Bermuda, under date Sept. 16, that the 1st Batn. has received orders to hold itself in readiness to embark for Halifax about Nov. 8 in H.M.S. Crocodile, and the news has been joyfully received by all ranks. Col. Vigors is on leave in the United States, Major Hereford has sick-leave to Nov. 30, and Major Handley commands the batn. Lieut. Handcock won the Duke of Edinburgh's Challenge Cup at the R.B.Y.C. Regatta in his yacht, the Nameless. A very severe hurricane visited the island on Aug. 29, which unroofed many of the barracks, blew the R.E. Theatre down to the ground, and did immense damage. The batn. is in good health, only two deaths in six months (Corpl. O'Neil, E Company and Pte. Simpson, A Company), and only 16 men in hospital. Letters should be addressed to Halifax, Nova Scotia, after Oct. 21.

22nd Regiment. Referring to the death of Capt. Straton, in the action before Candahar on the 1st ult., the *Indian Herald* says:—"The death of Capt. Straton, which is announced as having taken place in the battle of the 1st, will cause a great deal of pain both to his fellow-officers and to all others who knew him. Quick of eye and of hand, and gifted with great powers of endurance, he was known as one who specially excelled in every kind of physical sport, and was an officer of whom his regiment had every reason to be proud. He was stationed with his regiment here in Allahabad until the second Afghan war broke out, when he accompanied Gen. Roberts to Cabul in the capacity of superintendent of Army signalling. He was mentioned in despatches for the assistance he gave at the fight of Charasiab, and has since, on several occasions, rendered great services, which have been acknowledged by his commanding officers."

23rd Fusiliers. The *Globe* says:—"It is with much regret that we have to announce the death of Col. T. B. Hackett, V.C., through the effects of a gun-shot wound accidentally self-inflicted while out shooting. The deceased was as gallant and popular an officer as ever held her Majesty's commission, and this sad news will cause general grief throughout the Army. It was a brother of his, Col. R. Hackett, of the 90th Light Infantry, who was shot through the head at Kambula Kop, while gallantly leading on his men against the swarming Zulus. The Hacketts of Moore Park have always been a famous fighting family, and the present generation shows no falling-off. In addition to the two colonels above mentioned, two, if not three, other brothers have won distinction in the Army. Col. Robert Hackett was gazetted out of the Service about a fortnight ago, owing to total loss of eyesight through the terrible wound he received at the Kambula Kop. The gallant gentleman who has now so unhappily lost his life won his Victoria Cross when he was a lieutenant for daring gallantry at Secundrabagh, Lucknow, on Nov. 18, 1857, in having, with others, rescued a corporal of his regiment who was lying wounded and exposed to a heavy fire; and also for conspicuous bravery in having, under a heavy fire, ascended the roof and cut down the thatch of a bungalow, to prevent its being set on fire. This was a most important service at the moment."

24th Regiment. The 2nd Batn., on arrival in India, has been sent to Secunderabad, instead of to Poona, as had been previously arranged. The batn. proceeded by rail from Poona on the 14th and 15th ult. The change has occasioned the most bitter disappointment, for the regiment was quartered in the "benighted presidency" when last in India, and it was naturally felt that it had a claim to a station either in Bengal or Bombay. Colour-Serjt. Kenny, belonging to the 1st Batn. 24th, has been reduced to the ranks in accordance with the decision of a district court-martial which sat at Forton, near Portsmouth, he having been proved guilty of falsifying accounts. A serjeant named Chislett, belonging to the same regiment, who was charged at the same court with embezzlement, was acquitted.

25th Regiment. 2nd Lieut. Fox, 1st Batn., has been granted leave from India to England for 12 months, on medical certificate. Lieut. Becker has been recommended for the appointment of instructor of musketry to the 1st Batn., vice Lieut. Dandridge, promoted.

29th Regiment. Capt. Cooke has been appointed to the command of the Khundwa Rest House. Lieut. E. A. Williamson died at Baroda on the 7th ult., aged 21. The deceased, who was the only son of the late Surg.-Major G. Williamson, M.D., 64th Regt., entered the Army, Jan. 30, 1878, and became lieut., Jan. 31, 1879.

35th Regiment. The head-quarters and right half-battalion arrived at Limassol, Cyprus, on Tuesday in H.M.S. Tamar from Malta, and relieved the 1st Batn. 20th Regt.

40th Regiment. Lieut. O'Brien, a probationer for the Indian S.C., has been specially mentioned in the despatches of Gen. Palliser for his services in July last, when doing duty with the 1st Punjab Cavalry in the action against the Afghans at Patkao Shana.

47th Regiment. The orders for the move of the regiment from the Curragh to Dublin, which was to have been carried out on Tuesday, has been countermanded for the present. A correspondent writes:—"I should like to know why the 47th Regt., stationed at the Curragh, should have remained upwards of two years at that station, with every prospect of passing another winter there. The regiment has been on home service nearly eleven years, the greater part of which time has been passed in Ireland. During its stay on the Curragh there have been many regiments at the camp, none staying over twelve months. I venture to say that the regiment is equal to any in the Service for drill, &c. It has always received praise from the many Generals who have inspected it. During the past month instructions were received for the removal of the regiment to Dublin, but at the eleventh hour this order was cancelled. I venture to say that in the event of the regiment staying in its present quarters for the winter there will be a great number of desertions, for officers and men are alike dissatisfied."

ROYAL MARINES.

Lieut. L. M. M. Hall, a candidate for the Indian S.C., has been appointed to do duty with the 18th Bengal N.I., on probation.

Capt. G. F. Pengelley has been appointed gunnery-instructor to the R.M.A., vice Everitt, promoted (Sept. 27).

Lieut. J. J. Quill has been appointed adjutant at the Plymouth Division, vice Luxmoore, promoted (Sept. 20).

51st Light Infantry. Lieut. Pollock, a candidate for the Indian S.C., has been appointed to do duty with the 8th Bengal Cavalry, on probation.

58th Regiment. Capt. and Pymr. Minchin arrived home from the Cape on Monday in the mail steamer Pretoria.

59th Regiment. Lieut.-Col. S. Baker, on the Half-pay List, died on the 2nd inst. The deceased entered the Army, March 29, 1844; became lieut., Jan. 8, 1847; capt., April 11, 1851; brevet major, Jan. 29, 1863; accepted an unattached majority, April 1, 1866; and became brevet lieut.-col., May 6, 1873. Lieut. Hodgkinson, a candidat for the Indian S.C., has been appointed to the 11th Bombay N.I., on probation. The death is announced this week from Afghanistan of Pte. J. Atterwell.

60th Rifles. Capt. Frend, 4th Batn., has been appointed assist.-superintendent of Army signalling, Kurum Force. The 2nd Batn. was at Dahuneghalan, in the Logar Valley, Afghanistan, on July 12, and was in the 1st Brig. (Brigdr.-Gen. Barter's) of the 3rd Division, or Ghazni Field Force, commanded by Major-Gen. J. Hills, V.C., C.B. "One company, 'G,' Capt. Chalmer's, was, as it has been all through the last campaign, detached from it to act as personal escort of the General commanding the Division. Copies of Sir D. Stewart's despatches, concerning the actions of April 11 and 23, at Ahmed Jheyl and Urzoo, have been published in the Indian papers. In the first affair the only part of the battalion which was engaged throughout was the escort company, commanded by Lieut. Davidson, assisted by 2nd Lieut. Couper, its captain, Capt. Chalmer, being brigade-major of Gen. Barter's brigade. It had a hand-to-hand fight with the enemy, who rushed sword and rifle in hand into the midst of it; Colour-Serjt. J. H. Chessum, and Ptes. W. Blake and H. Ward, were killed, and Bugler Fitzpatrick dangerously wounded, shot through the neck; towards the close of the action the remaining seven companies arrived on the scene, under the command of Lieut.-Col. Collins, and took part in it, and in so doing had Pte. Bungay severely wounded. At the commencement of the action they had been about six miles from the front, as their brigade formed the rear-guard that day, but were pushed forward as soon as possible. Sir D. Stewart, in writing to the Commander-in-Chief in India, submits, among other names for favourable consideration, those of Lieut.-Col. Collins, commanding the battalion, and Lieut. Davidson, commanding his escort, and reports that the following officers of the battalion have been favourably mentioned by their Brigadiers-General:—Capt. R. Chalmer, brigade-major; Lieut. C. Hope, orderly officer; Lieut. R. E. W. Copland-Crawford, orderly officer; and Lieut. R. E. Golightly, orderly officer. The battalion had a full share of the action of April 23 at Urzoo, where it attacked the enemy in an entrenched position, in the regular order of attack, as laid down in the drill-book. In doing so, it only lost one man, Pte. W. Crook, of C Company, who was killed. It is wonderful that the loss was so slight, as the enemy were armed with Sniders, and held their positions until the leading companies were within 30 or 40 paces from them, when, being charged with the sword, they fled. Some of them showed great bravery, even coming out from their shelter to meet the attackers.

61st Regiment. H.M.S. Euphrates arrived at Bombay on the 8th ult. from Malta, with Lieut.-Col. Blackett, Capts. Curtin and Law; Lieuts. Trotman, Partridge (adjt.), and Vines; 2nd Lieuts. Cure and the Hon. H. S. Addington; Capt. and Pymr. Sutherland, Qrmr. Wilson, Surg.-Major F. W. Wade, and Surg. H. J. Michael, and 239 non-commissioned officers and men.

62nd Regiment. Lieut. Young, a candidate for the Indian S.C., has been appointed to the 6th Bengal N.I., on probation.

72nd Highlanders. Before proceeding to India, Sir Frederick Roberts presented distinguished-service medals to the men of the 72nd and 92nd Highlanders and 5th Goorkhas. The *Times of India* gives Gen. Roberts's address to the men as follows:—"I am glad to have this opportunity of giving medals for distinguished conduct in the field to you men of the 72nd and 92nd Highlanders and 5th Goorkhas. One thing I am sure of, no men could deserve them better. You showed the other day what materials the Highlanders and Goorkhas are made of. I only hope it will always be my good-fortune to have such brave, forward soldiers with me. The 72nd Highlanders have to mourn the loss of their colonel, as fine a leader of men as I have ever seen. With him fell an equally gallant spirit, Capt. Frome, and many brave men, among them, I regret to hear, Serjt. Cameron, a grand specimen of a Highland soldier. The 92nd lost heavily also, Colour-Serjt. Fraser being among the slain. Fourteen gallant fellows were laid in one grave on the evening of Sept. 2, and many more are lying wounded in the hospital; but, men, you have the satisfaction of knowing you did your duty nobly. I have seen a good deal of hard fighting, but I never remember noticing a greater look of determination to win a battle than I observed on your faces on the morning of Sept. 1. No Afghans could stand against such a steady, bold attack. You beat them at Cabul, you have beaten them at Candahar, and you can now leave the country, feeling assured that the very last troops the Afghans wish to meet in the field are Highlanders and Goorkhas. You have made a name for yourselves in Afghanistan. You will never be forgotten here, and you may depend on it you will never be forgotten by me." Capt. Kane has passed the lower-standard examination in Persian.

73rd Regiment. The death has been officially announced of an old officer of the regiment—Ensign S. Lewis, on the Half-pay List. The deceased, who died at Skibbereen on July 26, entered the Army, May 19, 1814, and retired upon half-pay, July 6, 1820.

74th Highlanders. Capt. A. M. Duff, late of the regiment, died at his residence, Bertram Lodge, Sandown, Isle of Wight, on the 27th ult., aged 40 years.

77th Regiment. On arrival in India from England, the regiment has been sent to Madras, instead of to Seetapore and Benares, as had been previously ordered. "Rambler," in the *Bombay Gazette*, writes:—"Regarding the departure of the 24th, I have a short story to relate, which I relate solely in order that the sapient *Pioneer* may mark, learn, and inwardly digest it. The chief military authorities in this Presidency telegraphed to Simla to ask permission that the 24th might leave on the 11th, in order that the 77th Regt., who are passing through the station, might occupy their barracks till the Rifle Brigade arrive. This modest request was sternly refused. The consequence is that the 77th Regt., fresh from England, are now in tents. It has been raining with monsoon vigour for the last 24 hours, and the whole land is one great swamp. If any of the soldiers of the 77th die of dysentery or fever, the military authorities at Simla will be guilty of culpable homicide."

80th Regiment. Capt. Saunders has arrived home from special service in South Africa, and reverted to regimental duty. The adjutancy has become vacant by the resignation of Lieut. Griffin.

81st Regiment. Lieut. Wheler has been offered a company by selection.

83rd Regiment. Lieut. Westropp, a probationer for the Indian Staff Corps, has been transferred from the 22nd to the 11th Bombay N.I.

84th Regiment. The order issued for the removal of the regiment from Beggars' Bush Barracks, Dublin, to the Curragh, has been countermanded.

85th Light Infantry. The death is announced from India of Pte. P. Smith, who was killed near Ghalozan, Afghanistan, on the 13th ult.

90th Light Infantry. Capt. Humfrey, who is entering the Pay Department from the 9th Regiment, is about to be appointed to the vacant paymastership.

92nd Highlanders. *Vide* 72nd Highlanders. The deaths are announced this week from Afghanistan of Cprl. D. McPhail and Ptes. W. Dixon and A. M'Donald.

98th Regiment. H.M.S. Euphrates, with the head-quarters and service companies on board, arrived at Kurrachee on the 4th ult. The following officers took passage in the Euphrates, viz.:—Lieut.-Col. Simpson; Majors Heathcote and Roper; Capts. Sharp, Tyacke, Carey, Allen, Powis, Williams, and Chapman; Lieuts. Reeves, Prior (adjutant), Chichester, Trevelyan, Randolph, Mackenzie, and Hunter; 2nd Lieuts. Lindner, Geldard, and Dyson; Capt. and Pymr. Johnson, and Qrmr. Shore, with 851 non-commissioned officers and men. The regiment was landed at Kurrachee. Major E. Haughton died at Levally, Enniskillen, on the 29th ult., aged 39 years. The deceased entered the Army, Oct. 28, 1859; became lieut., April 5, 1864; capt., Aug. 9, 1873; and retired on pension, Jan. 7 last.

Rifle Brigade. On arrival in India from England, the 1st Batn. has taken over quarters at Poona, a change having been made at the last moment in the distribution of regiments.

Medical Department. Surg.-Major S. E. Maunsell and Surg. J. R. Clark have proceeded from Bombay to Natal in H.M.S. Orontes, and will return to India with the King's Dragoon Guards.

Veterinary Department. First-class Vet.-Surg. W. Boyd, on the Half-pay List, died at Melrose on the 22nd ult., and Vet.-Surg. A. Pitcher, on the Half-pay List, on the 1st inst., at Brighton. Mr. Boyd entered the Army, July 31, 1867; became 1st-class vet.-surg., July 31, 1879; and was placed upon half-pay a few months ago, in consequence of ill-health. Mr. Pitcher joined the Army, Nov. 10, 1869, and was placed upon half-pay Nov. 16, 1878.

The Auxiliary Forces.

MILITIA.

5th Royal Lancashire. Capt. J. F. Leeming, having attended the course of instruction during September at Aldershot, passed a very satisfactory examination, and qualified for a field-officer's certificate.

Royal London. Lieut.-Col. Dundas has very recently been gazetted to the hon. rank of col. Col. Dundas, who was formerly in the 62nd Regt., served in the Crimean campaign, and was one of the officers of the storming party at the attack on the Redan in 1855. Since then, he has served with his battalion both in India and Canada, joining the Royal London Militia as major in 1873, subsequently being promoted to the lieutenant-colonelcy, and eventually obtaining the command.

YEOMANRY CAVALRY.

Suffolk. The annual training, held this year at Bury, terminated on Saturday, having lasted since the previous Saturday. The Marquis of Bristol again lent the corps the use of Ickworth Park. The annual inspection was held on Friday, when Col. Blundell subjected the troopers to his keen and critical scrutiny. At the conclusion of the manœuvres the men were drawn up, and Col. Blundell addressing them, said he was well satisfied with the state of the regiment on parade, and the movements had been executed in a way that reflected credit on the men. He felt that he should be enabled to make a favourable report with regard to them, but he did not feel satisfied with the number of absentees. He wished to impress upon all most strongly the importance of being present, and never being absent without leave. Afterwards the troops competed for prizes awarded for efficiency in the sword exercise, and in this the Bury Troop was again successful. The competition for the best man in the separate troops terminated in a victory for Pte. Baker, in the B Troop; Pte. Bennyworth, in the C (Ipswich) Troop; Pte. G. A. Collen, in the D (Stowmarket) Troop; Corpl. Baxter, in the A (Colchester) Troop.

Worcestershire. The regiment, which had been up for its week's training, under the command of Lieut.-Col. Lord Lyttelton, was inspected last week by Col. R. Blundell, inspecting officer for the district, who complimented the men on their efficiency, especially on account of the number of recruits in the ranks. A number of prizes were awarded, including cups for the best shot in each troop. Lady Sandys' prize to the smartest man in the regiment fell to Serjt. W. Winwood, of Worcester, who also won the prize for the best swordsman in the regiment. The review was held on Powick Ham, two miles from Worcester, and attracted a large number of people, the weather being fine.

ARMY GAZETTE.

DOWNING STREET, October 4, 1880.

The Queen has been pleased to appoint Sir Sanford Freeling, K.C.M.G., to be Governor and Commander-in-Chief of the Colony of Trinidad and its Dependencies.

WAR OFFICE, Pall Mall, October 5, 1880.

Granville to be Assist.-Comy.-Gen., dated April 1, 1880, having been cancelled, as notified in the *Gazette* of Sept. 21, 1880, the promotions of the following officers are antedated :—Assist.-Comys.-Gen. J. T. Skinner to April 1, W. H. Christie to April 29, J. A. Clarke to May 1, G. Coates to June 17, J. K. Johnston to Aug. 1, J. A. Scott to Aug. 15, G. Ramsey to Aug. 19; Deputy-Assist.-Comy.-Gen. R. D. Noake to be Assist.-Comy.-Gen., to complete establishment (Sept. 2); Capt. E. V. Huyshe, 41st Foot, to be Deputy-Assist.-Comy.-Gen. on probation (Oct. 1).

Commissariat and Transport Department—Assist.-Comy. T. St. J. Fagan has been placed upon retired pay, under Article 58 of the Royal Warrant of Jan. 31, 1880 (Oct. 1).

WAR OFFICE, Pall Mall, Oct. 8, 1880.

Ordnance Store Department—Deputy-Assist.-Comy.-Gen. of Ordnance R. Nicholls to be Assist.-Comy.-Gen. of Ordnance; Assist.-Comy. C. J. Dromgoole to be Deputy-Assist.-Comy.-Gen. of Ordnance (both dated Sept. 25).

INDIA OFFICE, Oct. 7, 1880.

The Queen has approved of the following admissions to the Staff Corps, made by the Governments in India :—

BENGAL STAFF CORPS.

To be Lieutenants :—Lieuts. E. S. Masters, from the 1st Foot (dated Nov. 25, 1878, but to rank from Aug. 9, 1873); C. G. M. Fasken, from the 16th Foot (dated Aug. 23, 1878, but to rank from June 13, 1874); C. J. L. Stuart, from the 17th Foot (dated Nov. 2, 1877, but to rank from June 27, 1874); C. G. F. Fagan, from the 63rd Foot (dated Feb. 28, 1879, but to rank from Feb. 11, 1875); R. V. Garrett, from the 54th Foot (dated Jan. 31, 1879, but to rank from Feb. 11, 1876); R. C. Onslow, from the 12th Foot (dated June 7, 1879, but to rank from Sept. 11, 1876); Sub.-Lieut. C B. Brownlow, from the 17th Foot (dated May 14, 1877, but to rank from Sept. 10, 1875).

MADRAS STAFF CORPS.

To be Lieutenants :—Sub-Lieuts. J. B. de la P. Beresford, from the 68th Foot (dated July 20, 1877, but to rank from July 15, 1876); E. Vansittart, from the 63rd Foot (dated July 20, 1877, but to rank from Sept. 10, 1877.)

BOMBAY STAFF CORPS.

To be Lieutenant :—Sub-Lieut. L. S. H. Baker, from the 83rd Foot (dated Aug. 16, 1878, but to rank from Oct. 28, 1877).

The date of rank of Lieut. J. H. H. Ausley, whose admission to the Madras Staff Corps from the 14th Foot, was notified in the *London Gazette* of July 6, 1880, should have been given as Feb. 12, 1876, and not as therein stated.

The Queen has approved of the retirement from the Service of the under-mentioned officers of her Majesty's Indian Military Forces :—Lieut.-Cols. and Brevet Cols. J. B. Thelwall, C.B., of the Bengal S.C. (June 1); J. W. Orchard, of the Bengal S.C. (Sept. 8); A. D. Clay, of the Madras S.C. (June 27); R. G. Lewis, of the Madras S.C. (June 30); J. N. Maclean, of the Madras S.C. (Aug. 1); G. R. F. Bardin, of the Madras S.C. (Sept. 1); R. H. Bolton, of the Madras S.C. (Sept. 4); M. R. Bruce, of the Bombay S.C. (Aug. 1); A. Y. Shortt, of the Bombay S.C. (Sept. 1); J. Ashburner, of the Bombay S.C. (Sept. 10); Lieut.-Col. E. Y. Walcott, of the Bengal S.C. (Sept. 1); and Surg.-Major H. Cookson, of the Bengal Army (May 20).

BREVET.

The under-mentioned officers are granted a step of hon. rank on retirement :—

To be Major-Generals :—Lieut.-Cols. and Brevet Cols. J. B. Thelwall, C.B., of the Bengal S.C. (dated June 1, 1880); J. W. Orchard, of the Bengal S.C. (dated Sept. 8, 1880); A. D. Clay, of the Madras S.C. (dated June 27, 1880); R. G. Lewis, of the Madras S.C. (dated June 30, 1880; J. N. Maclean, of the Madras S.C. (dated Aug. 1, 1880); G. R. F. Bardin, of the Madras S.C. (Sept. 1); R. H. Bolton, of the Madras S.C. (Sept. 4); M. R. Bruce, of the Bombay S.C. (Aug. 1); A. Y. Shortt, of the Bombay S.C. (Sept. 1); J. Ashburner, of the Bombay S.C. (Sept. 10).

To be Colonel :—Lieut.-Col. E. Y. Walcott, of the Bengal S.C. (Sept. 1).

To be Surgeon-General :—Deputy-Surg.-Gen. F. F. Allen, C.B., of the Bengal Army (March 31).

Lieut.-Col. W. Hicks, whose promotion to the hon. rank of Col. on retirement was notified in the London *Gazette* of Aug. 24, 1880, should have been described as belonging to the "Bombay," and not the Bengal S.C.

Lieut. E. Davison	North Durham	506
Lieut. R. W. C. Vyvyan	Cornwall Rangers	505
Lieut. A. E. Binyon	2nd Cheshire	503

Gen. Sir Daniel Lysons, K.C.B., commanding the troops at Aldershot, has ordered that under no circumstances are cavalry, when on a road, to go at a faster pace than a trot. During the recent manœuvres, a fine horse, belonging to Capt. Norton, 5th Lancers, sustained serious injuries on Ash Road, from a horse cannoning against it.

Allen and Hanburys' "Perfected" Cod Liver Oil is not only freer from taste and smell than any oil ever before offered to the public, but it does not give rise to the nausea and eructations which render the use of ordinary oil, even of the finest quality, so repulsive. It is the pure Oil made at Allen and Hanburys' own factory in Norway, and prepared by an entirely new and special process, and presents in the most effective condition all the invaluable properties of the remedy. All who have difficulty in taking Cod Liver Oil should insist on having Allen and Hanburys' Perfected Oil. Sold only in capsuled imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade mark, a Plough. Of all Chemists.

ORPHEUS MEMORIAL FUND.

COMMITTEE.

Sir Henry Barkly, K.C.B., G.C.M.G.
Sir T. Gore-Browne, K.C.M.G., C.B.
Sir Julius Vogel, K.C.M.G.
Vice-Admiral Robert Jenkins, C.B.
Captain Walter Stewart, R.N.
Commander Sir Wm. Wiseman, Bart.
Major Aylmer Somerset, Rifle Brigade.
Major Francis Bulkeley, late 65th Regiment.
Lieutenant J. L. Armit, R.M.L.I.
C. G. Brooke-Hunt (Midshipman on board the Orpheus).

TREASURERS.

Messrs. C. Hopkinson and Sons, Bankers, 3 Regent Street, S.W.

HON. SECRETARY.

W. G. Francis Hunt, R.N., Naval and Military Club.

At a meeting of the Committee, recently held at the Royal Colonial Institute, it was decided to raise sufficient funds to erect at the Royal Naval College, Greenwich, a Monument to the memory of the Officers and Crew of the ill-fated ORPHEUS. The following Donations have already been paid in to the Fund, and the Treasurers will gladly receive any further contributions:—

Army and Navy Gazette.

LONDON, SATURDAY, OCTOBER 9, 1880.

IN announcing his intention of allowing the succession Brevets to continue for another year, Mr. Childers plainly intimated that this was merely a temporary and provisional arrangement, subject, in the meantime, to modification by new regulations, stating, at the same time, that he had not yet conclusively considered the case of the Captains subject to compulsory retirement. We are not in a position to say that the Secretary of State has yet come to a decision upon the question. But we believe we may say that he is ready to grant a substantial concession, which is well calculated to mitigate the hardship of the case. So long as there is any compulsory retirement, there must, of course, be some grievance; and Mr. Childers, as we believe, is not slow to appreciate the misfortune entailed upon a man in being turned out of his profession while still in the prime of life, as well as the injury the public Service may sustain in being deprived of the services of those who may be efficient in every sense, and devoted to their calling. In two respects there is, we fear, hardly a possibility of his giving adequate relief. He cannot repeal the compulsory-retirement clauses of the Warrant of 1878, and he cannot add to the pecuniary advantages of the retirements. The recommendations of Lord Penzance's Commission, upon which the Warrant is founded, were altogether based upon the principle of the compulsory removal of officers from their regiments, at stated periods and under certain conditions of service. They may be described as the main pivot upon which the whole scheme was regulated. To go back from them would be virtually impracticable. Every officer allowed to remain beyond the specified time would stop the way to those below him, and the effect of making a considerate exception in the case of one individual would manifestly be an injury to several individuals standing below him on the regimental roll, would create uncertainty and confusion, and would, besides, be practically an abrogation of the beneficial operation of the Warrant. We think we may say that this is so far recognised, that no hope can be held out that exemption from compulsory retirement from a regiment, or from the clauses disqualifying for promotion in a regiment, will be made in any case. Nor, with the gift to a retiring Purchase captain of £1,400 over-regulation money, and to a post-Purchase captain of the full average Purchase value of a company, regulation and over-regulation, is it within the bounds of probability that more money will be paid by the public. Subject to these two reservations, we have reason for believing that Mr. Childers is not only willing, but anxious, to meet the equity of the case, and that he proposes to do so in two ways. As regards the Purchase Captains, one of their complaints rests upon the cessation of the brevets in succession to General Officers. They allege that when they purchased the rank of captain, they did so with the certainty that, if unlucky in their regimental promotion, they would at some time obtain the brevet rank of major. To those who may not have obtained that rank when they retire, we gather that the War Office will be ready to grant it; and as the Warrant gives each of them a step of honorary rank upon retirement, the effect will be that those older captains who may wish to quit the Army instead of taking half-pay Majorities, can do so with the rank of lieutenan-colonel. There are many men who are holding on for the purpose of gaining that rank by means of the intermediate brevet of Major, and to a vast proportion the concession we have indicated would be regarded as a considerable boon, while the stream of promotion would be accelerated by their consequent earlier retirement. In the case of the younger or post-Purchase Captains, the grievance with many consists in their having no alternative but quitting the Service altogether, or of going on half-pay only with the rank of captain. To many of them, no doubt, the termination of their military career may be no grievance, for it is needless to say that with a system of purely voluntary retirement, the great majority would still, as they did in former times, sell out at or about the age of forty. But to those who are fond of their profession, it is a heavy blow to be placed on half-pay in the rank only in which they have served probably for eight or ten years, and upon a stipend of £127 a year, as between it and complete retirement upon a pension of £200, many would be almost compelled to accept the latter, however devoted to soldiering, and however fit for soldiering they might be. It is, we believe, proposed that they should be saved from so painful an alternative by being given the choice of a half-pay majority, instead of a half-pay company or retirement from the Army. They would thus be still eligible for Staff employment, with probably the contingency of being allowed to count a five years' turn on the Staff as qualification for the rank of lieutenant-colonel. As against these two proposals, it may, no doubt, be urged that, in the case of the Purchase Captains, it is a further cheapening of Army rank and a reduction of its social value; while as regards the post-Purchase Captains, it indirectly affects regimental promotion, by opening the Staff to those whose selection would shut out regimental officers, and thus keep back subalterns and captains who would gain steps on their being seconded. But it would be a valuable concession to many of those who have really reason to complain, and whose complaints are most entitled to consideration; and on the whole, we take it that it would be accepted as a substantially fair settlement of a question which involves many conflicting interests.

H.R.H. the Field-Marshal Commanding-in-Chief commenced his inspections on Saturday last, when he visited Woolwich, and saw the 16th Lancers and Artillery under arms on Woolwich Common. The Duke visited Chatham on Monday, and inspected the troops in that garrison, under command of Brigadier-General Sir Evelyn Wood, V.C., K.C.B. His Royal Highness afterwards proceeded to Dover, where he witnessed on Tuesday a review of the garrison there and at Shorncliffe, subsequently visiting the fortifications and barracks. His Royal Highness will proceed to Portsmouth on Tuesday next, leaving the train at Havant, and riding over to Farlington to witness a sham-fight, in which the whole of the troops of all arms, under Prince Edward of Saxe Weimar's command, will take part. On the following day he will review the troops on Southsea Common, and will afterwards inspect the forts and regiments in the Isle of Wight. During his stay in Portsmouth, his Royal Highness will be the guest of Prince Edward, at Government House.

Major-General G. N. Boldero, we are glad to learn, has almost recovered from the serious accident he met with some time ago by a fall from his horse.

Lieutenant-General R. W. Lacy attained the age of seventy on the 5th inst., and will be placed on the Retired List in an early gazette.

Major D. Norton-Taylor, R.A., has been appointed inspector of Warlike Stores at Halifax, N.S.

Captain G. Mackinlay, R.A., has joined the staff of the Royal Military Academy as instructor of artillery, vice Captain R. Walkey, R.A.

Captain C. H. Ibbetson, 4th Dragoon Guards, has been appointed acting aide-de-camp to Major-General Willis, C.B., commanding the Northern District, vice Captain T. a'B. Sargent, 78th Highlanders, proceeded to India to join his regiment.

We trust that the new Military Secretary, now that he has got comfortably seated in his chair at the Horse Guards, will turn his attention to the list of brevet lieutenant-colonels who are still in command of companies. The position of some of these officers is most anomalous. A correspondent in our columns, some time since, referred to the case of one officer, Brevet Lieutenant-Colonel Brockman, of the 86th Regiment, who has been for thirty-three years in the service of his country. He entered the Navy in 1847, and served in the Burmese campaign, in the Kaffir war of 1851-52, and also through the mutiny in India, yet he is still a company officer, and as such is prevented from qualifying for promotion. Surely in such a case an exception might be made. It is evident that there is something radically wrong in our system of promotion, when a man with the claims of Colonel Brockman is left year after year unrecognised, with the prospect of ultimately retiring on a captain's pension. We refer to Colonel Brockman's case unsolicited either by the officer himself or his friends, for it shows at once how necessary it is that the Authorities should at times deviate from the beaten track, and help on an officer who has long and faithfully served his Sovereign.

The selection of medical officer to the new Governor of Madras rests, we learn, between the officer who has been filling the position on the staff of the Duke of Buckingham and Chandos and Surgeon-Major R. Anderson. The appointment of the latter officer would be very popular, as Dr. Anderson, during his twelve years' service in India, has derived great experience, and is well known in the three Presidencies. His last appointment was at the Deolalee Depôt, where his exertions were very meritorious on behalf of the sick and in their despatch by troopships for Europe. The information he gave to the Government of India on the subject of the eligibility of the Ooria plain at Aboo as a site for a military station was most valuable.

General Sir Arthur Borton, G.C.M.G., K.C.B., left England on Wednesday for Malta, to resume his duties as Governor of that Colony.

Captain Viscount Dalrymple, Royal Horse Guards, has been appointed aide-de-camp to Mr. Adam, the new Governor of Madras.

The following selections have been made for Royal Horse Artillery, viz.:—Captain B. F. Domvile, unattached, and Lieutenants E. F. Becher, 4th Brigade, Aldershot; Sir G. V. Thomas, Bart., 3rd Brigade, Ferozepore; and J. D. Cunningham, 2nd Brigade, Aldershot. Captain Domvile has been posted to G Battery B Brigade, at Woolwich, vice Captain J. C. H. Parlby; Lieutenant Becher to C Battery A Brigade, at Newbridge, vice Lieutenant J. K. Trotter, promoted; Lieutenant Sir G. Thomas to Depôt, B Brigade, at Dublin, vice Lieutenant F. A. Aylmer, promoted; and Lieutenant Cunningham to B Battery C Brigade, at Meerut, vice Lieutenant E. B. Coke, promoted.

Colonel P. W. L'Estrange, R.A., commanding the Royal Artillery at Guernsey, has been appointed to the command of the Auxiliary Artillery in the Dover Sub-district, vice Colonel F. C. Trevor, whose period of Staff service has expired.

We have a letter from a well-informed military correspondent at the Cape, in which occur the following sentences:—"The Basutos are rising in rebellion, and soon we shall have to face a difficulty as great, if not greater, than that which we have lately overcome in Zululand. Despite all statements to the contrary, the Basutos are a most formidable people, and will give us great trouble if once they take up arms *en masse,* as they are said to be prepared to do. It remains to be seen whether the Home Government will act promptly, and take measures at once to check any turbulent spirit which may show itself. Upon their action much depends. If they leave matters to the Colonial governments, the 'Basuto campaign' will become a most serious affair; for these governments are not strong enough, and never will be strong enough, I fear, to help or protect themselves. A lesson ought to have been learnt from the Zulu campaign. If it has, if the Imperial Government puts a British force into the field at once, under the command of Sir Hugh Clifford or Sir George Colley, the Basutos will, I doubt not, soon be brought to reason; but if the Home Government commits the very serious blunder of leaving it to the colonial authorities to settle the difficulty, I, as one who knows well what these Governments are capable of, would prepare you for another big South-African war, for the natives know as well as anybody here does what a farce the colonial forces have proved, and how utterly unprepared they are, with, perhaps, one exception—that of the Cape Mounted Riflemen—to take the field. So long as the Basutos are pitted against them they will simply laugh at us; but the British troops have earned a reputation, they would be feared, and as they will certainly have to be employed ultimately, I would recommend that their departure for the front be ordered immediately on hostilities commencing. A great mistake will be made if they are held back, as will be discovered when it is too late to repair the error." We may point out that this same correspondent foretold the difficulty which would arise in Zululand.

The War Office has just made a purchase of land in extension of the present barrack site at Belfast, at a cost of £5,000.

The War Office has entered into a contract for the rebuilding of the officers' quarters attached to the Exeter Brigade Depôt Barracks, recently destroyed by fire. The works are to be carried out at a cost of £6,000.

The War Office has acquired possession of the old *Nisi Prius* Court at Chester Castle, for a sum of £3,110, in order to add to the barrack accommodation at the station.

The Council of the Royal United Service Institution has lately taken a wise step in publishing a list of its members, classified under their regimental headings. We confess we have turned over the pages of this list with utter astonishment. Here is an institution maintained with the object of raising the education of officers, and promoting among them the study of professional subjects. The subscription to the Institution is only £1 a year, and for that sum each member receives annually the "Journal of Proceedings," which is more than worth the sovereign expended in the subscription. Yet we find that many Line regiments are entirely unrepresented on the list of members, whilst others are content to supply two or three names. In few instances do we find a dozen names under a regimental heading, whilst in the Militia and Volunteers the Institution is pretty well ignored. This state of things we consider most discreditable, and we would suggest to commanding officers that they should take steps to get some one of their officers appointed corresponding members of the Institution, and with instructions to use their utmost endeavours to obtain members, if only in order to establish the character of the British Army and to prevent foreigners, who may obtain a sight of this list, from forming erroneous impressions. We may safely say that in no civilised nation in the world, except our own, would an institution of the nature of that of the Royal United Service, which does so much to promote the welfare of the combined Services, be allowed to put forward a list such as that now before us, which is nothing short of a disgrace to the British officer in whose interests the house in Whitehall Yard is kept open.

An early gazette will contain the announcement of the promotion of Captain E. Montefiore to a battery command. Captain Montefiore is the last captain on the late Bombay list, and in future the captains on the Imperial Establishment of the Royal Artillery will benefit from all vacancies occurring on one out of the three Indian lists.

The Swedish Government have decided upon a new eight-centimètre field-gun for the Swedish Army, and have given Messrs. Krupp a large order for the weapon. They have also agreed upon a new eleven-centimètre siege-gun to be supplied by the same firm. In the Life Guards the lance has been replaced by the carbine, and the Government have in view the arming of the cavalry throughout with the sabres and breech-loading carbines. Finally, a commission has been appointed to select the best breech-loader rifle for the Swedish infantry.

The Navy.

ADMIRALTY, Oct. 2, 1880.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and May 18, 1870, Staff Commander George David Perry has been placed on the Retired List from the 30th ult., with permission to assume the rank and title of Retired Captain from the same date.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and November 29, 1879, Lieutenant Percy Clinton Raitt has been placed on the Retired List of his rank from the 30th ult.

ADMIRALTY, Oct. 5, 1880.

The following promotions of Engineer officers have been made, with seniority of Aug. 16, 1880:—Inspector of Machinery Orestes Nathaniel Brooker to be Chief Inspector of Machinery in her Majesty's Fleet; Chief Engineer Charles P. Turner to be Inspector of Machinery in her Majesty's Fleet; Engineer William George Littlejohns to be Chief Engineer in her Majesty's Fleet.

The under-mentioned Surgeons have been promoted to the rank of Staff Surgeon in her Majesty's Fleet, with seniority of 2nd inst.:—William Deacon Isaac and Christopher Harvey.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Paymaster William Henry Hyde has been placed on the Retired List of his rank from the 29th ult.

ROYAL MARINE FORCES.

The following promotions have taken place in the Royal Marine Artillery, viz.:—Lieutenant Lawrence Richard Connolly to be Captain, vice Robilliard, made Supernumerary on being appointed Adjutant in the Antrim Artillery Militia (Sept. 25, 1880); Captain and Gunnery Instructor Herbert Everitt to be Major, vice Tupman, retired; Lieutenant Augustus Simeon Le Quesne to be Captain, vice Everitt (both dated Sept. 27, 1880).

ADMIRALTY, Oct. 7, 1880.

In accordance with the provisions of her Majesty's Orders in Council of Feb. 22, 1870, and April 30, 1877, Chief Engineer Thomas Witherington Tandy has this day been placed on the Retired List of his rank.

APPOINTMENTS.

Lieutenants—Charles R. Arbuthnot, Richard J. Symonds, H. H. A. Littledale, to the Excellent, additional, to requality in gunnery; Alexander Leeper (acting) and Alfred Whitehouse (acting) (of the Jackal), to the Excellent, additional, for gunnery instruction; James W. Litle, to the President, additional, for study at the Royal Naval College, Greenwich; W. T. Bourke, to the Asia; Robert D. B. Bruce, Charles Milne, and Woodham A. Connop, to the Crocodile; Edward L. Lang, to the Indus, for service in the Mutine; Robert N. Ommanney, to the Indus, for service in the Espiègle; Mortimer K. Wodehouse, to the Superb; George R. Bethell, to the President; Herbert Swire, to the Pembroke, additional, for the Constance.

Navigating-Lieutenant—Hubert H. Sabben, to the Crocodile.

Sub-Lieutenants—Stuart P. Garde, to the Phœnix; George E. Patey, to the Zephyr; Richard H. Peirse, to the Northumberland; Robert P. Adams, to the Pioneer; Henry W. Sharp, to the Pioneer, for navigating duties; Coltland H. Simpson, to the Superb.

Midshipmen—William H. F. Montanaro, to the Superb; Francis S. A. Penman, from the Tourmaline, to the Superb.

Naval Cadet—William H. Ryder, from the Minotaur, to the Tourmaline, supernumerary.

Fleet Surgeons—William A. Lloyd, M.D., to the Nankin; Daniel O'Connor, to the Superb; John F. Mitchell, to the Lord Warden.

Staff Surgeon—James D'A. Harvey, to the Royal Adelaide.

Chief Engineers—Ronald Taylor, to the Indus, additional for Reserve; John Marwood, to the Pembroke, additional, for service in the Rupert.

Assistant-Paymaster—Samuel E. Lark, to the Royal Adelaide, as supernumerary.

Surgeons—Alexander R. Joyce and John A. M'Adam, to the Superb; Arthur W. Russell, to the Zephyr; John Jennings, to the Asia; Henry M. Levinge, B.A., M.B., to the Belleisle; Francis R. Loftie, to the Hercules; William M. Long, additional, to the Agincourt.

Engineers—John Murdoch, from the Asia, to the Pembroke, additional, for Rifleman; Richard S. Kiernan, from the Asia (supernumerary), to the Asia, additional, for the Spey; Elijah Tricker, from the Asia (supernumerary), to the President, additional, for the Royal Naval College.

Clerk—Charles D. M. Horne, additional, to the Minotaur.

Assistant-Clerk—John A. Keys, to the Minotaur, as supernumerary.

Gunner—David W. Flynn (acting), from the Cambridge (supernumerary), to the Beacon.

Albatross, Com. Errington, arrived at Nagasaki on Aug. 11, and remains.

Assistance, Capt. Buckle, left Portsmouth on Thursday with drafts for Gibraltar, and others for transhipment to the Tamar at Gibraltar, for conveyance to the West Indies. She will sail on Saturday.

Bacchante, Capt. Lord Charles T. M. Scott. Letters from Ferrol, dated Sept. 29, state that her Majesty's ship Bacchante was still lying there. The Commodore of the Dockyard and the Captains of the three Spanish war vessels then in harbour paid an official visit on the 28th. On leaving the Commodore was saluted with nine guns, the salute being returned by the Spanish frigate Villa de Bilboa. Prior to leaving, the Commodore invited the Princes and the officers of the ship to visit the dockyard and the naval-cadet ship Asturias, a fine old frigate lying near the Bacchante. In the evening the British Vice-Consul dined on board with Capt. Lord Charles Scott.

Beacon, Com. Geo. Hand, left Jaskh for Muscat and Kurrachee on July 25, and was to return by Aug. 31.

Boadicea, Comdre. Richards, C.B. Letters have been received from the Commodore in the Boadicea, at Simon's Bay, up to Sept. 6. He would sail on the 11th for a cruise, and after the 16th would visit Eastern ports and Delagoa Bay, returning to Simon's Bay about Oct. 15, and proposes to sail with the Pioneer in company for the West Coast Division about Nov. 15. Mails after Oct. 22 to St. Helena; after Dec. 3 to Sierra Leone.

Carysfort, Capt. H. R. Stephenson, C.B., has been taken out of the basin at Sheerness, and after the usual trials of engines and machinery will leave for the North-American and West Indies station.

Charybdis, Capt. C. F. Hotham, arrived at Ascension on Sept. 1, and left on the 6th for Devonport. She was recommissioned at Hong Kong in May, 1877. She will be placed in the Fourth Division of the Steam Reserve.

Cleopatra, Capt. F. Durrant, having had defects made good, sailed from Devonport on Saturday for an experimental cruise in the Channel.

Comus, Capt. J. W. East, arrived at Yokohama from Hong Kong on July 30, and remains.

Decoy, Lieut.-Com. Von Donop, is awaiting relief by the Foam at Cape Coast Castle.

Dido, Capt. C. Domvile, was at Cape Coast Castle up to the 5th ult.; would visit Brass River and cruise in Bights on arrival of the Foam.

Dryad, Com. John Hext, sailed from Rangoon for Akyab and Bassein on Sept. 2, and would return about the 17th.

Dwarf, Com. Bainbridge, arrived at Simon's Bay from Bights and St. Paul de Loanda on Sept. 6.

Eclipse, Capt. C. Rising. Letters have been received from the senior officer in the Eclipse, at Rangoon, up to Sept. 3.

Encounter, Capt. Hon. A. Denison, senior officer of the North China Division, was at Shanghai on July 21.

Euryalus, Capt. King, flagship of Rear-Admiral W. G. Jones, C.B. Letters have been received from the Commander-in-Chief in the Euryalus, at Trincomalee, up to Sept. 4, having arrived from Zanzibar on the previous day.

Express, Lieut.-Com. Hamond, will sail from Gibraltar for Malta, to be docked on the arrival of the Decoy from the West Coast of Africa.

Firebrand, Lieut.-Com. Sisson, was expected at Cape Coast Castle on Sept. 5.

Flirt, Com. Brackenbury, C.M.G., would sail from Cape Coastle for St. Helena and Ascension on the 7th inst.

Fly, Com. A. F. St. Clair, was on Aug. 12 on passage to Kobé.

Foxhound, Lieut.-Com. W. H. Nowell, arrived at Hakodate on Aug. 3.

Garnet, Capt. Loftus Jones, left Monte Video for Rio Janeiro on Sept. 21, and was to sail for the south on the 5th inst.

Hecla, Capt. Morgan Singer, sailed from Gravosa for Corfu and Malta on the 2nd inst.

Inconstant, Capt. Fitzgerald, flagship of Rear-Admiral the Earl of Clanwilliam, was out of the shipwrights' hands at Portsmouth on Saturday, and it is expected she will be ready for sea on the 14th.

Invincible, Capt. Hon. E. Fremantle, C.B. A Reuter's telegram from Malta, dated Oct. 3, reports the Invincible having arrived there from Sicily.

Iris, Capt. H. W. Brent, was to be docked on Sept. 30 at Malta.

Iron Duke, Capt. H. F. Cleveland, flagship of Vice-Admiral Coote, C.B., left Okosiri Island for Hong Kong on Aug. 6. Letters received from the Commodore up to Aug. 23 state that the Iron Duke arrived at Hong Kong from Japan on Aug. 18, and was taken into Aberdeen Dock on the 20th; was undocked on Sept. 20.

Kestrel, Com. Lang, *en route* to Singapore, had been detained at Manilla until Aug. 7 by bad weather.

Lapwing, Com. W. G. Scott, returned to Tientsin from Chefoo on July 9, and remains.

Lily, Com. Stanhope Grove, was at Shanghai on July 21, and would relieve the Mosquito at Hankow.

London, Capt. Charles J. Brownrigg. The amounts of prize-money due to individuals in the various classes, the proceeds of the sale of slave-dhows captured by this ship, are announced in last night's *Gazette.*

Modeste, Capt. R. Mead, was to leave Yokohama to be docked at Nagasaki about Aug. 19.

Monarch, Capt. Tryon, C.B., arrived at Malta, on Oct. 5, from Naples.

Moorhen, Lieut.-Com. Corfe, at Hong Kong, was to be ready for sea by Sept. 20, and would proceed to Singapore to relieve the Kestrel.

Mosquito, Lieut.-Com. Hon. F. Sandilands, was at Hankow on July 3, and would be relieved by the Lily.

Osprey, Com. Hon. H. A'Court, was at Callao according to last returns.

Pegasus, Com. Hon. H. N. Hood, was at Hong Kong on Aug. 23, for general service.

Pembroke, Capt. Hunt-Grubbe, C.B., flagship of Rear-Admiral T. Brandreth, at Chatham. The order for the embarkation of a Royal Marine detachment has been cancelled for the present, in consequence of the division being very weak, caused by the many drafts which have been sent away recently.

Philomel, Com. H. B. Berners, returns from Seychelles to Aden about Oct. 26.

Rambler, Com. the Hon. Algernon C. Littleton, will, after her ten days' cruise in the Channel, leave for the Cape and West Coast of Africa.

Ready, Com. H. H. Edwards, was senior officer's ship at Gask, Persian Gulf, on July 31.

Repulse has again been taken in hand at Portsmouth. She has had her machinery thoroughly repaired, and has made a satisfactory six hours' steam trial, when nearly 3,000 horse-power was indicated, and a speed of 11 knots realised. She has also passed through a general repair and refit, and comparatively little remains to be done to complete her for sea.

Rupert, Capt. E. J. Pollard, having been dismantled at Chatham, was on Saturday paid off, the officers and men being granted six weeks' leave. The Rupert was built at Chatham, and was commissioned on May 25, 1876, by Capt. Hunt-Grubbe, C.B., A.D.C., now in command of the Medway Steam Reserve. Capt. Pollard was appointed to her on June 18, 1878.

Seagull, Com. M. Byles, returned to Aden from a cruise on Sept. 17, and would sail for Perim on the 28th, returning the second week in October.

Serapis, Capt. Twiss, sailed from Portsmouth on Sunday morning for Bombay, with 69 officers, 8 non-commissioned officers, 800 men, and 13 women and children belonging to the 8th, 12th, 14th, 18th, 34th, and 100th Regts., and will embark a detachment of the 25th Foot at Devonport, and a number of women and children of the 61st and 98th Regts. at Malta.

Shannon, Capt. John D'Arcy, was at Arica on the 5th inst., and would proceed to Callao.

Sheldrake, Lieut.-Com. Bridger, was at Foochow on Aug. 23.

Superb, Capt. T. Le H. Ward, was commissioned on Monday at Chatham, with a complement of 600 men. She is to have an unusually large number of Royal Marine Artillery, but will only take about a dozen of the Royal Marine Light Infantry. She is to proceed to the Mediterranean to take the place of the Rupert, which was recently paid off at Chatham. Capt. T. Le Hunte Ward entered the Navy in 1844, and served as mate in the Excellent, gunnery-ship, from July, 1851, until the close of 1852, and subsequently served in the Leander, on the North America and West Indies station, until advanced to the rank of lieut., Oct. 22, 1853. He afterwards served in the Blenheim, in the Baltic, from February, 1854, to the close of 1855; in the Stork, tender to the Excellent, from January, 1857, until September, when he again joined the Excellent, and was promoted to commander, Jan. 31, 1861. He commanded the Columbine, in the Channel and Pacific, from May, 1863, until posted April 15, 1867, and subsequently from Feb. 1, 1873, until paid off in July, 1877; commanded the Thetis, on the China and East Indies station. He afterwards commanded the Cambridge, gunnery-ship, at Devonport, from August, 1877, until appointed in August last to superintend the fitting-out of the Superb. Com. Harry Francis Hughes Hallett served as sub-lieutenant in the Marlborough, Capt. C. Fellowes, bearing the flag in the Mediterranean of Vice-Admiral Robert Smart, K.H., from June 7, 1864, until paid off, Dec. 3 following. On June 8, 1865, he was appointed additional of the Octavia, Capt. C. F. Hillyar, fitting for the East Indies, and was promoted to lieutenant in that ship in April, 1866. He continued in the Octavia until January, 1867, when he was transferred to the Terrible, Capt. T. E. Commerell, C.B., V.C., and on Jan. 1, 1869, was appointed to the Excellent. He remained in the Excellent until May, 1870, when he joined the Royal Adelaide, Capt. T. P. Coode, flagship at Devonport of Admiral Sir H. T. Codrington, and in May, 1871, was appointed to the Barrosa, Capt. Lewis T. Moore, in China, and returned in her to England, and was paid off in September, 1873. In the following month he was appointed to the Devastation, turret-ship, Capt. F. W. Richards, and on March 1, 1875, was appointed flag-lieutenant to Admiral George Elliot, in the Duke of Wellington at Portsmouth. On Feb. 25, 1876, he removed, as senior lieutenant, into the Sultan, Capt. H.R.H. the Duke of Edinburgh, fitting for the Mediterranean, and in May, 1878, turned over at Malta into the Black Prince, and continued under his Royal Highness until the close of that year. He subsequently commanded the Firefly, gunboat, at the Cape of Good Hope and West Coast of Africa, from June, 1879, until invalided in March, 1880.

Swinger, Lieut.-Com. Tudor, was at Amoy on Aug. 23.

Tamar, Capt. T. H. Royse. A Reuter's telegram from Limasol reports that the Tamar, with the 20th Regiment on board, left on Oct. 6 for Malta.

Tay, which was lent to the Naval Artillery Volunteers of Liverpool, returned to Spithead on Saturday.

Thetis, Capt. P. Stephens, was at Callao according to last returns.

Thunderer, Capt. Colomb, arrived at Malta, on Oct. 5, from Naples.

Triumph, Capt. A. H. Markham, flagship of Rear-Admiral Stirling, sailed from Esquimault for San Francisco and Callao on the 2nd inst.

Valiant, Capt. W. C. Chapman. The officers of this ship are enlivening their annual visit to the quiet little watering-place of Rathmullen by gaieties of every description. On Thursday week a concert was given on board, which was so well patronised by their friends on shore that the experiment was repeated last week with even greater success. On Monday last the officers gave an "at home," to which all the *élite* of the neighbourhood were invited. The ship was, as usual on such occasions, most tastefully decorated with flags and flowers, and the guests numbered about seventy. Quite a round of festivities have been given to the officers, including a monster picnic to Mulroy Bay by the ladies of Rathmullen, and dancing and lawn-tennis have been quite the order of the day.

Vigilant, Lieut.-Com. W. Annesley. Letters have been received from the Commander-in-Chief in the Vigilant, at Yokohama, up to Aug. 12, having arrived from Okosiri Island on Aug. 10.

Vulture, Com. Pringle, arrived at Gibraltar from Malta on Monday, and sailed on Tuesday for Plymouth.

Woodlark, Com. P. C. Johnstone, was at Jaskh on July 31.

The following men have been awarded the medal for long service and good-conduct by the Admiralty:—W. H. Criketon, captain of the maintop, of the London; W. Green, captain's coxswain, of the Rocket; J. Westbrook, master-at-arms, of the Iris; G. Soper, serjeant, Royal Marines, of the Warrior; Robert M'Murtrie, chief boatman-in-charge, and W. R. Shipcott, boatman, of the Coastguard; Joseph Thibon, leading stoker, of the Terror; Frank Purse, leading stoker, of the Iris; Joseph King, bandsman, of the Duncan; Joseph Sharpe, private, 25th Company, and Richard Hovey, private, 11th Company, Royal Marine Light Infantry.

The Imperial Russian yacht Livadia left the dock of Messrs. John Elder, Govan, on Wednesday. Taking so large a vessel out of dock and down the river was a work of difficulty, and traffic had to be stopped. The vessel is 230 feet long by 153 feet wide at its lower portion. The superstructure is 260 feet long by 110 feet wide. When she was fairly in the channel way, the spectators, who lined the banks of the river in thousands, cheered loudly.

Epps's Chocolate Essence.—Product of a special refining process. It is chocolate devoided of its over-richness and substantiality. Sugarless and, when made, of the consistency of coffee. An afternoon chocolate. Sold only in packets, 6d and 1s, labelled, "James Epps and Co., Homœopathic Chemists, 48 Threadneedle Street, and 170 Piccadilly, London."

THE INTERNATIONAL DEMONSTRATIVE SQUADRON.

The Alexandra arrived at Teodo on Sunday afternoon from Gravosa, and the English and Russian Squadrons are now anchored in the Gulf of Cattaro. The position chosen is situated on the northern shore of the middle basin of Cattaro, and is completely landlocked. On the north, the side from which the Bora flows, it is sheltered by high land. The Fleet is anchored in one long line, the English being at the extremity nearest to the entrance to the harbour, and distant about six miles from the sea; the Russians at the other extremity, ten miles from Cattaro, which lies at the head of the Gulf. The line of the Fleet extends two miles, and is distant only a quarter of a mile from the shore. There are but few houses scattered along the shore of the Gulf, the little town of Castel Nuovo being five miles distant.

Telegrams would have been considerably delayed in transmission had not the Austrian Government ordered the immediate establishment of a branch office for the special use of the Fleet on the beach near the Alexandra, whence the wire passes to Castel Nuovo.

The Admiral, Sir Beauchamp Seymour, returned from Cattaro on Tuesday.

The Turkish frigate Seleminger and the paddle-yacht Izzeddin continue to land arms and provisions along the coast.

Telegrams to the Fleet should now be addressed to Badsic Station, Bocche di Cattaro.

Prince Danilo, eldest son of the Prince of Montenegro, arrived at Teodo on Wednesday, on a visit to Sir Beauchamp Seymour. He was accompanied by the Montenegrin Ministers for War and Foreign Affairs, and by a staff of officers. At Cattaro he was met by Capt. Sale, R.E., Special Commissioner, the Hon. Headworth Lambton, flag-lieut. to the Commander-in-Chief, and Lieut. Caillard, and was brought out to the Fleet in the Helicon. When the Helicon appeared in sight, about 11 a.m., the Allied Squadron dressed with flags, and on her reaching the centre of the line a salute of 21 guns was fired by all the ships of the Fleet. The Helicon stopped close to the Alexandra, and the Prince, accompanied by his staff, proceeded on board the flagship, where he was received by the Commander-in-Chief, his staff, a guard of honour of Marines, and all the officers of the vessel. He breakfasted with the Admiral, and was afterwards conducted over the ship. He then returned to the Helicon, and proceeded to pay visits to the Archduke Stephen of Austria and the various Admirals of the Fleet. The young Prince, who is 11 years old, was attired in the gorgeous Montenegrin national dress. He dined with the Commander-in-Chief at night, together with the Archduke Stephen and the captains of the Austrian ships-of-war, and left the following day for Cettinje.

THE ATALANTA.

The Atalanta Committee of Inquiry has not, we believe, yet been concluded, and the consideration of the report is delayed for some further evidence. It will be remembered that one of the last witnesses examined was Mr. William John, of Lloyd's, and his evidence was that a very moderate pressure upon the sails of the Atalanta would be sufficient to capsize her, and that this might have been proved or disproved by calculations before she was sent to sea. The reply of the Admiralty, upon the evidence of Mr. John, is signed by Mr. Barnaby, and at the suggestion of the Admiralty, the committee have called for Mr. John's observations upon Mr. Barnaby's review of his evidence.

In his minute Mr. Barnaby speaks of the check calculations for the stability of the Atalanta made for purposes of comparison with the Admiralty calculations. He says that when allowance is made for slightly differing conditions of lading and draft, the differences are extremely small; in fact, there is substantial agreement, as both calculations follow the same mathematical principles and were based upon identical *data*. Mr. John made a comparison of the curves of stability, sail-carrying power, &c., of the Atalanta and certain selected sailing ships of the Mercantile Marine. Mr. Barnaby says:—"The Atalanta was designed to be a vessel capable of fighting under sail; she was, therefore, made short in proportion to her beam, to secure handiness in action; and great initial stiffness was given her, so that the angle of heel under a press of canvas might not be so great as to prevent the free use of the leeward guns. This latter was always regarded as an essential condition of the design in sailing vessels of war, both English and foreign. Sir W. Symonds preferred to secure this stiffness by great breadth of beam, associated with fine under-water forms, rather than to use much ballast. The consequence of this was undoubtedly a reduction in the range of stability as compared with that which would have been obtained in a ship of equal stiffness but less breadth, carrying a large quantity of ballast low down in the hold. On the other hand, the actual range of the curve of stability in the Atalanta is very considerable, and the experience gained in her former commissions gave every assurance of her safety under sail when equipped as a training ship. All the changes made in her refit tended to an increase in her sail-carrying power and stability."

In the merchant ships mentioned, Mr. Barnaby adds, there would be essential differences in the designs, in the method of lading, and the condition of service. Light and heavy cargoes may have to be carried. All things make it difficult to ascertain beyond question the actual conditions of stability for a merchant ship on any particular voyage, especially when homeward bound. Owner and builder would desire such proportions as would cover the risks incidental to possible variations in stowage, to which there is nothing comparable in the war-ship.

The usual practice is simply to estimate the ratio of sail moment to righting moment for small angles of heel. Mr. John has performed a series of similar arithmetical operations for large angles of heel, and graphically recorded the results. The usual or Admiralty practice of denoting sail-carrying power by numbers can only be safely applied in comparisons made between ships of similar type and of approximately the same displacement; and as ships decrease in size, so the sail-carrying power diminishes. The reason is, the total sail spread in a ship is usually determined with reference to her resistance, so that in similar ships of different sizes the sail-spreads vary approximately as the squares of the lineal dimensions. The moment of sail would therefore be, roughly, as the cubes of the lineal dimensions, whereas the moment of stability in similar ships similarly stowed would be as the fourth power. In such curves as those given by Mr. John, the same thing holds good, and consequently a small ship must appear at a disadvantage when compared in that manner with a much larger one. Hence no importance is attached to the comparison between the Atalanta of about 1,000 tons displacement, and the Stuart Hahnemann, of nearly 4,000 tons.

As to conditions of wind-pressure, sail-spread, and state of sea, Mr. Barnaby says:—"Mr. John is dealing with a case of the greatest difficulty. No one has put forward a complete or satisfactory method of dealing with the question of the safety of rigged ships rolling in a seaway with sail set. Mr. John gives no details of his procedure, he simply states the result. There is consequently no ground for criticism. But we do not agree with the opinion he has expressed as to the force of wind which would possibly suffice to capsize the ship in a seaway. This opinion is necessarily speculative, since it is impossible, in the present state of our knowledge, to fully represent all the conditions of the problem."

A "Flag Officer," referring to the statement of Mr. John "that a very moderate broadside of wind-pressure on the sails of the Atalanta would be sufficient to capsize her," says:—"What can such an opinion be worth when opposed, as it is, to the experience of nearly fifty years? Why, the Atalanta and her sister-ships, the Iris, Alarm, Cleopatra, Carysfort, and Spartan, were tried over and over again under every conceivable condition of wind and weather, without the slightest suspicion of their instability. By 'stability' I mean power of resisting wind-pressure, without reference to the action of the waves. The weak point of those ships in bad weather was in their 'peg-top shape,' to which you allude. The sea abeam would strike very heavily against their straight lines; and I have no doubt whatever the Atalanta was thrown over by a heavy beam-sea in a gale of wind. I was in one of the above-named ships on one occasion, running, with the wind abeam and a tremendous sea, under close-reefed topsails and reefed courses. She gave some awful lurches that almost took one's breath away. The 1st lieutenant, a first-rate seaman, and anything but nervous, said to me, 'We can't go on like this; she'll be over; we shall have to heave to.' However, we did not heave to, and she did not go over; but I believe a very little more would have done it. That ship in smooth water was as stiff as a church, but terribly jerky in a sea."

The Press Association is informed that the report of the Atalanta Inquiry Committee will be issued to the public in the course of the ensuing fortnight. The report will be of a lengthy and exhaustive character, and appended to it will be a number of tracings and drawings. Meetings of the Committee will be held to-morrow and on Monday next, at which the report will be finally considered. The Committee are of opinion that the Atalanta foundered in the terrible gale to which reference has been made in the logs of several ships that were in the track of the ill-fated ship. The build of vessels of the class of the Atalanta will be condemned in the report in unmistakable language, and an opinion expressed that no more ships of this description should be constructed.

BARBETTE FIRING AND LOADING IN REAR.

Mr. G. Fawcus writes to us from Tynemouth:—"I have noticed with much satisfaction your report of the experiments at Cliff-End Fort, near Yarmouth, in the Isle of Wight, as confirming what I have so long advocated. I presume these experiments were with either the C or D pivot action, which, of course, brought the muzzle of the gun beyond the cover of the parapet, when turned to the rear. The North Shields double-pivot movement, as you are aware, allows the gun to turn all round under cover of the parapet, in much less space, with less labour, and in less time. Of two such lessons, why neglect the nobler and the simpler one? The depressed loading is a dangerous business, where the slipping or creeping forward of the shot is always liable to cause another accident like that of the Thunderer."

The *Jornâl do Recife* of Aug. 31 says:—"Capt. Freeden, master of the German brig W. von Freeden, which arrived here from Antwerp on the 28th inst., reports that on the 14th ult., in lat. 46° 42′ N., long. 7° 45′ W., he saw from a distance floating the hull of a large vessel without any masts, the stern almost submerged, and the bows five or six feet above water. The planks of the visible side were painted black, with a yellow border and a white one underneath, the bowsprit being taken in; and by what he could see with a telescope on the deck of that part of the vessel she seemed to be a man-of-war. Unfortunately, he did not remember then the training-ship Atalanta, belonging to the British Navy, whose disappearance has caused so much sensation. It was only two days after, on the 16th, and when he was already in lat. 45° N., long. 10° W., passing close to a piece of wood painted white, which looked like a piece of a man-of-war, that he remembered about it; but it was too late to make the necessary investigation."

The *Portsmouth Times* says there is, at length, an immediate prospect of the new official residence for the General-Commanding the Southern District being commenced, the plans having been finally approved. The cost is roughly estimated at from £10,000 to £11,000. Satisfactory progress is being made with the infantry barracks which are in course of erection on the land facing King's Terrace, Southsea. They will afford accommodation for 840 men and 24 non-commissioned officers. The barracks will cost £35,000, but before the officers' quarters, which will form a separate block facing the sea, are erected, that expenditure will have been doubled.

FRANKLIN RELICS.

The *New York Herald* of Sept. 22 has the following in reference to the discovery of Franklin relics:—"The members of the Franklin search party, under the command of Frederick Schwatka, U S. Army, were picked up by the barque George and Mary, of New Bedford, at Depôt Island, on Aug. 1, they having returned to that point from their sledge journey to King William Land on March 4. The sledge journey was the longest ever made through the unexplored Arctic regions as to time and distance, the party having been absent from their base of operation in Hudson Bay 11 months and four days. During that time they travelled 2,819 geographical or 3,251 statute miles. It was the only sledge journey ever made that covered an entire Arctic winter—a severe winter. The winter was pronounced by the Esquimaux as one of unusual rigour. This fact was attested by the freezing of Rawes Welcome throughout its entire extent from shore to shore, even below the latitude of Whale Point. The natives at Depôt Island and Wager River experienced much suffering in consequence of the severity of the season, which precluded successful hunting, and several deaths occurred at both places. The mortality was attributed to the intense cold and famine. The expedition, however, successfully withstood the greatest amount of cold ever encountered by white men in the field. On Jan. 3, 1880, the thermometer sank to 71 deg. Fahrenheit, or 103deg. below freezing-point; and during the entire day it did not rise above 69 deg. During 16 days the average temperature was 100 deg. below the freezing-point; and during 27 days it was below 60 deg. All this time the party travelled. In fact, they never halted a single day on account of the cold.

"Hunting for Relics.—During the summer and fall of 1879 they made a complete search of King William Land and the adjacent mainland, travelling over the route pursued by the crews of the Erebus and Terror upon their retreat towards Back River; and while so engaged, the party buried the bones of all those unfortunates remaining above ground, and erected monuments to the memory of the fallen heroes. Their research established the mournful fact that the records of the Franklin Expedition are lost beyond recovery.

"Important Information. — The Natchilli Esquimaux, who had found a sealed tin box about 2 ft. long and 1 ft. square, filled with books, at a point on the mainland near Back River, where the last of the survivors of Franklin's party are supposed to have finally perished, were interviewed by Lieut. Schwatka. These natives broke open the box and threw out the precious records, which were then either scattered to the winds of 30 Arctic winters, or destroyed by the children, who took them to their tents for playthings. This point was not only searched by Lieut. Schwatka's party, but by nearly the entire Natchilly nation, inspired by a promise of a great reward for the discovery of any remnants of books or papers, no matter what was their present condition. This search failed to discover any of the records, but resulted in the finding of a skeleton of a sailor about five miles inland. Its existence was previously unknown, even to local tribes. Every native who could impart any information concerning the lost crews was hunted up and interviewed. Some of them had not seen white men since Capt. Crozier's party was there. The interviews were made through the medium of a competent interpreter, and in this way much valuable information as to the loss of the Franklin records was compiled. It also made known the fact that one of Franklin's ships drifted down the Victoria Strait, and was unwittingly scuttled by the Ookjoolik Esquimaux, who found it near an island off Grant Point, during the spring of 1849. At that time one man was lying dead in the steerage, and during the same year the natives saw tracks of four white men in the spring snows on the mainland, living like the natives. The expedition started from the base of operations in Hudson's Bay with but one month's rations of 'civilised' food upon their sledges, thus voluntarily submitting to a dependence upon the game of the country through which they passed. The white men of the party began living upon the same fare and conforming to a mode of life strictly in accordance with that of their Esquimaux assistants. The result has shown that it is feasible for white men to adapt themselves to the climate and life of the Esquimaux in prosecuting journeys in Polar regions, and that they are not necessarily restricted to any particular season of the year for that purpose, but can travel at any time and in the same way in which the natives travel. A large quantity of relics has been gathered by the party, not to gratify morbid curiosity, but to illustrate the last chapter of the history of Sir John Franklin's expedition. From each spot where the graves were found a few tokens were selected that may serve to identify those who perished there. A piece of each of the boats found and destroyed by the natives has been brought away, together with interesting though mournful relics in the shape of the prow of one of their boats, the sledge upon which it was transported, and part of the drag-rope upon which these poor fellows tugged until they fell down and died in their tracks. In addition to these the party secured a board which may serve to identify the ship which completed the North-West Passage.

"One of the Terror's Officers.—They have also brought the remains of an officer, Lieut. John Irving, third officer of the Terror, which were identified by a prize found in his opened grave. The party endured many hardships and were once threatened with starvation, not, as might supposed, in the course of the sledge journey, but after their return to Hudson's Bay. When the party reached Depôt Island, there was but one saddle of meat upon the sledges. Although the return journey was made through a country where game could be procured, this was due to the fact that before the expedition set out an ample supply of provisions was left in the care of Capt. Barry, of the schooner Eothen. He had retained the food on board his vessel, stating that he could take better care of it, and promised to leave it at Depôt Island before returning home.

"Short Allowance.—Instead of finding the provisions the party found the natives short of food, as they had twice before during the same winter, when they were compelled to eat their dogs. Successive storms prevented the hunting of walrus, which is their main dependence at this season. Lieut. Schwatka's party were consequently for several days without food, and were reduced to the necessity of eating seal-skins, walrus-hides, and other refuse. The conclusion forced upon the expedition was that Capt. Barry, from whatever unexplained cause, had left for home, carrying with him the much-needed supplies. No material sickness occurred during the absence of the expedition in the field, and no severe frost-bites were experienced by any of the party.'"

The *New York Herald*, of Sept. 25, contains, from a correspondent, details of the discovery of some relics, and the "interesting testimony of the Inuit woman Ahlangyah, regarding the lost explorers of the Franklin Expedition. Here was a woman who had actually seen the poor starving explorers, and her story was replete with interest. At times it was saddened with the recital of the piteous condition of the white men, and tears filled her eyes as she recalled the sad scene at the place where so many had perished, and their bodies become food for wild beasts. It would seem from what she related to-day that the party who perished in the inlet that we visited yesterday was part of the same that Ahlangyah met on William Land. She and her friends would not get across Simpson Strait while the white men kept on over the rotten ice, probably at last compelled to take to their boat, and then, at the mercy of the wind and ice, after losing others of their number near Pfeffer River and Todd Islands, had drifted into the inlet where the dead bodies were found with the boat. How long it took them to reach this place will probably never be known, but there was little doubt that they were in a desperate condition. In fact, as we subsequently learned from other witnesses, there was almost unmistakable evidences of their being compelled to resort to cannibalism, until at last they absolutely starved to death at this point—at least, all but one, whose remains were found during the summer after our visit here, about five miles further inland.

"We secured one valuable relic here in the sledge seen by Sir Leopold M'Clintock in Erebus Bay, which, at that time, had upon it a boat with several skeletons inside. Since the sledge came into the hands of the Inuits it had been cut down several times. It was originally seven feet longer than at present, the runners about two inches higher and twice as far apart. But even in its present state, it is an exceedingly interesting momento. We have carefully preserved it in the condition in which it has been in constant use by the Esquimaux for many years.

"On the evening of June 4 we met a young man named Adelekok, who during the summer previously had found a new cairn erected by white men near Pfeffer River, which had never been seen by any other Inuits. Consequently, the next day Lieut. Schwatka and I took a little sledge, with Toolooah to drive and Adelekok as guide, and visited the spot.

"Arrived at the cairn, we found it, as he said, 'White men's Cairn,' unmistakably, but before proceeding to take it down, we examined it carefully, and found scratched on a clay stone with the point of a sharp instrument, 'H., May 12, 1869,' and on the opposite side, 'Eternal honour to the discoverers of the North. We . . . . .', and knew it to be the cairn erected by our countryman, Capt. Hall, over the bones of two of Franklin's men, which he speaks of having found here. A portion of the inscription was lost by the breaking off of a piece of the stone on which it was written. We did not take down the monument, but after making a hasty sketch returned to camp, having travelled over fifty miles in ten hours.

"At this camp we found another interesting relic, in a pine board that seems to have been part of the head of a bunk or other permanent fixture, and has the initials 'L. F.,' in brass tacks, upon it. This was picked up on the west coast of Adelaide Peninsula, near where the ship went down that drifted through Victoria Strait, and may serve to identify that vessel, thus proving a most interesting and valuable historic relic.

"Ogzenckjenwock, in answer to a question which we asked his mother, said he saw books at the boat place in a tin case about two feet long and a foot square, which was fastened, and they broke it open. The case was full. Written and printed books were shown him, and he said they were like the printed ones. The boat was right side up, and the tin case outside the boat. He saw a number of skulls; he forgot how many, but said there were more than four. He also saw bones from legs and arms that appeared to have been sawed off. Inside the boat was a box filled with bones. The box was about the same size as the one with books in it. He said the appearance of the bones led to the opinion that the white men had been eating each other. What little flesh was still on the bones was very fresh. One body had all the flesh on; the hair was light; it looked like a long body. He saw a number of wire snow-goggles, and alongside the body with flesh on it was a pair of gold spectacles. He picked out the kind of metal from several that were shown him. He saw more than one or two such spectacles, but forgot how many. When asked how long the bodies appeared to have been dead when he saw them, he said they had probably died during the winter previous to the summer he saw them. In the boat he saw canvas and four sticks. He saw a number of watches open faced, a few new. They were given to the children to play with, and had been broken up and lost. One body, the one with flesh on, had a gold chain on, fastened to gold earrings, and a gold hunting-case watch, with engine-turned engraving attached to the chain, and hanging down about the waist. He said when he pulled the chain it pulled the head up by the ears. This body also had a gold ring on the ring-finger of the right hand. It was taken off, and had since been lost by the children in the same way that the other things were lost. His reason for thinking that men had been eating each other was because the bones were cut with a knife or saw. They found one big saw and some pipes. There was no cairn there. The bones were now covered up with sand and seaweed, as they were lying just at high-water mark. Some of the books were taken home for the children to play with, and finally torn and lost, and others lay around among the rocks until carried away by the wind and lost, or buried beneath the sand.

"The next day we laid over at Cape Jane Franklin, to make a preliminary search of the vicinity. Lieut. Schwatka and I went up Collision Inlet, but saw no traces of white men. Henry and Frank, who had been sent up the coast, were more fortunate. About a mile and a half above camp, they came upon the camp made by Capt. Crozier, with his entire command, from the two ships, after abandoning the vessels. There were several cooking-stoves, with their accompanying copper kettles, besides clothing, blankets, canvas, iron and brass implements, and an open grave, where was found a quantity of blue cloth, part of which seemed to have been a heavy overcoat, and a part probably wrapped around the body. There was also a large quantity of canvas in and around the grave, with coarse stitching through it and the cloth, as if the body had been encased for burial at sea. Several gilt buttons were found among the rotting cloth and mould in the bottom of the grave, and a lens, apparently the object-glass of a telescope. Upon one of the stones at the foot of the grave was found a medal, which was thickly covered with grime, and was so much the colour of the clay stone on which it rested as nearly to escape detection. It proved to be a silver medal, 2½ in. in diameter, with a bas-relief portrait of George IV., surrounded with the words 'Georgius IIII., D. G., Britanniarum Rex, 1820,' on the obverse, and on the reverse a laurel wreath, surrounded by 'Second Mathematical Prize, Royal Naval College,' and enclosing 'Awarded to John Irving, Midsummer, 1830.' This at once identified the grave as that of Lieut. John Irving, third officer of the Terror. Under the head was found a figured silk pocket handkerchief, neatly folded, the colours and pattern being in remarkable state of preservation. The skull and a few other bones only were found in and near the grave. They were carefully gathered together, with a few pieces of the cloth and the other articles, to be brought away for interment where they may hereafter rest undisturbed. A reburial on King William Land would have been only until the grave was again found by the natives, when it would certainly have been again torn open and despoiled.

"The day after this discovery was made by the men we moved camp to the vicinity of the grave, and spent two days in searching for other matters of interest, but there was still some snow on the ground and little ponds in the vicinity of the articles were partly frozen, so that an exhaustive search was impossible. Upon our return from Cape Felix, on July 11, we found the snow entirely gone, and the ponds near the shore nearly all dry. We, therefore, had little difficulty in completing the search at that time. Among the various articles found was a brush, with the name 'H. Wilks' cut in the side, a two-gallon jug, stamped, 'R. Wheatley, wine and spirit merchant, Greenhithe,' several tin cans, a pickle-bottle, and a canvas strap, a sledge-harness marked with a stencil-plate 'T. 11,' showing it to have belonged to the Terror. We also found a stocking rudely made of a piece of blanket, showing that they were in need of good stockings, which are so essential to the comfort of the Arctic traveller. It was heartrending to see the mute testimony to their destitution. At our second visit, Toolooah's wife found in a pile of stones, where had formerly stood the cairn seen by Lieut. Hobson, a piece of paper, which had weathered the storms of more than twenty Arctic winters. It was with much difficulty that I opened it without tearing it, while all stood around in anxious expectancy, confident that it was an additional record from Capt. Crozier, as it was in a tattered, weather-beaten condition. It, however, proved to be a copy of the Crozier's record found by Lieut. Hobson of M'Clintock's expedition, and was in the handwriting of Sir Leopold M'Clintock.

"Some of the articles found were strewn along the beach a long distance on either side of the pile of clothing and heavy implements, and were covered up with snow when we first visited the spot. There was a large quantity of cask hoops near by, but no wood. Even the handles of the shovels and pickaxes had been sawn off, probably by the natives who first found the place. This was evidently the spot where the crews landed when they abandoned the ships, and, as Lieut. Hobson says, it appears as if they had selected only what was necessary on their sledge journey, and it would further appear that when the party reached the southern coast of King William Land, after a tedious and wasting journey, and found themselves fast fading away without being able to reach the mainland, a small party was sent back to the ships for provisions. The testimony of the Ookjoolik who saw the ship that sunk off Grant Point showed that there were some stores on board, though only a small quantity, and it is probable that Lieut. Irving was the officer in charge of this return party, and that he died after reaching the camp. It is also probable that these people, who, according to the Ookjoolik testimony, drifted with the ship to the island off Grant Point, were also of this party, and with their sailor's instinct preferred to stick to the ship rather than return to the already famishing party which they left with scarcely any better prospects on the south coast. The appearance of the boat-place on Erebus Bay seems to indicate that it floated ashore after the ice broke up, and had previously been abandoned by those who were able to walk. That skeletons were found in the boat by those who saw it before it was destroyed, and near our party, would seem to indicate that the whole party were in a desperate condition at the time, otherwise the helpless ones would not have been abandoned.

"Such a state of affairs would scarcely have occurred on the southern trip, and is a strong indication of a return party. Lieut. Irving's death had not occurred when they first left the vicinity of Cape Jane Franklin, or it would have been mentioned in Capt. Crozier's record, which was written the day before they started for Bucks River. That the boat on Erebus Bay drifted in, is evident from its being found just at high-water mark, where the *débris* is still visible. At the time the party returned under Lieut. Irving, the sledge could not have dragged along that line, as the snow would not have been off the ground just then, and probably was gone when the large party got on their way south, as the testimony of the natives who met them in Washington Bay showed that they moved exceedingly slow. That there were men of the ship that drifted down Victoria Strait is additional reason for believing that they returned, for Capt. Crozier, in his record, accounts for all the survivors being with him. It is possible that those who went out to the ship were caught there by the ice breaking up, and could not rejoin their companions on the shore, if, indeed, there were any there, which is doubtful, for we saw no skeletons at the camping-place, except Lieut. Irving's. The ice broke up in Erebus Bay and Victoria Strait the year we were there on July 24, and it is probable that it was as late as that when the return party reached the camp near Lieut Irving's grave."

NAVAL MEDICAL WARRANT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Is it too late to growl on a very unfair clause about to appear in the Naval Medical Warrant, unless cancelled by their Lordships, viz., "that fleet-surgeons who have reached or shall reach the age of 55 must retire?" Why? The committee think this retiring age desirable for the future and present benefit of the Service. The opinion of many others, both executives and medical officers of high rank, is otherwise,—and very able men, too, to give an opinion. Physicians and surgeons all over the world are well able to perform their work until long after 60 years of age; why not Naval doctors, provided they are in good health, and able and willing to serve anywhere? They entered the Service believing they might serve until they were 60 or more. The fact that fleet surgeons at the age of 55 or older are better able to perform their duties than ever they were—also their judgment, their practical knowledge, and their experience of the Service in all climates—should surely find some weight with their Lordships in persuading the committee to alter this clause, and to make the retirement optional or pending a medical survey. The younger medical officers (and very naturally, too) are not sorry to see their seniors retire at that age, as it ensures them better appointments and perhaps earlier promotion; but at the same time, I think it very doubtful, indeed, whether this compulsory retirement, common to all fleet surgeons at 55, will be a benefit to the Service. Time will tell.—I am, &c.,

R. N.

PROMOTION OF NAVAL MEDICAL OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Many would think that a C.B. and promotion had been good rewards for Dr. Fegan's services in Ashantee, but no! he has now made a jump over the heads of 23 fleet surgeons, 15 of whom have medals, and have therefore the plea of war services as well as Dr. Fegan. I would like, Sir, to call your attention to the Inspector-General and Deputy-Inspectors-General Lists, as they now stand. These lists are, or rather, they should be, composed of 16 officers, and at present four of these officers are junior men, as follows:—Inspector-Gen. A. Irwin, probable age, 51 years; Deputy-Inspectors-Gen. T. Colan, 46; J. U. Dick, 49; and H. Fegan, 46; so that one-fourth of the best appointments are now occupied for 9, 14, 11, and 14 years, respectively. Under this *régime*, the good things are monopolised for too long a time, and while in force what chance does a surgeon see of ever reaching the senior ranks? None, absolutely none. What, than, more natural for the juniors to retire, and men decline to enter a Service where they see nothing before them but long service in junior ranks and small rewards? We have at the present moment 23 living examples heading the Fleet Surgeons' List of what our probable fate will be, and I have another example in my mind,—a staff surgeon, 40 years old, nearly 18 years in the Navy, serving in a bug-trap, and no likelihood of anything more desirable. If then, Sir, nothing better is before us, at least give us the new Warrant, and the same opportunities of retirement as our Army *confrères* now enjoy.—I am, &c.,

SURGEON.

On Wednesday afternoon, there was launched from the yard of Messrs. Samuda, at Poplar, the steel armour-clad corvette, Almirante Brown, which has been built for the Argentine Republic. The vessel has a length of 240 ft., a breadth of 50 ft., a depth of 30 ft., and her displacement tonnage is 4,200 tons. She is clad with compound armour, of two thicknesses,—namely, 9 in. and 6 in., the 9-in. being on the belt of the ship, and the 6-in. on vulnerable and exposed parts. There is also some 8-in. armour at various points. The 9-in. armour is composed of a face-plate of steel, 3 in. in thickness, and a backing-plate of wrought-iron 6 in. in thickness, the 6-in. armour having its steel 2 in. and its iron 4 in. in thickness. The Almirante Brown has a central battery carrying six guns of 8-in. calibre, and weighing 11½ tons each. There will also be two more of these guns, one placed forward and the other aft, besides six 4¾-in. guns, which will be carried on her upper deck. She will be fitted with twin screws, each 14 ft. 6 in. in diameter, and having four blades. Each screw will be worked by an independent engine placed in its own protected room, so that in the event of injury to one of the engines, the other will still be available. The engines, which are being manufactured by Messrs. Maudslay, will be of 4,500 horse-power indicated, and the speed is to be 13¾ knots per hour. The engines are of the compound type, the high-pressure cylinder being 52 in., and the low-pressure 90 in., in diameter, with a stroke of 3 ft. 3 in., and making 80 revolutions per minute. Working with one engine only, her anticipated speed is put at 12 knots. The vessel will carry coal sufficient for steaming 4,000 miles.

"They come as a boon and a blessing to men,
The Pickwick, The Owl, and The Waverley Pen."
Also, the Hindoo Pens, Nos. 1, 2, and 3, *Diagonal Points.*
Sold at 6d and 1s per Box at all Stationers.
Sample Box, containing all the kinds, by post, 1s 1d.
Patentees: MACNIVEN and CAMERON, 23 to 33 Blair Street, Edinburgh. (Established 1770.)

Reviews.

James Outram. By Major-General Sir F. Goldsmid, C.B. (Smith, Elder, and Co.)

The circumstances connected with the publication of these volumes are curious and interesting. Seventeen years ago, in accordance with the expressed desire of Sir James Outram, the late Sir John Kaye undertook to write his biography. Ill-health and pressure of business prevented the accomplishment of this intention, and the history of one whose name is a household word, not only in England and British India, but throughout the civilised world, has remained untold for nearly twenty years. At length, however, the task has been accomplished by one exceptionally well qualified to do justice to such a work; and we have before us a plain, unvarnished record of an honest life, written by one of the most unpretending and conscientious of honest men, for so Sir F. Goldmid may be characterised. A considerable part of the first portion of the work is occupied by a sketch of the early life of Sir James Outram, and no doubt many readers will consider that too much space and time have been devoted to this purpose. However, we, at all events, find one very interesting episode, if such it may be called,—that is, Outram's choice of a profession. He was doomed to take holy orders, and were it not for the strength of will which he possessed, and which he so abundantly manifested, in after-life, the boy, ardent to be a soldier, might have eked out an uneventful existence as a parson. His mother struggled hard to gratify her son's wishes, but the obstacles were great, and at the same time, her brother-in-law, Archdeacon Outram, had offered to promote his interests. It was a critical moment when young Outram, aware of what was going on, determined to announce his intentions to his sister, from whom he was assured of sympathy. He did so, in few but emphatic words :—" They mean to make me a parson. You see that window. Rather than be a parson, I'm out of it, and I'll 'list for a common soldier." This argument was unanswerable. A direct commission which was offered at the moment was gladly accepted by the lad, who was destined to enact before long the *rôle* of the Bayard of the East. This work will find a ready welcome from the many who have felt that justice had been hitherto denied to the great soldier-statesman who, with such dogged perseverance, fought and won many an uphill battle, more for others than for himself. Such a work has been anxiously waited for, and has appeared at a moment most opportune. Forty years have passed since James Outram recorded his estimate of the Afghan people, and the momentous events which are now passing before us afford the strongest evidence that his diagnosis was the right one, and that the rules for our guidance laid down by him in 1839 might be applied with advantage to our recent negotiations with a nation of faithless intriguers. Sir James Outram was fully impressed with the impolicy of any interference on our part with the internal affairs of the Heratis, or generally of Afghanistan. In May, 1857, he wrote strongly on this subject to Lord Lyveden, pointing out how much was to be deprecated the most distant attempt on our part to side with this or that chieftain, or to foster a policy for incorporating the whole of that country under one rule or ruler. Most emphatically he argued that the time had not come for British intervention to effect any good among the Afghans themselves, and that the consolidation of an Afghan Empire, in view of the geographical frontier of that country, might be attended with serious inconvenience, as well to our North-West Frontier as to our political relations with Russia and Persia. Such were Outram's opinions in 1857. It is not improbable, at least, that if he were still alive, he would, without question, endorse them. It must, however, be borne in mind that Outram never, even indirectly, has asserted that British interference could *never* be judiciously exercised in Afghanistan, nor that a consolidated empire was a *sine quâ non* for the better government of three substantially separate States, as Herat, Cabul, and Candahar. General Goldsmid's opinion as to what would be the views of Sir James Outram, had he been now living to give his counsel, must command respectful attention. He thus states it :—

> "Sir James Outram's views on the advisability of restricting our frontier to the Indus caused him to regret up to the closing years of his life that we had ever shackled ourselves with the Peshawur Valley; but let no politicians urge this as a reason for making a retrograde movement towards the river line, after the events which have transpired under the last three Viceroys of India. For my own part—whatever judgment he might have formed on the 'scientific frontier,' and our responsibility along the Suliman range of mountains—I do not believe that Sir James Outram would, with his knowledge of the Afghans and their Persian neighbours, and the exterior influences bearing upon both, have advised withdrawal from our position in Candahar."

In the opinion of many readers, the most interesting portion of General Goldsmid's work dates from the middle of June, 1857, when Outram was summoned to India. "Write to Sir James Outram that I wish him to return to India immediately, and the same to General Jacob. We want all our best men here." Such was the telegram which Lord Canning addressed to Lord Elphinstone, and which the latter forwarded to the Commander of the Persian expeditionary force. There was meaning in the words. The crisis was urgent. It was no time for empty compliment; plain truths were shorter, too, than conventional circumlocution. On August 13 the new Commander-in-Chief, Sir Colin Campbell, had arrived in Calcutta, and notified to Outram the exceeding satisfaction he experienced in having his assistance, and in finding him in the position he then occupied. One of the brightest episodes in Outram's career was his self-denying conduct relative to the relief of the garrison at Lucknow. The following extract from the Division Orders, issued on September 16, 1857, tells the story in a few eloquent passages :—

> "The important duty of relieving the garrison at Lucknow had been entrusted to Major-General Havelock, C.B., and Major-General Outram feels that it is due to this distinguished officer, and the strenuous and noble exertions which he has already made to effect that object, that to him should accrue the honour of the achievement. Major-General Outram is confident that the great end for which General Havelock and his brave troops have so long and so gloriously fought will now, under the blessing of Providence, be accomplished. The Major-General, therefore, in gratitude for and in admiration of the brilliant deeds of arms achieved by General Havelock and his gallant troops, will cheerfully waive his rank on the occasion, and will accompany the force to Lucknow in his civil capacity —as Chief Commissioner of Oude—tendering his military services to General Havelock as a volunteer. On the relief of Lucknow, the Major-General will resume his position at the head of the forces."

When narrating such an instance of sacrifice of self-interest as this, the biographer is well justified in pointing to it with emphatic admiration :—

> "It was an act illustrative of the man himself, and thoroughly in accordance with his particular views of duty, his ordinary abnegation of self, and his repugnance to become a passive instrument of injustice, or even apparent injustice, to a gallant brother-officer. To the majority of men, such conduct may seem exceptional; to Outram, it was part of his rule of life."

On September 28, Sir Colin Campbell confirmed this temporary transfer of command in eulogistic terms, which formed a fitting recognition of such disinterested generosity. On September 26, Sir James Outram, having resumed his command of the forces, refers with regret to the heavy cost at which the relief of our countrymen had been purchased, and points out the brilliant conduct of the survivors. In referring to this great landmark in the Indian Mutiny, General Goldsmid says :—

> "Relief or reinforcement—or whatever name be applied to it—the great feat of arms achieved on this occasion has been commemorated in Brigadier-General Havelock's official report. But the details supplied by minor actors in, and independent historians of, the Indian Mutiny, must be studied and understood, if justice is to be done to the glorious march of the 2,000 from the 'Alambagh' to the Lucknow Residency, on September 25, 1857."

It is a matter of regret to be obliged to give but a meagre sketch of the stirring events which form the groundwork of these interesting volumes. General Goldsmid has performed his part with an evident sense of its importance. It devolved on him to write the life of one of those great soldiers who served his country well, and he has done so in a manner which cannot but win the grateful approbation of all who knew and valued James Outram.

Soldiers of the Victorian Age. By C. Rathbone Low. (Chapman and Hall.)—The author of these volumes has already published an elaborate work on the Indian Navy, as well as a memoir of Sir Garnet Wolseley, so that he is not altogether unknown to the reading public. The work now under notice is highly ornamental, and contains a great deal of information with which we have already become familiar. In fact, Mr. Low's book is a careful compilation, treating of remarkable sieges and battles that have taken place throughout the world, from Corunna and Sir John Moore down to Zululand, Sir Garnet Wolseley, Evelyn Wood, and Lord Chelmsford. Amongst others will be found a memoir of Sir James Outram, which may serve to add zest to the perusal of the exhaustive volumes so recently published by General Goldsmid, and so worthy of commendation. There is no doubt that the author has evinced care in the preparation of these volumes, but it would be too absurd to call the work anything but a compilation, pure and simple.

SOME MAGAZINES.

In the June number of *Colburn*, the questions of the Purchase and superseded captains were critically considered. The same writer returns to the subject in the current number, and takes the opportunity of congratulating Mr. Childers on the "straightforwardness and John-Bull-like honesty" which characterises his reply to Col. North's question in reference to the Purchase captains of the Army. That reply he considers as suggestive of a "new departure," and as justifying the hope that at last the whole case of the pre-abolition officers will be fairly reviewed, and that a modicum of justice may even yet be vouchsafed to them. While giving Mr. Hardy credit for not wishing to act unjustly when ignoring these claims, the writer in the current number of *Colburn* states his opinion that the case was simply one of ignorance on Mr. Hardy's part. He furthermore takes great comfort from Mr. Childers's allusion to the possible issue of other Regulations before the termination of the period during which a portion of Mr. Hardy's Warrant will remain inoperative, and suggests that it foreshadows a great deal more even beyond the granting of the brevet, so long and anxiously looked for by the Purchase captains. Com. Barber, U.S.N., concludes his interesting observations on the progress of torpedo warfare. Those who entertain the warmest admiration of Sir Bartle Frere's administration in South Africa, and of Lord Chelmsford's conduct of the Zulu war, will feel pleasure in reading the article on those subjects in *Colburn* for this month.

The first session of "The Stump Ministry," is the principal article in the October number of *Blackwood.* It concludes with some pungent observations on the duty of the Conservative party at the present critical moment. "Society and the Salons before the French Revolution" is written with much spirit, and affords very useful information, as well as pleasant reading.

There is nothing remarkable in the current number of *Macmillan.* A new story by Henry James, junior, is commenced, Mrs. Oliphant's clever tale continued, and two other articles concluded.

There is a good deal of variety in *London Society.* "The Mystery in Palace Gardens," is becoming rather serious, and not a little perplexing. A new short story by E. C. Hertford is commenced, and promises well. "Love in a Lift" is a novel idea, and may serve to create one in the minds of some of its readers. The illustration has, apparently, an imposing effect, especially upon the principal actors. "Love and War" is concluded. It is scarcely equal to "He would be a Soldier." "The Advantages of Living in a Poor Neighbourhood" are satisfactorily explained.

St. James's Magazine for October is an average number. Ditto as to *Belgravia.*

Temple Bar has some dozen articles of no particular merit. "Adam and Eve" is still continued, also Mrs. Lynn Linton's lively story depicting the trials of the "Rebel of the Family," the bold utterances of Bell Blount, a woman's champion, and the tactics of the Winstanley family.

The Gentleman's Magazine for October is made chiefly attractive by the continuation of Mr. Francillon's "Queen Cophetua."

The Theatre is in every respect up to the average.

Cassell's publications afford, as usual, instructive and highly entertaining reading.

THE INDIAN STAFF CORPS GRIEVANCES.

"T." writes :—"I read with much interest the leading article in your paper of Sept. 25, on the grievances complained of by the members of the Indian Staff Corps. Will you permit me to supplement it by a short tabulated statement, showing the comparative rates of pension in the different Services (extracted from the *Times of India*), which I have received from my son, a Staff Corps officer in India, by the last mail ?—

	Captain.		Major.		Lieut.-Col.	
	Years.	£	Years.	£	Years.	£
British Line Corps ...	20	200	27	300	27	300
New Line Regiments Officered from Indian Army............	20	350	20	475	20	575
Indian Staff Corps ...	20	191	24	292	28	365

In the case of the Indian Staff Corps, it must be remembered (as justly remarked in your article) that the years of service reckoned are independent of all service prior to an officer's going out to India, and all extraordinary leave he may subsequently have had; and attention was also called by you to the fact that an officer of any rank in the British Service retiring after twelve, fifteen, or eighteen years' service, receives a gratuity of £1,200, £1,600, or £2,000 respectively, whilst an Indian Staff Corps officer receives nothing. The *Indian Daily News* also gives the following : —'There are no less than 1,050 colonels and majors in the Indian Army, to only 679 captains and lieutenants, whilst the absolute requirements of the Service do not need more than, say, 100 field-officers for Bengal, 60 for Madras, and 40 for Bombay, or in all, 200 lieutenant-colonels or majors for regimental commands.' And again :—'There are 358 field-officers of the Madras Army to only 41 captains and 62 lieutenants.' Could there be a greater anomaly ?"

MESS EXPENSES.

"Over-Taxed," writing from a distant station, says :— "Every sensible officer should thank you for the remarks contained in the *Army and Navy Gazette* relative to mess expenses. In estimating these, should be borne in mind the subscriptions on appointment, and on promotion, also yearly, which officers are compelled to pay by the Queen's Regulations. In addition, officers above the rank of subaltern pay a yearly subscription to the band; in fact, a captain, for mess and band, pays a yearly subscription exceeding that of any London club. He is taxed nearly one month's pay out of twelve. It would appear ironical, the expense incurred by officers on the inspection of a regiment by the General commanding the district in which it is quartered. The General dines officially at the mess, when it may be supposed an example of sensible economy would be shown; however, it is just the reverse. An elaborate dinner is prepared, at which the most expensive wines circulate freely. To meet the General at dinner, his personal staff are the guests of the regiment; also commanding officers of regiments forming part of the brigade, and many departmental officers. In mess slang, it is called a 'big night.' Including the extra cost of dinner, the wine every officer is compelled to drink—unless he is willing to appear singular—the cigars he must smoke, &c., the cost of an inspection dinner to every member of the mess amounts to about £1 10s. Not to make further mention of expenses in connection with the establishment of messes, every officer of any length of service must be aware that, notwithstanding the outcry for economy, a mess costs far more now than it did a few years ago."

H.R.H. the Duke of Connaught has consented to lay the foundation-stone of a new coffee tavern at Woolwich, at an early date not yet fixed.

The October number of the journal of the Russian Ministry of Marine, *Morskoi Sbornik*, publishes a translation of Capt. Colomb's lecture on the best means of averting collisions at sea. It also contains an account of the trials last summer on board the ironclad Neptune.

Obituary.

Col. E. H. C. Simpson, fourth son of the late Major-Gen. E. H. Simpson, H.E.I.C., died at his residence, Ruby Hall, near Monkstown, co. Dublin, on Sept. 26, 1880, aged 47 years. The deceased officer entered the Bengal Army from the Addiscombe College in the year 1851; served through the Indian Mutiny, was present as a volunteer in the Artillery of Sir Henry Havelock's force in all the engagements leading up to the relief of Lucknow, and served with that garrison until finally relieved by Lord Clyde (medal and two clasps). He retired from the Service in 1878, having been employed in the irregular cavalry for 14 years, his last regiment being the 4th Bengal Cavalry, in which he earned the respect and esteem of his brother officers and all who ever knew him.

Col. Sir William L. Merewether, K.C.S.I., C.B., Bombay S.C., died suddenly on Monday night, and so unexpected was the sad event that Sir William had made preparations for proceeding to Southampton to meet his old friend, Sir Bartle Frere, on his return from South Africa. The deceased, who was a member of the Council of India, became a 2nd lieut. in the Bombay Army in March, 1841. He served in Scinde with the 21st Regiment of Native Infantry in 1842 and 1843, and was present at the battle of Hyderabad. Two years later he fought in the campaign in the Southern Mahratta country, and in 1847 he was with the Scinde Irregular Horse on the frontier of Upper Scinde. Here, in command of a party of 132 men, Lieut. Merewether defeated a large body of Boogtees. In 1848 and 1849 he was with a detachment of the Scinde Irregular Horse with the army of the Punjab at the siege and surrender of Mooltan, the battle of Goojerat, and the pursuit and surrender of the Sikhs. He served on the frontier of Scinde from 1847 to 1862, and, having got his company in 1856, successfully held the frontier in the stormy year which followed, and crushed an extensive rebellion projected by the Beloochee and Brahoe tribes. In addition to the military distinctions which he had gained, Capt. Merewether had shown great prudence and skill in political negotiations. He was made a C.B. in 1860, and in 1865 was appointed Political Agent and Resident at Aden. In this capacity he was present at the operations against the Fondeli tribe of Arabs, and, having conducted the negotiations with King Theodore from 1866 to 1868, he accompanied Lord Napier's expedition to Magdala. He was appointed Chief Commissioner of Scinde in 1868, and afterwards became a member of the Indian Council.

Brevet Lieut.-Col. W. A. Godley, half-pay, late 56th Regt., Staff Officer of Pensioners for the Woolwich District, died at Herne Bay on the 24th ult. Col. Godley entered the Army Oct. 1850. He landed with the 56th Regt. in the Crimea on Aug. 25, 1855, served at the siege of Sebastopol, and was present at the final assault (medal with clasp and Turkish medal). In May, 1868, he joined the pension staff as staff officer at Aberdeen, and on the abolition of that district in 1873 he was transferred to Woolwich as successor to Col. Tench. We understand that the Woolwich District will not be reduced, the vacancy being filled by a transfer.

Com. George Sherbrooke Airey, R.N., died at Cadenabbia, Lake of Como, on the 27th ult., in his 70th year. He entered the Navy in April, 1822, and in 1824 joined the Blanche, Capt. W. B. Means, fitting for South America, where he removed into the Diamond, Capt. Lord Napier. He was made lieut. in Feb., 1830, and in Aug., 1831, was appointed to the Isis, flagship at the Cape of Good Hope of Rear-Admiral F. Warren. In Dec., 1834, he was transferred to the Sylla, Capt. E. T. Carpenter, on the North-American and West Indies station; and in Feb., 1836, was appointed to the Howe, flagship at the Nore of the Hon. C. E. Fleeming. He became retired commander July 1, 1864.

Mr. Joseph Kellaway, V.C., chief boatswain, whose death took place on the 2nd inst., at Chatham, entered the Navy in 1841 on board the St. Vincent in Portsmouth Harbour. As third-class boatswain he served in the Reynard, which was wrecked on May 31, 1851, in the China Sea. Speaking of his services rendered during the trials and hardships which attended the wreck, Com. Cracroft says, "His conduct was in every way deserving of my approbation, and I consider him a most invaluable officer, and one who will do credit to the Service." From Feb. 1852 to April, 1854, his name appears in the books of the St. George, Boscawen, Poictiers, and various guard-ships at Portsmouth, Chatham, &c. During the Crimean war, and whilst boatswain of the Wrangler, in the Sea of Azof, he was taken prisoner, after a stout resistance, whilst endeavouring to rescue Mr. Odevaine, mate. This gallant service was performed on shore near Marioupol. A detachment, consisting of Mr. Odevaine, Mr. Kellaway, and three seamen, had been despatched from the Wrangler to endeavour to burn some boats, fishing stations, &c., on the opposite side of a small lake. They had nearly reached the spot, when they were fired upon by a party of 50 Russian soldiers, who suddenly rushed from their ambush and endeavoured to cut off their retreat. One man fell into the enemy's hands, but Mr. Kellaway and the two other seamen had contrived to make good their escape, when Mr. Odevaine accidentally fell. Mr. Kellaway, apparently imagining him to be wounded, without a moment's hesitation returned to his rescue, risking his own life to succour his commanding officer. Unfortunately, while lifting up Mr. Odevaine, they were surrounded by the enemy, and, notwithstanding a gallant but hopeless resistance by Mr. Kellaway, they were both made prisoners. The treatment they received when once overpowered is thus described by Mr. Kellaway:—"Five men sprang upon me, four laying hold of my hands and feet, while the fifth held on to my beard. By dint of struggling I succeeded at last in throwing off four of my captors, but the remaining one managed to retain his hold upon my beard until the rest, recovering themselves, came to his assistance, when, taking me by the heels, they pulled me along in that position for a long distance. Eventually Mr. Odevaine (a seaman) and myself were tied to trees, a good space apart, expecting every moment to be shot. Our anticipations on that score were fortunately not realised, and we were shortly afterwards taken up into the interior as far as Taganrog." For this act of bravery he was recommended for the Victoria Cross, of which honourable Order he was the seventh recipient, her Majesty in person pinning the decoration on his breast. He left the Wrangler as 2nd-class boatswain in June 1856, afterwards doing duty on board the Firebrand, Formidable, Edinburgh, and Royal George. In 1861 he received the rank of 1st-class boatswain, on board the Clio, and upon being discharged from that vessel, when lying at Panama, for a passage to England, Capt. Miller endorsed his certificate thus:—"Mr. Kellaway has gained, and justly so, the respect and esteem of every officer in the ship, and I beg to recommend him most strongly to their Lordships." From Nov. 1861 to July 1862 he was on the Asia, going over from that vessel to the Edgar at Portsmouth, on which ship he served until Dec. 14, 1865. On May 28, 1868, he was promoted to chief boatswain, and appointed foreman of riggers at Chatham Yard, and two years later he received the post of boatswain of the same establishment. At the end of 1877, and after nearly forty years of active service, the first signs of the painful complaint which closed his zealous and honourable career were manifested, and on Dec. 26 in that year he was granted a retiring pension of £143 per annum, and, whilst retaining the warmest friendship of his brother officers, he speedily found himself surrounded by a circle of friends, who, recognising at once the genuineness and affability of his nature, regarded him as a man whom to know was to respect. The deceased officer's funeral took place at Chatham, when the following brother-officers of the deceased acted as pall-bearers, namely, Messrs. Cruys, Church, Lamb, Woodley, Higham, King, Penicott, Taylor, Maroney, Millett, Stewart, and Potter. It may be added that among the nine decorations earned by the late officer was that of Knight of the Legion of Honour.

A telegram, dated Limassol, Oct. 5, states that "Major-Gen. Sir Robert Biddulph was to-day presented by the mayor of this town with an address expressive of the loyalty and happiness of the population under British rule. The High Commissioner, in reply, dwelt on the visible signs of prosperity in the town and district of Limassol. The population had increased one-third since the English occupation of the island, the harvest of corn and olives was plentiful, the vintage was good, and carobs, though less plentiful than last year, were fetching double the price. Alluding, in conclusion, to certain reports which have been current here of late, Sir Robert assured the mayor that the British Government had no intention of relinquishing Cyprus."

THROAT IRRITATION.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms, use Epps's Glycerine Jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in boxes, 7½d. and 1s. 1½d., labelled "JAMES EPPS AND CO., Homœpathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment), in almost all forms of throat disease. They soften and clear the voice. In no case can they do any harm.—Yours faithfully, GORDON HOLMES, L.R.C.P.E., Senior Physician to the Municipal Throat and Ear Infirmary."

HOT WEATHER.—How to Invigorate the Nervous System by Natural Means. Mental Prostration.—"Having suffered much from headache and mental prostration, I was induced to try ENO'S FRUIT SALT, the effects of which have been most satisfactory, resulting in invigorating my entire nervous system, and removing the frequent headache to which I was subject. You are at liberty to make any use you think proper of this testimonial, as I consider Eno's Fruit Salt an indispensable adjunct to the Household."—TRUTH, Sigdon Road, Dalston, E. Caution.—Examine each bottle, and see the Capsule is marked, "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d.

Amusements.

A second series of Promenade Concerts has been prosperously commenced at COVENT GARDEN, under the management of Mr. Samuel Hayes. Popular music seems to be the chief dependence of the director, who now arranges the programme, and the renewed delight derived from Jullien's "*British Army Quadrille*" would justify a belief in the sustained popularity of compositions of this class. Herr Josef Gung'l, the Viennese composer, conducts his own tuneful dance music.

The ROYALTY THEATRE has been reopened by Miss Kate Lawler, with an entirely new programme, of which the principal feature is a three-act comic drama, called "*Bow Bells*," written by Mr. Henry J. Byron. The novelty illustrates the troubles of a retired tradesman, who gives up his business in Cheapside with the expectation of enjoying rural felicity in a country village, remote from the metropolis. The piece, admirably acted by Miss Kate Lawler, Mr. Edward Righton, and the other members of the company, has been favourably received.

At the SURREY, Mr. William Creswick has met with a hearty welcome, on his reappearance as Virginius, after a prosperous tour of three years in Australia. The interval has in no degree diminished his histrionic powers, and his embodiment of the noble-hearted Roman demanded on its own merits the warm applause so liberally bestowed. Miss Lydia Cowell was a sympathetic Virginia, and Mrs. Billington a most efficient Servia. The revival has been very carefully placed on the stage.

The IMPERIAL THEATRE, adjoining the Westminster Aquarium, is now open for both afternoon and evening performances, a new burlesque being provided by Mr. R. Reece, under the title of "*Half-Crown Diamonds*," sustained in the liveliest fashion by Miss E. Farren, Miss Kate Vaughan, Miss Connie Gilchrist, and Mr. Royce.

The ST. JAMES'S and the COURT THEATRES commence their winter seasons this evening. The OLYMPIC will open under new management in the course of next week. Mr. Boucicault appears at the ADELPHI in his new Irish drama, called "*O'Dowd*," on Thursday, October 21. The reconstructed PRINCESS'S will be opened at the end of the month.

Mr. and Mrs. German Reed have recommenced their attractive entertainments at ST. GEORGE'S HALL, Langham Place. Several novelties are in preparation, but at present the programme consists of familiar pieces, including "*The Pirates' Home*," Mr. Corney Grain's clever musical sketch of "The London Season," and Mr. Arthur Law's lively operetta of "*A Flying Visit*."

The COVENT GARDEN pantomime is already in an active state of preparation. Mr. F. C. Burnand furnishes the opening, under the title of "*Valentine and Orson, or Harlequin and the Magic Shield*;" Mr. Julian Hicks paints the scenery, that accomplished artist M. Wilhelm designs the dresses, Mr. John Cormack arranges the ballets and general action, and Mr. William Beverly has been specially engaged to supply the fanciful ballet scene. The Vokes Family and Mr. J. G. Taylor will sustain the prominent characters, and the harlequinade will have two clowns, represented by Mr. Harry Payne and Mr. Charles Lauri. The whole will be produced under the immediate superintendence of Mr. F. B. Chatterton, whose long experience in connection with similar entertainments at Drury Lane ought to prove of great value to the Covent-Garden management.

Mr. W. T. Carleton being under engagement to return to America, the part of Captain Robert, in "*La Fille du Tambour-Major*," has been undertaken by Mr. Harry St. Maur, who will make his first appearance at the ALHAMBRA on Monday next.

The vase and cup to be presented to Professor Nordenskjold and Capt. Palander by the residents of Hong Kong, to commemorate the fact that that was the first British port touched on the homeward voyage of the Vega, have been sent on to the British Minister at Stockholm, who has been asked to present them on behalf of the donors. The silver vase to be presented to Professor Nordenskjold has wrought upon it no less than 146 individual figures. On the cup of Capt. Palander the most striking feature is a Chinese junk, beautifully wrought in gold and silver.

ROWLAND'S ODONTO is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that ROWLAND'S ODONTO will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

USE MARGERISON'S REGISTERED WHITE WINDSOR SOAP, PRESTON.—The best and cheapest Soap in England for washing clothes, or any household purpose. Ask for MARGERISON'S Soap, and see that the word MARGERISON is on every bar, as there are so many worthless imitations. Sold at Stores.

BIRTH.

FORSYTH.—On October 6, at Ryde, Isle of Wight the wife of Commander Douglas M. Forsyth, R.N., of a son.

DEATH.

BOURNE.—On the 5th inst., at Tor Castle, Fort William, Francis Hole Bourne, Captain in H.M.'s 43rd Light Infantry, aged 30.

Advertisements.

THE COMMITTEE of the "BARNES HOME" INDUSTRIAL SCHOOLS, Heaton Mersey, Manchester, require an efficient and steady man, to TEACH and CONDUCT a BOYS' BRASS BAND, and to act as Yard Officer. To a single man, the salary would be from £40 to £50 a year, according to ability, with board and lodging and a suit of uniform annually; or to a married man, about 30s a week and a suit of uniform.—Applications, stating age, height, and whether married or single, accompanied by copies of three testimonials of recent date, to be addressed to the "GOVERNOR."

WANTED, a COOK, for Officers' Mess, 13th Light Infantry.—Apply to PRESIDENT, Mess Committee, Raglan Barracks, Devonport, stating terms, age, family, &c., with recommendations.

WANTED, a MAN COOK for the Officers' Mess, 32nd Light Infantry.—Apply to the PRESIDENT, Mess Committee, 32nd Light Infantry, Jersey.

MESSMAN.—WANTED, for the Officers' Mess, 24th Regiment, Gosport, a MESSMAN.—Apply by letter, enclosing copies of testimonials and terms, to MESS PRESIDENT, 24th Regiment, Gosport.

SCHOOL SHIP CONWAY, LIVERPOOL.—Established for training Young Gentlemen for Officers in the Mercantile Marine. Terms, 50 guineas per annum, including uniform and all other extras. The sons of members of the Mercantile Marine Service Association and of officers of the Navy are received at the reduced rate of 40 guineas. Age for admission, 12 to 16. Quarter-days, February 1, April 10, August 1, and October 10.—Apply to Captain E. B. H. FRANKLIN, R.N., Rock Ferry, Birkenhead.

WANTED, MESSMAN, with competent Man Cook, for the 36th Regiment.—Apply, enclosing testimonials, to "P.M.C.," 36th Regiment, Cork.

TORQUAY.—Comfortably furnished VILLA to be LET, containing double drawing-rooms, dining, billiard-room, and study; four bed and one dressing-room; two servant's ditto. Good garden. Rent, three guineas per week.—Address, "E. S.," Fawsley, Torquay.

BLACKHEATH, close to the Heath, a comfortably-furnished RESIDENCE, containing 12 rooms, Good garden; rent moderate.—Apply to Messrs. HARDS, VAUGHAN, and JENKINSON, 6 Moorgate Street, City, and Greenwich, Kent.

NEAR STAFF COLLEGE, CAMBERLEY.—To LET, FURNISHED, HILLSIDE, CAMBERLEY. Good house, containing four public rooms, total of nine bed-rooms and one dressing-room; good kitchen, scullery, servants' hall, bath-room; good stabling, four loose boxes, carriage and harness-rooms, four men rooms above. House surrounded by six acres of good garden and pleasure-grounds.—Apply to "M. J. S.," Hillside, Camberley.

HOME, with THOROUGH EDUCATION, including residence in France and Germany, offered to the Children of Officers in the two Services.—For references and full particulars, apply to the Misses HANCE, Brompton, Dawlish.

LIFEBOAT SERVICES.—The NATIONAL LIFEBOAT INSTITUTION has contributed, by its 269 Lifeboats and other means, to the saving, during the past 21 months, of 1,137 lives from various shipwrecks, and 33 vessels from destruction.—Contributions are thankfully received by Messrs. COUTTS and Co.; by all the other London and Country Bankers; and by the Secretary, RICHARD LEWIS, Esq., at the Institution, 14 John Street, Adelphi.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

ARMY and NAVY HOTEL (Limited).—Established upon the principle of Co-operation. Shareholders of five Shares and upwards will be entitled to a reduction of 10 per cent. off the hotel tariff. Capital, £100,000, in 20,000 Shares of £5 each, payable £1 on application, £2 on allotment, and £2 three months after. Five per cent. per annum on the call allowed on all payments in advance.

ABRIDGED PROSPECTUS.

The want of comfortable accommodation in London, with living on an equality with that of a regimental mess and at economical rates, has always been felt by officers of the Services. This it is now intended to supply both for temporary use and also in the style of a residential club, so that Shareholders may retain private rooms or suites of rooms with good attendance, and the use of general dining, drawing, club, smoking, and other rooms, while they may be either boarded at very moderate rates, or obtain their meals as required in club fashion.

The Army and Navy Hotel is established for the purpose of these requirements, and is intended for the use of the public as well as of the Shareholders, priority being in all cases given to the latter.

Baths of every description, including salt water, will be obtainable in the Hotel.

Shareholders will be allowed the use of the smoking, reading, and writing rooms, thus providing all the accommodation of a club without any annual subscription, and, whilst bachelors will find all the advantages of a mess, married officers will not miss the comforts of home.

Special facilities will be afforded to the families of officers proceeding to or returning from abroad, and, if desired, their travelling arrangements can be conducted by trustworthy agents.

Arrangements will be made for a service of small omnibuses to the principal railway stations; on receipt of telegraphic notice, these would be sent to meet any train.

A post and telegraphic office will be established in the building, and arrangements will be made by which visitors may obtain railway tickets to all parts of the world without leaving the premises.

Visitors who may wish to make the Hotel their home during their stay will be received at a fixed and very moderate tariff. It is intended to fix the tariff at as low a rate as is compatible with the declaration of a dividend, and it is confidently anticipated that board and lodging can be provided for about the same cost as is now charged by other hotels for rooms alone.

Suites of residential chambers, for bachelors as well as married families, will form a distinctive feature in the Hotel. Applications for Shares can be made in writing to the Secretary, by giving name, address, rank, or occupation, and the number of Shares required, accompanied by deposit.

C. HINTON MOORE, Secretary,
(Late Royal Canadian Rifles).

HALL LINE. — LIVERPOOL to BOMBAY, *viâ* SUEZ CANAL, calling at MALTA.

Sail punctually as advertised.

The magnificent fast steamship CITY of BALTIMORE, 2,400 tons, will sail on October 23.

Night, week, or period.

Working Proprietor, J. ELDRIDGE.

HOLLOWAY'S PILLS.—PREVISION.—As autumn treads on winter, slender, delicate, pale-faced youths become listless, languid, and debilitated, unless an alterative, combined with some tonic, be administered to quicken their enfeebled organs. This precise requirement is supplied in these noted Pills, which can and will accomplish all that is wanted, provided the printed instructions surrounding them meet with scrupulous attention. Holloway's Pills are especially adapted to supply the medical wants of youth, because his medicine acts gently, though surely, as a purifier, regulator, alterative, tonic, and mild aperient. A very few doses of these Pills will convince any discouraged invalid that his cure lies in his own hands, and that a little perseverance only is demanded for its completion.

ESTABLISHMENT for GENTLEWOMEN during TEMPORARY ILLNESS, 90 Harley Street, W. The house is now ready for the reception of Invalids requiring Medical or Surgical Treatment. This is given gratuitously by eminent practitioners, whilst the weekly charges for board and lodging, with nursing and attendance, vary from 17s 6d to £1 11s 6d. All applications for papers for admission to be addressed to LADY SUPERINTENDENT, 90 Harley Street, W.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

ZOEDONE.—OHNE PHOSPHOR,

KEIN GEDANKE.—There has long been a desire to obtain a sparkling and agreeable beverage combining sustaining and invigorating qualities without intoxicating effects. This want is now, in every respect, supplied by

ZOEDONE, a non-alcoholic nutrient Tonic Beverage, which will be found invaluable in all cases of mental or physical strain, while its refreshing properties and pleasant flavour render it a delicious drink for daily use.

ZOEDONE contains the vitalising, tissue-forming, phosphatic elements which give oysters their specific value.

ZOEDONE is recommended by the Faculty. Dr. Simpson says:—"Zoedone contains two of the most important elements of the human organism, viz., phosphorus and iron, in a state easily assimilable, supplying exactly what is required where any extraordinary waste of tissue has been induced—a condition too common in this competitive age."

Pamphlet of particulars, with list of Agents, free.

Price, including bottles and packages, free on rails at Wrexham, 6s 6d per dozen in half-champagne bottles—in six-dozen cases; 12s per dozen in large champagne bottles—in three-dozen cases.

A small extra charge in smaller cases. See Pamphlet.

ZOEDONE FOR SPORTSMEN.

THE BEST DRINK FOR THE MOORS.

CAUTION.—See that "DINNEFORD and CO." is on every Bottle and Label.

INDIAN MEDICAL SERVICE.

INDIA OFFICE, September 29, 1880.

Notice is hereby given that an EXAMINATION of CANDIDATES for THIRTY APPOINTMENTS as SURGEON in HER MAJESTY'S INDIAN MEDICAL SERVICE will be held in London in February, 1881.

Copies of the Regulations for the Examination, together with information regarding Pay and Retiring Allowances of Indian Medical Officers, may be obtained on application at the Military Department, India Office, London, S.W.

A further notice will be issued when the exact date of examination has been fixed.

T. F. WILSON, Colonel, Military Secretary.

WOOLWICH, SANDHURST, the UNIVERSITIES, &c.—Professor PRITCHARD (late Royal Military Academy, Woolwich), and the Rev. A. PRITCHARD, M.A., Oxon., can RECEIVE ONE or TWO MORE PUPILS after Oxford and Cambridge meet.

Messrs. Pritchard have already, since January, exceeded the number of their successes last year. Lists on application.

Special arrangements for the new Military Competitive (March 1881), for Subalterns of Militia, in charge of a retired Field-Officer (Colonel late R.A.), formerly Instructor in Field Sketching at Royal Military Academy and Aldershot Camp.

All Five Candidates sent up last month were successful.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

SALISBURY SCHOOL.

Head Master—Rev. W. H. EMRA, M.A., late Open Scholar of Exeter College, Oxford, Classical Honourman in Moderations and Final Schools; Assistant Classical Master of the King's School, Bruton, 1867; Rector of Gt. Blakenham, 1871.

Second Master—CHAS. MORGAN, Esq., B.A., Senior Optime, late Scholar and Mathematical Prizeman of Jesus College, Cambridge.

With an efficient staff of Assistants.

This Proprietary School was founded in 1876 expressly to enable gentlemen of moderate means to obtain for their sons—

A high-class education in accordance with modern requirements.

A liberal and well-appointed dietary and domestic ménage.

The best associations of a Public School and companions exclusively of their own class.

The work is tested yearly by Public Examiners, whose reports are published, and one of the first pupils at the School has already passed with credit into Cooper's Hill College.

The sanitary and domestic arrangements will also be inspected and reported on periodically.

The New Buildings, on a fine site of ten acres, and fitted with every modern appliance, were opened in September last.

Terms, £54 a year.

A full prospectus will be sent on application to the Head Master, Salisbury School, Salisbury; or to the Warden, Batcombe Rectory, Evercreech.

WATCHES.—JEWELLERY.—WATCHES.

The Rev. Robt. Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Ladies' Gold Lever Watch received from you for 70s in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

The Rev. James Arthur Kemp, Lew Down, North Devon, also writes, March 8, 1880:—"The watch I ordered of you at 25s, for my servant arrived quite safely, and I am exceedingly well pleased with it in every way. It is an excellent timekeeper, very neat and handsome in appearance, and in my opinion worth far more than those that cost treble the money. I do not think anybody should be without a watch, when they can obtain from you such an excellent article at so reasonable a price."

THE MIDLAND COUNTIES WATCH COMPANY supply their celebrated Watches direct to wearers, at very lowest wholesale cash prices. They guarantee watches supplied by them to be most perfect timekeepers, and honestly assert their price to be under one-half those charged by watchmakers; and as a guarantee of good-faith they undertake to return the full amount paid for any Watch if not to the satisfaction of the purchaser.

The Company's chief manufacture are their celebrated Crystal Glasses, which dispense with all risk of breakage. Their LADIES' and GENTLEMEN'S SILVER WATCHES, at 25s, and their LADIES' GOLD LEVERS, at 70s, are acknowledged to be the cheapest Watches in the world.

Catalogues, containing list of testimonials, and beautifully illustrated descriptions of more expensive watches, gold and silver jewellery, electro-plate, &c., are sent gratis on application. We may safely assert that the prices in same will be a surprise to all who see them.

GENTLEMEN'S FINE SILVER, flat crystal glass, heavy cased, superior movement, 25s.

LADIES' FINE SILVER, handsomely engraved, flat crystal glass, highly-finished movements, 25s.

YOUTHS' FINE SILVER, flat crystal glass, highly-finished movements, 25s.

LADIES' very heavy cased GOLD LEVERS, in exquisitely chased cases, with highly-finished extra-jewelled movements, 70s.

These watches are frequently sold for treble the money.

Cheques or Post-Office Orders must be made payable to the Company's Manager,

Mr. S. HISSEY, Vyse Street, Birmingham.

On receipt of which any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

From Mr. J. J. HARRIS, Schoolmaster, 2nd-18th the Royal Irish Regiment, Aldershot, Sept. 22, 1880.

"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by regimental clubs for *treble* the money. I am positive your Company will prove itself a boon to Army men at home and abroad, particularly the latter, who are often compelled to pay enormous prices for very inferior articles indeed. Your Company is deserving of every success, and I deem it a duty, to you and the Army, to become an amateur agent, *unpaid.*"

BILLIARD BALLS, Chalks, Cues, and Tips, at HENNIG BROS'. Ivory Works, 11 High Street, London, W.C. Cheapest house in the trade for Billiard-Table Requisites and Ivory Goods in general. Old Balls Adjusted or Exchanged and Tables Re-covered. Price Lists on application. Established 1862.

CARSHALTON HOUSE SCHOOL, SURREY.

Boys prepared to pass into Woolwich, Sandhurst, and the Navy. Military Drill and Discipline.—For particulars, apply to the HEAD MASTER.

MALVERN COLLEGE.

The ANNUAL EXAMINATION for SCHOLARSHIPS and ENTRANCE EXHIBITIONS will be held on December 7th and 8th.

SANDHURST.—Successful preparation for Admission Examination. Nominal fees. Payment based upon results. Highest references. —THOS. LYLE, B.A., F.R.Hist.S., Fern House, 48 Navarino Road, Hackney, N.E.

EDUCATION.—Mr. THOMAS JONES, F.G.S., F.R.A.S., formerly a Master in the Woolwich Common and Oxford Military Schools, RECEIVES a FEW BOARDERS. Thorough grounding, careful training, and home comforts. Terms moderate.—Address, Broomhill, Shooters' Hill, Kent.

EDUCATION.—TWO LADIES, of great experience in Tuition, having a large, airy house, situated in its own grounds, offer a liberal Education, with home comforts and careful training, to INDIAN or MOTHERLESS CHILDREN, upon moderate terms. Good references.—Address, "ETA," The Firs, Maldon Road, Colchester.

3 Berners Street, London, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

THE ARMY, viâ Sandhurst, Woolwich, or the Militia.—The Rev. WALTER BAKER, M.A., late Scholar of his College, &c., assisted by able tutors of special experience, offers careful PREPARATION for the QUALIFYING and COMPETITIVE EXAMINATIONS. Few pupils taken, and great individual attention given to each. References to parents of former pupils who have taken high places, as well as to successful Militia and University Candidates.—Batcombe Rectory, Evercreech, Bath.

LIEUTENANTS of MILITIA desirous of competing, this year or next, for Line Commissions can be RECEIVED by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major R. V. DICKENS (late 11th Foot), who, besides having passed the Staff College, and held several Staff appointments, has for some time past been successfully engaged in coaching Lieutenants of Militia, and also Sandhurst Cadets for their final examination in the same subjects. Other competent Tutors assist in preparing for the qualifying Examinations.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the examination required for the above.

At the recent Competitive Examination (June, 1880) of Candidates for Assistant-Clerkships in the Royal Navy, of the Fifteen successful competitors, FIVE were pupils of this Establishment.

ARMY, NAVY, AND CIVIL SERVICE EXAMINATIONS.
SYSTEMATIC AND SUCCESSFUL PREPARATION FOR THE ABOVE AT
ST. JAMES'S COLLEGIATE SCHOOL,
HIGHLANDS, JERSEY.

Upwards of 300 successful Candidates in these Examinations have gone up direct from the School, many of them taking very high places, especially in the Examinations for entrance into Woolwich and Sandhurst. Among recent ones are a third place in French out of 162 Candidates at the last Militia Examination in April, 1880, and the twelfth place with 5,104 Marks on the General List; with the first place in Mathematics, at the last examination held in July, 1880, for entrance into the Royal Military College, Sandhurst.

Inclusive terms for Boarders from Fifty Guineas.

THE TERM COMMENCED ON TUESDAY, SEPTEMBER 7.

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded.

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

ON WEDNESDAY WILL BE PUBLISHED.

20 GREAT TITCHFIELD STREET, LONDON, W.

PERFECTLY PAINLESS DENTISTRY.—NITROUS OXIDE GAS.—By the use of this, the most simple, speedy, and successful agent, after an experience of 45,000 cases, Mr. B. L. MOSELY, the Dentist, Member of the College of Dentists, England, and original introducer of this Gas, guarantees entire immunity from pain in every operation pertaining to Dental Surgery, and successful painless adaptation of artificial teeth. The daily experience of Hospital and extensive private practice demonstrates that, unlike every other anæsthetic, the Nitrous Oxide Gas is innocuous and even pleasant, while want of success or the least pain is simply impossible. For confirmation of this, vide *Lancet*, *British Medical Journal*, of 15th January, 1870, and opinions of leading members of the faculty. In the use of Mr. B. L. Mosely's Painless Artificial Teeth, the following results may be confidently relied on. All loose Teeth are permanently fastened, and the Artificial Teeth as firm in the mouth as the natural. Such entire comfort, combined with a fit so perfect is secured by this spécialité that the wearer, so far from being inconvenienced by his Artificial Teeth, is actually uncomfortable without them. In appearance and in use, both for eating and speaking, they are precisely the same as natural teeth—there is no difference whatever.

"Ease and comfort most apparent, while mastication appears completely provided for."—*Advertiser*.

From the *Lancet*, April 2nd, 1870 (p. 480):—"The reasons why we advocate the use of *Nitrous Oxide Gas* are 'Its safety;' 'The rapidity with which anæsthesia can be induced, viz., from 50 to 100 seconds;' Because it is actually pleasant to inhale, and therefore fright and mental distress are avoided;' 'Because recovery is usually bright, pleasant, and complete, after-discomfort being extremely rare.'"

Teeth from 5s; sets, 5 to 30 guineas. Only addresses, 312 Regent Street, opposite the Polytechnic; and 49 Moorgate Street. Established 1820. Consultation free.

N.B.—PUNCTUAL ATTENDANCE EVERY THURSDAY AT 4 HIGH STREET, ALDERSHOT, FROM 11 TILL 5.

Now ready, price 2s.

A BRIEF HISTORY of the 13th REGIMENT in SOUTH AFRICA. By Private McTOY, 13th Regiment.

"A Brief History of the 13th Regiment in South Africa" (Devonport: A. H. Swiss).—"This is a remarkable book. It is written by Private McToy, 1st Battalion 13th Foot, and in it there is a most reliable account of the doings of that regiment, as well as of the other regiments that were in South Africa during the Zulu and Sekukuni campaigns. Private McToy describes the march through Natal, the annexation of the Transvaal, the entry into Pretoria, the march to the north-east frontier, the expedition against Sekukuni, the battle of Tolyana, the fighting at Zlobanne, as well as other episodes of campaigning in South Africa. His book well deserves attentive perusal."—*Broad Arrow*, October 2, 1880.

Printed and published by A. H. SWISS, Military Stationer and Bookseller, 112 Fore Street, Devonport; and all Booksellers. Post free, 2s.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE, as supplied to the Upper Ten Thousand.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE, as supplied to Army Messes.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE, as supplied to Navy Messes.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE, as supplied to Merchants.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE. COOPER COOPER and CO. will not buy common or inferior TEAS at any price.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE. COOPER COOPER and CO. will not sell low or inferior TEAS on any condition.

AT TWO SHILLINGS a POUND, TEA of EXTRAORDINARY VALUE. COOPER COOPER and CO. taste and examine all the TEAS imported into London, and they exercise extraordinary care in the selection of the whole of their Teas.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES. A Perfect Luxury.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES. A Luxury at a Fraction the Cost of other Luxuries.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES, is Gathered in Early Spring, when the leaves are bursting with succulence.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES, is the Cheapest of all Teas.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES, is the Greatest Luxury the World produces.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES, is the most Inexpensive Luxury.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES, is also the Cheapest Tea.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES, is Strongly Recommended.

AT THREE SHILLINGS a POUND, the FINEST TEA the WORLD PRODUCES is Recommended to the Public.

COOPER COOPER and CO. undertake to answer the oft-heard question,— Why is Tea so dear? and they say that it is simply because the public in this, as in other matters, are powerless to insist on having their share of the advantages which result from falling markets. Tea, in fact, was never so cheap to buy since it was first imported into England, as may be easily ascertained by a reference to the current market reports, and yet relatively the retail price was never so exorbitant. Now Cooper Cooper and Co. have resolved to rectify this discrepancy, and to this end they undertake to SELL the BEST TEAS that can be purchased at their respective prices at a small commission only on the actual prices paid to importers. This system of business is specially intended to bring the public into partnership, as it were, or at all events to enable them to become participators in the great margin of profit which lies between the wholesale and retail price of tea. COOPER COOPER and CO.'S prices will be found to be ninepence per pound less money than those usually charged for identical qualities.

POST-OFFICE ORDERS should be made payable at the General Post-office, and cheques crossed National Provincial Bank of England.

FAMILIES residing in the country can, by joining together to divide the expense of railway crrriage, save 9d a pound in the price of their TEA, by sending to COOPER COOPER and CO.; or Cooper Cooper and Co. will pay railway carriage on parcels of the value of £2 and upwards to any station in England, on receipt of 9d in addition to the cost of the tea.

COOPER COOPER and CO., 50 King William Street, London Bridge, E.C.; 63 Bishopsgate Street Within, London, E.C.; 268 Regent Circus, London, W.; 35 Strand, London, W.C.; and 7 Westbourne Grove, W.

NAVAL CADETS, &c.

E. A. SEAGROVE,

ROYAL NAVAL AND MILITARY OUTFITTER,

22 & 23 The HARD, PORTSEA, PORTSMOUTH
(near the Dockyard).

ESTABLISHED 1795.

Under the Distinguished Patronage of
H.R.H. the PRINCE of WALES,
H.R.H. PRINCE EDWARD of WALES, R.N.,
H.R.H. PRINCE GEORGE of WALES, R.N.

Since the establishment of her Majesty's Training Ships in August, 1857, Mr. E. A. Seagrove has had the honour to equip and furnish his ADMIRALTY PATTERN REGISTERED

NAVAL SEA CHEST

TO OVER ONE THOUSAND NAVAL CADETS,
(on joining the Service.)

COMPLETE LISTS of OUTFIT, with ESTIMATES, SENT FREE on APPLICATION, for ALL OFFICERS.

N.B.—Agent for the sale of the new ADMIRALTY PATTERN WATERPROOF COAT and CAPE.

⁂ Orders forwarded to any part of the world.

RODRIGUES' MONOGRAMS, Arms, Coronet, Crest, and Address Dies Engraved as Gems, from original and artistic designs. NOTE PAPER and ENVELOPES brilliantly illuminated by hand in gold, silver, bronze, and colours.

BEST RELIEF STAMPING, any colour, 1s per 100.

All the New and Fashionable Note Papers kept in stock.

A VISITING CARD-PLATE, ELEGANTLY ENGRAVED, and 100 SUPERFINE CARDS PRINTED for 4s 6d.

BALL PROGRAMMES.—All the new patterns of the season arranged, printed, and stamped in the latest fashion. BILLS of FARE, GUEST CARDS, REGIMENTAL BAND CARDS, BOOKPLATES, and INVITATIONS in every variety.

At RODRIGUES', 42 PICCADILLY, LONDON, W.

OFFICERS' WATCHES.

Silver Keyless Chronograph Watch ...	£5 10 0
Silver Keyless Alarum Watch	4 10 0
Silver Keyless Lever Watch	3 10 0
Nickel Silver Calendar Watch	1 5 0

SNOW SANDERS AND CO.,

WINE MERCHANTS

TO THE SERVICES,

32 THE HARD, PORTSEA,

PORTSMOUTH.

ALFRED BROAD.

THE

ARUNDEL & CALEDONIAN HOTELS.

The ARUNDEL is near the New Law Courts, in the Strand, being next door to the Temple Station.

The CALEDONIAN is on the Adelphi Terrace, and close to Charing Cross.

These two old-established Family Hotels, from their especially advantageous position, both overlooking the Thames Embankment, combine light, air, and perfect quiet, although in the centre of London. They are now under one management, AND AT EITHER ESTABLISHMENT VISITORS CAN ARRANGE FOR FULL BOARD AT A FIXED CHARGE OF SEVEN SHILLINGS AND SIXPENCE PER DAY, which includes a good Bedroom, Breakfast of hot and cold meats, Luncheon, Dinner of six courses, and Tea and Coffee in the evening; also the use of large, well-appointed Sitting-rooms, including an ELEGANTLY-APPOINTED DRAWING-ROOM.

These Hotels, containing upwards of 200 Rooms, have been for many years largely patronised by Members of Parliament, the Clergy, and by Military and Naval Officers and their Families, by reason of their central, but retired localities, affording all the comforts and luxuries of high-class Hotels.

J. R. WILLIAMS, Proprietor.

PATRONISED BY HIS LATE R.H. PRINCE ALBERT.

COWVAN'S CANTON STRAP,

OR FOUR-SIDED RAZOR SHARPENER.

For Grinding, Setting, Strapping, and Finishing Razors, Penknives, and Surgical Instruments. To all who value ease and comfort in shaving, this Strap will be an invaluable acquisition. The bluntest razor or penknife may be instantly restored to its primitive keen edge.

Prices, 5s 6d, 7s 6d, and 9s 6d. Cowvan's Razor Paste, 6d and 1s per packet.

Warehouses—5 GREAT MARLBOROUGH STREET, W.; and 93 and 95 CITY ROAD.

GOUNDRY'S CONSOLIDATED TEA.

Is much better and Cheaper than Loose Tea.

For full particulars, apply to

181 UPPER THAMES STREET, LONDON, E.C.

E. & E. EMANUEL,

3 THE HARD (3 DOORS FROM H.M.'s DOCKYARD), PORTSEA.

WATCH AND CLOCK MAKERS.
GOLDSMITHS, SILVERSMITHS, & JEWELLERS
to the QUEEN and ROYAL FAMILY.

English and Foreign Watches and Clocks.
Regimental, Prize, and Presentation Plate.
Electro-Plate. Table Cutlery.
Rare China, Antique Plate, Bronzes, and Curios.
Collections valued and purchased.
Old Plate, Jewels, and Epaulettes bought. Foreign Money exchanged.
Miniature Copies of all Medals and Decorations.
Race, Field, and Opera Glasses. Nautical Instruments.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179, of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactory."

Sole Address—**3 THE HARD, PORTSEA.**

ESTABLISHED 1844.

A. D. LOEWENSTARK & SONS,

GOLDSMITHS, MASONIC JEWELLERS, NAVAL AND MILITARY MEDALLISTS,

210 STRAND, LONDON.

Manufactory, 1 Devereux Court, Strand.

SOUTH-AFRICAN WAR MEDAL and CLASP, in Miniature, now ready; and all other English and Foreign Medals and Decorations.

MASONIC APRONS and JEWELS for every Degree in Freemasonry, a large Assortment always in Stock.

WAR MEDALS and ORDERS of KNIGHTHOOD, Regulation, &c., in Miniature.

THE NEW REGULATION MILITARY BUCKLE now ready, in all Sizes.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 10s. 4d. per annum; viâ Brindisi, £1 14s. 8d.

The ARMY AND NAVY GAZETTE can be obtained in Paris of our Agent, Mr. J. W. S. NEAL, English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.

THOSE who have carefully considered the various accounts both of the first and the second Afghan wars, cannot but have been struck by the prominent part taken in military matters by Political Officers. The latter, moreover, being generally soldiers, the authority assumed by or conceded to them creates the more surprise. The exercise of such authority or influence has been, as history shows, frequently very injurious. Both Sir Charles Napier and General Nott protested loudly and energetically against dictation to military commanders by men having no military responsibility, comparatively little or no military knowledge, and ostensibly only performing civil functions. Similar protests may have been made during the last two years, but if so, we have heard nothing of them as yet. None the less, however, is it our duty to call attention to the evils of the system. We are quite prepared to be accused of prejudice, and to be confronted with a long roll of military politicals who have illustrated Indian history, and have, both in their political and military capacities, displayed undoubted talents of the highest order, and rendered splendid services to the country. The fact, however, that some military politicals have been eminent men, and that almost all have displayed ability, courage, and energy, does not make a bad system good, and we maintain that the system in question is essentially and radically bad. Sir Charles Napier, in his terse language, repeatedly pointed out the absurdity and impropriety of allowing a Political, often only a subaltern who had for years ceased to perform military duties, to control, in purely military matters, a war-worn General, expressly selected for his position on account of his military fitness, and solely responsible for the success or failure of the operations undertaken within the limits of his command. General Nott, with almost equal vigour, pointed out that though a Political might, as the representative of the Civil Government, represent the propriety of striving to obtain certain results, the ultimate decision as to whether it was prudent to attempt to obtain them, and the means by which they should be obtained, ought to rest with the senior military officer. Nevertheless, strong in the support of friends at the Council Board, the political officers in Afghanistan during the period which ended in the outbreak of 1841 practically kept the military commanders in a state of tutelage. A lieutenant in charge of an outlying district took it into his head that a certain tribe or chief needed punishment, and at once called on the nearest commander of a post not only to supply troops, but even to employ them in the manner which the lieutenant deemed advisable. The senior military officer was compelled—or thought himself compelled—to comply, and the result was not unfrequently disastrous failure. Even if the expedition succeeded, it was objectionable in many cases, for it might interfere with a comprehensive scheme of operations planned by the General. At all events, it placed him in this position,—that it weakened his authority, and left him in ignorance as to the position and number of the troops on whom he could count, in case a grave emergency should arise. When at length this unwise interference with military arrangements, on the part of the whole body of Politicals, from Sir William Macnaghten downwards, resulted in the outbreak of November, 1841, the Government of India temporarily changed the system, and accorded to Generals Pollock and Nott full political as well as military authority. The vicious system was, however, only scotched, not killed, and we find during the next few years Sir Charles Napier complaining of its existence. In the recent campaigns we have seen similar, though lesser, evils arising from the pretensions of military politicals, and it was only Sir Donald Stewart who fully and practically asserted the supremacy in an enemy's country of the General commanding the army. It is true that the Politicals have not, as they did forty years ago, almost openly dictate to General officers, but they have been still animated by the same spirit as their predecessors, and have obtruded advice and information which produced disastrous results. In the campaign in the Kurum Valley in the winter of 1878-79, General Roberts allowed his baggage train to thread a defile some distance in rear of the main body, because the Political attached to his column assured him that no attack was to be apprehended from the local tribe. Yet the attack was made, and though it was repulsed, some valuable lives were sacrificed to the incorrect information which induced the General to relax military precautions. A twelvemonth later, General Roberts was within an ace of suffering a severe disaster at Cabul, and did actually undergo much military humiliation, because of defective information afforded by the Political. Still more recently, we find Lieutenant-Colonel St. John not only advising Major-General Primrose to despatch General Burrows to the Helmund, but even suggesting the strength and composition of the force to be sent. How far his subsequent advice induced General Burrows to make that fatal advance from Khushk-i-Nakhud, which led to the crushing defeat of July 27, we know not. Neither do we know whether it was his counsel which caused General Primrose to take ignominious refuge in the citadel of Candahar, and a little later to undertake the unwise, unnecessary, and unfortunate sortie. We are, however, justified in assuming that he was, to a great extent, responsible both for Generals Burrows' and Primrose's errors, and for the defective information to Government which led to General Phayre's Division being deprived of the means of moving. We say that we are justified in this assumption, and our reason for arriving at such a conclusion is that throughout the five weeks following the defeat of Maiwand, it was not General Primrose's, but Lieutenant-Colonel St. John's communications with the Viceroy, which were published. Indeed, the latter seems to have been the only local authority recognised by Lord Ripon, and to have been the medium of communication with the commander of the beleaguered garrison. If ever there was a case in which all civil authority should have been held in abeyance, it was surely this; yet we heard nothing but, "St. John reports this," "St. John thinks so and so," "St. John is of opinion that the sortie was a success," "St. John asserts that Burrows' disaster was exaggerated." Any foreigner would have imagined that it was Lieutenant-Colonel St. John, not Major-General Primrose, who was the military commander. We are far from wishing to underrate the services which Politicals have rendered in the Afghan wars. Their chief quasi-military functions have comprehended the procuring of information and supplies. If, as regards the former, they have often been failures, they, have at all events as regards the latter, aided the Commissariat most efficiently. During General Roberts's march from Cabul to Candahar, indeed, much of the success was due to their energy and ability. Still, though they may be very useful in collecting grain and cattle, we nevertheless contend that, on the whole, their position with reference to the Military Authorities has been productive of harm. Their information has been notoriously defective or misleading, and they have shone neither as strategists nor tacticians. We, therefore, earnestly urge the propriety of putting these gentlemen in their proper place. That place is neither that of Commissioners of the Government, nor of Chiefs of the Intelligence Department, but merely that of instruments to carry out such orders or to perform such functions of a civil nature as the chief military officer may think fit to issue. When the country is tranquil, and civil government has been re-established, then let the Politicals act as the directions from their departmental superiors may desire them; but when war is abroad, there should be but one person to give orders, —namely, the Military Commander, and his authority should be absolute.

An unfortunate military scandal has just been brought before a French civil court, much to the annoyance of the French Army. Our neighbours have long harboured the idea that their reverses in 1870 and 1871 were due to treason, and during the Franco-German War a detachment was hardly ever defeated without the cry going up to Heaven,—"Nous sommes trahis, livrés, et vendus!" The fact of French soldiers being beaten by Germans was only to be accounted for by treachery. We may remark that this suspicion of treason has long been inherent in the French Army, and especially among Parisian troops. M. Thiers has made the remark, in his *History of the Consulate and the Empire*,—"Directly there was a disinclination to fight, the Parisians declared they had been sold, and scampered away." It would be difficult to say from what precise epoch this want of confidence dates, or whether it is due to overweening assurance, or to the fact of French Generals having really betrayed their trust. The belief in the omnipresence of Prussian spies may, perhaps, date from the Seven Years' War, when Frederick the Great laughingly said, when alluding to Madame de Pompadour's Generals, "My brother Louis has twenty cooks and one spy, while I have twenty spies and one cook." Now, a short time ago it was rumoured that the Prussians had obtained possession of the French plan of mobilisation; that the documents concerning this matter had been purloined from the War Office; and that an officer connected with the Department was the guilty person. Several names were mentioned in connection with this affair, and at last a most circumstantial article appeared in the *Gaulois*, charging Captain Jung, of the Staff, with being the culprit. The accused officer at first wished to fight the journalist, but various difficulties were raised to a meeting, and in the end the Captain determined to appeal to a civil tribunal in order to clear his character. M. Ivan de Woestyne, the defendant, called a good many witnesses, but his chief reliance was placed on the evidence of General Ney, Duc d'Elchingen. But the General, when asked, could only say that public rumour attributed the theft of the papers in question, and that meeting M. de Woestyne out riding, he had said, "If it be true that Captain Jung has taken them, he deserves to be treated as the Borgias or the Medicis treated objectionable persons." He roundly declared that he had all along used the word "if." The consequence was that the defence broke down. But there were other serious matters brought into the trial. It was shown that if important information had been given to the Germans, it was not Captain Jung who was the culprit, but in all probability his wife, from whom he had long been separated, and who had managed to get into the good graces of General de Cissey, when that officer was Minister of War. It appeared from official documents read out in Court that the General had abused his position as War Minister to endeavour to force Captain Jung to sign a paper required by his wife, and also that he had given Madame Jung, who went by the name of "Mdlle. Kauller," a permission to visit her son at the Military College of La Flèche, and this in opposition to the sentence of a civil court. The whole affair is most lamentable. Here is General de Cissey, after a long life spent in the service of his country, after having been twice War Minister and reorganised the Army, and after commanding an Army Corps, called upon by public opinion to send in his papers, for allowing himself to be seduced by a designing and attractive woman. It is to be regretted, too, that General Ney should have spoken in the manner he did of a brother-officer, and this to a man he knew to be a reporter, and whom he had only met once before in his life. In the accusation brought against Captain Jung, and which completely fell to the ground, there was a good deal of political animus. The captain is writing a work, called *Bonaparte et Son Temps*, which is very damaging for the private character of the great but unscrupulous soldier, and he has consequently drawn upon him the wrath of all the Bonapartist officers. The names of other officers and gentlemen were mixed up indirectly in this matter. For example, there was M. Wachter, who was recently editor of *L'Armée Française*, the military organ of M. Gambetta. It was shown in court that this gentleman had also been accused of purloining the missing documents, but that he had been whitewashed. However, he was forbidden further entrance into the War Office, and he was removed from his post as editor. As for M. Ivan de Woestyne, who was formerly in the Belgian service, he was sentenced to six months' imprisonment and 5,000 francs fine for having basely slandered a gallant officer.

At this particular time of the year, it is the practice to send one corporal and one private from each Cavalry regiment to Canterbury, to undergo a course of military equitation for nine months. Although this is an excellent practice in its way, it is open, we think, to considerable improvement. To begin with, it is not to be expected that a young corporal or private will value very highly the instruction he receives, when he finds the work of keeping his horse and appointments clean and in order is a task of the greatest difficulty. Indeed, he is inclined in too many cases to view the whole thing more in the light of a punishment than anything else, the consequence being that he makes little progress, and ultimately returns to his regiment not much benefited, and is seldom considered even fit to be employed in the regimental riding-school, or as drill instructor, to qualify him for which duties it is that he is sent to Canterbury. Thus the country is put to an almost useless expense, as it often happens that the man breaks down a valuable horse, and turns out utterly unfit for further promotion at the termination of his course. Now, if the period of instruction was extended from nine to twelve months, and two serjeants were sent to Canterbury, with one private told off from the depôt or despatched with them from their regiments to clean their horses and appointments, an improvement would, we believe, very soon be observable. The two serjeants would be able to devote themselves entirely to the object for which they were selected, viz., drill and instruction, which might be divided into four parts, with a certain number of marks given for each subject—say, military equitation, 15; instruction-drill, 12; foot-drill, 9; education, 9; good-conduct, 5; making a total of 50 marks—first, second, or third-class certificates being granted, according to the number of marks obtained, the description of certificate obtained being entered in their ledger-books, as a reference. The time for instruction should be divided into regular hours, and in addition to the usual course, it would be well to add "Cavalry Regulations," a suitable portion of "Queen's Regulations," and the "Articles of War," with military sketching and accounts. Such a course of instruction would produce good non-commissioned officers, and qualify them for the responsible position of troop serjeant-major, by their knowledge of drill and discipline as taught at Canterbury. It would also ensure a greater uniformity in the system of drill and the fitting of appointments throughout the Service than at present exists. A mess might be formed, and the serjeants should be kept together as much as possible, every encouragement being given them to improve themselves, and bring themselves up to a high state of discipline and efficiency. Non-commissioned officers sent to qualify for ridingmasters should receive one shilling per day extra, and be in possession of a 1st-class Canterbury certificate; and they should not be appointed until they had passed an examination, similar to that laid down in Section 4, "Queen's Regulations," with an elementary examination to show their knowledge of the anatomy and powers of the horse, so as to assist them in the training of remounts, ignorance of these subjects often leading to serious results both to the horse and rider. Such a system as this, if carried out, would, we believe, prove most beneficial, and would enable us to obtain good non-commissioned officers for the appointment. On first appointment, the ridingmaster should be gazetted a combatant officer, and take his turn of promotion in the regiment to which he is appointed; in other words, he should be given something to look forward to. At present he has no prospects, and the best and most zealous soldier naturally loses heart when he finds himself occupying a standstill position year after year, with no chance of ever making any advance. The present training of Cavalry non-commissioned officers, it must be allowed, is lamentably bad. In many regiments everything depends upon the favour with which a young soldier is regarded by the commanding officer; and a young corporal, be he ever so unfitted to exercise authority, may be promoted serjeant, and pass on to troop serjeant-major, if he only contrives to pass muster under the eyes of his captain and commanding officer. So much depends, especially in the Cavalry, upon the troop serjeant-major, that the very utmost should be done to raise the professional knowledge of those vested with such large powers, upon whom much will depend in our next European campaign. The scheme we have sketched out could not fail to be advantageous, and as it would in the long run be found to be a saving to the country, we hope that it may be considered. At any rate, it would be a wise thing to call together a committee of cavalry officers to discuss the question, and report what steps it is desirable to take to render the non-commissioned ranks more attractive, and to ensure our obtaining a constant supply of men qualified to undertake the important duties of serjeants and troop serjeant-majors. It is idle to deny the fact that there is at present a great want of good men of the old class, for the very simple reason that there is no encouragement held out to our young soldiers to qualify themselves for the responsibilities of the higher non-commissioned ranks. Under a proper system, the riding-mastership would be a thing to be aspired to. It is now anything but that, for a man once gazetted ridingmaster knows that he is provided for for life, and that work as he may, he has no opportunity of ever rising to the command of a troop. It is certainly a great mistake not to render this position more attractive.

Rear-Admiral H.R.H. the Duke of Edinburgh, while on his visit to Hull this week, for the purpose of inspecting the *Audacious*, received, contrary to his usual custom, a congratulatory address from the Mayor and Town Council of the place. On Wednesday the Duke of Edinburgh was present at the Leeds musical festival, of which he is president, on which occasion Mr. Barnett's cantata, "The Building of the Ship," was produced.

The Admiralty appear still to have strange notions of economy. We hear that the *Spitfire*, a paddle-wheel vessel of an antique class, sent out to Bermuda fifteen years ago for harbour service, having been reported upon as rotten and used up, the authorities, with the experience of many years of dockyard administration, ordered her to be repaired, and the vessel is now being virtually rebuilt. It will be interesting to know the total cost of this ship from first to last.

The Board of Admiralty will make the official annual inspection of the dockyard, victualling yard, Marine division, and other naval establishments at Devonport, in the course of next week. The Admiralty yacht *Enchantress* has been ordered to be at Devonport to receive their Lordships on Monday next.

Up to the present time there is no reliable information as to the future movements of the Demonstrative Squadron, and letters for the *Alexandra*, *Monarch*, and *Téméraire* should be sent to Brindisi, to the care of H.B.M.'s Consul, to be forwarded.

Sub-Lieutenant Richard Peirse has been successful in passing out of the *Excellent* with a "first-class" in gunnery, and having previously taken the highest certificates in seamanship and navigation, he now holds three "firsts," and becomes entitled to the usual Admiralty present of books. Sub-Lieutenants George Patey, of March, 1878, and Robert Adams, of September, 1879, have also passed out of the *Excellent*, and are confirmed in their rank.

A programme of experiments for testing the effects of oblique fire on armour-plates is being drawn up, and will be carried out shortly at Portsmouth. The firms now having contracts with the Admiralty for the manufacture of plates for ships under construction will be invited to send in sample plates for these trials.

The Nordenfelt guns and ammunition, which it was so suddenly decided to send to the Mediterranean Fleet, will not be taken by the *Assistance* to the Adriatic, but will be landed at Malta, whence the *Assistance* will return to England.

The designs for the new 6-inch 43-ton breech-loading guns for the Navy have been all but completed, and the minor details will be submitted to the Ordnance Committee before handing the designs over to the manufacturers, Sir William Armstrong and Co.

We are glad to hear that the *Pandora*, the yacht of the ex-First Lord of the Admiralty, Mr. W. H. Smith, in which he recently paid a visit to the Demonstrative Squadron, and which went ashore on entering Argostoli, was safely got off with the assistance of the Italian man-of-war *Victor Emmanuel*. The yacht is reported to have gone aground in a fog; but she was steaming easily, and is but slightly damaged.

Rear-Admiral Stirling left San Francisco for Callao in the *Triumph* on the 8th inst. At Callao, he will probably find the *Shannon*, *Osprey*, and *Thetis* awaiting him, so that the force of British ships will be quite equal to any call for the protection of British interests.

Commander John Rainier has been selected by the Admiralty as a member of the Committee on Machine Guns, in the place of Commander Custance, appointed to the *Flamingo*.

The French expedition, for opening up the Upper Niger and "taking possession" of the country placed under the protectorate of France, left Bordeaux on the 5th inst., one company of Sappers, two of Marine Infantry, and four companies of natives form the expedition.

In addition to the writing-table made from the timbers of the *Resolute*, which it is intended to present to the President of the United States of America, another piece of furniture has, we hear, been manufactured from the old ship for presentation to Mrs. Grinnell. The furniture will be sent to Washington to the care of her Majesty's Minister, by whom it will be presented as directed.

The statement that the death of Admiral Sir Walter Tarleton, K.C.B., has placed a good-service pension of £300 a year at the disposal of the Admiralty, is, unfortunately for some expectant recipient, untrue. There are now ten officers in receipt of these pensions, and thus the complement is full and there is no vacancy, although their Lordships have the power of increasing the number under special circumstances.

On the arrival of the *Vulture* at Devonport, she will receive orders to proceed to pay off at Sheerness, where she was commissioned in December, 1876. Lieutenant Carey, Navigating Lieutenant Stovin, and Mr. Wright (engineer), are the only officers who have served the commission in the ship.

Commodore Richards' threatened blockade of the Brass River appears to have had the desired effect, the natives having collected the fine of oil imposed upon them for plundering the British ship *Cypriote*. The ships on the West Coast of Africa will, therefore, be relieved of the tedious work of blockading.

The new surveying steamer for the coasts of England, which is to be built for the purpose of replacing the *Porcupine*, is to be named the *Triton*.

There is a general move among the Coastguard ships, the *Belleisle* being ordered to Kingstown for the winter, the *Hector* to Portsmouth to make good defects, and the *Warrior*, *Defence*, and *Hercules* to go to sea for target practice.

The Naval Demonstration is now, there is reason to hope, almost a thing of the past. That the Fleet was intended to begin operations unless the cession of Dulcigno was agreed upon is plain from the ultimatum issued by Vice-Admiral Sir Beauchamp Seymour, in which he said, "I demand the surrender, without delay, of the town and district of Dulcigno to the Montenegrin authorities. Before beginning active operations, I accord you a delay of three days for reply. The officers who will hand you this communication may convey to me your reply. I am ready to enter into negotiations with the Prince of Montenegro for the purpose of facilitating the occupation of the ceded territory." It is satisfactory, however, to learn from a source which may be considered inspired, that at no time was the bombardment of Dulcigno entertained by the allied commanders of the Demonstrative Fleet. It is asserted in this quarter that if it had been necessary to use force, the fire of the shipping would have been directed on the Mazura entrenchments and on those situated on the hills north of Dulcigno; and even if the fortress of Dulcigno itself had been brought under fire, it stands on rising ground, clear of the town. But the allied commanders, acting under the authority of their respective Governments, were fully agreed that under no circumstances should a shot be fired which would endanger the lives of the inhabitants of Dulcigno.

It is stated that in the programme of shipbuilding for the ensuing financial year, provision will be made for laying down three new ironclads, but we believe they will be of the smaller classes, though carrying a powerful armament.

Sebastopol is growing rapidly in importance, and promises soon to supersede Nicolaieff. Of late years, the Black Sea Steam Navigation Company have established their head-quarters there, constructing also a building-slip and workshops. Recently, the great floating-dock was removed from Nicolaieff to Sebastopol, and now we hear of the assignment of 300,000 roubles to construct a pier for embarking troops, and 500,000 roubles to build a row of barracks for seamen of the Black Sea Fleet. But for Russia's belief in the annexation of Constantinople in the immediate future, greater energy still would probably be displayed in developing Sebastopol.

At the quarterly meeting of the directors of the Naval Medical Supplemental Fund, held on Tuesday, Dr. H. J. Domville, C.B., Inspector-General, in the chair, the sum of £65 was distributed among the several claimants.

The sum expended yearly by the Russian Admiralty on the purchase and printing of books amounts to about £50,000 sterling. A by no means insignificant portion of this is disbursed in subscribing to the leading European newspapers and journals, and in purchasing every work of note appearing upon Naval matters. The vote also includes subsidies to Russian authors, to assist them in buying works dealing with the Navy, the reading public in Russia being too small to render it a profitable matter for publishers to issue Naval works.

Wednesday next will be the fifty-third anniversary of the battle of Navarino, which was fought by the *Asia*, Vice-Admiral Sir Edward Codrington, Captain Edward Curzon; *Albion*, J. A. Ommanney; *Genoa*, Walter Bathurst; *Cambrian*, G. W. Hamilton; *Dartmouth*, T. Fellowes; *Glasgow*, Hon. A. Maude; *Talbot*, Hon. F. Spencer; *Rose*, L. Davies; *Philomel*, Viscount Ingestre; *Mosquito*, G. B. Martin; and the *Brisk*, Hon. W. Anson; and which ended in the destruction of an ally with whom we were at peace.

The proceeds of the Kensington House Fête for the *Atalanta* Fund amounted to rather over £800, which sum has been handed over to the Lord Mayor. We are sorry to hear that the branch funds at the Ports have not met with the support that was anticipated, and that the London fund is also but slowly progressing. It is not, we feel sure, any want of sympathy with the sorrowing relatives of those lost which has stayed the hand of the charitable public, but there is a strong feeling in many quarters that the Government should come forward more prominently in matters of this kind, especially in a case in which men ordered on the Service of their country met with death in a ship provided for them by a Government Department.

Rear-Admiral the Earl of Clanwilliam rehoisted his flag on board the *Inconstant*, on return from leave, on Monday last, and it was directed by the Admiralty that the ship should be at Spithead ready for sea on Thursday. It was afterwards decided to give her a six-hours' trial of engines, and to-day has now been fixed as the date of departure of the squadron for Vigo. The authorities at Sheerness were ordered to use all possible haste in getting the *Tourmaline* ready, and the usual six days' Channel trial of the *Cleopatra* and *Carysfort* was so far set aside that they were simply instructed to proceed from Sheerness to Devonport and from Devonport to Portsmouth, respectively, so that they might not delay the sailing of Lord Clanwilliam's command. The *Bacchante* arrived at Vigo on Thursday, and will await the Detached Squadron.

General Sir Fortescue Graham, K.C.B., of the Royal Marine Artillery, who died at Plymouth on Saturday, at an advanced age, had seen much service, in the old fighting days. He entered the Service in 1808, and shortly afterwards proceeded to the Baltic, where he was landed with the Marines from the Fleet, and served with the battalion at the taking of Walcheren in 1809. He served in a battalion in Portugal and north coast of Spain, and was present at the taking of Castro. He afterwards proceeded to America, and assisted at an attack on Norfolk, and taking of Hampton. Also with a battalion in Canada, where he commanded a division of gunboats at the attack on a battery on Lake Champlain. Returning to America, he was at the capture of Fort Point Peter, and town of St. Mary's in Georgia. He served with another battalion in Spain, in 1837; and afterwards in China, where he was present at the demonstration before Nankin (medal). He commanded the Royal Marine Battalion, landed from the Fleet and acting in conjunction with the French, at the bombardment and surrender of Bomarsund (medal). The late Sir Fortescue Graham commenced his service with the Royal Marine Artillery, but becoming adjutant of a division of the red, he did not revert to the blue until he was appointed General of the Artillery Division in 1870, from which date he also was in receipt of a good-service pension of £200 a year. Sir F. Graham was the senior General of the Marine Corps, but having been on the Retired List at the time of his decease, no step accrues to the serving corps. The remains of the late General were interred in the cemetery at Plymouth on Wednesday. In addition to relatives, Colonel-Commandant Heastey, Colonel Second Commandant Hunt, A.D.C., Lieutenant-Colonels Sanders and Jones, and other officers of the Plymouth Division of Marines attended the funeral.

Although Mr. Edison's wonderful "inventions" have made people a trifle shy in accepting new Yankee notions as gospel fact, we believe there may be something worth inquiring into in Captain Ericcson's new torpedo. In the reports that have been received through the New York Press, it is remarkable that the inventor has been very guarded in his statements, and has not yet committed himself to half that it is alleged that his wonderful weapon can do. We must, therefore, wait for some further experiments, which are promised shortly, and we hope that Captain Arthur, the present Naval attaché at Washington, whose knowledge of torpedo warfare has been kept up to date in his late command, the *Vernon*, will be on the spot.

Referring again to the report that dissatisfaction had been felt by the men of the battalion of Marines now in Ireland, in consequence of their not being borne on ship's books, and thus not receiving ration allowance, we would observe that there has always been a diversity in the arrangement of the many Marine battalions that have been sent to Ireland, the officers and men of some battalions having been taken from the "foreign service" or embarkation roster, while others, as in this instance, have been selected from the "home service," or command duty roster. The chief cause of complaint has been that no allotments could be made by the married men; but the Admiralty have been liberal in this instance, and following the precedent of the course adopted with the South-African Battalion, have given separation allowance to the families at the rate of 6d. a day to the wife and 2d. a day to each child under fourteen years of age. This will make the men's families as well, and in some instances, better off than if they were in receipt of allotments, for, taking a family of a wife and two children, they would receive 10d. a day, or 25s. a month, added to which their husbands could well afford to transmit further help. The only losers are the officers and unmarried men, who would receive, if borne on ship's books, the former 1s. 6d. and the latter 7d. per diem in lieu of rations. But an unmarried soldier can live as well on his pay in Ireland as in England, and can, therefore, have no just cause for complaint that he is still considered on shore service.

Tempus edax rerum! Seventy-five years have rolled by since Nelson fell on the deck of the *Victory*, and it is not therefore surprising that the roll of Trafalgar heroes now living is reduced to a minimum. The names of those who fought four years previously at the battle of the Nile have all gone from the *Navy List*, and the names of those who fought in Nelson's last great action are fast disappearing. Admiral of the Fleet Sir George Rose Sartorius, G.C.B., who is now in his 91st year, and entered the Navy in June, 1801, fought as a midshipman on board the *Tonnant*; Admiral Robert Patton, now in his 90th year, who entered the Navy February 1, 1804, was a midshipman in the *Bellerophon*; Admiral W. Ward Percival Johnson, who is now in his 91st year, and who entered the Navy July 2, 1803, was midshipman of the *Victory*; Commander Francis Harris, a recipient of the Naval pension, was 1st-class volunteer in the *Téméraire*; Commander William Vicary (A), who is now in his 88th year, and who entered the Navy February 6, 1805, was 1st-class volunteer in the *Achille*,—he is in receipt of the Greenwich-Hospital pension; and Lieutenant-Colonel James Fynmore, R.M., a recipient of the Greenwich-Hospital pension, who was born in 1793, entered the Navy in 1803, and was midshipman of the *Africa*. He was also at the bombardment of Algiers, in 1816. The following is a list of the ships engaged:—*Victory, Royal Sovereign, Britannia, Téméraire, Neptune, Leviathan, Conqueror, Agamemnon, Africa, Ajax, Orion, Minotaur, Spartiate, Belleisle, Mars, Bellerophon, Colossus, L'Achille, Dreadnought, Polyphemus, Revenge, Swiftsure, Defiance, Thunderer, Defence, Tonnant, Prince, Phœbe, Sirius, Euryalus, Naiad, Entreprenante,* and *Pickle.*

Admiral of the Fleet Sir Thomas Symonds, taking exception to the letter of "Flag Officer" respecting the *Atalanta*, which we printed last week, has come forward with a censure upon the anonymous Admiral for giving no warning voice when the *Atalanta* was equipped for training service. Sir Thomas Symonds has, however, no fault to find with ships of the *Atalanta* class, and asserts that he "commanded ships of the same form as the *Atalanta* for eleven years, and served in three others, in every sea and circumstance; and, though I found them faultless, it is on record that I did not approve of the *Atalanta* as a training-ship for other reasons than safety. Her sister, the *Niobe*, gunned and weighted as designed, has done seventeen years' good service as a training-ship in the German Navy, and to this day is reported very highly of—in fact, 'perfect.'" "Flag Officer" replies that he did not know the *Atalanta* was the old *Juno* until after she was lost, and that "for an officer, after suffering compulsory retirement, to presume to dictate to the Admiralty what ship they should employ would be a piece of impudence that I, for one, would rather not be guilty of." But how great a pity it is that there should be this "stand-off" feeling between the Service afloat and the department. The evils which arise from this were pointed out by us in a recent article on "Naval Officers and Naval Constructors," and here we have a confirmation of our views.

We believe it is a fact that the application of Lieutenant-General the Hon. Leicester Smyth for the services of Captain Luxmoore, R.M.L.I., as A.D.C. at the Cape, has been refused by the Horse Guards, having been under consideration apparently until H.R.H. the Duke of Cambridge returned from Germany. It is hard that officers of Marines should be shut out of all Staff employment, except one or two professorships at Sandhurst, &c. If Royal Marine officers are entitled to be A.D.C.'s to her Majesty, surely there should be no bar to their being so to General officers, when the rare case of their being offered such appointments occur. Captain Luxmoore was offered the aide-de-campship by General Smyth solely from his professional qualifications having frequently come under the General's favourable notice when field-adjutant of the Plymouth Division. The Admiralty fully approved of Captain Luxmoore's accepting the appointment, and the onus of refusing permission lies, apparently, solely with the Horse Guards authorities.

The *Novosti* publishes a letter this week from an officer on board the *Naezdnik*, at Nagasaki, expressing the satisfaction of the Russian Fleet at the courtesy displayed by Admiral Coote. In the recent case of the stranding of the *Iron Duke*, the Russian Admiral put off a public dinner he had arranged to have at Hakodate, and hurried to the assistance of the English vessel. The *Naezdnik* was unable to do any good on reaching the spot, but Admiral Coote was profuse in his thanks all the same, and delighted the sailors on board the corvette by making the band of the *Iron Duke* play the Russian national anthem. The correspondent says that the officers of the *Naezdnik* and *Razboinik* still remember the very friendly treatment they experienced in England during their stay at Portsmouth.

In July last a scientific contemporary, in making an effort to defend the present Hydrographic Department, waxed warm over an assertion made by Lieutenant Temple, R.N., that he was "bound to warn all those whom it may concern of the errors to which the Department has given dangerous publicity." This was said to "be contrary to the traditions, and certainly to the interests, of any public office connected with the practical and working world." But however this may be, we have now before us, in this month of October, the fact that the Hydrographic Department has been warned for over a fortnight of a singular disparity existing between Admiralty Charts Nos. 1,588 and 2,701 of the coast of Albania, in the neighbourhood of Dulcigno; and yet no official attempt that we are aware of has been made to correct or, if necessary, to cancel the faulty document, for both charts in their unreconciled state are still for sale.

H.R.H. the Duke of Cambridge has continued his inspections during the week. On Monday he went to Colchester, and held a review of the troops. The Duke lunched with Major-General Radcliffe, and left Colchester for town shortly before four o'clock. His Royal Highness commenced his inspection of the Portsmouth garrison on Tuesday, when he was present at a sham-fight on Portsdown Hill, the forces numbering over five thousand men. Sir Charles Ellice and Sir Garnet Wolseley were with the Duke. The attacking force attempted to destroy the waterworks which supply Portsmouth, with its 130,000 inhabitants, and adjacent villages with water, and, after a smartly-contested fight, were adjudged to be the victors. A march-past concluded the operations. The local Volunteers took part in the proceedings. Dinners were afterwards cooked on the ground. His Royal Highness continued his inspection on Wednesday, when all the troops in garrison were reviewed on Southsea Common. After luncheon the Duke visited the forts and barracks at Gosport, and then returned to Portsmouth Dockyard, where, accompanied by the Port Admiral, he made a tour of the extension works, and inspected the *Inflexible*, *Dreadnought*, and other vessels. Sir Garnet Wolseley went out to view the Spithead fortifications. Prince Edward of Saxe-Weimar entertained a distinguished party in the evening at dinner at Government

House. His Royal Highness, attended by Sir Garnet Wolseley and Colonel Arbuthnot, C.B., R.A., visited Aldershot on Thursday, and reviewed the troops composing the division. The troops paraded at ten o'clock, and the evolutions lasted till nearly two. After partaking of luncheon with Sir Daniel and Lady Lysons, the Duke of Cambridge and his staff left the camp, and proceeded by train to London.

However hotly contested the proposed increase in the German Army may be, from a purely military point of view, it will appear that the changes intended, especially the provision in accordance with which the supplementary reserves *(Ersatz-Reserven)* of the first class are to be called in, periodically, in time of peace for drill, are highly necessary, if Germany is to maintain her military prestige and preponderance. The *Deutsche Heeres-Zeitung* has lately supplied some instructive figures, which show how useful it would have been to the Germans in 1870 if they had had at home Ersatz-Reserven ready to fill up the fearful gaps which the first battles of the Franco-German war made in their battalions. In fact, the losses were so heavy that, in the case of some regiments, they could be replaced only by the sending forward of a whole reserve battalion. Thus, in the battle of Wörth, the 1st West Prussian Grenadier Regiment, No. 6, lost 30 officers and 876 men (out of a total strength of about 3,000, be it observed), and the 1st Lower Silesian Infantry Regiment, No. 46, 35 officers and 982 men, more than a third of its strength. In the battle of Spicheren, the 2nd Brandenburg Grenadier Regiment, No. 12, lost also 35 officers, besides 771 men. The King's Grenadier Regiment, No. 7, suffered a loss at Weissenburg of 23 officers and 329 men; at Wörth, 16 officers and 551 men; consequently, within three days, 39 officers and 880 men. In the battle of Vionville (Mars-la-Tour), the 6th Brandenburg Infantry Regiment, No. 52, lost the astounding number of 1,202 men; the 4th Brandenburg Infantry Regiment, No. 24, 1,099 men; the 2nd Silesian Grenadier Regiment, No. 11, 1,119 men; and the 4th Thuringian Infantry Regiment, No. 72, 852 men, not reckoning the loss of officers, always considerable. The losses of the regiments of the Guards were as heavy at Gravelotte. As already remarked, such losses would have necessitated the forward movement of whole reserve battalions; but as a matter of fact, this was not possible, because those battalions, formed only a few weeks, consisted mostly of men not sufficiently drilled for field service. The consequence was that the Third and Tenth Army Corps, which each took the field with 25,000 infantry, in the battles which followed had to be placed in reserve, with strengths respectively of 16,100 and 18,550 men. The above figures also, for the first time, we believe, present to us a true picture of the actual losses entailed upon Germany in the Franco-German war.

The letters which recently appeared in the *Standard* signed "Trooper" would seem to have had the desired effect, for it is ordered that in future the course of instruction in gymnastics is not to commence with cavalry recruits until they have been dismissed their foot drills, nor with infantry recruits until they have completed the ordinary recruit drill, and have been put through the recruit's course of musketry.

We lately pointed out the injustice of the arrangement by which the officers and men who served in the campaign against Secocœni in 1878, were to be deprived of the medal which is about to be issued to mark the successful termination of operations at the Cape. We are glad to see that the omission has been rectified, and that a general order has been promulgated extending to those who formed part of the first Secocœni expedition the honour which all others will enjoy who took an active part in the late campaigns in South Africa.

We have received the sixth annual report of that excellent institution, the Soldiers' Institute and Sailors' Welcome, at Portsmouth, which, under the careful superintendence of Miss Robinson, has effected so much good among our soldiers and seamen. We are glad to find from the report that the institution is now in what may be said to be a flourishing condition; but subscriptions and donations are still much needed. The charitably disposed cannot employ their money better than by helping to provide for the wants of those who fight our battles, and in a garrison town such as Portsmouth are surrounded by temptations of every kind. There is a strong feeling, we know, in certain quarters against these homes for soldiers, on account of the shortsightedness of those who have the direction of affairs in endeavouring to parade religion at every turn; but Miss Robinson takes a practical view of things, and this error is not committed at Portsmouth, where the utmost is done to make the soldier and sailor really comfortable. As the Chaplain-General said on a recent occasion, "While every opportunity is afforded for religious advantages in Miss Robinson's Institute, there is no attempt whatever to proselytise the men,"—a fact which speaks highly in Miss Robinson's favour.

The latest accounts from Basutoland are not reassuring. The *Standard* correspondent at Capetown telegraphs that Colonel Bayly was attacked at Maseru on the 10th inst. by the enemy in considerable numerical force. During the daytime they contented themselves by keeping up a heavy fire from the hills, 600 yards distant; but late in the afternoon the enemy began to work their way down, evidently with the intention of attacking after dark. Colonel Bayly then withdrew his troops into the Residency and new fort, firing the hospital, so as to light the ground outside the lines held by our men. The Basutos sacked and burned the Government office and barracks, the school, dwellings, and stores, retiring after midnight. As our men were kept under shelter, we had only one killed and four wounded. The Basutos left three dead upon the ground. Colonel Bayly, with his 500 men, was still shut up in Maseru when the despatch was sent off, Colonel Carrington, with a rather smaller force, being besieged at Mafeteng. A relief column had, however, been forming for some time at Wapener, in the Orange Free State, fifteen miles from Mafeteng, and it was to march, 1,000 strong, on Wednesday last, under Brigadier-General Clarke. It would almost seem, therefore, that our correspondent who wrote to us last week from the Cape was justified in taking the gloomy view he did of the situation, which would seem to be growing more serious.

We would draw the attention to the heads of the War Office to the letter of "An Advocate for Fairplay," in another column. A more undoubted case of miscarriage of justice was never brought to light. We are convinced that the officer in question has been unintentionally injured, and we insert the letter with much pleasure, as it will enable the Secretary of State for War to set the matter right, and reward an old and most distinguished officer as he deserves to be rewarded, for his long and faithful services, with the highest rates of pension it is in the power of the War Office to accord.

Intelligence has reached Woolwich from India of the death of Major E. S. Burnett, commanding C Battery B Brigade, Royal Horse Artillery, who is said to have been thrown from his horse and killed at Secunderabad. Major Burnett received his first commission in August, 1855; attained the rank of Captain in July, 1864; and became Major, April 16, 1873. His war services include the Indian Mutiny of 1857-8, during which he was present at the relief of Lucknow by Lord Clyde, the battle of Cawnpore of December 6, the siege and capture of Lucknow, and other engagements.

There was a little flutter of excitement on Tuesday by reports respecting the menacing attitude of Burmah, and a telegram published in the *Standard* indicated that an outbreak of hostilities was really imminent. The Rangoon correspondent of the *Times*, however, whilst confirming the statement that about 1,000 armed Burmese have appeared on the frontier near Allanmyo, and that a rumour existed that war would be declared against us, if the British Government refused to give satisfaction for the losses sustained during the Nyoungoke rebellion, assures us that these reports are exaggerated and absurd, and that no serious trouble is anticipated. And the Viceroy, in an official telegram, reports:—"Following received from Chief Commissioner, Rangoon, October 12:—'In case exaggerated accounts reach you, I beg to report as follows:—On Sunday, the 10th, Deputy-Commissioner Thayetmyo reported that Upper Burmans were collecting on frontier, and intended to attack British territory. On Wednesday, he arranged with commanding officer for increasing the Allanmyo garrison by one company Native Infantry. Yesterday (Monday), Deputy-Commissioner telegraphed that possibly native informants had been misled, and there was no cause for alarm now. The cause for dissatisfaction was said to be our refusal to pay indemnity for losses caused by Nyoung Oke Prince's incursion last May. I do not anticipate trouble, but have directed Deputy-Commissioner to take steps to improve his sources of information, as alarms of this kind harass troops and disturb the public; such rumours will have effect on trade, and already, Flotilla Company's agent, Thayetmyo, has telegraphed alarming rumour to his Rangoon principal. Latest news from Mandalay gave no sign of probable troubles.'"

Lieutenant M. K. Brady, Royal Engineers, has been offered, and has accepted, the appointment of Inspector of Light Marines on the Bahamas, vacant by the death of Captain J. Simpson.

The work of transforming the uniforms of the Volunteer Rifle battalions from grey to scarlet is making steady progress. Within the last year or so, eight regiments have adopted the "National colour," viz., the 1st Aberdeen, 1st Berks, 2nd Cheshire, 1st Inverness, 1st Shropshire, 2nd Sussex, 1st West York, and 9th West York. The numbers now stand as follows, viz., in scarlet, 104 battalions; in green, 56; in grey, 46. Five years ago the numbers were, scarlet, 64; green, 63; grey, 79. Thus it will be seen that in five years 7 green and 33 grey battalions have changed to scarlet.

In August, 1782, his Majesty's commands were conveyed to the regiments of the Line, then 70 in number, directing them to assume county titles, and in order to facilitate the procuring of recruits, to cultivate a connection with that division of the country. This order was communicated to the different regiments in a letter from Field-Marshal Conway, Commander-in-Chief, of which the following is a copy:

> "London, August 31st, 1782.
>
> "Sir,—His Majesty having been pleased to order that the regiment of Foot which you command shall take the county name of ——— Regiment, and be looked upon as attached to that division of the county, I am to acquaint you it is his Majesty's further pleasure that you shall in all things conform to that idea, and endeavour, by all means in your power, to cultivate and improve that connection, so as to create a mutual attachment between the county and the regiment, which may at all times be useful towards recruiting the regiment; but as the completing of the several regiments, now generally so deficient, is, in the present crisis, of the most important national concern, you will on this occasion use the utmost possible exertion for that purpose, by prescribing the greatest diligence to your officers and recruiting parties, and by every suitable attention to the gentlemen and considerable inhabitants; and as nothing can so much tend to conciliate their affections as an orderly and polite behaviour towards them, and an observance of the strictest discipline in all your quarters, you will give the most positive orders on that head; and you will immediately make such a disposition of your recruiting parties as may best answer that end.—I am, &c., H. S. Conway.—To General ——, Colonel of the —— Regiment of Foot."

There are now seventy pairs of linked battalions, the regiments from one to seventy, with one or two exceptions, retaining the same titles they received in 1782. If it should be found to be necessary to amalgamate the linked regiments, it would be better, we think, that the seventy senior battalions should retain their present designations, the junior battalions becoming second battalions of these old corps, than that both should be called by new and unknown titles. If this suggestion was acted upon, the Line, with thirteen exceptions, would stand as it did in 1782, each regiment having two battalions, instead of one. The centenary of the old titles, August 31, 1882, would be a fitting opportunity for any such change to be carried out. If the service is too short with the colours to promote *esprit de corps* regimentally, the only way is to try and promote local *esprit de corps*, by such means as is expressed in Field-Marshal Conway's letter.

The other day, 60 commissions were offered for competition among Militia officers. After the close of the examination, it was found that there were so many vacancies, that 30 of the best of the unsuccessful candidates were also gazetted. Nevertheless, there remained 68 Militia officers duly qualified, but at the bottom of the list, who were left out in the cold. It would be a graceful and well-merited compliment to the Militia force if commissions were also to be given to the 68 officers in question. They have all practical knowledge of their profession, and could, in case of necessity, at once enter on their duties, which is not the case with the passed Sandhurst cadets. Many of these 68 Militia officers, moreover, will not have another chance of getting into the Line, and it seems hard to baulk their military zeal. Of course, if there are no vacancies available, or likely to be available, within the next few months, there is nothing more to be said; but this can hardly be the case. Since the 90 commissions were given, several vacancies have occurred in Afghanistan, and it is but reasonable to expect that not a few officers will, before the close of the year, succumb to the wounds and hardships of the recent campaign.

The *Standard* correspondent at Candahar gives a by no means encouraging account of the state of affairs in Afghanistan. We are told that continued rumours are current in the city to the effect that Persian and Turcoman assistance is being given to Ayoub to continue his preparations for another campaign, his chief want at present being money. The Mollahs are hard at work exciting the population, and denouncing downheartedness and want of confidence. Ayoub is regarded as a popular hero, returned from having gained a great victory over the Kaffirs. His defeat is regarded as a mere trifling incident, by the side of the glory of his victory.

The Wala-Wynaad Indian Gold Mining Company, Limited, has been incorporated, with a capital of £75,000, in 75,000 shares of £1 each, for the purpose of purchasing the freehold and leasehold property, known as the Kareempoyah estates, comprising about 500 acres of land, situate under the Moorkooty and Koondah Hills, in the Madras Presidency, and adjacent to the Neilgherries.

The *Times* says:—"A few days ago, as the Duke of Connaught was riding from his residence, Bagshot Park, attended by his groom, to Aldershot, to discharge his military duties, he met with rather a serious accident. On arriving at Jolly Farmer's Hill, his horse suddenly shied at a heap of ashes by the side of the road, throwing his Royal Highness right over the animal's head. The groom at once rendered assistance, and after a short time the Duke was able to resume his ride to the camp. His Royal Highness returned to Bagshot Park in the evening with the Duchess, who had driven over to the camp in the course of the afternoon. An eye-witness of the accident states that but for the protection afforded by his cocked hat, the consequences would, he believes, have been serious."

THE RUSSIAN PACIFIC FLEET.

There seems to be no longer any doubt that Russia is bent upon taking the most aggressive measures towards China, and that she will commence open hostilities as soon as she can concentrate her forces. Her Pacific fleet has been considerably strengthened, forming now a very powerful Naval force, and is placed under the command of Admiral Lessovsky. That officer has been appointed to the post on account of his having been formerly stationed for some time in Chinese waters, in charge of the frigate *Diana*, and is thus supposed to know the coast well. The squadron under his command is composed at present of the following ships:—Two ironclad frigates: The *Minin*, an old ironclad, reconstructed two years ago, of 5,740 tons displacement, 5,600 effective (800 nominal) horse-power, attaining a speed of fourteen knots, protected by eight inches of iron, armed with four eight-inch, twelve six-inch guns, ten four-pounders, and two mitrailleuses, and manned by a crew of forty-six officers and 501 men; and the *Kujas Poscharskij*, a casemated ship of 4,506 tons, built in 1867, protected by an armour of only four and a half inches in thickness, with engines of 2,835 effective (600 nominal) horse-power; she attains a speed of 10·57 knots an hour, and carries ten eight-inch guns, eight four-pounders, and two mitrailleuses. Her crew consists of forty-five officers and 466 men. The ironclad battery *Netronjmenja*, built in 1864, with 1,140 effective (450 nominal) horse-power, running eight knots an hour, of 3,370 tons, protected by four and a half-inches of armour, and having a crew of twenty officers and 374 men, is also to be despatched to China. She carries sixteen eight-inch guns, one sixty-pounder, four four-pounders, and two mitrailleuses. There are, besides, five screw frigates:—The *Rossija*, a cruiser, built in 1872 for commercial purposes, which distinguished herself in the last war by the capture of the Turkish transport *Mersina*. She has a tonnage of 4,200 tons, engines of 500 nominal horse-power, a crew of twenty officers and 380 men, and is armed with eight eight-inch and two six-inch guns, two six-inch rifled mortars, two nine-pounders, four four-pounders, and two mitrailleuses. It should be mentioned that the many varieties of calibre are evils from which most Russian men-of-war suffer. When the *Rossija* started on the 2nd July from Cronstadt to China, she carried, besides, 1,000 men for landing, twenty officers, 8,000,000 cartridges, 10,000 submarine mines and torpedoes, and two torpedo-boats. *St. Petersburg*, which was bought in 1878 by the society for establishing a cruiser fleet, has a displacement of 3,098 tons, engines of 800 nominal and about 3,500 effective horse-power, attains a speed of fourteen knots, and is armed with an eight-inch, two seven-inch, four six-inch, one nine-pounder, four four-pounders, and two mitrailleuses. The *Moscov*, of the same armament, speed, and engine-power, but 98 tons smaller, belongs, besides the *Nishnej-Novgorod*, to the vessels bought two years ago for the Volunteer fleet. Also the *Asia*, with two seven-inch and four six-inch guns, four nine-pounders, and one mitrailleuse. Her crew consists of twenty-six officers and 236 men. (It is said that the sister-ships *Europa* and *Africa*, as well as the new corvette, *Jaroslav*, of the volunteer fleet, are to leave Cronstadt for Eastern Asia.) The Pacific fleet includes further five screw clippers. The *Abrek*, built in 1860 for the Siberian fleet, of 360 nominal (about 740 effective) horse-power, 1,069 tons burthen, a crew of eleven officers and 149 men, and an armament of five twelve-centimètre guns, two nine-pounders, and two four-pounders. The *Dshigit* and *Krejser*, built in 1876 and 1875, are each armed with three six-inch guns, four nine-pounders, and two mitrailleuses, of 1,334 tons displacement, 1,072 tons burthen, have engines of 250 nominal, or 1,500 effective horse-power, and a speed of 12·34 knots. The crew of the *Dshigit* consists of twenty officers and 174 men, that of the *Krejser* of eighteen officers and 148 men. The latter, however, is said to have completed her crew on April 12 at Aden. The *Najesdnik* and *Rasbojnik* are sister ships to the preceding ones, the former with twenty-one officers and 169 men, and the latter with twenty-two officers and 168 men. They have besides two four-pounders on board. (It is reported the clippers *Strelok*, *Plastun*, and *Zabijaka*, similar vessels to the preceding ones, will shortly be despatched to China.) Other vessels of the Pacific fleet are:—Three paddle steamers: *America*, in built 1856, belonging to the Siberian Fleet, of 555 tons and 140 nominal horse-power, and with a crew of eleven officers and eighty-seven men; *Amur*, built in 1857, with five light guns, of 100 nominal horse-power and 190 tons, and with a crew of five officers and thirty-two men; *Sujfun*, a boat built in 1870, of only 20 horse-power, and with a crew of five officers and eight men. Two transport steamers: *Japonetz*, twenty-two years old, of 1,472 tons, with 300 nominal horse-power, two twelve-centimètre guns, and a crew of twelve officers and 118 men; *Mandschur*, of the same age, 816 tons burthen, with 150 horse-power, two twelve-pounders, and twelve officers and 105 men. Five gun-boats: *Sobolj*, constructed 1863, of 80 nominal (300 effective) horse-power, 340 tons burthen, 456 tons displacement, and seven officers and 83 men; *Morsch*, resembling the last one, but three years older; *Hornostaj*, like the *Sobolj*; *Nerpa*, only four years old, with the same armament, but of only 380 tons, and 60 nominal horse-power; *Vladivostok*, an entirely new river steamer, built for the Volunteer fleet. The screw schooner *Wostok*, dating from 1852, is armed with two twelve-centimètre guns, has a burthen of 210 tons, 40 nominal horse-power, and a crew of six officers and 40 men. Three small harbour steamers: *Kit*, built in 1864, 26 tons, 12 nominal horse-power, and manned by five men; *Poljsa*, two years older, 12 tons, 10 horse-power, and manned by four men; *Nadeshda*, built 1854, eight tons, 16 horse-power, manned by four men. The sailing schooner *Farwater*, constructed in 1862, has 60 tons, three officers, and 13 men; the sailing boat *Kuegda*, ten years older, 42 tons, one officer, ten men. The brig *Kuril* serves for training purposes. According to another source, the yacht *Zarcona* is also to be sent to China. She was built in 1874, has a burthen of 734 tons, and with 800 effective (130 nominal) horse-power, attains a speed of 14 knots. She is armed with four 12-centimètre guns, and has a crew of 7 officers and 62 men. Of the 140 torpedo-boats possessed by Russia, eight are said to be in Chinese waters, including the two carried by the *Rossija*. Of the above vessels, three ironclads, as well as the *Rossija*, *Nishnej-Novgorod*, *Asia*, *Rasbojnik*, and *Najesdnik*, are on their way to China; *Petersburg*, *Moscov*, *Vladivostok*, *Dshigit*, and *Krejser* have been stationed for some time in Chinese waters; all the remaining ships belong to the Siberian fleet. When all the Russian ships on the way to China have arrived at their destination, their naval force will consist of 38 ships, armed with 343 guns,—viz., 41 8-in. guns (164-pounders), 10 7-in. guns (110-pounders), 42 6-in. guns (80-pounders), 33 12-centimètre guns (30-pounders), 5 12-pounders, 32 9-pounders, 42 4-pounders, 32 mitrailleuses, one 60-pounder, and two rifled 6-in. mortars (76-pounders). Fit for active operations are only 23 ships, with 235 guns, and crews numbering about 450 officers and 4,400 men. Should the reinforcements mentioned above—two frigates, one corvette, three clippers, one yacht—really be started, this would bring the strength of the Russian naval force in Eastern Asia up to 30 ships, with 302 guns (of which 160 are heavy) and 6,200 men (among them 580 officers).

Reviews.

The Naval Brigade in South Africa. By Fleet Surgeon Norbury, C.B., R.N. (Sampson Low, Marston, and Co.)

The author of this work was afforded many opportunities of becoming well versed in the habits and customs of the Kafir tribes, their country, and their wars. He served in South Africa during 1877-8-9, and held the appointment of principal medical officer of the Naval forces that were landed there. Although a goodly array of books has been already published on the subject of the war in Zululand, there remains a great deal which has not yet been told, and which is full of interest. In the first portion of the volume, the author introduces his readers to the Kafir tribes, and describes, with much minuteness, their customs and habits; he does so in a manner which will at once attract attention and make many readers half fancy that they must have lived for years among the Kafirs, as they appear to have suddenly become so well acquainted with the *vie intime* of these peculiar people. During the course of this portion of the book, several anecdotes are related and many scenes described which are highly amusing. The author proves himself to be a man of keen observation, and at the same time to be quite as competent as others to see the ludicrous side of an adventure, and to tell it with effect. We extract one out of many amusing bits, which relates to the mode in which children and young girls are frightened by the old Zulu women. The mode resembles somewhat that practised in England, but it is more elaborate. The Amanzima, or men-eaters, produce the most terrible effect. They are described as huge heavy beings, like men, who prowl at night or during the misty weather. Behind their shoulders they are furnished with a large, fleshy basket, in which they place the children they may catch. They then walk away to a precipice, which opens and lets them into a cave, where they cook the children. The second part of Surgeon Norbury's work treats of the Transkei and Zululand, his remarks on which possess considerable interest. Galekaland or Transkei offers many advantages to the agriculturist. The soil is generally good. Extending to a considerable depth, it bears the plough well, and, under proper care, could scarcely be excelled in point of productiveness, while its verdure is so magnificent as to entitle it to be called the garden of South Africa. The climate is delightful during the greater part of the year, the heat sometimes oppressive in summer, rarely, however, exceeding 82 degrees. In the author's opinion, it is a most healthy country, and on proper sites for residences being selected would prove a most desirable resort for persons suffering from certain pulmonary diseases. To the naturalist, Galekaland presents exceptional attractions, both its *fauna* and *flora* are numerous and varied,—its butterflies magnificent, and its variegated moths of a huge size. Moreover, game is abundant. Its speciality, however, seems to be serpents, from the terrible puff-adder down to the beautiful little grass-snakes. These are not pleasant companions to meet with when wandering about, more especially the small whip snake, an irascible little fellow, which will show fight on the slightest provocation. The python grows from eight to twenty feet, and is in some cases as thick as a man's thigh. Woe to the native who kills one; his life will never be safe, for there is a wide-spread superstition that if a man can drink the gall of a person who has slain a python, it renders him very courageous. Consequently, the unhappy individual is always being dogged by some chief, intent on obtaining his liver. We cannot pause to enumerate the wonderfully beautiful ferns, including the "tree fern," which the author describes, but recommend those whose tastes lie in that direction to consult Surgeon Norbury's book. Having fully described the Kafir country, the author narrates some of the most startling incidents of the Kafir wars of 1877-78. The term "Kafir war" has, no doubt, become a familiar one in England. They seem to have been always cropping up,—in 1819, 1835, 1846, 1850, they asserted themselves, and very nearly so, in 1856. The author attributed the prolongation of these wars to two circumstances, viz., the complete freedom which we permitted the enemy's women to enjoy, and the liberty which we accorded to the so-called loyal Kafirs:—"The women spent their days in collecting food, and, where possible, ammunition, which they conveyed to the men by night, being intimately acquainted with every path through the bush. They were also invaluable as spies, and in many other ways. It is impossible to starve an enemy into subjection with such a multitudinous and indefatigable commissariat staff." Having fully exhausted the subject of the Kafir wars, the author gives a graphic account of the operations of the Naval Brigade against the Zulus, premising it with a brief history of that nation, and of the state of affairs which conduced to bring about that war. Several books have been recently written on the war, which seems to be by no means over yet, in Zululand, and the authors naturally enough differ in many respects from each other as to its cause, the mode in which it was conducted, and its probable future effects. Surgeon Norbury does not altogether confine himself to the operations of the Naval Brigade against the Zulus, but gives many interesting particulars on the general conduct of the war. He, however, with natural pride, concludes his very interesting narrative by enumerating the services of the Naval Brigade, which was landed in November from H.M.S. *Active*:—"The part they have borne throughout the Zulu war is one which they can look back upon with just emotions of pride and satisfaction. They have shown that the British seaman can serve his country as well upon shore as upon sea. They have, under the trying circumstances of an arduous campaign in a savage land, been cheerful, unrepining, and courageous. The *Active's* men were the first to reach the Lower Tugela. It was they who watched and kept the border for a few weeks preceding the advance. They fought victoriously at Inyezane, and they were cooped up in Etshowe during the long and weary period of its isolation. Their only regret is that they were not allowed to march upon Ulundi, and had no share in that crowning episode of the war." There is a great deal of instructive information to be found in this book. It is written *con amore*. Whatever may be the reception it will meet with from the public generally, there can be little doubt that the author's friends of the "Naval Brigade" will justly appreciate it.

An Elementary Treatise on Geometrical Drawing. By Rev. J. Robson, LL.D. (Relfe Brothers.)—Students who are preparing for the preliminary examination for entrance into Woolwich or Sandhurst will find this a very useful manual, inasmuch as geometrical drawing is one of the compulsory subjects. Numerous examples are given, which have been selected for the greater part from the Army examination papers. The student cannot fail to derive benefit from the use of this manual.

Angel's Advanced Geometry. (W. Collins, Sons, and Co.)—This work is intended as a text-book for students wishing to gain such a knowledge of the principles of practical geometry as may be useful to them in the drawing-office or the workshop, and may be regarded as a sequel to the elementary treatise already published, though at the same time it is complete in itself, and thoroughly suitable for a beginner. The general arrangement has been designed to cover the courses of study pursued at the Royal School of Mines and other high-class institutions in England, as well as to embrace the major portion of the two higher stages in the syllabus of the Science and Art Department. The second part of this important work, on "Practical Plane Geometry and Projection," presents a large volume of finely-executed engravings, admirably calculated to meet the requirements of the higher stages in the Science and Art Department syllabus. Altogether, we find in Mr. Angel's work evidence of sterling merit, which should entitle it to the consideration of the principals of such institutions as the Royal Military Academy, the Engineering College at Cooper's Hill, and others.

USE MARGERISON'S REGISTERED WHITE WINDSOR SOAP, PRESTON.—The best and cheapest Soap in England for washing clothes, or any household purpose. In pounds, 4½d; squares, 2d. Ask for MARGERISON'S Soap, and see that the word MARGERISON is on every bar, as there are so many worthless imitations. Sold at Stores.

I MUST NOT MISS THIS OPPORTUNITY OF COMMENDING THE "PERFECTED" COD LIVER OIL, lately introduced by Messrs. Allen and Hanburys. It is so pure and tasteless that, when oil will agree at all, this is sure to do so.—"On Loss of Weight, Blood-Spitting, and Lung Disease" (New Edition),—by Horace Dobell, M.D., Consulting (late Senior) Physician to the Royal Hospital for Diseases of the Chest, &c. See also the opinions of the *Lancet*, *British Medical Journal*, *Medical Times*, *Practitioner*, &c. All who have difficulty in taking Cod Liver Oil should insist on having Allen and Hanburys' Perfected Oil. Sold only in imperial quarter-pints, 1s 4d; half-pints, 2s 6d; pints, 4s 9d; quarts, 9s. Trade-mark, a Plough. Of all Chemists.

The Army.

6th Dragoon Guards. Capt. Fife is under orders to return home from India, to assume command of the depôt at Canterbury.

7th Hussars. Brevet Lieut.-Col. M'Calmont and Lord St. Vincent left Kurrachee for Candahar on the 10th ult.

8th Hussars. The regiment arrived at Rawul Pindee last week from Afghanistan, and relieved the 10th Hussars. Capt. Rawlinson and Lieut. Fell are under orders to relieve Capt. Field and Lieut. Davidson at the depôt at Canterbury.

9th Lancers. Copy of Rawul Pindee Division Order by Lieut.-Gen. Sir F. F. Maude, V.C., K.C.B., dated Murree, Aug. 12, 1880:—"It is with heartfelt regret that the Lieutenant-General commanding the Division announces the death of Lieut.-Col. R. S. Cleland, 9th Lancers, at Murree on the 7th inst., after a painful and lingering illness of eight long months, which he bore with the utmost patience and resignation, of wounds received in action, when gallantly leading his regiment against overwhelming numbers of the enemy near Cabul on Dec. 11, 1879. In his death, not only have the ever glorious 9th Lancers lost a gallant soldier worthy of being at the head of such a distinguished regiment, but the Army and country an officer whose sole aim was unswervingly to do his duty. Sir Frederick Maude feels that although the gallant 9th Lancers are at the present moment actively employed in Afghanistan, and therefore not under his command, he may be permitted, owing to his connection with the regiment since 1877, and that the depôt is still in his division, to record these few words in memory of one for whom he entertained the highest regard, and whose loss he mourns as that of a brother. (True copy.)—F. F. Maude, Lieutenant-General commanding Rawul Pindee Division." The following Field Force Order will be read with interest by the friends of the lamented officer:—"Lieut.-Gen. Sir F. Roberts is sure that all ranks of the late Cabul Field Force will share the regret he feels at the death of Lieut.-Col. Cleland, 9th (Queen's Royal) Lancers. On Dec. 11 last, in the Chardah Valley, this officer was dangerously wounded whilst gallantly leading his distinguished regiment against the enemy. From the effects of that wound Lieut.-Col. Cleland died at Murree on the 7th inst., after many months of severe suffering. By the death of Lieut.-Col. Cleland Sir F. Roberts, in common with a large number of officers and soldiers, has lost a valued friend, whilst her Majesty's Army has been deprived of the services of a most promising and gallant officer. The Lieutenant-General desires to express the deep sympathy he feels with the officers and men of the 9th Lancers in the personal loss they have sustained." Capt. Chisholme, now in England, has been detached to take command of the depôt troop for two years.

10th Hussars left Rawul Pindee last week for Lahore, to join the Viceregal camp, having been relieved by the Hussars from Afghanistan.

12th Lancers. Lieut.-Col. Tait is about to retire from the command. Lieut. Newton has joined head-quarters in India, on exchange from the 20th Hussars; and 2nd Lieut. Learmonth, on transfer from the 6th Dragoons.

13th Hussars. Capt. Maunsell has been appointed to the 6th Carabiniers, on entering the Pay Department.

14th Hussars. 2nd Lieut. Staunton joined headquarters in India last month, on appointment.

15th Hussars. 2nd Lieut. Manners joined headquarters in India last month, on appointment. We learn from Quetta that the regiment lost alone 30 men and 12 horses on the march there from Meerut.

ROYAL ARTILLERY.

In memory of the late Lieut.-Col. Picard, V.C., a brass tablet has just been placed in the Rutland Chapel of St. George's Chapel, Windsor Castle. It is in close proximity to that of the late Sir Charles Phipps, and bears the inscription:—"To the memory of Lieut.-Col. Arthur F. Picard, V.C., C.B., R.A., Assistant-Keeper Privy Purse and Assistant Private Secretary. Born April 12, 1841; died March 12, 1880. This monument was erected as a tribute of respect by her Majesty the Queen, his Royal Highness the Duke of Connaught, and his Royal Highness Prince Leopold. Not slothful in work; fervent in spirit." The monument is very handsome, the design being in strict accord with the architecture of the chapel.

The following officers arrived in India by H.M.S. Himalaya and Malabar last month, to join their respective batteries, viz.:—Majors T. C. Martelli, 4th Brig., J. A. S. Colquhoun, 8th Brig. (late Bengal), L. H. S. James, 5th Brig. (late Bengal), A. Swinton, 1st Brig. (late Bengal), and J. R. King, 8th Brig.; Brevet Major J. Alleyne, C Brig. R.H.A.; Capts. W. P. Georges, 4th Brig., and W. A. Eden, 5th Brig.; and Lieuts. W. B. Fletcher, A Brig. R.H.A., C. W. Kellie, 8th Brig., G. S. Mellish, 9th Brig., E. T. Young, 9th Brig., C. T. Head, 8th Brig., F. H. Crampton, 8th Brig., and N. W. H. Du Boulay, 8th Brig.

Lieut.-Col. A. R. Wragge, late of the regiment, died at East Down Park, Lee, on the 3rd ult., aged 58 years. The deceased served at the siege of Sebastopol, from Dec. 1854, to May, 1855, in the trenches with the siege train and at the bombardment in April (medal with clasp and Turkish medal). He joined the Army, March 19, 1839; became 1st lieut., March 18, 1841; capt., May 30, 1848; major Dec. 26, 1859; lieut.-col., April 1, 1860; and retired upon half-pay, May 2, 1860; and subsequently retired altogether from the Service.

Her Majesty has been pleased to allow Major Evelyn Baring, C.S.I., to accept and wear the insignia of First Class of the Turkish Order of Medjidie.

H.M.S. Tamar sailed from Malta on Wednesday, having previously embarked Nos. 13 and 14 Batteries 10th Brig., for conveyance to Gibraltar.

Capt. W. C. W. Arbuthnott, 9th Brig., has been selected to succeed Capt. G. A. Beaty-Pownall as Adjt. of the Argyll and Bute Artillery Militia.

Lieut.-Col. S. Penny, 10th Brig. (late Madras), succeeds Col. L'Estrange in command of the Artillery in Guernsey and Alderney.

Lieut.-Col. H. le Cocq, B Brig. R.H.A. (late Bombay), proceeds at the close of the year to the Bengal Presidency.

Lieut. W. A. Plant, B Brig. R.H.A., left Candahar on the 18th ult., invalided.

A correspondent writes from Quetta, on the 8th ult.:—"The new Mountain Battery (No. 5 Baty. 8th Brig.), under the temporary command of Capt. Brown, R.A., arrived here on the 29th ult., without, I am informed, losing a man or mule by death. Capt. Brown has gone to Killa Abdulla with two guns, and another officer of the same battery to Gulistan with two guns. Lieut. Hopkins, R.A., has been appointed adjt. to Lieut.-Col. W. Carey, commanding the Royal Artillery here. There is some talk of expeditions against the Murrees and other budmashes. Should the report be true, the Mule Battery now up here will be useful, for these people live in places where wheeled artillery is of no use whatever."

The following divisional order has been issued at Aldershot:—"The General Officer Commanding the Division is compelled to call the most serious attention of the Royal Artillery to the deplorable occurrence in the Long Valley on Oct. 1, which resulted in the loss of life of one man and injury to two others. Sir Daniel Lysons fully understands the spirit of emulation which first prompted competition in rapid firing, but when emulation leads to reckless irregularity and utter disregard of all drill regulations, it can be considered in no other light than a most discreditable want of discipline and control; and he must remind the officers, non-commissioned officers, and men, that smartness in drill does not consist in mere rapidity, but in that perfection in the performance of every detail of the regulations which has heretofore been characteristic of their distinguished corps."

The *Standard* says:—"Major J. R. Poole, R.A., has been struck off the active establishment of his regiment by the War Office, having been appointed personal attendant in charge of the captive king, Cetewayo, at Cape Town."

The following master gunners, Coast Brigade, have been awarded medals for long service and good conduct, viz., Master Gunners T. White, 5th Division; D. Reid, W. Mawby, and R. Connelly, 10th Division.

ROYAL ENGINEERS.

The *Irish Times* announces that Col. G. Chesney (late Bengal) is to be appointed a C.S.I., in recognition of his services at the Royal Indian Engineering College. We trust the report may prove true, for the honour was never more fairly earned than it has been by Col. Chesney.

We *(Standard)* are informed that Brevet Lieut.-Col. Beresford Lovett, C.S.I. (late Bengal), is about to proceed to Astrabad as our Consul, in succession to Col. St. John, now on special service in Afghanistan.

Grenadier Guards. A concert was given by the 1st Batn. in the East Day Room, Chelsea Barracks, on Friday last. The programme included, besides glees, choruses, &c., a song, "Sad news from home" (Gilmore), by Serjt. Locke; a song, "For ever and for ever" (F. P. Tosti), by Lieut. and Adjt. Ricardo; overture (pianoforte), "Zampa" (Herold), by Lieut.-Col. Viscount Hinchingbrook; duet, "Life is but a summer day" (Balfe), by Lieut. Ricardo and Mr. Smears; a song, "The Mulligan Guards," by Drill-Serjt. Simpson; a trio, "The Red-Cross Knight" (Callcott), by Lieut. Ricardo, Mr. Smears, and Drill-Serjt. Simpson; pianoforte selections, "The Devil's March" (Suppé), and "The Holly Bush" (D. Godfrey), by Lieut.-Col. Viscount Hinchingbrook.

1st, or Royal Scots. Lieut. Pakenham, a probationer for the Indian S.C., has passed the lower-standard examination in Hindostanee.

2nd Queen's. Capt. Trench and Lieuts. Richards and Robson, 2nd Batn., are under orders to return home from India, for duty with the depôt at Guildford for two years. Lieut. Elverson, 2nd Batn., left Candahar on the 18th ult., invalided.

3rd Buffs. The officers of the 2nd Batn. naturally feel chagrined at so many "brevet" steps having been given to those of other regiments who served through the Zulu war, while, with the exception of the colonel, who got promotion and a K.C.B., no honours or rewards have fallen to them. It will be remembered that the 3rd Buffs was one of the first regiments to take the field, a portion of it was transformed into cavalry, and did good service as such, while the gallant defence of Ekowe, and the several engagements, finishing up with Ulundi, in which the battalion took a part, testify to its noble behaviour throughout the war. Had the regiment come straight to England and marched through London, according to its old established right, with bands playing, bayonets fixed, and colours flying, and entered its old county town of Canterbury in the same manner, public attention would have been drawn to it, and the War Office and Horse Guards authorities would have had honours and rewards ready to bestow; as it is, however, the relief of a regiment from the Straits Settlements necessitated the sending of the 3rd Buffs to Singapore, instead of bringing them to England, and it is only another instance of "out of sight, out of mind." The names of Capts. Forster, Harrison, and Alexander have been mentioned. we understand, as deserving the rank of brevet major, and we should be one of the first to congratulate them on so well merited a distinction.

4th King's Own. Capt. MacCarthy and 2nd Lieut. Tritton have joined the 2nd Batn. in India.

6th Regiment. Capt. St. George, 2nd Batn., has been ordered to return to England from India, to take command of the second depôt company. Pymr. and Hon. Major Westell, 1st Batn., is about to retire upon half-pay.

7th Fusiliers. Major Butler has joined the 2nd Batn. in Afghanistan. We learn from Candahar, on Sept. 18, that Capts. Groube and Manning, and Lieut. Thunder, 2nd Batn., had left that station, invalided.

8th King's. Capt. Dawson, 2nd Batn., has been placed under orders of readiness to return to England from India, to join the depôt.

9th Regiment. Capt. Burton and Lieut. Lombe, 2nd Batn., are about to return to England, for duty at the depôt.

10th Regiment. Capt. Knatchbull, 2nd Batn., has arrived home from Malta. Lieut. Richardson, 1st Batn., is a candidate for the Indian S.C., and proceeded to India last month from Malta to take up duty with a native regiment on probation.

12th Regiment. Lieut. Deane, 1st Batn., at present in England, is under orders to join the depôt companies at Bury St. Edmund's.

16th Regiment. Lieut. Sutton, 2nd Batn., has passed the higher, and 2nd Lieuts. Flood, Vaughan, and Cave the lower-standard examination in Hindostanee. Lieut. Fordyce, 1st. Batn., a candidate for the Indian S.C., arrived at India last month to join a native regiment, on probation.

17th Regiment. Capt. Vulliamy, 1st Batn., is under orders to join the depôt at Leicester for two years.

18th Royal Irish. Capt. Smith, 1st Batn., returns home shortly from India, to join the regimental depôt.

21st Fusiliers. 2nd Lieuts. Swanston and Dawson, 1st Batn., are candidates for the Indian S.C., and have been appointed respectively to the 6th and 12th Madras N.I., on probation.

22nd Regiment. Capt. Sealy and Lieuts. Johnston and Gardner, 2nd Batn., are under orders to return home, to join the depôt at Chester.

23rd Fusiliers. The 1st Batn. arrived at Bombay on the 11th ult. in H.M.S. Malabar from England. The following officers arrived in the Malabar, viz., Col. C. Elgee; Majors Tilly and Williamson; Brevet Major Tulloch; Capts. Hadden, Hutchinson, Taylor, Webber, Mayhew, and Mainwaring; Lieuts. Carey, Evans, Baker, Chapman, Morris, Sir R. A. W. Colleton, Bart., Griffith, Walker, and Dunn; 2nd Lieuts. Lyle, Beresford, and Lysons; Capt. and Pymr. Bampfield, and Qrmr. M'Cormick. The *Times of India* says:—"The well-known goat of the Fusiliers was also brought down. It is the fifth one of its kind, and is a splendid animal, with long snowy hair and curled horns of 2 ft. 9 in. in length. The last goat, which died in 1872, followed the regiment throughout the Indian Mutiny, being led by the same serjeant who has charge of the present one, and he seemed very mindful of his 'ward' when landing it at the Sassoon Docks yesterday. The present animal is of the Cashmere breed, and was presented to the regiment by the Queen in 1872. It is now 13 years old. The regiment went by three special trains from the dock *en route* to Deolalee. The right half-battalion, with band, left at 6 p.m.; the left half-battalion at 7 p.m.; and the baggage guard at 8.30 p.m. From Deolalee they proceed to Serampoor, and then to Chakrata, which is 8,000 ft. above the sea level. It lies at an angle between Simla and Mussoorie, and was constituted a military station in 1869." The Queen has sent a telegram of condolence to Col. R. Hackett, on the death of his brother, Col. T. B. Hackett, who died on the 5th inst. from the effects of a wound in the abdomen, caused by the accidental discharge of his gun while out shooting at Lisnacarry. At the inquest, which was held on the 7th inst. by the coroner for North Tipperary, Mr. Fayle, who accompanied the deceased, together with a boy named Carroll, deposed that at about 4 o'clock they were proceeding before the deceased in a direction which he had pointed out, when in about five minutes after they had left him they heard a shot and a voice call out, "Willy!" He ran and found Col. Hackett lying on his back on the ground. His gun, a double-barrelled breech loader, was lying near him. Col. Hackett said, "The gun went off, and I'm shot in the stomach." He also said he was stooping for the gun when it went off; that his clothes were burning, and that he had not time to extinguish them before the witness came up. He attributed the discharge of the gun to accident. There was no one near Col. Hackett at the time. He was taken into Mr. Dalton Carroll's house, where he died at half-past 11 o'clock on Tuesday night. On examining the gun he found the right barrel loaded and on full cock; it was the left barrel that was discharged. A verdict of "Accidental death" was given. Col. R. Hackett, brother of the deceased, it was who lost his sight while with the 90th Regiment in Zululand. Since his return to Ireland, he received the most devoted attention from the deceased. The remains of Col. Hackett were interred in Lockeen Churchyard, County Tipperary, on the 10th inst.

24th Regiment. Lieut. W. W. Lloyd, 1st Batn., a candidate for the Indian S.C., arrived in India last month to join a native regiment, on probation. The *Standard* says:—"There is a proposal on the part of the officers and late officers to raise a regimental memorial to those gallant comrades who lost their lives whilst fighting under the regimental colours, or who fell victims to disease, whilst on service at the Cape."

25th Regiment. Lieut.-Col. Harvey has assumed command of the 1st Batn. in India, on promotion from the 2nd Batn. Capt. Dixon and Lieuts. Mayne and Turner, 1st Batn., return home shortly from India, for duty with the depôt at York.

30th Regiment. Capts. Cooke and Clowes are under orders to return home from India for duty at the depôt.

31st Regiment. Major Jebb has succeeded Major Bayley at the depôt at Kingston.

34th Regiment. Capt. Richmond is ordered home from India, to fill the vacancy at the depôt.

38th Regiment. Capt. Conor, who lately resigned his appointment as adjutant of the 49th Middlesex Rifle Volunteers, in order to accept civil employment under the Home Office, has applied for permission to retire on a gratuity for the purpose of accepting a civil appointment.

40th Regiment. Capt. Turnbull is ordered home from India, to join the depôt for two years.

41st Regiment. Brevet Lieut.-Col. Haydock has arrived in England from Gibraltar, on leave. Capts. Webb and Torkington are about to retire; Capt. Rudman is about to exchange into the 80th, with Capt. Cole.

43rd Light Infantry. Capt. F. H. Bourne died at Tor Castle, Fort William, on the 5th inst., aged 30 years. The deceased entered the Army, July 15, 1868; became lieut., Jan. 4, 1871; and capt., March 13, 1878. 2nd Lieut. Howell has joined head-quarters in India, on promotion.

47th Regiment. Capt. Stewart, on joining the Pay Department, has been posted to the 11th Hussars.

53rd Regiment. Capt. Bowyer-Lane, who lately retired upon half-pay from the regiment, has been appointed to a majority in the 4th Middlesex Rifle Volunteers.

54th Regiment. Capts. Wilkinson and Wingfield are under orders to return to India, to join the regimental depôt.

57th Regiment. Capt. Wade-Dalton has joined head-quarters at Dublin from the depôt.

59th Regiment. Lieut. Boulderson is a candidate for the Indian S.C., and has been appointed to the 3rd Madras N.I., on probation. "LIX." writes to us from Jhelum, under date Sept. 20:—"Reports calculated to throw discredit on the behaviour of the European regiments at the battle of Ahmed Kheyl having from time to time been circulated, and as the 59th Regt. and one company of the 60th Rifles were the only European infantry actually engaged, in justice to us, I should feel obliged by your publishing the following extract from a letter from Sir Donald Stewart, which has been placed at our disposal:—'There can be no doubt that the line was pushed back, but I never blamed the 59th nor any one, and I am just as well pleased with that regiment as with any in the force, as far as that goes, and I have said so to a reference of Col. Lacy. I have pointed out that in pars. 14 and 15 of my despatch I have praised the whole force, as I unreservedly wished to do; and if it had occurred to me as necessary to name the 59th in par. 15, I should have done so, but in that paragraph I merely intended to describe the position, and did not write for the purpose of bringing in the "Goorkhas and 2nd Sikhs by name."' With reference to the first paragraph in the above extract, we may state that the order to retire came from one of Gen. Stewart's staff officers; this order was carried to the right of the line by that officer, and passed along to the left."

60th Rifles. Lieut.-Col. J. J. Collins, commanding the 2nd Batn., died at Sibi, Afghanistan, on the 8th inst., from dysentery. Col. Collins had commanded his battalion since August, 1878, and was with it throughout the Afghan war, including the occupation of Candahar, the advance on Ghuznee, battle of Ahmed Kheyl, advance on Cabul, and march from Northern Afghanistan to Candahar with Sir Frederick Roberts. He joined the Army, Aug. 25, 1854; became lieut., March 23, 1855; capt., July 19, 1859; brevet major, July 5, 1873; and lieut.-col., Aug. 21, 1878. Major Algar, 4th Batn., will most probably succeed to the command of the battalion. Capts. Blackwood-Price, 2nd Batn., and Frend, 4th Batn., and Lieuts. Walker, and the Hon. C. S. G. Cannings, 4th Batn., are under orders to return to England from India for duty at the depôt.

61st Regiment. Capts. Dickin and Leathem, Lieuts. O'Connell, Grove, and Humphery, and 2nd Lieuts. Tuffnell, Hon. R. French, and Bishop, arrived at Bombay on the 11th ult. in H.M.S. Malabar from Malta.

62nd Regiment. Capts. Jones and Verner and Lieut. Tonge are under orders to return to England from India, to join the depôt at Devizes. Lieut. Clarke, now in England, on leave, has alse been ordered to join the depôt.

63rd Regiment. Capts. Nuthall and Robotham have rejoined head-quarters in India from leave in England.

66th Regiment. The death is announced from Candahar of Major C. V. Oliver, as having occurred there from dysentery. Major Oliver joined the Army, Sept. 8, 1854; became lieut., Feb. 29, 1856; capt., April 21, 1863; brevet major, Oct. 1, 1877; and major, Feb. 24, 1878; and was with the regiment during the recent disaster, when he succeeded in escaping with a remnant of Gen. Burrows's army to Candahar. Brevet Major Stewart will most probably obtain the majority thus rendered vacant. Surg.-Major Preston left Candahar on the 18th ult., invalided. Intelligence comes from Maiwand that numbers of bodies were found buried under a wall, having evidently been thrown over purposely. The bodies of Lieuts. Chute and Olivey were recognised, and 43 other bodies were found in the same place. All have been buried. The brigade will now return. The disappearance of the bodies of the dead appears to be unaccountable.

67th Regiment. Capt. Poole has joined head-quarters in India from leave in England. The *Times'* correspondent at Calcutta telegraphs, on the 10th inst.:—"Cholera still hangs about the troops returning from Cabul. The 67th Regt. had been halted at Hassan Abdul, owing to the appearance of some cases; but the regiment has now been free from the disease for some days."

68th Light Infantry. Major Covey has joined head-quarters in India, on promotion from the adjutancy of the London Scottish Rifle Volunteers. Capts. Tyndall and Woodland are under orders to return home from India to relieve Capts. Stanley and Fulton at the depôt.

73rd Regiment. Capts. Hill and Swiny joined head-quarters last month in India, from leave in England.

76th Regiment. Lieut. Whateley is about to retire by the resignation of his commission. Schoolmaster Collier has been posted to the 29th Regt., at Bombay, and ordered to hold himself in readiness to embark for India.

77th Regiment. H.M.S. Himalaya, with the head-quarters and service companies on board, arrived at Bombay on the 9th ult., from England. The officers who arrived in the Himalaya were Lieut.-Col. Colquhoun; Brevet Lieut.-Col. Bengough; Major Hoskins; Capts. Gatacre, Tickell, Forte, Marryat, Royds, Thornton, Dawson, and Graham; Lieuts. Schuyler (adjt.), Foley, Lumley, Law, Norton, Barnardiston, Lempriere, Savile, Singleton, and Oliver; Capt. and Pymr. Haldane and Qrmr. Hunt; with 39 serjeants and 758 men. The head-quarters, consisting of 450 rank and file with a number of followers under Lieut.-Col. Colquhoun, arrived at Madras by special train on the 16th ult., and were marched into the Fort. The regiment, we hear, is to be located in Fort St. George, only for a few months, when it will be sent to Burmah to relieve the 44th.

78th Highlanders. The regiment arrived at Quetta on the 8th ult., from Bombay.

80th Regiment. Capt. Cole is about to exchange into the 41st Regt. with Capt. Rudman.

81st Light Infantry. Lieut. Borrow has been placed under orders of readiness to return to England from India to join the depôt for two years. 2nd Lieut. Davies joined head-quarters in India last month, on appointment.

85th Light Infantry. Lieuts. Smythe and Bulman are under orders to return home from India to join the depôt for two years.

86th Regiment. Capt. and Brevet Lieut.-Col. Brockman has been granted leave of absence from date of embarkation of his regiment till Dec. 31 next. A correspondent, a General officer, writes:—"I was, indeed, much pleased to notice that in your last week's issue you called attention to the case of the senior captain of this regiment. I had the 86th under my command some short time ago, and I can conscientiously say that I have rarely met an officer more thoroughly deserving than Col. Brockman is of the confidence of those in authority. Always at his post, a painstaking regimental officer, and an old and very distinguished soldier, he richly deserves to occupy some higher position, and it will be an immense pity if so good an officer is allowed to quit the Service a disappointed man. Were I in want of a military secretary, I know no man I would sooner have on my staff. I agree with you that the military authorities ought to keep this officer's claims in view, for I can say conscientiously that he merits better treatment than he has received, if only on account of his attachment to his profession, which it is his aim to show himself worthy of."

91st Highlanders. Major Hollway is about to retire.

92nd Highlanders. Capt. Darvall has been ordered to return home from India to fill the vacancy at the depôt. A correspondent, in an account of Gen. Roberts's action at Candahar, says:—"At 9.15, two guns of C-2 R.A. began shelling Sahibdad, the rest of the battery soon after coming into action, as well as the screw guns placed to the north of the *karez* hill. The enemy responded with rifle fire, while the 92nd and 2nd Goorkhas skirmished towards the village from the right, the 23rd B. N.I. working to the left, with the 24th in support. The village was taken by the 92nd Highlanders and the Goorkhas with a rush, at half-past 10, many Ghazis fighting desperately, and inflicting a severe loss upon our troops. Even when the village had been stormed, the fanatics shut themselves up in rooms, whence some of them were not dislodged until nightfall. Lieuts. Menzies and D. Stewart were wounded in this first attack. Lieut. Menzies was placed in a doolie, and carried into a room out of the sun. A Ghazi, hidden in the room, made a rush, cut down one of the guard, and slashed Lieut. Menzies over the head and on the back. The fanatic was bayoneted before he could do further mischief."

95th Regiment. Lieut. Taylor, a candidate for the Indian S.C., arrived in India on the 11th ult., to join a native regiment, on probation.

99th Regiment. The colonelcy is vacant by the death of Gen. S. Braybrooke, which occurred at 3 Gledhow Gardens, South Kensington, on the 7th inst., at the age of 84. Gen. Braybrooke entered the Army as an ensign in the Ceylon Rifle Regt. on Dec. 17, 1812, and served at the capture of the Kandian territories in 1815, when the King was made prisoner by Gen. Brownrigg, and the complete sovereignty of the island of Ceylon vested in Great Britain. In the suppression of the Kandian rebellion in 1817-18 he was again engaged, receiving his commission as lieutenant in April of the latter year, and being promoted to the rank of captain in March, 1823. He was made a major of his regiment in Feb., 1835, and lieut.-col. in Jan., 1844. In June, 1854, he received the rank of colonel by brevet; was made a major-gen. in June, 1854, and appointed col. of the 99th in Jan., 1866; promoted to be lieut.-gen. in Feb., 1868, and gen. in April, 1875. He was placed on the Retired List in Oct., 1877, on the issue of the New Army Promotion Warrant.

100th Regiment. Capt. Collins and Lieut. Clery are under orders to return home from India to join the depôt companies.

102nd Fusiliers. Brevet Major Shaw is about to retire.

103rd Fusiliers. 2nd Lieut. King, a candidate for the Indian S.C., proceeded to India some time since to join a native regiment, on probation.

106th Light Infantry. Lieut. Purdon, a probationer for the Indian S.C., attached to a native regiment in the Madras Presidency, has passed the lower-standard examination in Hindostanee.

Rifle Brigade. The *Deccan Herald* of the 21st ult. has the following:—"The 1st Batn. Rifle Brigade arrived here yesterday evening. The station was crowded, and so eager were the natives to see the officers and men of the Rifle Brigade, that a large number of them followed the regiment to Ghoreporie. The arrangements in the station compound under the superintendence of Capt. Hore, the brigade-major, were excellent, and the loading of the baggage on camels and mules did not occupy much time, and consequently there was no unnecessary or vexatious delay. There were two bands in attendance to welcome the battalion. The band of the 2nd Batn. 24th Regt. played first, and then the band of the 11th N.I. followed. The officers and men looked remarkably well. There were also a number of ladies and gentlemen in carriages at the station to witness the arrival of this regiment. Lord Edward Clinton drove with Capt. Hore, the brigade-major, and on nearing the entrance into the spacious compound of the Council Hall a number of carriages were seen, with ladies and gentlemen, among whom were his Excellency the Commander-in-Chief and Lady Warre."

1st West India Regiment. Lieut. Lawson, a probationer for the Indian S.C., has passed the lower-standard examination, in Hindostanee.

Ordnance Store Department. The following changes have taken place:—Assist.-Comys.-Gen. of Ordnance G. E. Murray, from Upnor Castle, to York, Northern District, vice C. Ralph, under orders for foreign service; W. B. Le Geyt, Chester, to Woolwich; Deputy-Assist.-Comys.-Gen. of Ordnance J. Stevens, Natal, to unattached; R. F. King, Malta, to unattached; W. Horan, Hong Kong, to Devonport; Qrmr. R. Drake, Devonport, to Bermuda.

Medical Department. Inspector-Gen. of Hospitals Sir W. Linton, K.C.B., M.D., Queen's honorary physician, died at Scarfield, Dumfriesshire, on Saturday last. Sir William preceded the Army to the East in 1854 on a special mission of inspection throughout Roumelia. Served with the Army at Scutari and in Bulgaria; accompanied it to the Crimea, and was present at the affair of Bulganac, battles of Alma, Balaklava, and Inkerman, sortie on Oct. 26, opening of the siege of Sebastopol, and every succeeding bombardment till its fall. He was noticed in Lord Raglan's despatches of Nov. 11, 1854, "for his able exertions, as deserving of being most honourably mentioned" (medal with four clasps, C.B., 4th Class of the Medjidie, and Turkish medal). He entered the Service as hospital assistant, Dec. 9, 1826; became assist.-surg., Jan. 18, 1827; surg., July 2, 1841; surg.-major, March 17, 1848; deputy-inspector-gen., March 28, 1854; inspector-gen., Oct. 1858; and was placed upon half-pay, May 1, 1863. It is said that Surg.-Gen. Innes, lately head of the Department in India, was denied the distinction of K.C.B., because "the medical profession is in excess of its due proportion of K.C.B.'s." The *Indian Daily News* remarks:—"England has come to something when honours are meted out by the numerical proportions in the different branches of the Service. It is not likely that good men will have any ambition to enter the Army Medical Department, if this piece of stupidity is once understood as a rule." The following officers arrived at Bombay on the 9th ult., in H.M.S. Himalaya, from England, viz.:—Surgs.-Major H. M. Macbeth, M. L. White, T. Murtagh, Douglas, and W. Ashton; and Surgs. J. Watson, W. R. Henderson, O. G. Wood, W. C. Grant, C. P. Dwyer, G. G. Flood, C. R. Egan, J. D. Day, and C. A. Webb. Surg.-Major C. A. Innes arrived at Bombay in H.M.S. Malabar on the 11th ult. Deputy-Inspector-Gen. T. Hunter, M.D., surgeon-major on the Half-pay List, died suddenly on the 7th inst., in the Army and Navy Club. Dr. Hunter served in the Eastern campaign of 1854-55, including the battles of Alma and Balaklava and siege of Sebastopol (medal with three clasps, 5th Class of the Medjidie, and Turkish medal). He entered the Army, April, 1834; became surg., July 23, 1844; surg.-major, Oct. 6, 1854; and retired, with the rank of deputy-inspector-gen., July 29, 1859. Deputy-Inspector-Gen. R. Smith, surgeon-major on the Half-pay List, died at Stuttgart, on the 29th ult., aged 72 years. The deceased joined the Service as assist.-surg., Sept. 26, 1834; became surg., Dec. 8, 1845; surg.-major, March 8, 1854; and retired, with the rank of deputy-inspector-gen., Sept. 20, 1860. We learn from India that Surg.-Major Hannah, who was killed in the recent disaster, had but just gone to Naini Tal, on short leave from Allahabad, where he had been attached to B-4 Royal Artillery; he had well earned a holiday by his devoted and unceasing labour during the recent cholera epidemic.

The Auxiliary Forces.

MILITIA.

Argyll and Bute Artillery. Capt. W. C. W. Arbuthnott, R.A., has been selected to succeed Capt. Beaty-Pownall as adjutant.

THE VOLUNTEERS.

Pte. Runtz, L.R.B., writes to the *Daily News* as follows:—"A paragraph appears in your issue of Oct. 14, in which it is stated that 'Pte. Runtz, R.V., has (a Central News despatch says) again refused to accept the Olpmpic Prize of £100.' So many erroneous statements have been imported into this case, that I shall be obliged if you will allow me to say that the value of the Olympic is fifty guineas, not £100, and that the prize not yet having been offered to me, it is not strictly accurate to say that I have 'again refused' it. The court-martial recently held at Gosport has by its verdict declared me to be legally entitled to claim the prize. I have simply written to the Secretary of the National Rifle Association to say that my opinion of the real nature of the score credited to me being unaltered, I would suggest that the prize should be retained by the Association, and the entrance-fees returned to all those who competed for it."

The Indian Army.

[The Editor will be glad to receive Contributions from time to time from Officers of Native Regiments who may desire to render this column interesting to friends in England.]

1st Bengal Cavalry. Col. R. Jenkins, Bengal Cavalry commandant, eldest son of the late Sir R. Jenkins, G.C.B. died at Rawul Pindee on the 9th ult., aged 52 years. The deceased entered the Army, Feb. 20, 1845; became lieut., May 8, 1849; capt., July 22, 1856; major, Feb. 20, 1865; lieut.-col., Feb. 20, 1871; and col., Feb. 20, 1876. He was appointed commandant, April 1, 1876, and had lately resumed command from leave in England.

8th Bengal Cavalry. Surg.-Major E. S. Tandy has been granted leave to England for one year, on medical certificate.

10th Bengal Cavalry. In the *Gazette of India* are published, by direction of the Governor-General in Council, the correspondence and despatches relating to the defeat of a body of Zermottis at Patkao Shana, on July 1, by the Cavalry Brigade of the 3rd Division, Northern Afghanistan Field Force, under the immediate command of Brigdr.-Gen. C. H. Palliser, C.B. The operation referred to reflected the highest credit on the force and upon Gen. Palliser, and this is recognised in very flattering terms by the Viceroy in Council, as well as by the Commander-in-Chief and Sir Donald Stewart. Capt. S. D. Barrow is specially mentioned by Gen. Sir F. Haines in his memorandum to the Governor of India, when sending the despatches of Gen. Palliser. The General says:—"The conduct of Capt. S. D. Barrow is also specially worthy of notice, and Sir Frederick Haines considers that all the officers and men mentioned—indeed, the whole force—deserve the favourable notice of Government." Gen. C. H. Palliser says, in his description of the operations:—"Among the first of the enemy overtaken was a stalwart well-dressed, and well-equipped Afghan, evidently a man of some note, armed with rifle, shield, sword, and knife, to encounter whom rode out Capt. S. D. Barrow, aide-de-camp to the Major-General, whose services had been placed at my disposal as a galloper. In the fight between them, I regret to say, Capt. Barrow received two severe sword-cuts, first on his bridle hand, rendering it useless, and another on the right fore-arm, his charger being also wounded in the neck. The Afghan, already badly wounded by Capt. Barrow, was finally despatched by Sowar Gulam Khan, 1st Punjab Cavalry, and a sowar, Jewand Sing, of the 19th Bengal Lancers (the latter, Col. Yorke's orderly, afterwards killed)." And again:—"I beg specially to notice Capt. S. D. Barrow, Bengal S.C., who up to the time of his being wounded rendered me, throughout the day, valuable service in conveying orders and carrying out the instructions it was necessary for me to give." Gen. Hills in his report recommended Capt. Barrow with others to favourable notice to receive some special reward. "Capt. S. D. Barrow, A.D.C., severely wounded in both arms in a personal encounter with a nephew of Sultan Mahommed, and who up to the time of his being wounded rendered Brigdr.-Gen. Palliser much assistance as an orderly officer."

13th Bengal Cavalry. Surg. W. N. Keefer, from the 20th Bengal N.I., has been appointed to the medical charge of the regiment, vice Surg. G. Watson, M.D., deceased.

19th Bengal Cavalry. Col. P. S. Yorke, commandant, is specially mentioned by Gen. Palliser in his despatch giving particulars of the cavalry action at Patkao Shana, Northern Afghanistan, on July 1:—"I beg to bring to the special notice of the Major-General commanding, for good service performed, Col. P. S. Yorke, commandant, 19th Bengal Lancers, who had two narrow escapes, a bullet passing through his helmet and another grazing his cheek-bone." Surg. W. R. Murphy is also mentioned as deserving "special thanks for his care of and attention to the wounded on the field, often at much risk to himself from straggling and skulking Afghans." Gen. Palliser goes on to say,—"Col. Yorke, commandant, 19th Bengal Lancers, mentions Capt. G. M. Abbott, officiating second-in-command, who commanded the advanced guard, and eventually the scouting party (I would beg to add the above duties were performed to my entire satisfaction); Lieut. S. D. Gordon, the officiating adjutant, as particularly forward in the pursuit, killing several men to his own sword; Surg. W. R. Murphy, in medical charge of the regiment; Jemadars Manawar Khan and Khan Mahommed Khan." Lieut. E. A. Young has arrived in England from India. Lieut. Young was engaged in the action at Ali Kheyl, and was wounded in no less than twelve places. He has come home on sick-leave, and the Government of India, as a special case, granted a free passage to a soldier to attend upon him on the voyage.

4th Bengal N.I. The Lahore paper says:—"The little expedition under Major Douglas, of the 4th Bengal N.I., against the Murrees, who raided upon Mal and threatened Mittri, appears to have been very successfully conducted. His detachment of 200 men of the 3rd and 4th N.I. reached Mittri at 4.30 p.m., and marched for Mal within an hour afterwards, reaching Mal about 8.30 p.m. A little after midnight the troops pushed on, catching up the Murrees in their camp at 6 a.m. They dispersed in every direction at the first volley, and were pursued over the hills by our sepoys for a couple of miles. The fugitives fired a few shots, but hurt no one. Their camp was completely surprised, and a quantity of arms, cooking utensils, a large number of cattle, sheep, and a few ponies were taken. The detachment marched twenty-four miles in twelve hours."

8th Bengal N.I. Lieut. W. G. Mansel has passed the lower standard examination in Persian.

15th Bengal N.I. Lieut. R. C. Hadow, wing-officer, has been appointed qrmr., vice Abbott, promoted.

16th Bengal N.I. The following has appeared in Indian General Orders:—"The Right Hon. the Governor in Council has much pleasure in directing the publication of the following correspondence regarding the arrangements made by Col. W. Pierce, commanding 16th N.I., for the defence of Kuch, and the results of an attack made upon that post by a body of Murrees and Ghazis:—'No. 536-A.—Field Operations.—Adjutant-General's Office, Poona, Aug. 27, 1880.—From the Adjutant-General to the Secretary to Government, Military Department.—Sir,—In forwarding for the information of Government the accompanying communication (with enclosure) from the General Officer commanding Second Division, Candahar Field Force, reporting the arrangements made by the officer commanding 16th Regt. N.I. for the defence of Kuch, and also the results of an attack recently made upon that post by a body of 2,000 Murrees and Ghazis, I am directed to convey the Commander-in-Chief's satisfaction at the excellent arrangements made by Col. Pierce to defend the position, a duty, however, which was only to be expected from an officer of Col. Pierce's rank and experience, whose system of discipline, as maintained in the 16th Regt. N.I., has now borne its fruit in the gallant conduct and coolness under fire of the men of that regiment.—I have, &c., A. Wardrop, Lieut.-Col., officiating Adjt.-Gen.'" A special correspondent of the *Times of India*, writing from Kuch on Aug. 30, says:—"When we advanced at 6 a.m. (on the 16th) we saved five. Lieut. Seymour, of the 16th N.I., got surrounded at the commencement of the fight in the cattle lines where the attack began; he ran a man through, and the enemy only ventured to come one by one, giving a cut at him and running back. He tried to get back to his men and found he was entangled in a cattle line, and while disentangling himself was hit a heavy blow on his bare head, which cut it open, but he got free and cut his way through back to the men. On the 17th we attempted to reach Kuch village, but the enemy were too strong and we had to fall back; but on the 19th a party of two hundred rifles, with Major Newport, Capt. Mosley, and Lieut. Seymour attacked and burned Kuch village, two miles off, and Amadoon, five miles off, fighting the whole way out and back without a man being hit, and killing and wounding about fifty of the enemy. Several of our men had very narrow escapes."

17th Bengal N.I. Lieut.-Col. R. A. Wauchope, second-in-command, 14th Bengal N.I., has been appointed officiating commandant during the absence on furlough of Lieut.-Col. R. J. Walker.

20th Bengal N.I. Surg, W. E. Griffiths has been appointed to the permanent medical charge, vice Surg. Keefer, transferred to the 13th Bengal Lancers.

25th Bengal N.I. Major J. J. N. Steel, wing-commander, has been granted leave to England for one year and 182 days.

1st Central India Horse. Major A. J. Bannerman, second squadron-commandant, has been granted leave to England for fifteen months, on medical certificate.

Corps of Guides Cavalry. Brevet Lieut.-Col. G. Stuart, commandant, has been granted leave to England for one year, on medical certificate.

Corps of Guides. Lieut. H. W. Hughes has passed the lower-standard examination in Persian.

1st Hyderabad Cavalry. Lieut. G. Adye, adjt., on detached duty at Cabul, has been attached for duty with the 15th Sikhs, "the Soodianah Regt.," 3rd Infantry Brigade of Gen. Sir F. Roberts's force, proceeding to Candahar.

1st Punjab Cavalry. The Commander-in-Chief in India in forwarding to the Government of India the despatches with reference to the Cavalry affair, under Brigdr.-Gen. Palliser, C.B., at Patkao Shona, Northern Afghanistan, on July 1 last, says:—"His Excellency considers that great credit is due to Brigdr-Gen. Palliser and the troops engaged, and desires me to bring to special notice the names of Major J. R. B. Atkinson, 1st Punjab Cavalry, and Capt. L. T. Bishop, 2nd Punjab Cavalry, whose conduct was admirable, affording a brilliant example of squadron leading." Lieut.-Col. C. S. Maclean, commandant, is also specially mentioned by Gen. Palliser, and brought to notice for any reward which it may be possible to confer upon him for his conduct in the action. The following are also brought to notice:—Capt. D. S. Cuninghame; Lieut. E. D. J. O'Brien, 40th Foot, attached; Ressaldars-Major Mahommed Ali Khan; Mir Alam Khan; (Woerdi Major) Salim Khan; Jemadar Hak Newaz Khan; Kot-Duffadar Karam Khan; Duffadar Cheyt Sing; Sowars Jagat Sing and Sirbuland Khan. Surg. P. F. O'Connor is further mentioned as "deserving of special thanks for his care and attention to the wounded on the field, often at much risk to himself from straggling and skulking Afghans."

2nd Punjab Cavalry. Gen. Palliser, in his despatch giving particulars of the Cavalry affair at Patkao Shana, Northern Afghanistan, on July 1 last, reports that "Col. T. G. Kennedy, C.B., commanding the 2nd Punjab Cavalry, particularly mentions the spirited leading of his squadron, throughout the day, of Capt. L. T. Bishop, and the conduct of the senior native officer present, Ressaldar Jowahir Sing, which was all that could be desired." Col. T. G. Kennedy, C.B., commandant, is specially mentioned by Gen. Palliser, "good service he performed."

3rd Punjab Cavalry. Capt. C. C. Egerton has passed the lower-standard examination in Persian.

4th Punjab Cavalry. Surg. C. P. Costello has been granted leave to England for two years, on medical certificate.

5th Punjab Cavalry. Major H. M. Pratt has passed the lower-standard examination in Persian. Lieut. G. Pycroft died at Edwardesbad, Bunnoo, East Indies, on Aug. 28.

3rd Sikh Infantry. Surg. T. Moloney, M.D., has been granted leave to England for one year, on medical certificate.

18th Sikh Infantry. Lieut. J. A. H. Pollock, wing-officer, has been appointed qrmr. vice Capt. F. B. Begbie, promoted.

1st Madras N.I. The regiment passed through Rawul Pindee last week, on its homeward march from Afghanistan.

4th Madras N.I. The regiment passed through Rawul Pindee last week, on its homeward march from Afghanistan. Major-Gen. C. T. Harkness, late of the regiment, died at Avenue House, Great Malvern, on the 30th ult., aged 57 years.

3rd Scinde Horse. Col. Malcolmson, C.B., while commanding his regiment during the sortie from Candahar on Sept. 16, received a Snider ball through his right thigh, and was also contused by another bullet. By the last accounts, however, we are glad to learn that he is gradually becoming convalescent.

7th Bombay N.I. Major T. W. Sanders, acting deputy-assist.-comy.-gen., 1st class, with Gen. Phayre's force, died at Killa Abdulla on Sept. 2 of pneumonia, hard work and incessant anxiety having undermined his health.

10th Bombay N.I. Havildar Dhurmajee Cuddam has, subject to confirmation by the Government of India, been promoted to be jemadar, "as a special mark of the approbation of Government for the skill and bravery displayed by him whilst in command of an escort on the occasion of its being attacked by the enemy in Southern Afghanistan."

15th Bombay N.I. Col. G. S. Morris, commandant, returned to India last month from English leave, and resumed command of the regiment.

16th Bombay N.I. Capt. J. R. Watson, wing-officer, and Capt. J. T. Carruthers, wing-officer and adjt., have been granted leave to England for eighteen months, on medical certificate.

17th Bombay N.I. Major J. S. Tinling has been granted leave to England for two years, on medical certificate.

19th Bombay N.I. Major W. Jacob's despatch regarding the withdrawal of the Abdul Rahman, Melkarez, Dubrai, and Gatai detachments to Chaman is now published in the *Gazette of India*, with a letter from the Commander-in-Chief in India, who "considers that the retirement was carried out with ability and judgment, and desires to bring to favourable notice Lieut. F. B. G. D'Aguilar and the men mentioned by Major Jacob." It is further stated that "his Excellency the Viceroy in Council concurs with the Commander-in-Chief in regard to the manner in which this retirement was effected, and agrees with his Excellency's remarks regarding the behaviour of the officers and men concerned."

23rd Bombay Light Infantry. Surg. J. C. Lucas, from the Bombay Sappers and Miners, has been appointed to the medical charge, vice Surg.-Major Simpson, deceased.

A CRUEL CASE OF OPPRESSION.

"An Advocate for Fair Play" writes:—"Having noticed in your issue of the 11th ult. an article referring to the case of an officer who you seem to infer is being unjustly treated by the War Office, with reference to the recent reorganisation of the Ordnance Store Department, and having since watched the *Gazettes* with more interest than curiosity, in expectation of seeing some adjustment made, I think it would be only fair to the officer alluded to to make known his name, and the true facts of his case, feeling convinced that the Secretary of State for War, the Surveyor-General of the Ordnance, and the Director of Artillery, must be either ignorant of or misinformed as to the valuable services he has performed for an unusually long period—approaching 40 years—and the strong claims which he has to the favourable consideration of those in authority on such an exceptional occasion as a reorganisation of the Department. From sources which, I believe, may be relied on, I cull the following information:—The *Army List* for January, 1880, stood as follows: Assistant-Commissaries-General—J. J. Lilley, Oct. 1, 1871, Bermuda; A. H. Young, July 1, 1872, Northern District; G. J. Purkis, June 17, 1873, Cork; D. Gibbons, July 1, 1874, Portsmouth; H. A. Russell, July 7, 1874, War Office. The new Warrant for the reorganisation of the Department is dated Jan. 31, 1880. A vacancy happened on Jan. 11, which, in equity and fairness, should have been filled up at that time, under the rules of the Royal Warrant then alive to which it appertained; but by some arrangement it subsequently and indirectly fell to a junior officer, who is employed as an assistant to the Director of Artillery and Stores in the War Office. Advantage appears to have been taken of the circumstance of the two senior officers being 55 years of age to withhold promotion from them while their old Warrant was in existence, thus rendering them ineligible for further service under the terms of the new Warrant. The third officer, who was not 55, was promoted on the date of the new Warrant, and retired some 12 weeks afterwards. The fourth officer on the list, being over age for the new Warrant, was compulsorily retired, thus leaving the original vacancy to be substantially filled by its present incumbent. It is believed that certain awards were framed by the actuaries and designed for the three officers, in consideration of their compulsory retirement before the stipulated age to which they would have served under their late Warrant. The two seniors have seen between 36 and 40 years' continuous service, the third, 26 years, having entered the Store Department as a temporary clerk on Feb. 6, 1854. It is believed that these awards were made on a graduated scale, according to standing and seniority, but they were not made known to the recipients until about May or June last, when, by some unaccountable transposition of names and figures, the second officer received the highest, the third the next, and the senior officer the lowest. Hence, it is presumed, the 'Departmental tyranny' alluded to in your columns. Certainly, deprivation of promotion, when due, on the grounds of a pending reorganisation would seem to be bad enough and sufficiently disastrous in its effects, without adding further injury to it; but to be followed by retirement under an article of the new Warrant other than that in which he was selected for it, and an income offered to him considerably less than his two juniors, would appear to require some most convincing explanation from the War-Office authorities, in justification of what appears to be a double act of injustice. In civil life, such acts would be amenable to the closest investigation, and if found unjustifiable, remedied by an ample award for damages, no matter who were the authors. The matter in its present aspect is simply extraordinary and unintelligible, and should, both in the interests of the officer and of the Service to which he belongs, be rectified at once, or such reasons given as would thoroughly justify the War-Office authorities for their treatment of this officer in a manner directly contrary to the terms of their own original selection of him for retirement under the new Warrant."

Ladies proceeding in H.M.'s troopships, or in any vessel conveying troops, will be required to produce a certificate that they (and their children and servants, if accompanied by them) are free from infectious disease, and are in all respects medically fit to embark. This certificate is to be handed to the military officer superintending the embarkation, and then (in the case of one of H.M.'s ships) to the naval paymaster, before the ladies pass to their berths.

Arrangements have now been made for reducing the engine-room complement of the First Reserve ships for the winter season, and an engineer officer will be taken from each of them.

The Eureka (Nevada) Silver Mining Company has been formed to acquire, work, and develop the well-known "Bald Eagle" series of mines, near Ruby Hill, Eureka (Nevada), United States of America, consisting of the "Bald Eagle" mine, the "White Eagle" mine, the "Eagle's Nest" mine; and the "Williamsburg series of mines, also near Rugby Hill, consisting of the "Williamsburg" mine, the "Williamsburg" 1 mine, and the "Williamsburg" 2 mine.

INDIA.

Col. R. J. Hughes, half-pay, late 63rd Foot, has been appointed to the Brigade Staff of the Army with the rank of Brigdr.-Gen., in succession to Major-Gen. H. B. Browne, whose tour of Staff service has expired.

It is stated that Gen. Sir Neville Chamberlain was offered the seat in the Viceroy's Council in succession to Sir Edwin Johnson, but declined it, on the ground of ill-health. And yet, according to Reuter, his Excellency has been offered the chief command.

The *Hindoo Patriot* thinks it will be interesting to many to know that Sir Edwin Johnson, the late Military Member of Council, was in his younger days a "gentleman of the Press," and on the staff of the *Moff*, under Mr. Laing.

The Government of India has granted one month's special leave to all political officers recently employed in northern Afghanistan, on the understanding that the privilege must be at once availed of, and that on its expiry the recipient rejoins his appointment in India.

It is stated that the following troops have been told off to assemble at Lahore, on the occasion of the formation of the Viceroy's camp there:—The 10th Hussars, the 4th Bengal Lancers, the A Baty. B Brig., R.H.A., and the C Baty. 3rd Brig., R.A.; the 9th Foot British Infantry; the 6th Regiment Bengal N.I., and a regiment of Madras Infantry.

It is officially notified that a vacancy having occurred in the office of an Ordinary Member of the Council of the Governor-General of India by the resignation of Gen. the Hon. Sir Edwin Beaumont Johnson, Royal Artillery, K.C.B., C.I.E., her Majesty the Queen-Empress of India has been graciously pleased to appoint Lieut.-Gen. Sir Donald Martin Stewart, K.C.B., to be an Ordinary Member of the said Council. Gen. Stewart has taken his seat in the Council, under the usual salute.

THE SECONDING OF OFFICERS.

"Justitia" inquires:—"Can you inform me upon what principle of justice an officer of infantry employed on civil duty away from his regiment, and, in accordance with paragraph 63 of the Royal Warrant of 1877, seconded for further employ in that civil department, is not only disallowed his regimental pay for that period, but is called upon to subscribe to his regimental mess and band funds? The paragraph of the Warrant in question certainly only says, 'He may be continued on the establishment of his regiment for six months.' But having been so maintained, why, I submit, is he not entitled to his regimental pay? Why is it added, 'From that date,' the date of his being seconded, 'the whole of his emoluments shall be derived from the civil department in which he may be employed,' if previously he is to receive no pay from his regiment? Why defer the seconding, so depriving the regiment of the services of an officer for six months for apparently no object, unless, indeed, it be to mulct him of the mess and band money? Why, again, is one officer allowed his regimental pay till seconded, and another refused his?"

THE RESERVE OF OFFICERS.

"W." writes:—"It is a well-known fact in the Service that several grievances have received attention from those in authority through appearing in your paper, when the parties themselves had not the interest to get an interview with the 'Soldiers Friend,' viz., the Duke. The following is my grievance:—Not long ago the Reserve of Officers was started, and loads of men, myself included, applied for commissions in it and got their applications granted, some few of us from having been already officers in the Regular Army. Now we are soldiers, and yet have no uniform. The very name of 'soldier' ought to entitle us to wear one. It may be asked, what is the use of a uniform until we are called out? I think it is of use, under these circumstances. Some of us left the Service same years ago, and want to be attached to a regiment, as even Volunteer officers often are, for a course of drill. Now, are we supposed to fall in in the ranks in mufti? Secondly, some of us who have interest would like to attend one of the Duke's levées, but of course cannot do so with no uniform. Government might easily allow us to wear the ordinary Staff uniform, and it would be received with satisfaction by us all."

THE CONSOLIDATION OF PENSIONS.

"Senex" writes:—"Allow me to direct attention to the Royal Warrant, dated July 21, 1880, Clause 191, Army Circulars, 1880. According to this circular, pensioners are in future to receive a fixed quarterly sum instead of a daily rate of pension. Now I would ask why this change is brought forward in the last quarter of this year, as it will reduce my already small amount of pension by 1s. 2d. for the quarter. By introducing the change on Jan. 1, 1881, there would be no injustice done to any one."

A short and interesting report by H.R.H. the Duke of Genoa has been published in the Italian *Maritime Review* of the cruise of the Vettor Pisani, an Italian corvette of 300 horse-power, from Shanghai to Hankow and back, and thence to Hong Kong and Manilla. Not only is it the first time a European prince has visited Hankow, the most distant of the five open or "treaty" ports on the great "Blue River," but no war-steamer, or indeed any vessel so large, has hitherto made the passage in the month of April.

We have received the prospectus of the Minas and Rio Railway Company, Limited. The railway provides communication between the richest and most populous province of the empire, and the two seaports of Santos and Rio de Janeiro. The position of the railway is analogous to that of the San Paulo Railway, the most successful railway in Brazil, because each crosses a mountain range (otherwise only surmountable by pack-mule), and provides railway communication for a fertile province with the seaboard.

"They come as a boon and a blessing to men,
The Pickwick, The Owl, and The Waverley Pen."
Also, the Hindoo Pens, Nos. 1, 2, and 3, *Diagonal Points.*
Sold at 6d and 1s per Box at all Stationers.
Sample Box, containing all the kinds, by post, 1s 1d.
Patentees: MACNIVEN and CAMERON, 23 to 33 Blair Street, Edinburgh. (Established 1770.)

"ATALANTA" RELIEF FUND.

The sum required for the relief of the numerous dependent relatives is £20,000.
Subscriptions are earnestly requested to be paid to "ATALANTA" RELIEF FUND, at Bank of England; Messrs. Drummond and Co., London; at any local bank at Portsmouth; or by
Commander JOHN W. F. HARVEY, R.N., Hon. Secretary.
Portsmouth Branch, H.M.'s Dockyard, Portsmouth.

BOOKS, Etc., RECEIVED FOR REVIEW.

The Invasion of the Crimea, by A. W. Kinglake, Vol. VI. (W. Blackwood and Sons)—Horses and Roads, by Free Lance (Longmans and Co.)—An Elementary Treatise on Geometrical Drawing, by the Rev. J. H. Robson, M.A., LL.D. (Relfe Bros.)—The Naval Brigade in South Africa, by Fleet Surgeon H. F. Norbury, C.B., R.N. (Sampson Low and Co.)—Memoirs of the Duke of Saldanha, by the Conde da Carnota, 2 vols.; Japan: its History, Traditions, and Religions, by Sir E. J. Reed, K.C.B., F.R.S., M.P., 2 vols. (John Murray)—The New Rules of the Road at Sea, by J. G. Moore and P. E. Le Conteur (G. Philip and Son).

NOTICES TO CORRESPONDENTS.

GHOORKHA.—There are no reliable data upon which we can found a calculation.

G. A.—The Warrant is so worded that it may be made to mean anything.

R. J. C.—Such an exceptional amount of praise lavished on the depôt by one signing himself a "Corporal" would have been accepted by your readers as no commendation. Some one else should blow the trumpet.

NOTICE.—We are obliged to hold over a number of letters in type, owing to the demands on our space. We shall hope, however, to publish the majority of them shortly.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e del Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; "*Vedette*;" *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Army and Navy Journal of New York*; in addition to all the home and colonial professional periodicals and journals.

Army and Navy Gazette.

LONDON, SATURDAY, OCTOBER 16, 1880.

ARCTIC Chronology, commencing with a narration of the discovery of Iceland, by a Scandinavian depredator in the year 861, carries us through a series of about 160 Arctic Expeditions, from that period up to the present date, presenting to our notice many brilliant achievements, naturally interspersed with failures here and there. The last British Government Expedition proved to be a success on the one hand, a failure on the other, inasmuch as a higher latitude was reached by a distance of thirty-five miles beyond that attained by Parry; but the great object, so fully anticipated by England, viz., the discovery of the North Pole, was not accomplished. But as time goes on, we have sure evidence that British enterprise will not be ingloriously beaten back from the path that is destined to be advanced to its goal, notwithstanding the vast difficulties to be overcome. As we write, Mr. Leigh Smith is within hail of our shores returning from a private venture, on which he has discovered new coast on Francis Joseph Land, and on Tuesday last we witnessed the assembly of an influential deputation at No. 1 Savile Row, for the purpose of asking the aid of the Royal Geographical Society towards the organisation of a New British Canadian Expedition, as brought forward by Commander Cheyne, R.N. The report of this deputation will be found in another column. Great as has been the apathy of our countrymen in Arctic exploration, since the return of Sir George Nares from the head of Robeson Channel, we are gratified to see that following upon a good harvest, trade is being developed and prosperity returning; so the concurrent flame of enterprise burns more brightly, giving us a fair promise that our flag may ere long be planted, if not indeed at the Pole itself, yet at a far more advanced position than has hitherto been attained. Commander Cheyne's plan of taking one steamer only, at a moderate cost, provisioned for three years, through Smith's Sound to Discovery Bay, and utilising the bed of coal found there by the Nares Expedition, and so making it a basis for further operations, is sound and practical. We learn that Commander Cheyne has written to Mr. Gordon Bennett, proposing his co-operation for pushing forward this expedition, in order that assistance may possibly be rendered to the *Jeannette*. Whilst this letter is on its way across the Atlantic, Mr. Gordon Bennett telegraphs to Commander Cheyne and other Arctic authorities, asking for counsel as to what measures should be concerted for an expedition next spring for the relief of the *Jeannette*. Circumstances could not, apparently, be more opportune, and we have now every hope that, with the assistance of Canada, and probably of Mr. Gordon Bennett, Commander Cheyne's long perseverance and determined energy will be duly rewarded, by having a private expedition placed under his command, destined to sail next spring, for the prosecution of his cherished hopes, as well as for the relief of the *Jeannette*. We understand that a motion will be brought before Parliament early next Session for a grant in aid of this volunteer movement; following which, the Canadian Parliament will, in all probability, be asked by Canadian Ministers] for a similar grant. Already, in view of such a motion being brought forward in the Commons, a large measure of support has been assured from both sides of the House; therefore, with a little energy and English spirit, we may soon see the proposed expedition *un fait accompli*. As Major Duncan informed Lord Aberdare, Commander Cheyne has so modified his plans with regard to balloons as to remove all objections on that score. And now, placing the project in a rough outline before our readers, we will conclude by quoting the words of one of our greatest Arctic celebrities, viz., Sir Edward Parry, who says:—"May it still fall to England's lot to accomplish this undertaking; and may she ever continue to take the lead in enterprises intended to contribute to the advancement of science, and to promote, with her own, the welfare of mankind at large! Such enterprises, so disinterested as well as useful in their object, do honour to the country which undertakes them, even when they fail. They cannot but excite the admiration and respect of every liberal and cultivated mind; and the pages of future history will undoubtedly record them as every way worthy of a powerful, a virtuous, and an enlightened nation."

The War Office is making little progress towards filling the vacancies in the Commissariat and Transport Department. Three Line captains have been appointed in eight months. Slow work this!

The 9th Lancers, we understand, will winter at Candahar. The officers and men of the regiment cannot fail to welcome this further mark of appreciation of those soldierly qualities which they have displayed throughout the recent operations in Afghanistan, but it is fully time that steps were taken to confer upon them the rewards which are their due. Whatever the reasons may be for the suppression of General Roberts's despatches giving an account of the affairs at Cabul in December last, it must be seen that it is a great injustice to regiments like the 9th Lancers, which did their work splendidly before the enemy, and not unnaturally look for an official acknowledgment of their services.

Major-General Sir Frederick Roberts, G.C.B,, will arrive in England shortly before Christmas, and will be summoned at once to Windsor, where he will receive the personal thanks and congratulations of her Majesty, who will invest him with the insigna of the highest class of the Order of the Bath, to which he has been gazetted, and at the same time intimate to him the intentions of the Government with regard to monetary or other rewards.

Lieutenant-General the Hon. Leicester Smyth, C.B., who leaves England on Tuesday next for the Cape, is expected to arrive and take up his duties from the 10th prox. General Clifford will leave at once for England, on General Smyth's arrival.

The Paymastership of the Cavalry Depôt, Canterbury, has become vacant, consequent upon the retirement of Major C. B. Roche, who has held it since 1871. Major Roche is succeeded by Major R. C. Streatfield, from the Canterbury Brigade Depôt, Major Streatfield being, in turn, replaced by Major W. Joice, from the Leicester Brigade Depôt, late of the 18th Hussars, and for many years adjutant of the 13th Hussars. Major Sir H. D. Nightingale, Bart., takes Major Joice's place at Leicester.

Brigadier-General R. J. Hughes, half-pay, late 63rd Regiment, has arrived home on a short leave to recruit his health, after his recent services in Afghanistan, preparatory to returning to India to take up a brigade command in Bengal.

It may be doubted whether there is any military necessity for maintaining the expensive posts of colonels of Horse Artillery at Umballa and Bangalore, seeing that these stations have now been many months without these officers, who, though detailed for duty there, are still at home.

Lieutenant-General H. J. Warre, C.B., obtains the colonelcy vacant by the death of General S. Braybrooke.

Deputy-Commissary-General W. F. Wright, C.B., who was promoted for distinguished service in connection with the Zulu expedition, is to be placed on the establishment of his rank in the Ordnance Store Department, to fill the vacancy caused by the retirement of Deputy-Commissary-General J. O. Hamley, C.B.

Lieutenant-Colonel R. W. Sartorius, V.C., C.M.G., the hero of the "Coomassie ride," has arrived in England this week from India, on leave of absence.

How and why is it that Militia regiments avail themselves to so various an extent of the Schools of Instruction? How does it happen, for instance, that the Scottish Borderers have 18 "school-men," the Royal Ayr and Wigtown 13, while the 11 strong battalions of Lancashire have only 23, and the 9 Yorkshire battalions only 28, and while some half-dozen other regiments have not a single one? If the Schools of Instruction are useless, let them be done away with, as a cause of fruitless expense. But if, as we believe, they are a very valuable means of supplementing the necessarily scanty training of our young Militia officers, surely commanding officers could do much to make attendance at them more general, and young officers should feel that in no way can they do more to raise in public estimation the Service to which they belong, than by thus giving public proof of their zeal and efficiency.

It has been decided to allow Surgeon-General H. Kendall, M.D., to retain his present appointment as principal medical officer of the Chatham District, though Chatham is, strictly speaking, only a deputy-surgeon-general's charge. Dr. Kendall, however, will retire in January next, when Deputy-Surgeon-General S. H. Fasson, M.D., principal medical officer at Aldershot, will get his step. It was not thought necessary to disturb the arrangements for so short a time.

The Editor of the monthly *Army List* has not yet become alive to the fact that there exists such a thing as a Reserve List of officers. Any way, we look in vain for the list of those granted commissions in the Reserve in the October *Army List*. As the *Army List* is incomplete without the names of the officers in question, the list cannot, of course, be omitted intentionally, but from ignorance of its existence.

Mr. R. T. Goldsworthy, C.M.G., late 9th Lancers, is expected home early next week from Western Australia, where he has been employed for some time past as Colonial Secretary. Mr. Goldsworthy is *en route* to St. Lucia, of which colony, as we lately announced, he has been appointed Administrator.

The Military Authorities have consented to the seconding of Captain A. Collins, 57th Regiment, on his appointment as equerry to H.R.H. the Princess Louise. Captain Collins has passed all his service—sixteen years—in the 57th. With the exception of a few months, during which he was aide-de-camp to the Lieutenant-Governor of Ceylon, he has during all his sixteen years done regimental duty with his regiment. He was one of the three officers of the regiment who remained the whole five years in Ceylon, though his health suffered considerably during the last year of his stay at the station; and at the very outset of the Zulu campaign it broke down completely, and he was invalided to England. On arrival at home, a medical board granted him sick-leave, but before this leave expired, the Princess Louise appointed him, with her Majesty's sanction, her equerry. Captain Collins's case has been coupled with that of Lord Gifford, but the two are scarcely analogous. Lord Gifford, it will be remembered, was appointed to the 57th some four years ago from the Half-pay List, to command a company. After a lapse of some time he joined head-quarters in Ceylon. After doing duty with head-quarters for about a year, Sir Garnet Wolseley was appointed High Commissioner of Cyprus, and Lord Gifford was offered and accepted the appointment of aide-de-camp on his staff. The regiment was very short of captains at the time, and as the War Office raised some paltry objections to his lordship's being seconded, the whole of the officers suffered considerably. The regiment was ultimately moved to the Cape for active service, and Lord Gifford, of course, proceeded out to join it, and did duty with it for a couple of months, when Sir Garnet Wolseley, having arrived and been appointed Commander-in-Chief, his lordship was reinstated on his personal staff as aide-de-camp. He eventually found himself selected to carry home the despatch announcing King Cetewayo's capture, for which he has been rewarded with a brevet majority and a money grant. The 57th Regiment in time was brought to England, when his lordship ought in the ordinary course to have joined head-quarters; but he applied for and obtained leave of absence as a Peer, and has now gone out to Western Australia to fill a highly-remunerative Colonial appointment, never having seen his regiment since he left it in Zululand. Now, no one in the 57th objects, we feel sure, to Lord Gifford's being rewarded for his service; he has proved himself a most gallant and useful officer, and he well deserves to be recognised. Still, there is no disguising the fact that not only in the 57th, but throughout the Army, a feeling exists that his lordship has been favoured in a manner which is not calculated to promote the interests of the Army. We trust, therefore, that the War Office will lose no time in seconding him, and giving the hard-worked subalterns of the 57th the promotion out of which they have been kept for so long a time, in consequence of his introduction to the regiment. At present, his lordship continues on the establishment of his regiment, and draws the pay of his rank, whilst others have all the anxiety, trouble, and responsibility which the duty of commanding his company entails. The War Office authorities must admit the injustice of this arrangement, and should take immediate steps to put matters on a more equitable footing.

Lieutenant-General the Hon. J. W. B. Macdonald, C.B., colonel of the 21st Hussars, will be 70 years of age on the 31st inst., when he will be placed on the Retired List. Seven other steps are due this year, by the operations of the Age Clause, the following officers attaining the prescribed age on the dates specified, viz.:—General Sir E. C. Warde, K.C.B., colonel-commandant Royal Horse Artillery, on November 13; General W. Irwin, colonel of the 88th Regiment, on December 3; General Lord Napier of Magdala, G.C.B., G.C.S.I., colonel-commandant Royal (late Bengal) Engineers, on December 6; General Sir E. Green, K.C.B., Bombay Staff Corps, on December 15; Lieutenant-General R. Hamilton, C.B., Madras Staff Corps, on December 18; General Sir H. C. B. Daubeney, K.C.B., colonel of the 55th Regiment, on December 19; and General J. T. Grant, C.B., colonel of the 94th Regiment, on December 26.

It is worthy of note that the marks gained by the officer who was head of the list of the recent examination for admission to the Staff College—Lieutenant R. da C. Porter, R.E.—are the highest that have been obtained of recent years by any candidate. Subjoined is a list of the marks gained by the first man in each year since 1871:—1872, Lieutenant W. A. H. Hare, R.E., 2,656; 1873, Lieutenant W. G. Morris, R.E., 2,489; 1874, Lieutenant H. Pilkington, R.E., 2,410; 1875, Lieutenant D. J. Jones, R.A., 2,530; 1876, Lieutenant W. R. Fox, R.A., 2,209; 1877, Captain C. Grove, 1st Battalion 15th Foot, 2,544; 1878, Lieutenant W. Peacocke, R.E., 2,568; 1879, Lieutenant A. O. Green, R.E., 2,671; 1880, Lieutenant R. da C. Porter, R.E., 2,721. What makes Lieutenant Porter's case so creditable to him is, that he has been for some time past on service at the Cape, and has not, therefore, enjoyed the advantages which other officers have done.

It is strange that the absurd Regulations with regard to Volunteer regiments clothed in scarlet should have lasted so long. Officers of "scarlet regiments" are ordered to wear a tunic which, so far as the skirt is concerned, is of infantry pattern. The cuffs, however, are rifle pattern, and instead of the sash, a shoulder-belt and pouch is worn, of rifle pattern. The sword for all ranks is the infantry regulation, and the helmet the infantry pattern. Though clothed in scarlet, they are called "rifles,"—rifles always being distinguished by their sombre uniform. Moreover, long rifles and infantry bayonets are carried by the rank and file, who are supposed to observe the instructions for the short rifle drill. The new Deputy-Adjutant-General for Auxiliary Forces would do well to see to these things. Eventually there will, of course, be an entire revision of titles, and we shall have no more rifles in scarlet; but the War Office cannot do too much at once, and it will take time to prove to those in authority the utter absurdity of the present arrangement.

It would almost appear it is time, as Lord Morley lately suggested in the House of Lords, that the commands of the Madras and Bombay Armies were merged into one, when such petty jealousies exist between the two Presidencies as the following, and when the Commander-in-Chief can find time to interest himself about such paltry details:—An officer some time since obtained leave for four months, which he spent working for a garrison course. After he had completed two months' work his leave was cancelled, and he was peremptorily recalled by the Commander-in-Chief of the Madras Presidency, because he heard that the officer was studying in the Bombay instead of in the Madras Presidency, in which his regiment was quartered. Now, this recall is strictly contrary to the Queen's Regulations, which say that every opportunity is to be accorded to officers, with the consent of their commanding officers, to study for their profession.

The Russian Minister of War has voted 5,017,693 roubles, or £500,000, towards the maintenance of military schools in 1881. The Ministry controls four huge orphan schools at St. Petersburg, eighteen gymnasia, two colleges, eight minor schools, and several hundred regimental schools.

The Navy.

ADMIRALTY, October 8, 1880.

Assistant-Paymaster John Jeans Hoar has been promoted to the rank of Paymaster in her Majesty's Fleet, with seniority of the 6th inst.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Commander Seymour Spencer-Smith has been placed on the Retired List of his rank from the 27th ult.

ADMIRALTY, October 9, 1880.

Staff Surgeon Patrick Keelan has been promoted to the rank of Fleet Surgeon in her Majesty's Fleet, with seniority of the 2nd inst.

ROYAL MARINE FORCES.

Lieutenant George Robert Cecil Booth has been allowed to resign his commission in the Royal Marine Light Infantry.

ADMIRALTY, Oct. 12, 1880.

Navigating Sub-Lieutenant Edward Wright Wild has been promoted to the rank of Navigating Lieutenant in her Majesty's Fleet, with seniority of 6th inst.; Engineer John Johnson has been promoted to the rank of Chief Engineer in her Majesty's Fleet, with seniority of 8th inst.

Royal Naval Artillery Volunteers (London Brigade)—Arthur Price, Esq., M.R.C S., to be Surgeon (Oct. 12).

ADMIRALTY, Oct. 13, 1880.

Navigating Sub-Lieutenant Frederick Wetherall Edward Houghton Smith has been promoted to the rank of Navigating Lieutenant in her Majesty's Fleet, with seniority of June 19, 1880.

In accordance with the provisions of her Majesty's Orders in Council of Feb. 22, 1870, and Feb. 4, 1875, Staff Surgeon Alexander Crosbie, M.D., has been placed on the Retired List of his rank from the 8th inst.

APPOINTMENTS.

Commander—James H. Haye, to the Belleisle.

Lieutenant—Oliver Young, additional, to the Valorous.

Navigating Lieutenants—John Horatio Woodward, to the Dasher; Frank Haslewood, to the Northampton, additional, for surveying service.

Paymaster—A. Yockney, to the Urgent.

Chief Engineer—John A. Lodge, to the Indus, additional, for service in the Reserve.

Surgeons—Christopher Pearson, M.D., M.A., to the Crocodile; Robert Redford, to Haslar Hospital; John Arthur Langdon, additional, to the Duke of Wellington; T. J. Preston, to Plymouth Hospital.

Engineers—G. Mackney, to the Redwing; Peter Murray, to the Cockatrice; Edward Little, to the Nankin, additional, for service in the Ajax; Richard Irwin, to the Duncan, additional, for service in the Hydra.

Gunners—R. C. Steele (acting), to the Pembroke; M. J. Delaney (acting), to the Iron Duke.

Coastguard.

Second Mate—John F. Tremayne, Stag, to be senior mate, Redwing.

Chief Quartermasters—Denis McCarthy, Stag, to be second mate, Stag, vice Tremayne; Henry Roach, Active, to be second mate, Hawk, vice Young, transferred to Redwing.

Quartermasters—William Bell, Penelope (additional, for Lively), to be chief quartermaster, Audacious (additional, for Active), vice Roach, promoted; Murdo McKenzie, Defence (additional, for Margaret), to be chief quartermaster, Defence (additional, for Margaret); George H. Greenham, Defence (additional, for Royal Charlotte), to be chief quartermaster, Defence (additional, for Redwing); Patrick Griffin, Valiant, to be acting chief quartermaster, Valiant (additional, for Stag), vice McCarthy, promoted; Edward Eycott, Lord Warden, to be chief quartermaster (additional, for Squirrel).

Commissioned Boatmen—A. Brown, Exmouth, to be chief boatman, Bridport, vice Charlo, promoted; W. Peddington, Cawsand, to be chief boatman, Sidmouth, vice Rackley, pensioned.

Alert, Capt. Maclear, has been to Tahiti to pay the new French colony a visit, and to examine some points not clearly defined in the charts, and on the completion of this duty it is not improbable the ship may leave the Pacific command, and go elsewhere on surveying duty.—*Hampshire Telegraph.*

Assistance, Capt. Buckle, left Portsmouth on Monday morning with a draft of the 1st Batn. 4th Regiment, and a new ship's company for the Flamingo, which is to be paid off and recommissioned at Bermuda. The men will be transferred to the Tamar at Gibraltar. It was proposed to place 80 tons of iron ballast on board to increase her stability, but instead of that it was decided at the last moment to place on board about 100 tons of ammunition, several Nordenfeldt guns, and a large number of Naval supernumeraries for the Mediterranean fleet, for conveyance to Malta, and such was the haste with which this last order had to be carried out that the men had to be borrowed from the Excellent, Minotaur, and even the Inconstant. The Assistance will receive from the Tamar the reliefs for England, and the latter on arrival at Bermuda will await the return of the Crocodile from Halifax with reliefs and time-expired men, and will bring them to Portsmouth.

Audacious, Capt. H. B. Woollcombe. Rear-Admiral H.R.H. the Duke of Edinburgh visited Hull on Monday, for the purpose of inspecting the Audacious. It had originally been arranged that his Royal Highness should arrive at Hull on Monday, in the Lively, but on account of stress of weather the Duke determined to go to Hull by train. The Duke, accompanied by Mr. C. Sykes, M.P., at once proceeded to the Corporation Pier, where a steam pinnace from the Lively was in attendance to convey his Royal Highness on board the Audacious. The inspection of the ship was completed shortly after 11 o'clock, after which the Duke landed and proceeded to the Victoria Dock, where he inspected the Nimble. At noon his Royal Highness left the Lively, and on landing was loudly cheered, and, accompanied by Mr. Sykes, drove to the Town Hall, the crowd along the route cheering lustily. At the Town Hall the Duke was received by the Mayor and members of the Town Council, and proceeded to the dais which had been erected, and on which was placed the arm-chair in which the Queen sat on her visit to Hull on Oct. 12, 1854. In this chair his Royal Highness seated himself, while the Mayor read the following address:—"To his Royal Highness, Alfred Ernest Albert, Duke of Edinburgh, Earl of Kent, and Earl of Ulster, Knight of the Garter, Rear-Admiral of the Royal Navy, &c.—May it please your Royal Highness,—We, the Mayor, Aldermen, and Burgesses of the borough of Kingston-upon-Hull, for ourselves and the inhabitants of this ancient port, town, and county, beg to approach your Royal Highness in order to express our sense of the great honour conferred upon us in the visit of your Royal Highness to our loyal and ancient town and port, and to assure your Royal Highness of our most sincere and hearty welcome. We beg also to convey to her most gracious Majesty the Queen, through your Royal Highness, our firm loyalty and affectionate attachment to her Royal person and august family, and we humbly pray that Divine Providence may vouchsafe to her Majesty the blessing of health, that she may long continue to reign in the hearts of a faithful and devoted people. Given under the common seal of our Corporation, Oct. 11, 1880. Kelburne King, Mayor." His Royal Highness, in reply, said,—"Mr. Mayor and Gentlemen,—I beg that you will accept my very sincere acknowledgments for the address you have offered me on the part of the inhabitants of this most ancient and important seaport, which I now visit with great pleasure. It will afford me the highest satisfaction to convey to her Majesty the Queen the sentiments of loyalty and attachment to her person and family it expresses." This closed the proceedings, and the Duke drove to the Trinity House, where his Royal Highness was entertained at luncheon. The proceedings at the Trinity House were private, but it was made known that his Royal Highness would be elected an Elder Brother of the Incorporation, and his appointment to this office, together with an address of welcome, was handed to his Royal Highness in an elaborately chased gold casket.

Blanche, Capt. Knowles, would leave Halifax for Jamaica about the 7th inst.

Boadicea, Comdre. Richards, C.B., was at Table Bay up to Sept. 20. She had arrived from Saldanha Bay on Sept. 20, and would leave next day, after arrival of mail, for the east coast, returning to Simon's Bay about Oct. 15.

Britannia, Capt. Rhodes. The athletic sports of the Britannia were held on Wednesday on the cricket-ground, Dartmouth, belonging to the ship. The prize-winners were:—Long jump—1, Green; 2, Comber. Quarter-mile race (over 4 ft. 10 in.)—1, Ryan; 2, Macnamara. Quarter-mile race (under 4 ft. 10 in.)—1, Gregson; 2, Kiddle. High jump—1, Comber; 2, Green. Hurdle race (over 4ft. 10 in.)—1, Green; 2, Sheppard (b). Hurdle race (under 4 ft. 10 in.)—1, Starkey; 2, Sterston. Pole jump—1, Egerton. This was very well contested between Green and Egerton, the latter winning amidst general applause. 100 yards' race (over 4 ft. 10 in.)—1, Green; 2, Comber. 100 yards' race (under 4 ft. 10 in.)—1, Starkey; 2, Ross. Throwing cricket-ball—1, Farquhar; 2, Sheppard (b). Half-mile foot race—1, Macnamara; 2, Sampson. The three-legged race was one by Comber and Ayre. Steeple-chase—(1), Boothby (a); 2, Clark. Consolation races were won by Ward (b) and Lee. A tug-of-war, starboard watch and port watch, was won twice by the former.

Carysfort, Capt. H. F. Stephenson, C.B., was inspected in Sheerness Harbour on Saturday morning by Vice-Admiral Sir R. J. Macdonald, K.C.S.I., Commander-in-Chief at the Nore. A very close examination of the officers and crew was made, and likewise of the internal arrangements of the ship. At the conclusion, the Admiral expressed himself as being perfectly satisfied with everything which came under his notice. The Carysfort left Sheerness for her cruise on Monday.

Cherub, Lieut. and Com. A. G. Fullerton, arrived at Sheerness on Oct. 9 from Harwich.

Cleopatra, Capt. F. Durrant, sailed for Portsmouth from Devonport on Tuesday.

Comus, Capt. J. W. East, left Yokohama for Kobé on Sept. 1.

Decoy, Lieut.-Com. E. von Donop, was at West Coast Castle on Sept. 13, awaiting the arrival of her relief, the Foam. She arrived at St. Vincent from Sierra Leone on the 11th inst.

Defence, Capt. Thrupp, is ordered to proceed to sea from Portland for target practice at first favourable opportunity.

Dido, Capt. Compton Domvile, senior officer at West Coast Castle, was to sail on Sept. 14 for Accra, Quitta, Lagos, Brass River, and Fernando Po.

Druid, Capt. Kennedy, would proceed to Bermuda from Halifax, and Contest would join the flag at Halifax, at the end of the fishery season.

Dwarf, Com. Bainbridge, was at Simon's Bay on Sept. 20, making good defects.

Elk, Com. H. Clanchy, was docked at Rio de Janeiro on Sept. 9, and would proceed for a week's cruise, joining senior officer off Cape Frio, and then remain cruising off Brazilian coast.

Firebrand, Lieut.-Com. J. L. Sisson, was at West Coast Castle on Sept. 13, where she had arrived from St. Helena and Ascension. She was to proceed to the Brass River and Fernando Po.

Flamingo, Com. Custance, on return from cruise would proceed to Bermuda, to be docked, for examination of her bottom.

Flirt, Com. Brackenbury, C.M.G., has proceeded to St. Helena and Ascension from West Coast Castle on Sept. 13, and would return to Accra by Nov. 25.

Foam, Lieut. and Com. Julian A. Baker, was to have left Sierra Leone for Cape Coast Castle on Sept. 8.

Garnet, Capt. Loftus Jones, senior officer on the south-east coast of America, was at Rio de Janeiro on Sept. 18.

Hercules, Capt. Townshend, is ordered to proceed to sea from Greenock for target practice, weather permitting.

Humber, Com. John L. Way, was put into dock at Sheerness Dockyard on Saturday morning, for the purpose of undergoing some extensive alterations. It will be about six weeks before she will be ready to proceed to the Cape.

Inconstant, Capt. C. Fitzgerald, flagship of Rear-Admiral the Earl of Clanwilliam, C.B., commanding the Detached Squadron, went out of Portsmouth Harbour on Wednesday, and will probably sail on Saturday for the trial of her machinery. The squadron will consist (besides the flagship) of the Carysfort, Capt. H. F. Stephenson, C.B.; the Cleopatra, Capt. F. Durrant; the Tourmaline, Capt. Dennistoun; and the Bacchante, Capt. Lord Charles Scott; the latter, awaiting the arrival of the other ships at Vigo. The programme of the cruise has not been definitely accepted, but as at present arranged the squadron, after leaving Gibraltar, will visit Madeira, St. Vincent, Cape de Verde, Rio de Janeiro, Monte Video, Falkland Islands, Straits of Magellan, Valparaiso, San Francisco, Vancouver's Island, Honolulu, China (two ports), Japan, and Singapore. The Bacchante will leave the squadron at Singapore and proceed to England, *viâ* the Suez Canal, in order to reach home by Christmas 1881. The remainder of the squadron will return by way of the Cape, and reach England a few months later.

Iron Duke, Capt. Cleveland, flagship of Vice-Admiral Coote, C.B. A correspondent on board the Iron Duke sends the following particulars of the grounding of that ship to the *Hampshire Telegraph*. He says:—"We sailed from Hakodate at 2 p.m. on Thursday, July 29. At five o'clock on Friday morning, when going over six knots in a fog, our vessel went ashore on a reef of rocks off the island of Okosiri, 100 miles from Hakodate. The Admiral at once despatched the flag-lieut. in the steam-launch to Hakodate for assistance, while we proceeded to lighten the ship, sending provisions and ammunition on shore and throwing coal overboard. On Saturday the French admiral arrived, also the French ships Kerguelin and Champlain, the Russian admiral, H.M.S. Modeste, and a Japanese gunboat. Four lighters were towed by the Modeste and Champlain. On Saturday night the Champlain, in rendering assistance, got aground, and remained all night, coming off on Sunday morning, with loss of false keel, while her screw was entangled with a steel hawser and rendered useless, her rudder disabled, and the ship leaking badly. She will be towed by the Kerguelin to Nagasaki and be docked. Up to Sunday morning all efforts to get the Iron Duke off failed, and at times she bumped heavily on the rocks. At ten on Sunday morning, having been considerably lightened, and the tide being high, she floated, with assistance from the Kerguelin, after being fifty-three hours on the rocks. The damage ascertained so far by the divers, who have partially examined the ship's bottom, is most considerable, such as, it is supposed, cannot be repaired on the station. There are large holes in the outer skin, and the keel-plate is very much bent and bulged. The Kingston valve has been forced in, so as to establish a leak through the inner skin. It is expected that the Admiralty will order a court-martial, and that the ship will be docked at Yokohama or Hong Kong for temporary repairs. Further examination shows most serious damage. Her frame is broken and twisted in many places, and the outer skin in some places is forced almost on the inner. It seems doubtful wisdom on the part of the Admiral to take the ship up the Gulf of Tartary in a season of constant fog, in narrow seas, with varying currents, and charts marked untrustworthy. During the previous eighteen days before leaving Hakodate fog had been very general."

Lively, Lieut.-Com. Le Strange, left Sheerness on Oct. 10, and arrived at Hull on Monday.

London, Capt. Brownrigg. The distribution of the slave-bounty awarded for nine slaves, captured on May 1, 1879, commenced in the Prize Branch of the Department of the Accountant-General of the Navy, Spring Gardens, S.W., yesterday. The following are the shares due to an individual in the several classes:—Flag, £1 6s. 1d.; captain, £3 15s. 8d.; second class, 12s.; third class, 10s. 5d.; fourth class, 7s.; fifth class, 4s. 2d.; sixth class, 3s. 6d.; seventh class, 2s. 5d.; eighth class, 1s. 4d.; ninth class, 8d.; tenth class, 4d. The distribution of the tonnage bounty awarded for a slave-dhow, name unknown, captured on May 4, 1879, by H.M.S. London, commenced at the same time and place. The following are the shares due to an individual in the several classes:—Flag, £19 6s. 11d.; captain, £56 1s. 11d.; second class, £8 19s. 9d.; third class, £7 14s.; fourth class, £5 2s. 9d.; fifth class, £3 1s. 9d.; sixth class, £2 11s. 5d.; seventh class, £1 16s.; eighth class, £1 0s. 6d; ninth class, 10s. 3d.; tenth class, 5s. 1d. And also the distribution of the tonnage bounty awarded for the slave-dhow Mzuri Kivas, captured on June 9, 1879, by H.M.S. London. The following are the shares due to an individual in the several classes:—Flag, £24 1s. 9d.; captain, £69 16s. 10d.; second class, £11 1s. 6d.; third class, £9 9s. 9d.; fourth class, £6 6s. 6d.; fifth class, £3 15s. 11d.; sixth class, £3 3s. 3d.; seventh class, £2 4s. 3d.; eighth class, £1 5s. 4d.; ninth class, 12s. 7d.; tenth class, 6s. 3d.

Minotaur, Capt. H. Rawson, flagship of Vice-Admiral Hood, C.B. The officers of this ship gave an amateur theatrical performance on board on Monday evening at Portsmouth, and it was attended by a marked degree of success. Extensive preparations had been made, and the arrangements were thoroughly complete in all respects. The Minotaur will sail for Portland on the 24th inst.

Modeste, Capt. J. G. Mead, left Kobé for Nagasaki on Aug. 23.

Northampton, Capt. Fisher, flagship of Sir L. M'Clintock, was at Halifax up to the 1st inst. She had arrived with Blanche and Forester on the 25th ult.

Orontes, Capt. Kinahan, arrived at Natal on Sept. 24, and left four days later with the 1st Dragoon Guards on board for Bombay, whence she will return to England with time-expired men and invalids.

Pioneer, Lieut.-Com. Carre, was at Simon's Bay on Sept. 20, making good defects.

Ranger, one of the vessels recently built at Glasgow, had her engines and machinery tested in the steam basin at Sheerness Dockyard on Saturday afternoon, when everything was found to answer very satisfactorily.

Rapid, Com. W. F. Mann, arrived at Larnaca on Oct. 8.

Serapis, Capt. Guy O. Twiss, passed Gibraltar on Oct. 9, on passage to the eastward.

Tamar, Capt. Thomas Royse, arrived at Malta on the 11th inst. from Cyprus, and landed 352 men of the 1st

Batn. 20th Regt., with women and children. She proceeded on Wednesday for Gibraltar. She arrived on the 11th inst. at Malta, and would sail on the 13th inst. There she will meet the Assistance, and receive from her some more troops and Naval drafts (including the new crew of the Flamingo for passage to Bermuda), and proceed to Barbados and Jamaica. At Bermuda she will meet the Crocodile about the middle of November, and will transfer to her some drafts from the West Indies for conveyance to Halifax, awaiting at Bermuda the return of the Crocodile with reliefs and time-expired men from Halifax, with which she will start for Portsmouth direct.

Tourmaline, Capt. Robert P. Dennistoun, which arrived at Sheerness from the North America and West Indies station on the 12th ult., and was recommissioned a few days back, has been put into No. 3 Dock, and is being brought forward for sea as rapidly as possible. There are a large number cf shipwrights employed upon her in order to get all the necessary repairs executed with the utmost despatch.

Triumph, Capt. A. H. Markham, bearing the flag of Rear-Admiral F. Stirling, arrived at San Francisco on Oct. 8, and was to sail for Acapulco and Callao on Oct. 9.

Vigilant, Lieut.-Com. W. Annesley, left Kobé for Nagasaki on Aug. 28.

Warrior, Capt. R. Douglas, is ordered to proceed to sea from Portland for target practice at first favourable opportunity.

Zephyr, Lieut.-Com. Pollard, is detailed for service on the China station, where she will relieve the Swinger, which was recommissioned at Hong Kong in Feb., 1877, by Lieut. Oswald Tudor, who was appointed to her in Nov., 1876.

The under-mentioned men have been awarded the medal for long service and good-conduct:—Thomas B. Williams, engine-room artificer, of the Northumberland; John Chapple, second captain of quarter-deck of the Britannia; John Barkett, gunner, R.M.A., of the Minotaur; Henry Fowler, carpenter's crew, of the Dasher; George Figgins, ward-room steward; Benjamin Corke, captain of maintop; Thomas A. Marshall, able seaman; George Pitman and W. T. Midlane, able seamen riggers; William Radmore, caulker, of the Victoria and Albert; Henry Couper, naval schoolmaster, of the St. Vincent; Joseph Ashbourne, quartermaster, of the Duke of Wellington; Charles Pressey, quartermaster, of H.M.'s yacht Osborne; Walter Beer, leading stoker, of the Asia; Edwin Eastlake, barber, of the Cambridge; Edward Triggs, able body, pensioner, of the Asia; W. H. Harding, sick-berth steward, of the Impregnable; and the following in the Coastguard:—James M. Briggs and Charles H. Pearne, divisional carpenters; Richard Lawrence, chief boatman-in-charge; John E. Pearce, Samuel Teague, Thomas Baker, and James Dimmick, boatmen; and James Hoare, George Cock, William Swain, and William Ryan, commissioned boatmen.

A Constantinople telegram says a Russian Whitehead torpedo launch has passed through the Bosphorus, having successfully made the voyage from England. Though only 100 ft. long, she will serve as a model for constructing similar craft at Nicolaeff.

The problem of rendering ships unsinkable has found an advocate in Mr. Lamb, of Finsbury Circus, who has had a steam launch built to illustrate his system. This launch was inspected, and a short run was made in her last week at North Woolwich. The principle consists in attaching to the sides of the hull of a vessel a series of flat, air-tight metallic cylinders or drums, the inner heads of which are built into and form part of the framing and inner skin of the vessel. These drums project on either side of the ship, and are cased in, the under sides of the casings normally resting upon the surface of the water, and becoming slightly immersed under a load. The result is a light draught with great freeboard, and it is claimed that a greater stability under canvas, and a higher rate of speed under steam or sail are thereby attained, besides several other contingent advantages. The system is illustrated by means of a steel-built steam launch, 37 ft. long, 6 ft. deep, and 5 ft. 8 in. beam internally. She has seven cylinders fitted on each side, each cylinder being 3 ft. 6 in. in diameter, and 1 ft. 8 in. deep, and which give her a width on deck of 9 ft. over all. She draws 2 ft. of water without her load, and has a freeboard of 4 ft.

Two hundred thousand rounds of ammunition for the Nordenfelt machine-guns have been issued for the use of the ships of the squadron in the Mediterranean. The order was received unexpectedly, and the ammunition had to be drawn from the magazine at Upnor, and, contrary to practice, during the night. Two sailing barges were loaded with the cartridges, and in order to save time the first of these was towed to Woolwich, by the steam-tug Monkey, which was sent by the Admiralty for the purpose. At the Royal Arsenal, Woolwich, the Nordenfelts were transferred to railway trucks, to proceed direct to Portsmouth.

The correspondent of the *Times* writes from Naples that the Italia was towed over to Naples on Friday last by the Citta di Genova, accompanied by the ironclad Terribile. On arriving she was received with a salute of guns, and an immense crowd of people had assembled to welcome her. So large, indeed, was it that it was found difficult to prevent its breaking into the arsenal. As yet no one has been permitted to visit her, nor will be for at least ten days; but the interest in the "largest vessel of war in the world" is as lively as ever, and on Sunday the crowds of curious spectators were as large as ever. There was a shower of decorations, beginning with Admiral Acton, and descending to some of the employés in the dockyards of Castellamare. The Italia will remain in Naples to receive her machinery and boilers, and will then be taken to Spezzia to complete her armament. The time occupied in these operations, it is calculated, will be about two years.

Watches. Jewellery.—Before you buy a Watch or Jewellery, send for the Midland Counties' Watch Company's Catalogue, beautifully illustrated with over 200 copper-plate engravings, and sent gratis and post free, on application.—Address, S. Hissey, Manager, Vyse Street, Birmingham. See advertisement.

THE FRANKLIN RELICS.

The special correspondent with the Franklin search party, in his narrative in the American papers, which were landed at Queenstown on Saturday, says:—

"We encamped on a point below Cape Maria Louisa after our next march, and, after erecting the tent, Owanark found a 'cache' on the flats, containing a wooden canteen, barrel-shaped, marked on one side 'No. 3,' and on the other 'G. B.,' under the Queen's broad arrow. There were also the staves of another canteen, a small keg, a tin powder can, several red cans marked 'Goldner's patent,' a narrow-bladed axe, several broken porter and wine bottles, stamped 'Bristol Glassworks,' and a few barrel staves.

"Back to Franklin Point.—We left Irving Bay on July 13, after erecting a monument over the grave of Lieut. Irving, and marking a stone to indicate the object of the cairn. We also buried a copy of the M'Clintock-Crozier record, together with the record of our work to date, 10 ft. north of the cairn, marking the fact on the tombstone. On our way back to Franklin Point, we buried the skull found on our way up, but found no further bones till we reached Point le Vesconte. We saw tenting places both of white men and natives at different points along the coast, and one cairn that had been torn down and contained nothing. At Point le Vesconte we found the grave of an officer, as was evinced by the finding of gilt naval buttons among the *débris* and pieces of cloth and linen of finer texture than any seen elsewhere. There was nothing whatever to indicate the name or rank of the deceased, though we noticed that the grave had been made with especial care. This seems to have amounted to nothing, for it had been torn open by the savages and the bodies dragged around by foxes and wolves. The bones that we found were scattered around, some of them a quarter of a mile from the grave, but as they were of different parts of the human skeleton there was nothing to indicate that more than one person had been buried here. The care with which the interment had been made was sufficient evidence that the officer had died on the way from the ships. We found another empty grave on a hill where we encamped, about four miles below this point, and a skull about a quarter of a mile distant from it, evidently having been dragged there by wild beasts. The only things found in the tomb were a large brass buckle and a percussion cap. Near by were traces of native tenting places. In fact, wherever we found graves we always found evidences that natives had encamped in the vicinity like vultures.

"We found the coast on the south side of Erebus Bay cut into long narrow points, separated by deep inlets, that made the work of searching much greater. All along the shore at the bottom of the inlets we found pieces of navy blue cloth, which seemed to have been washed up by high tides. Quantities of drift wood were also seen, but we already had as much on the sledge as in the present condition of the ice we could carry. At the bottom of one of the deepest inlets or bays, the men found the wreck of a ship's boat strewn along the beach, together with pieces of cloth, iron, canvas, and human bones. We gathered together portions of four skeletons, a number of buttons, some fish lines, copper and iron bolts and rivets, the drag brake of a sledge, some sheet lead, some shot, bullets, and wire cartridges, pieces of clothing, broken medicine bottles, the charger of a powder-flask, an iron lantern, and a quantity of miscellaneous articles that would naturally form part of the outfit of such an expedition. The bodies were prepared for burial, and the relics gathered together in a pile from which to select a few to take away with us. The prow and stern-post of the boat were in good condition, and a few clinkered boards still hung together, which measured 28 ft. 6 in. to where they were broken off at each end, showing it to have been a very large boat. We spent several hours here, gathering together various articles, in a thick fog and strong north-west wind that came down across the heavy ice-fields of Victoria Strait and Melville Sound, and it was intensely cold. The next day we remained in camp to bury the remains found at the boat place, and during the evening I went hunting with Toolooah, who killed two fine bucks. The next day Toolooah returned to the island off the mouth of Little Bay, and brought on the things he had abandoned there, while we searched the vicinity with the hope of finding the second boat-place, which the natives mentioned as being about a quarter of a mile from the one seen by M'Clintock. If this is the boat seen by him, it is certainly a long way from the position represented on the maps. We found no trace of a second boat-place anywhere in the neighbourhood, though we made an extensive search for it. Terror Bay was reached on Aug. 3, after a tedious journey across the narrow neck of land that separates it from Erebus Bay. Our camps were not far apart. As everything had to be carried upon our backs or upon the dogs, it was necessary to make two, and often three, trips between camps before everything was brought up. Consequently only two of the Franklin stoves were brought along. The largest and heaviest of these Henry took in charge and carried all the way over, strapped to his back like a knapsack. Toolooah brought the empty sledge over with all the dogs, after first removing the bone shoes from the runners. Henry and Frank, with all the Inuits, left us on Aug. 6 to reach the rest of our party, whom they expected to find somewhere east of Gladman Point. Frank and Henry are to remain there, and Toolooah return with the dogs, and move what we can to the same point. Lieut. Schwatka and I were then left alone to provide for ourselves until Toolooah's return, which was on Sept. 1. During the time we were alone we searched the neighbouring coast as far west as Cape Crozier, but found only one skeleton. The tent place spoken of by Ahlangyah and others, and which we confidently expected to find without much trouble, marked by the quantities of human bones and clothing scattered far around, as at the camping places at Irving Bay and Cape Felix, and the boat place on Erebus Bay, could not be found, though Lieut. Schwatka passed over the spot that the natives spoke of as the site. This was a great disappointment to us, and seemed unaccountable until we subsequently learned from them that it was so close to the water that all traces of it had disappeared. When we again met the natives, we saw one man who had been there not a great while ago, and said there was nothing to be seen where he previously saw many skeletons and other indications of the white men's hospital-tent. The Inuits had never known white men to live alone in their country as we had, and were afraid we were very hungry, but we relieved their anxiety in that respect by giving them a hearty meal of cooked meat. We learned from them that the Inuits were all on the mainland in the neighbourhood of Thunder Cove, and that Joe had been and still was very sick with rheumatism. Henry remained there with them, and prosecuted the search of Starvation Cove, building a monument over the remains found there, and depositing a record that Lieut. Schwatka had sent to him for that purpose. Before he got there, however, Joe and a party of Netchilliks had been searching the spot, and in a pile of stones found a small pewter medal commemorative of the launch of the steamer Great Britain in 1843, and among the seaweed some pieces of blanket and a skull. This was all that could be seen at this memorable spot."

The *New York Herald* of the 27th ult. contains the last instalment of the narrative, and principally deals with the incidents of the return journey from the point where the previous letter terminated. They found a piece of the boat found in Wilmot Bay, and part of a block branded either 10 or 'O R,' with part of the R obliterated. If the ships blocks were branded with the name of the vessel to which they were attached, this would be important as establishing the identity of the ship that drifted down as the Terror. On November 12, Sherman Inlet was reached, where a very large camp of Esquimaux was encountered. The men were standing outside to receive the strangers. They welcomed the party, and during their stay provided for their comfort. Here a piece of wax candle was also found with the natives. They met with an old woman, named Toolooah, who had seen white men on Boothia Isthmus when she was a girl, and who had also been with the party who had found the boat and skeleton at Starvation Cove, near Richardson Point. During the summer, the natives had found near Starvation Cove the skeleton of a white man and two pieces of his clothes, which indicated that he was a sailor, not an officer.

The *Herald* correspondent reached the ship George and Mary on Dec. 21. During the year they were absent from the verge of civilisation, the party had travelled 3,251 statute miles, and that mostly over unexplored territory, and making the longest sledge journeys on record. During the entire journey its reliance for food was almost entirely on the resources of the country. It was the first expedition in which a white man voluntarily lived on the same food as his Exquimaux assistants, thus showing that the white man can adapt himself to the climate and travel as well as the natives.

The *Herald* gives an interview which its representative at Halifax had with Vice-Admiral Sir Francis Leopold M'Clintock, Commander-in-Chief of the North American station. The Admiral had only just returned from a cruise, and had not read the account of Lieut. Schwatka's search until it was shown to him by the correspondent who, addressing Sir Leopold, said, "Lieut. Schwatka has brought back the copy of the Crozier record which you left at Point Victory, and has reported that he searched in vain for the record alleged to have been buried 10 ft. due north of the cairn. Is it possible that the report of the burial of the papers was an error?"—Sir Leopold, before replying, took up his book and turned over its pages. He found the part referring to the burial of the papers, and then said, "Oh, they were buried; see, here is the record of the fact." Correspondent: "Have you any formal recollection of the event?"—Sir Leopold (reflectively): "No. Everything of this kind is carefully recorded at the time, and the record of it is positive evidence. It is not a matter for personal recollection." Correspondent: "Then how do you account for Schwatka's failure to find the papers?"—Sir Leopold: "He could not have found the right spot." Correspondent: "He says he followed the instructions and dug 10 ft. northward from the cairn."—Sir Leopold: "When we speak here of 10 ft. north of a certain point, there is no difficulty in locating the place; but in those regions the compass is useless, and we have to trust to observations, which may not give the direction correctly. This must have been the difficulty with Lieut. Schwatka, for there can be no doubt whatever of the burial of the record. At what time did the digging take place?" Correspondent: "I have not learnt the date."—Sir Leopold: "The ground is covered with snow for eight months of the year, and digging is not easy."—Correspondent: "The identification and recovery of the remains of Lieut. Irving are interesting features of Lieut. Schwatka's work."—Sir Leopold: "Yes. There was another case of the kind. Hall brought home remains which were identified as those of Lieut. Des Vœux, of the Erebus. They were buried in England."—Correspondent: "Lieut. Schwatka reports an extraordinary degree of cold—103 degrees below the freezing-point."—Sir Leopold: "The figures are, indeed, extraordinary. As regards the ability of man to bear the cold, I may say that after a certain point has been reached, a few degrees more or less makes no perceptible difference. But before the correctness of the figures given is assured, the thermometers must be tested. Do not understand me as casting any doubt upon the truth of the report. What I mean is thermometers cannot always be relied on." Correspondent: "What is your opinion as to the value of Lieut. Schwatka's report?"—Sir Leopold: "I can hardly venture to express any opinion. My information is small, and I have had so little time to consider the matter. He is entitled to great praise for his perseverance in the face of the great difficulties. What I regard at this moment as the most striking feature of the report you have read to me is the success of Lieut. Schwatka's plan of living on the produce of the land through which he travelled. It is that that distinguishes his expedition from others. All other explorers making sledge journeys have relied chiefly on the supplies carried with them. The Schwatka party according to this report, was nearly a year absent from its base of supplies, and took only one month's food with it. In adapting themselves to the life of the natives as they did, Lieut. Schwatka and his followers accomplished something remarkable. It is evident, too, that they were more successful than usual in keeping their Esquimaux assistants. The Esquimaux are often obstinate and unmanageable. They will do what they like, not what you want them to do. Lieut. Schwatka appears to have gone over much of the same ground as myself. His expedition and mine are the only ones which reached the place at which, according to the best accounts, the Franklin party died; and his report is a confirmation of mine. The idea that the Franklin party still lives has been received in some quarters, being encouraged by vague reports of white men having been seen at various places in the Arctic regions. Lieut. Schwatka's report is valuable as a confirmation of the generally-accepted belief that the party perished as before reported. I shall await with interest the appearance of fuller reports from the Schwatka expedition."

THE WAR IN SOUTH AMERICA.

Advices from Panama to the 2nd inst. confirm the news of the sinking of the Chilian war vessel Cavadonga. The latter, on the 14th ult., took on board a supposed abandoned boat, which was loaded with dynamite, and exploded, causing the Covadonga to sink immediately. Only four of those on board were saved.

The *Panama Star and Herald* mentions a rumour that the United States, jointly with England, have presented a note to the Chilian Government remonstrating against the excesses committed by the Chilians in Peru. The same paper states that Mr. Christiancy, the American Minister at Lima, continues his efforts of mediation.

Intelligence from Costa Rica states that President Guardia has issued a decree suspending the personal guarantees and dissolving the Constituent Assembly, owing to the alleged discovery of a conspiracy in connection with which fifty influential persons have been arrested.

THE BRITISH-CANADIAN ARCTIC EXPEDITION.

An influential deputation of the London Central Arctic Committee waited upon Lord Aberdare, president of the Royal Geographical Society, at the Society's rooms, No. 1 Savile Row, on Tuesday. The deputation, which numbered about twenty, including Fellows of the Royal Society, of the Royal Geographical Society, of the Royal Astronomical Society, officers of the Army and Navy, civil engineers, and others interested in enterprise and science, was introduced by Major Duncan, R.A., LL.D., D.C.L., who briefly stated what steps had been taken to organise a new British-Canadian Expedition for another attempt to reach the North Pole, including within its scope of operations the circumnavigation of Greenland. The gallant major laid stress upon the necessity of England keeping to the front in Arctic enterprise, especially at a time when so many other nations were taking the field, mentioning that Com. Cheyne had been chosen by the Arctic Committee as a leader of the proposed expedition on account of his experience and the character he had gained from the commanders of three Government expeditions under whom he had served. After an able and masterly speech, Major Duncan asked Lord Aberdare, as president of the Royal Geographical Society, to give his support to the efforts being made by the Arctic Committee to bring about the organisation of a British-Canadian expedition, at the same time informing Lord Aberdare of the warm interest taken in the matter by Sir John Macdonald, the Canadian Premier. Com. Cheyne was then called upon to lay his plans before Lord Aberdare, which he did, briefly showing his intended route up Smith's Sound to Discovery Bay, and utilising the valuable bed of coal found there by the Nares expedition, proposing that spot as a basis of further operations, giving his reasons for the choice of route, and informing Lord Aberdare that he had written to New York to Mr. Gordon Bennett, asking him to co-operate with the London Arctic Committee, and concluding by making an earnest appeal for aid from the Royal Geographical Society, of which he was a fellow. Mr. Vaux, F.R.S., then addressed the president in an energetic speech, invoking the aid of the Society towards such a desirable undertaking. Capt. Bedford Pim, R.N., said that he could say from his acquaintance with Capt. Cheyne that he would not turn back, if once launched on this expedition. Mr. W. H. Le Frere, C.E., president of the Balloon Society of Great Britain, spoke in support of the movement for another Arctic expedition. He stated that all the countries of the civilised world were establishing stations at high latitudes. A recent Order in Council which had been sanctioned, to the effect that all countries and islands north of Canada, with the exception of Newfoundland and its dependencies, should form part of the Canadian Dominion, gave an additional claim on this country for further investigation. As president of the Balloon Society, and in reference to its connection with the Central Arctic Committee, he should like to say a few words. It was proposed to employ balloons as an auxiliary to Arctic research in combination with the telegraph, the telephone, the photophone, and the sun telegraph. The Balloon Society, with the assistance of similar institutions in other countries, were about to form stations for meteorological purposes, to determine the currents at high altitudes. He read a letter from an eminent meteorologist, of which the following is an extract:—"By means of balloons meteorological facts can be discovered which could not otherwise be found out." The observations at high altitudes tended to show that the currents there governed the currents on the surface, and had not the disadvantage of the friction of the earth. The time would come when the forecast of the weather would be given for a month, and not for a day, as at present, and vessels would know when leaving our shores for a distant port what route to avoid and what passage to select, so as to arrive at the destination safely and in the shortest possible time. Mr. Le Fevre, President of the Balloon Society, urged the necessity of meteorological information being obtained in the Arctic latitudes, and stated that this information would be of the utmost value to us as a maritime nation, in enabling us to obtain long forecasts of weather. The balloon in this expedition would be an auxiliary. Lord Aberdare, in reply, said that the subject of Arctic exploration was one in which the members of the Council took deep interest; but upon the various points which had been brought before them, they could not give an answer at once. The question of Arctic discovery had occupied the attention of the Society for many years, and the Society was fortunate in possessing many men of eminence who had a thorough acquaintance with all the bearings of the subject. As there were questions of great importance involved in the matter laid before the Council by the deputation, he would suggest that the deputation should prepare a written statement as to the course the proposed expedition intended to pursue and the means they sought to attain. If the gentlemen present would do that, he would promise them that the statement should be submitted to a body of men most competent to deal with this subject. Major Duncan promised on behalf of the deputation that the statement should be prepared, and the deputation, after thanking his lordship and the Council, withdrew.

THE LIVADIA.

The official trials of the Livadia took place on Friday and Saturday last week, and gave a speed of 16 knots and 12,383 indicated horse-power. The trials were conducted under the inspection of an Imperial Commission appointed for the purpose. Admiral Popoff was unable to be present, owing to illness. There were also present Sir William Thomson, and Mr. James Dunn, one of the constructors of the Navy. The trials on Friday consisted of a six-hours' continuous run. The trial showed a speed of 15 knots by the lights, and 15½ by log. It extended from half-past 12 to half-past 6, and, as the contract required only 14 knots, the result was satisfactory. On Saturday the revolutions were taken during the whole of the run and indicator diagrams every half-hour, showing an average of 10,500 horse-power. The trials consisted of six runs on the measured mile, and resulted as follows:—The first, 16 knots; the second, 15·652; the third, 16; the fourth, 15·755; the fifth, 16; and the sixth, 15·755; showing a mean for the six runs against wind or tide of 15·864 knots. After the trials the party dined in the ward-room of the yacht. After dinner, Mr. Pearce, the constructor of the yacht, in asking the company to drink success to the Livadia, said that they were now entering on a new phase in the construction of large steamers. Passengers were now no longer content with 10 or 15 knots an hour, and the great problem for the naval architect was to find out the proper form for a ship to go not merely from 16 to 18, but from 20 to 25 knots an hour. They had not only a fast and agreeable ship, but they had obtained a very steady platform and a high rate of speed for war vessels. During the last 12 years, progress in the construction of war vessels had not been as great as it should have been, considering what strides had been made in the manufacture of iron, steel, and other materials, and also the great improvements that had taken place in marine engineering. They had that day carried out an experiment which, notwithstanding the prejudices hitherto entertained against it, must be a guide in respect of many points in the future. It would be said, "Look at the displacement of your ship and the enormous amount of horse-power;" but they must remember in the construction of war-ships that the first consideration was a steady platform; the question of speed was secondary. The Livadia had been subjected to an extraordinary amount of criticism. In the first place, the design had excited the opposition of the leading constructors of ships-of-war in Great Britain. Some of them had gone so far as to ridicule the idea altogether, and when he expressed a hope that he should get 14 knots an hour out of the ship, he was laughed at. Among the critics the Russian papers had been the most inveterate. Reading some of these papers he found they said that the ship was tried three weeks ago, and that she only went seven knots an hour—a statement which was copied into a great many of the papers in Europe. He declared that a more successful ship than the Livadia had never been built, and he congratulated Russia and the Grand Duke Constantine on being the first to take up this bold enterprise, when our own Admiralty dared not venture. He asked them to drink success to the Livadia and the health of Admiral Popoff, her designer.

THE NEW NAVAL MEDICAL WARRANT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—We have anxiously waited for the Naval Medical Warrant to appear for several months past, but as it seems to be so hopelessly deferred, it is not the least surprising that there are no candidates willing to accept at present a commission in her Majesty's Naval Medical Service. Every few months a notice appears in the various London and provincial papers entreating candidates to enter. Who could be astonished such a few there are, indeed, responding to the call? A great proportion of those young men who do enter the Service have no conception of the sacrifices which it calls upon them to make, and would resign at the first opportunity if it was not for that natural reluctance, common to all people, to begin the world again, after being engaged for some part of the best period of their lives in any occupation, however disagreeable. One would be inclined to believe that at a time like the present, when things appear to be approaching a crisis in the East, the Admiralty would be anxious to do anything in their power to obtain the required number of able and promising young men to replenish the existing vacancies—now amounting to nearly 100—in order to place our Service on the same footing as the Army Medical Department, whose ranks are being filled with many of the most promising young medical men from our hospitals, whilst the Naval Medical Service is regarded at the great medical schools as the lowest grade of medical employment. It will be gratifying to Naval surgeons (should the promised Warrant appear) to have compulsory retirement for fleet surgeons at 55 years of age, thus making a quicker promotion, and younger men in that rank, instead of those who have become tired and disgusted at being so long in the same rank, who, when serving afloat or in comfortable home appointments, looking back at their lengthened service, rest altogether on their laurels. I have examples in my mind, at present, where, in a sea-going ship, a fleet surgeon had been four or five weeks without having once visited the sick-berth; where a senior fleet surgeon made his junior surgeon write his journals for him, and work out the quarterly nosological returns; also in a harbour-ship, where one of the surgeons being on leave, the fleet surgeon, from Saturday until Monday morning, weekly, left the junior surgeon in charge, on the plea that he was so old an officer and married, considered it but his just reward. A correspondent, "R.N.," states in your paper, last Saturday, that physicians and surgeons all over the world are well able to perform their work long after 60 years of age, and asks, Why not Naval surgeons? He will now learn that being capable, they are not always anxious to do it. The late Committee, acting for the good and benefit of the Service, did wisely in their recommendation that fleet surgeons should be retired at an earlier age.—I am, &c.,

SURGEON.

The report of the Special Committee on Ordnance appointed to make experiments with a 12-inch R.M.L. gun returned from the Thunderer was issued on Tuesday, although it bears date April 30, 1880. The report contains details of the experiments, this information being illustrated by numerous plates; and the opinion at which the Committee arrive is that the circumstances of the burst afford the strongest possible confirmation of the view taken by the Malta Committee as to the cause of the accident on board the Thunderer. In a note appended from the conclusion, the Committee say that "although the experiments carried out to ascertain the effect of an air-space between the cartridge and the projectile have shown that with pebble-powder in a 12-inch gun, the pressure, as a general rule, is reduced as the air space is increased, yet the Committee do not wish it to be understood that it is their opinion that this would necessarily be the case with every kind, or amount of powder, or in every calibre. The present experiments, low as the pressures are, give some indications of dynamic or wave-action, and point to the desirability of more extended trials in this direction. As to the Committee's experiments with wads, they appear to show, as far as they have gone, that a *papier-maché* disc placed a few feet in front of the projectile has little or no effect; but they do not prove that an obstruction in the bore, such as a drill-shot or tampeon, might not cause injury to the gun. This question assumes some importance in view of the introduction of breech-loading guns, and the Committee recommend that it be thoroughly investigated."

We have, says the *Irish Times*, to record the death, at Montrose, on Oct. 1, of James Coull, the old tar who steered the Shannon into the memorable action with the Chesapeake, off Boston Harbour, on June 1, 1813. James Coull was born in the fishing village of Ferryden, near Montrose, on Jan. 7, 1786, so that he was in his 95th year. On account of the death of his father, and the poverty of his mother, James started life as a cabin-boy in one of the local vessels at the early age of six years. He was afterwards indentured as an apprentice in the brig Concord, of Montrose, in the year 1801, and while lying at Copenhagen was pressed for the Navy the same year. James was sent on board the Centaur, commanded by Capt. Broughton, in which vessel he first saw active service, having been at the bombardment of Copenhagen on April 2, 1801. After the Treaty of Amiens, James received his discharge, and was sent on board his old ship to finish his apprenticeship, which he completed, and then sailed as an A.B. in another vessel. While lying at the Nore in this ship, he was again pressed for the Navy, and again sent on board the Centaur, where he was shortly afterwards appointed assistant-quartermaster, and was present in this vessel at the battle of Trafalgar on Oct. 21, 1805. From this time onward he was retained in the Service, and by the time he was 21 was a circumnavigator. His most notable engagement was the tussle of the Shannon with the Chesapeake, off Boston Harbour, on June 1, 1813, which only lasted 15 minutes from the firing of the first gun to the running-up of the Union Jack over the Stars and Stripes. Coull, being then a petty-officer and a volunteer from the Actæon, had the honour of steering the Shannon into action; and while doing so he received a musket-ball in his left wrist, which traversed his arm and came out at the elbow. Coull, however, stuck to his post, and after the vessels had got entangled by the Shannon's anchor catching hold of the Chesapeake, he formed one of the boarding party led by Capt. Broke, receiving a severe scalp wound while scrambling on board. The scalp wound was quickly patched up, but owing to the bullet wound Coull was invalided in 1814, and finally the arm was taken off at the elbow in 1816. Coull was then discharged on a pension of £16 per annum, which was augmented some fourteen years ago by £13 16s, so that he had been a pensioner for the unusually long period of 66 years. Although thus disabled he sailed as for 20 years cook in the whalers belonging to the port of Montrose, besides acting in the same capacity for some fourteen voyages across the Atlantic in sailing vessels. He was married in early life, but left no children. His remains were interred at Montrose, with full military honours by detachments from both branches of the Service, on the 4th inst., the coffin being borne to the grave on the shoulders of the Coastguard, and the farewell volley fired by the serjeants commanding the permanent staff of the Forfar and Kincardine Artillery Militia. As an additional mark of respect, the shipping in the harbour exhibited their colours at half-mast.

ROWLAND'S ODONTO is the purest and most fragrant Tooth Powder ever used, and contains no acid or mineral ingredients, which are so detrimental to the teeth and gums. All who have a good set of teeth, and wish to keep them, should use it; and they who, by early neglect or ill-health, suffer from discoloured or imperfect teeth, which are the forerunners of dyspepsia and indigestion, will find that ROWLAND'S ODONTO will keep them sound and white, and prevent and arrest decay. Its purity especially adapts it for the teeth of young children. Ask any chemist for Rowland's Odonto.

Obituary.

We have to announce the death of Admiral Lord Lanerton, of Castle Howard, Yorkshire, brother and heir-presumptive of the Earl of Carlisle. His lordship died at 29 Grosvenor Square. The Hon. Edward Granville George Howard was created Baron Lanerton of Lanerton on January 8, 1874, during the former administration of Mr. Gladstone. He was born on December 23, 1809, and was fourth son of George, sixth Earl of Carlisle. He represented Morpeth in the House of Commons as a Liberal from 1834 to 1837, and from 1840 to 1853. In 1837 he retired in favour of Lord Leveson, and in 1853 in favour of Sir George Grey. He married, August, 1842, Diana, the only daughter of the late Hon. George Ponsonby, fourth son of the first Viscount Ponsonby. His lordship leaves no issue, and the heir-presumptive to the title and estates of the house of Howard is now Mr. George James Howard, son of the late Hon. Charles Wentworth George Howard, late M.P. for East Cumberland. Mr. Howard married October, 1864, the youngest daughter of the second Lord Stanley of Alderley. The elevation to the peerage of Baron Lanerton raised the number of the Howard family who held seats in the House of Peers to seven.

Capt. William Robert Hobson, R.N., on the Retired List, died suddenly at Pitminster, near Taunton, on the 11th inst., in his 50th year. This gallant officer was the only son of the late Capt. William Hobson, R.N., who was distinguished alike as a naval officer, and as the First Governor of New Zealand, and the founder of its capital, Auckland. He entered the Navy in 1845, and became acting mate in Feb. 1851, and served on the North-American and West Indies station and on particular service from May following until March, 1852, in the Inflexible. He became mate of the Rattlesnake in Dec. 1852, and gained his first experience of Arctic travelling whilst serving in her on her expedition to Behring's Straits as relieving ship to the Enterprise and the Investigator. He was promoted to be lieut., April, 1855, and from June following until 1857 served in the Duke of Wellington, flagship of the Hon. R. S. Dundas, C.B., and the Majestic, Capt. James Hope, C.B., in the Mediterranean, during the Baltic campaign. In 1857 he joined the Fox, yacht, under the command of Capt. McClintock, and was most indefatigable in his duty, and was justly complimented by his commanding officer, for to him was due the credit of discovering the boat containing the two skeletons, &c. He was promoted to com. in 1859, and commanded the Vigilant at the Cape of Good Hope and in the East Indies from Feb., 1863, until Aug., 1865. He was posted, April 11, 1866.

Qrmr. L. Hardy, on the Half-pay List, late New Brunswick Fencibles, died at Nottingham on Monday, aged 84 years. The deceased, who was for many years an alderman of the borough of Nottingham, and much respected, served in the ranks at Waterloo, and was promoted to the quartermastership of the New Brunswick Fencibles, Jan. 13, 1825; being placed upon half-pay, Aug. 3, 1826.

Amusements.

Her Majesty's Theatre will open with Italian opera at cheap prices on Monday, October 18, when "*Faust*" will be represented. With this week the Haverly troop of Minstrels have closed a very successful season of eight weeks at this establishment.

The curious experiment of turning Douglas Jerrold's vigorously-written "*Black-eyed Susan*" into a poetical nautical drama for the St. James's has proved more successful than many anticipated, and the ungracious task assigned to Mr. W. G. Wills has been, on the whole, creditably executed. "*William and Susan*," as now represented at the fashionable West-End house, is undoubtedly a more pathetic play than the piece on which it is founded. A strong hold is obtained over the sympathies of the auditory, and those who go to a theatre to enjoy "a good cry" will soon learn where to direct their footsteps. Admirably placed on the stage, the doleful drama receives the strongest support from the company. Charmingly rendered by Mrs. Kendal, the faithful Susan gains the warmest admiration of the spectator. Mr. Kendal presents a manly figure as William, and effectively sings an introduced song. Mr. Hare depicts the Admiral with characteristic dignity, and Mr. Barnes, as Capt. Crosstree, now accredited with heartless profligacy, instead of a temporary tendency to take more wine than is good for him, shows the value of his addition to the company. A rascally seaman, named Truck, who from malice keeps back the discharge which William has received from the Navy, is embodied with artistic skill by Mr. Wenman; and the subordinate impersonations of Miss Kate Phillips, Mrs. Mackney, Mr. Mackintosh, and Mr. Denny are all most creditably sustained.

Schiller's heavy and unhistorical play of "*Mary Stuart*," first produced at a German theatre in 1800, and since repeatedly presented in various forms before a London audience, has been carefully revised by the Hon. Lewis Wingfield for the Court Theatre; and as the representative of the heroine, Madame Modjeska, here fulfiling her second engagement, has strengthened the high opinions formed of her histrionic power. It is an embodiment full of passion and pathos by a highly-finished dramatic artist, and the enthusiasm of the audience can hardly be said to be in excess of her merits. Miss Louise Moodie plays Elizabeth with spirit and intelligence, Mr. John Clayton is a stalwart Leicester, and the other parts are efficiently filled by Mr. J. D. Beveridge, Mr. Edward Price, Mr. Clifford Cooper, and Mr. J. R. Crawford.

The Olympic, entirely redecorated, will open this (Saturday) evening, under the management of Mr. C. Baker, with a new drama called "*Mabel*," written by Mr. Frederic Hay, and supported by Miss Carlotta Addison, Miss Carlotta Leclercq, Mr. W. H. Vernon, Mr. Arthur Dacre, Mr. David Fisher, and Mr. G. W. Anson.

At Sadler's Wells Mr. Charles Warner has appeared as William Tell, giving a vigorous delineation of the Swiss patriot, so inseparable from recollections of Macready, who first "created" the character at Drury Lane May 11, 1825. Emma, Tell's wife, is forcibly played by Miss Louisa Willes, Albert is gracefully and intelligently acted by Miss Laura Lawson, and the cast is efficient in other respects. Two very picturesque scenes are provided, representing Tell's cottage by the lake and a mountain pass, down which rushes a torrent of real water.

A new play, by Mr. James Willing, entitled "*Delilah*," and adapted from "Ouida's" earliest novel, called *Held in Bondage*, has made more than a local hit at the Park Theatre, Camden Town. The acting is quite up to a West-End standard, and the general improvement in this respect of the companies engaged at what are considered outlying theatres, may be accepted as a recognition of the advanced intelligence of suburban audiences.

Mr. F. Mervin being under special engagement to play with Musgrove's Opera Company in Australia, the part of Monthabar (the drum-major), in "*La Fille du Tambour-Major*," has been undertaken by Mr. E. Rosenthal, who will accordingly make his first appearance in that character at the Alhambra on Saturday, Oct. 23. "*La Fille du Tambour-Major*," Offenbach's last completed work and latest success, will reach its 163rd representation at this theatre on Oct. 23, and has already been witnessed by 350,000 persons.

A new first part will be produced at St. George's Hall (Mr. and Mrs. German Reed's), on Wednesday next, entitled, "*A Turquoise Ring*," from the pen of Messrs. W. E. Godfrey and E. W. Craigie; the music supplied by Mr. Lionel Benson. Mr. Corney Grain has also a new musical sketch, "*The Haunted Room*," which he will give for the first time on the same evening.

Epps's Cocoa.—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us, ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Sold only in packets, labelled—"James Epps and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence, for afternoon use.
